In 1841, at Low Farnbury, Mathew Robson, lead miner, aged 30, his wife Hannah (Pickering, married 29th April 1837) aged 25, children Mary 3, and Margaret 1. In 1851, at Low Farnbury, Matthew Robson, lead miner, aged 40, his wife Hannah 36, children Mary 12, Margaret 10, Hannah 7, William 3, and Tamer 11 months.
In 1861, at Low Farnbury, Matthew Robson, lead miner, aged 50, his wife Hannah 47, children Mary 22, William 12, Tamar 10, Ralph 7, and Alfred 3.
In 1871, at Low Farnbury, Matthew Robson, labourer, aged 60, his wife Hannah 57, children William, carter, aged 23, Margaret, domestic servant, unemployed, aged 30, Ralph, lead miner, aged17, Alfred 13, and Nora 2.
In 1881, at Low Farnbury, Hannah Robson, widow, (Matthew died 2nd quarter of 1877, aged 66), laundress, aged 67, children Margaret, domestic servant, aged 40, William, cartman, aged 33, Ralph, general labourer, aged 27, Alfred, general labourer, aged 23, and granddaughter Jane E.N. Robson 12.
Hannah died 3rd quarter of 1888, aged 74.
In 1891, at Low Farnbury, Ralph Robson, coal miner, aged 36, and his sister Mary Lancaster, widow, aged 52. See 8th June 1878, 9th December 1882, 7th February 1891, and 4th March 1893.
Leadgate, 3rd inst., aged 68, Isabella, wife of John Bell, lead ore dresser.
In 1851, at Ramsey's Buildings, Robert Bell, lead miner, aged 50, his wife Margaret (Surtees, married 16th January 1823, Alston) aged 47, children John, lead miner, aged 27, Margaret 16, Elizabeth 11, and Nancy 8 years.
In 1861, at Leadgate, John Bell, lead miner, aged 37, his wife Isabella (Pattinson, married 15th July 1852, Alston) aged 33, children Betsy 8, Margaret 6, Jane 2, and Robert 4 months.
In 1871, at Leadgate John Bell, lead ore washer & farmer of 6 acres, aged 47, his wife Isabella 43, daughters Margaret 16, Jane 12, and Isabella 5.
In 1881, at Leadgate, John Bell, lead ore dresser & farmer of 6½ acres, aged 57, his wife Isabella 53, daughters Margaret 25, and Isabella, pupil teacher, aged 15.
In 1891, at Leadgate, John Bell, farmer, aged 67, his wife Isabella 63, and daughter Margaret 29.
In 1901, at Leadgate, John Bell, widow, aged 77, and daughter Margaret, housekeeper, aged 38.
John Bell died 1st quarter 1908, aged 84, registered at Alston.

19th October 1895 (North Cumberland Reformer)
NENTHEAD NEWS AND NOTES.
MR Swan and a gentleman from Algiers spent the last week end in this place.
THE foreign gentleman continues to stay, but the representative of the existing company left on Monday.
IT is said in some quarters that the new company will not take possession this year.
THE evening classes under the Technical Education scheme have again been commenced by Mr Petty. A good number have enrolled their names.

THE continuation classes comprise mensuration, geography, and history.
THE art classes comprise second grade freehand, model, and light shading.
IT is a fact that the pipes that are intended to be laid for the supplying of Holmesfoot with water have arrived. It is to be hoped that they will not lie about as long as some things have been allowed to.
IT is said that workmen are at present engaged with the sewerage drains at Garrigill, and are about half done. As soon as they finish there, they are coming to Nenthead. ACCORDING to that statement they may be expected here in about two or three weeks' time.

MINES.

It was reported a few months ago that a German syndicate were treating with the present mining company with a view to purchasing the Nenthead mines. After a lengthy survey it was stated that they had made a bargain, and would take possession on the 1st of October. The date named has passed and they have not yet appeared on the ground. The quarterly bargains are generally let about the first Friday in October, but these have been indefinitely postponed. During the last few weeks all sorts of rumours have been abroad, and as was quite natural the men have manifested a good deal of anxiety as the time approached for changing hands. Whether things would be carried on under the present existing arrangements, or whether some new features would be introduced, were questions that could not be solved. There is, however, no doubt about the fact that a change is to take place. But when, is a problem that is bothering the minds of more than one person. The men have received orders to continue working on the present terms, and how long that will last is not known. It is to be hoped that when the new company does take possession that things will brighten up a bit. Ever since the present company took these mines they have almost all the time had to fight against a falling market, and that is a thing not at all pleasant. Bad as things have been, we are still better off than a lot of our neighbours. Take for instance Allendale and Weardale. While things have been going from bad to worse in those districts, the miners here have still been supplied with regular work, and if the wages have not been high, they have been sure, which is something to be thankful for. Comparisons have often been made about the liberality of the present Company and the old London Lead Co, It is true the last named did a good deal more for the general appearance and improvement of the place, but the facilities were altogether more favourable in those days than what have prevailed in these latter times. The big change that has come over the metal markets during the last 20 years accounts for the apparently meagre actions in this respect of the Lead and Zinc Co. When the old firm was at its height lead was then selling at from £20 to £26, recently it has been selling at from, £9 to £11. Again, Spelter when this company took possession, was making from £21 to £24. Now the price is considered good if it makes £14. At the prices above quoted it is not at all surprising if large dividends were produced, and the prices at that date would easily allow a substantial sum being set apart for the benefit of the locality, and local institutions being liberally supported. But the falling off in these donations need not be surprising when these great redactions are taken into consideration. Really speaking, the Lead and Zinc Co. have never had a fair opportunity of being benevolent, and it is hard to say what they might have done if they had been in receipt of large dividends. We have had a few slight intimations that the directors would have done something for the general benefit of the place if the

speculation had been more successful. When they first took possession they gave a grand dinner to all their workmen, and some of the gentlemen have dealt in a liberal manner with the News Room, and as a body they have dealt generously with that institution. They have supplied the room, oil, and firing, which are heavy items if they had all been to pay for. For small mercies we should be thankful, and accept them as a token of the greater favours we might have had had prosperity been more rampant. The Managing Director, Mr J. Cameron Swan, has been connected with, the place for a very long time. In fact before the mines were taken over he worked on his own account. During his connection with the place he has always taken a great interest in the people. In fact he has been known to say, when miles and miles from the place, that it would be one of the greatest wrenches he had ever experienced, that of breaking , his connection with the people of Nenthead. Now that the time of parting is at hand, there is no doubt, but that the men, as a whole, will have as tender feeling towards him as what he will have towards them. And although he is not likely to have many dealings in these parts in the shape of mining, there is no fear but that he will always receive a hearty welcome if he should occasionally make an appearance. As time rolls on changes are continually occurring, and as previously expressed it is to be hoped that the change about to take place will be for the benefit of the people that are located in the neighbourhood.

22nd October 1895 (Shields Daily Gazette)

THE NEW WEARDALE RAILWAY. OPENING OF THE LINE.

The Weardale Extension Railway, which runs from Stanhope to Wearhead, a distance of about 9½ miles, and which has been established at a cost of about £50,000, was opened yesterday. Although the weather was most unpropitious, rain falling heavily throughout the day, the initial day's passenger train service was largely patronised. The railway practically runs in a line with the river course; but owing to the tortuous windings of the river it has had to be crossed and recrossed to so many places that no less than 21 small bridges have been erected. The new stations at Stanhope, Eastgate, Westgate, St. John's Chapel, and Wearhead are all prettily arranged, and present an attractive appearance, in keeping with the fine scenery of the dale. There was no officially arranged function in celebration of the event, but the dales people made a holiday of yesterday, and outward indications of 'appreciation of the N.E.R. enterprise were not lacking. Sir Joseph Pease, Bart, the chairman of the company, and a party of directors and others, proceeded up the line by special train, and were cheered by crowds assembled at the different stations. After travelling up to the terminus at Wearhead a stoppage was made on the return journey at St. John's Chapel, where the party were cheeringly welcomed by a large crowd, which had assembled. Luncheon was served at the King's Head Hotel. Sir Joseph Pease addressed the crowd from a window of the hotel, and said he thanked them on behalf of his colleagues and himself for their attendance that day, and for the hearty welcome they had given to the enterprise, which, under the care of the N.E.R. Company, had at last been finished up to Wearhead. J. Mr J. Lloyd Wharton, M.P., also spoke.

26th October 1895 (Hexham Herald)
Deaths
Hayring, Nenthead, 22nd inst., aged 12, John Walton, son of Christopher Pattinson.
In 1891, at Hayring, Christopher Pattinson, yeoman, aged 43, his wife Ann 46, and son John Walton 7.

2nd November 1895 (Hexham Courant)
Deaths
At Peasemeadows, Allenheads, 18th ult., aged 79, Jane Heslop. *Single Grocer*
At West End Allenheads, 13th ult., aged 72, Tamar, widow of the late Richard Bright.

15th November1895 (Carlisle Patriot)
ALSTON DISTRICT COUNCIL
A WATER QUESTION
A letter was read from the Nenthead Co-operative Society, asking for a connection with the water main presently being laid from Nenthead to Holmesfoot. It was gathered from the letter that the request was for a private

supply on the society's premises, and some adverse comments were made on its being granted, but ultimately it was acceded to with the proviso that the public have the use of the standpipe to be erected.
The Health of the Union.—The report of the Medical Officer for No. 1 District showed that during the quarter there had been twelve deaths and seven births. In No.2 District, the Medical Officer reported that there were four deaths and eleven births.

15th November 1895 (Carlisle Patriot)
Deaths
At Nenthead, on the 7th inst., Thomas Robson, aged 67 years.

16th November 1895 (Hexham Herald)
Deaths
Stanhope, 10th inst., aged 41, Wm. Walton *(death presumed to be due to Epileptic seizure).*
Joseph Walton married Sarah Longstaff 18th February 1854, at Stanhope.
In 1871, at Stanhope, Sarah Walton, milliner, aged 36, sons, William, lead ore washer, aged 16, and Joseph, labourer, aged 14.
Joseph Walton, died 15th April 1875, at Clunes, Australia, aged 42 years
In 1881, at Front Street, Stanhope, Sarah Walton, widow, straw bonnet maker, milliner, aged 47, and her son William, limestone quarryman aged 26.
In 1891, at Front Street, Stanhope, Sarah Walton, widow, confectioner, aged 57, and her son William, aged 36, Limestone quarryman. Probable death of Sarah Walton 4th January 1899, aged 65, at Stanhope.

20th November 1895 (Teesdale Mercury)

DISASTROUS MINING VENTURES
IN TEESDALE.
THE AFFAIRS OF MR J. H. ROBINSON, OF
BARNARD CASTLE.

Sad instances of the vicissitudes or commercial life are frequently revealed in the Stockton Bankruptcy Court. None could be more pitiful than the story told before Mr Registrar Crosby, on Wednesday, by John Harper Robinson, 6, Montalbo-terrace, Barnard Castle, lead mine owner, when examined by Mr J. R Stubbs, the official Receiver. —Bankrupt, a white-haired old man of 81years, said he was the owner of lead mines in Teesdale. The mines had become valueless, in consequence of the depreciation in the price of lead, and the only source of livelihood left to him was that of letting apartments. He commenced business as a lead mine owner in 1874, having then a capital of £150, and an interest in lead mines as lessee, and other property, which he valued at £20,000. He now owed to unsecured creditors £2,247 16s. 9d, and he estimated his assets would realise £105, including £85 worth of furniture and £20 worth of machinery At one time, he was in business in Newcastle as a grease manufacturer, but lost money in it, and about 1858 he made a private arrangement with be creditors, and paid them 5s in the £. Subsequently, he paid several in full. The mines, which included the Langdon, Lodge Gill, and Martha Mines, were now unworked, and the leases had been deposited with be creditors as security for money borrowed. He was liable to a Mr Carr for £194,

for accommodation bills he having assisted him through friendship. The bulk of his liabilities was money which be had borrowed to keep on the mines. Instead of improving, prices had dropped from £26 a ton to £9. He owed £522 to the executors of a certain gentleman to whom be handed over lead mine shares about twelve years ago, and £116 10s. which his wife lent him in 1887, had all gone into the business. He had kept on borrowing money, as it was impossible for him to do anything, being, he said, “like a ship amongst icebergs.” Bankrupt said he had not a large experience in mines when he began, but plaintively added, “I have had a bitter one since; it is bitter now." He had all the accounts in connection with his mines, but he would want a horse and cart to bring them to court. —The examination was adjourned for three weeks, and debtor was requested to furnish in the meantime an amended statement of affairs, showing dates on which various debts were contracted, etc.

23rd November 1895 (Hexham Courant)

ALSTON

ACCIDENT TO MR T DICKINSON

On Tuesday last what might have proved a very serious accident happened to Mr T. Dickinson of Spency Croft. It appears that while Mr Dickinson was superintending the working of his lead mine at Galligill Syke, he had been handling one of the detonators used in blasting, when by some means it exploded in his hands. A part of the left thumb was blown off and several fingers were seriously damaged.

In 1891, at Spency Croft, Mary Dickinson, widow, farmer, aged 81, (her Husband William, born Grassington, died 29th March 1857, aged about 48) son Thomas, lead mining engineer, aged 56, daughters Sarah 52, and Frances A 42. In 1901, at Spency Croft, Thomas Dickinson, mine owner and agent, aged 66, and his sister Sarah aged 63. In 1911, at Lowbyer, Alston, Thomas Dickinson, Mine owner, aged 76, and his sister Hannah Wilthew, widow, aged 68. Thomas Dickinson died 24th June 1912, aged 77.
Probate 1912: Thomas Dickinson of Lowbyre Alston Cumberland retired farmer died 24 June 1912 Probate Carlisle 26 July to Ethel Dickinson spinster. Effects £826 5s 4d.
See 4th May 1872, 10th May 1879, 20th August 1887, 6th July 1889, 14th November 1891 and 23rd April 1892

29th November 1895 (Daily Gazette for Middlesbrough)

MINING ENTERPRISE IN WEARDALE

The sod of a new shaft to be sunk a little nearer to the Wear at Short Thorns has been cut to tap the once prolific lead vein of the Gin and Ireshopeburn Mines of the Lead Company. Fluorspar is known to abound, the demand for which, now that the railway is handy for transit is great. New limestone quarries are shortly to be opened at Eastgate.

27th November 1895 (Daily Gazette for Middlesbrough)

FATAL RESULT OF AN ACCIDENT

While at work at the Grovehead Mine on the 15th inst. Hugh Fairless (25) Mount Pleasant, Westgate, was bringing a tub out bye when his hand got jammed between the tub and a prop. Erysipelas set in, and deceased died yesterday from blood poisoning.

In 1881, at Huntshield Well House, Westgate, Thomas Fairless, iron miner, aged 49, his wife Elizabeth 44, children John 19, Catherine 18, Anne 16, Thomas 12, Hugh 11, Hannah 7, William S. 5, and Mary 2 months.
In 1891, at Mount Pleasant, Weardale, Thomas Fairless, limestone quarryman, aged 22, brother Hugh, limestone quarryman, aged 21, sister Hannah 17, brother William 15, aunt, Mary Emerson, widow, aged 58, sister, Ann Batey, married, aged 26, nephew Thomas F Batey 6 months, sister Elizabeth Headman, married aged 24, and niece Catherine Headman 1 yr.

7th December 1895 (Hexham Herald)

WEARDALE

WEARDALE LEAD MINES.

A few more men have been employed at the Weardale lead mines. Two shafts are to be sunk at Newhouse, with a view to further development of old trials. The ironstone mines are also somewhat brisker and more men are being employed and it is probable that more men will be employed shortly. It is also rumoured that the ironstone is to be put on the new railway to cheapen transit to the furnace.

The report of the Weardale Lead Company shows after payment of £500 for rent and royalties for the year ending June 30, 1895, and a similar payment for the year ending June 30, 1894, a profit of £54. The total sums received from the sales of lead smelted was £25,913, as against £31,429 in the previous year.

14th December 1895 (Hexham Herald)

ALSTON RURAL DISTRICT COUNCIL

A discussion took place as to the provision of a standpipe at Holmesfoot in connection with the new water pipes laid from Nenthead. It was agreed that the pipe be erected.

WEARDALE

An epidemic of Measles is raging just now in Stanhope. Both the schools are closed on account of it.

On Monday the chiefs of the Weardale Iron Company Ltd. and the engineers were surveying St John's station teams and the proposed siding at Ireshope Burn for the loading of Ironstone from their Grove Head Mines, and it is expected that the latter with an incline from the said mine will be adopted.

The Copt Hill (Weardale) Whinstone Quarry will immediately be worked for blocks by Mr O. Monkhouse and the proprietor (Mr R. Peart) who have secured large orders from sample.

10th December 1895 (Northern Echo)

WEARDALE INDUSTRIES

On Monday the chiefs of the Weardale Iron Company and engineers were surveying the St John's Station, teems, and the proposed siding at Ireshopeburn for the loading of ironstone from their Grove Head Mines, and it is rumoured the latter with an incline from the said mine will be adopted.

13th December 1895 (Carlisle Patriot)

ALSTON DISTRICT COUNCIL.

It was agreed to erect a standpipe at Holmesfoot in connection with the new water pipes from Nenthead.

21st December 1895 (Hexham Herald)

WEARDALE

The first excursion train was run on the new railway in Upper Weardale on Saturday when a large number of people travelled from Weardale to Newcastle.

4th January 1896 (North Cumberland Reformer)

NENTHEAD

WESLEYAN CHAPEL BAZAAR

On Christmas day a bazaar was held in the Nenthead Board School. Owing to the stormy character of the day the attendance was at first small, but it increased towards the evening. Mr A. Elliot, Garrigill, who was announced to open the bazaar, was scarcely expected. He, however, boldly faced the storm, and put in an appearance, and did his duty in a most pleasing manner. Goods were very freely purchased. An exhibition in a separate room was well attended, and a great feature of the day was the judging of the best dressed doll. The decision was by voting, 203 being given. Miss M. Angus received 80, and Miss K. Thompson 55. For a map drawing competition decided on similar lines, I. Angus was first with 42 votes, and I. Robson second with 27. The Wesleyan choir gave several pieces of music during the day. The sale was re-opened on Saturday, which was again stormy, but the results were satisfactory.

MINES.—The uncertainty that has for a long time existed in reference to the new company which has been expected to take over these works is now set at rest, it being announced on indisputable authority that they take over the whole concern next week. The men employed are naturally anxious, and it is hoped that it will be for the good of all concerned.

WATCH-NIGHT meetings were held, commencing at 11 o'clock, in the Primitive and Wesleyan Chapels. Good companies assembled, and appropriate addresses were delivered by the local brethren.

DANCE.—A public dance was held in the Nenthead Board School on New Year's Eve, commencing at 9-30, under the auspices of the Nenthead Brass Band.

SOIREE.—The teachers of the Wesleyan Sunday School held their annual social gathering on New Year's Day. At six o'clock a meeting of the teachers and friends was held in the chapel, when several addresses to the teachers, pertaining to Sunday School work were given. Several solos, &c., were also rendered by the members of the choir. After the meeting a supper was provided, and the evening was spent in a profitable and interesting manner.

11th January 1896 (North Cumberland Reformer)

ALSTON DISTRICT COUNCIL

A TUMBLE DOWN HOUSE

The INSPECTOR said nothing had been done by Mr Dickinson, Spency Croft, to the dilapidated house at Nenthead.—Mr HOLMES thought there should be no delay, as the place was really dangerous.—The CLERK pointed out that the Medical Officer must first report on the house, and it was agreed that he be asked to.

KATES LANE.

The INSPECTOR reported that the work of water supply at Nenthead and the Garrigill sewerage had been completed. He wished to know if he must proceed with Kates Lane.—The CHAIRMAN: You have the order to go on.—The

INSPECTOR: The men who took the contract have given it up.—The CHAIRMAN: Did they take it at prices they could not make wages at?—The INSPECTOR: Yes; it will be very difficult, there are so many pipes. The CHAIRMAN: Ascertain what they will do it for.— The INSPECTOR: They have got work elsewhere.—The CHAIRMAN: Then I suggest that the Inspector obtain fresh tenders and submit them to me. and that we be empowered to get the work done.—On the motion of Mr BOLTON, seconded by Mr J. H. WALTON, this course was adopted.

Toe CLERK stated that as Dr. Masterton, medical the Officer, for No. 2 district, was ill, it would be necessary to appoint a temporary substitute.—The CHAIRMAN said that the situation was peculiar as Dr. Masterton had not resigned. Under the circumstances he had asked Dr. Carson to attend to the Nenthead District until a temporary appointment could be made, and Dr. Carson agreed to do so. He had been asked by several to allow Dr. Carson to hold the post temporarily.—Mr LATTIMER: Will you name the parties who made the request.—The CHAIRMAN: It was done privately.—Mr HARRISON moved that Dr. Short be appointed as he was going into the district three or four times a week. —Mr BOLTON seconded, and Mr LATTIMER supported the motion, saying he thought it was not fair that one man should monopolise so many offices—Mr ELLIOTT moved, and Mr NEVIN seconded that Dr. Carson be appointed, but on being put, Mr Harrison's motion was carried *nem. con*.

KATES LANE.

The INSPECTOR reported that the work of water supply at Nenthead and the Garrigill sewerage had been completed. He wished to know if he must proceed with Kates Lane.—The CHAIRMAN: You have the order to go on.—The INSPECTOR: The men who took the contract have given it up.—The CHAIRMAN: Did they take it at prices they could not make wages at?—The INSPECTOR: Yes; it will be very difficult, there are so many pipes. The CHAIRMAN: Ascertain what they will do it for.— The INSPECTOR: They have got work elsewhere.—The CHAIRMAN: Then I suggest that the Inspector obtain fresh tenders and submit them to me. and that we be empowered to get the work done.—On the motion of Mr BOLTON, seconded by Mr J. H. WALTON, this course was adopted.

18th January 1896 (Hexham Herald)

NEWBROUGH

Shortly after six o'clock yesterday morning an accident attended with sad and painful results occurred at the **Greyside shaft of the Settlingstones and Greyside** mines, the victim being a miner **Emanuel Nattrass**, who for about nine years has resided with his wife and family in the Haydon Bridge district. Deceased it appears entered the shaft about the time mentioned and alighted at the 60 fathoms level. Just after signalling for the cage to return, he was noticed to fall forward down into the well of the shaft, and distance of about 12 feet where the water of the workings accumulates. The alarm was immediately given and although every endeavour was made to recover him considerable time elapsed before this was effected. The depth of the water at the time was over 6 feet and when the body was got out life was quite extinct. Deceased who was a native of Nenthead was about 50 years of age and leaves to mourn his loss a widow, 4 daughters and 3 sons. It is conjectured that deceased when

he fell had been seized with an attack of faintness, he having for some time past been subject to such attacks.

Deaths

Killed at Settlingstones and Greyside mines on the 17th inst. aged 51 Emanuel Nattrass. To be interred at Haydon Bridge on Monday 20th inst. at 2 pm.

The inquest identified that he had fallen from the 60-fathom level to the 70-fathom level, also a rail provided to go across the entrance to the shaft at the 60-fathom level that should have been in place to prevent such an accident was not in position. He had a son Christopher.

In 1841, at Foulard, John Nattrass, lead miner, aged 45, his wife Mary aged 34, children Thomas 10, Mary 7, and John 4.

In 1851, at Foulard, Mary Nattrass, widow (John died 1st quarter of 1848) of lead miner, aged 43, children Thomas, lead miner, aged 19, John, lead miner, aged 16, Emanuel 6, and lodger George Moor, lead miner, aged 41.

In 1861, at Kings Head, Mary Nattrass, lead miners widow, aged 54, children Mary, dressmaker, aged 26, John, lead miner, aged 24, Emanuel, lead miner, aged 16, and George Moor, lead miner, aged 53.

In 1871, at Holme Foot, Emanuel Nattrass, lead miner, aged 26, his wife Isabella (Irving, married 4th quarter of 1869) aged 23, and daughter Mary L. 1 year.

In 1881, at Kings Head, Nenthead, Emanuel Nattrass, lead miner, aged 36, his wife Isabella 32, children Mary L. 11, Ellen 6, Christopher I. 3, George W. 6 months, and brother John Nattrass, lead ore dresser, aged 45.

In 1891, at North Side, Haydon Bridge, Emanuel Nattrass, lead ore miner, aged 46, his wife Isabella 42, children Nellie, dressmaker, aged 16, Christopher, lead ore dresser, aged 13, George William 10, Sarah Oletta 8, Thomas 5, and Frances H. 3 years.

In 1901, at 18 Ratcliffe Road, Haydon Bridge, Isabella Nattrass, widow, aged 52, children George, coal agent, aged 20, Thomas, washer at lead mines, aged 15, and Frances H. 13.

In 1901, at 48 Sycamore Street, Elswick, John Charlton, widow, aged 62, children Annie F.22, John C. engine cleaner NER, aged 19, Gertrude M. 16, James H. 11, and boarder Christopher J. Nattrass, railway porter NER, aged 23.

25th January 1896 (Hexham Herald)

ALSTON

RIFLE SHOOTING IN AUSTRALIA

We are pleased to learn from an Australian paper that a native of Alston has been distinguishing himself at the rifle ranges. We refer to Private Todd who is son of Mr Thomas Todd of Moor House, and is a member of the Ballarat battalion.

25th January 1896 (The North Cumberland Reformer)

ALSTON SCHOOL BOARD.

The monthly meeting of this Board was held on Saturday, Mr R. Elliott presided, and Messrs H. Walton, H. Bell, and T. Harrison were present, with the Clerk (Mr T. W. Dickinson), and the Attendance Officer (Mr N. Walton).

EXEMPTION FROM ATTENDANCE

The Board considered three applications which were laid before the previous meeting. They were in respect of two boys and one girl, whom their parents wished to be exempted from further attendance at school, although they had not passed the examination for the necessary certificate.—After some discussion, the Board declined to grant the applications.

ATTENDANCE.

The attendance for the month was as follows:—

	On Books	Average.
Nenthead	125	109

	495	418

8th February 1896 (Hexham Courant)

Deaths

At Middleton in Teesdale, The Grove, 2nd inst. Lucy Sarah, eldest daughter of John J. and Jane Millican.

In 1841, at West Nenthead, Tinniswood Millican, lead mine agent, aged 35, his wife Lucy (Little, married 21st September 1831, Alston) aged 35, children Frances 8, Sarah 7, and John 3.

In 1851, at New House, Nenthead, Tinniswood Millican, mining agent for lead company, aged 47, children Frances 18, Sarah 17, house servant Hannah Teasdale aged 26, and house servant Ann Cousin aged 18.

In 1851, at Croft House School, Brampton, John Millican aged 13, pupil.

In 1861, at Nenthead House, Tinniswood Millican, widow, district mining agent, aged 57, son John J., clerk to the district mining agent, aged 23, housekeeper Hannah Teasdale aged 36, and housemaid Frances Teasdale aged 18.

In 1871, at Nenthead house, John Joseph Millican, leads mine agent, aged 33, his wife Jane (Walton, married 4th July 1865) aged 31, children Lucy Sarah 4, Phoebe Walton 3, John Tinniswood 1, and Jacob Arthur 7 months.

In 1881, at Hudshaw House, Hexham, John Joseph Millican, retired lead mining agent, aged 43, his wife Jane 41, children Lucy Sarah 14, Phoebe Walton 13, John Tinniswood 11, Jacob Arthur 10, Ethel 8, Laura 7, cook Elizabeth W. Coulson aged 19, and housemaid Jane A. Whitfield aged 18.

In 1891, at The Grove, Middleton, John J Millican, superintendent of lead mines, aged 53, his wife Jane 51, children Lucy S 24, Jacob A, steam engine maker apprentice, aged 20, Ethel 18, Laura 17, and domestic servant, Sarah A Boyd, widow, aged 31. See 17th August 1844, 2nd September 1876, 24th August 1878, 5th April 1879, 8th March 1895, 26th June 1897, & 12th March 1898.

At Nentsbury, 2nd inst. aged 20, Mary Jane Smith.

See 4th March 1876, 15th December 1877, & 18th February 1893

8th February 1896 (The North Cumberland Reformer)

Deaths

At Albert Place, on the 31st ult., Isabella Teasdale, late of Nenthead, aged 84 years, at the residence of her daughter, Mrs John Thompson. Was interred at Sherriff Hill, on Sunday the 2nd inst.

At Nether Nentsbury, Alston, on the 2nd inst., Mary Jane daughter of the late John and Sarah Smith, aged 20 years.

DEATH OF MR ADAMSON BELL.

On Tuesday, Jan. 28th, another of the older class of men, in the person of Mr Adamson Bell, of Low Nest, passed away to his rest. He was very widely known from the position he so long held as lead ore washing master in the palmier days of the London Lead Mining Co. Altogether apart from the technical skill required in lead ore washing and dressing, he had the difficult position to fill of doing justice to his employers, to the men whose mineral he dealt with, and to the boys under his charge. He gained, and through all the years of his long service kept, the complete confidence of all. Beneath a quiet, unassuming manner lay a soul of sterling worth, which unconsciously influenced for good the youths who year by year came under his supervision. On the closing of the mines at Garrigill he retired, and gave his attention to farming. A few years after leaving Dryburn for Low Neat, he had a dangerous illness from which he never got strong, and on his 64th year the end came peacefully. The funeral took place on Saturday in the Alston Cemetery; the Rev. E. Crump officiating both in the Wesleyan Chapel and at the grave. From all parts of the parish a large concourse gathered to pay a tribute of respect to his memory.

Adamson Bell aged 37, married Elizabeth Watson aged 26, 14th April 1870, at St John, Garrigill.

In 1871, at Dryburn, Alston, Adamson Bell, Lead Ore Washer & farmer of 21 acres, aged 38, and his wife Elizabeth 27.In 1881, at Dryburn, Alston, Adamson Bell, Lead Ore Washing foreman & farmer of 22 acres, aged 48, his wife Elizabeth 37, children, James 9, Hannah 6, Margaret A 3, and sister in law Isabella Watson, 31.

In 1891, at High Nest, Adamson Bell, farmer, aged 58, his wife Elizabeth 47, children, James, farm assistant, aged 19, Hannah Lizzie 16, and Margaret Ann 13.

Elizabeth Bell died 1st qtr 1919, aged 75, registered at Alston.

Probate: Adamson Bell of Nest Garrigill, Alston, Cumberland, farmer died 28th January 1896, administration Carlisle 8th March 1898, to James Bell farmer. Effects £1015.

ALSTON
RURAL DISTRICT COUNCIL

A letter was read from Dr. Short, thanking the Board for appointing him temporarily medical officer in place of Dr. Masterton.

THE STEAM ROLLER

Letters were read from Mr C. B. Hodgson, Clerk to the Cumberland County Council, and from Mr G. J. Bell, County Surveyor, intimating that the steam roller would be used on the roads in the Alston District from time to time when practicable.

A DANGEROUS RUIN.

The MEDICAL OFFICER (No. 2 district) reported on a dwelling house partly occupied at Nenthead, which was referred to him for inspection at last meeting.

He expressed the opinion that the unoccupied part was not only unfit for habitation, but dangerous to passers by.—The CHAIRMAN: I suppose we shall have to take measures to get it put right.—Mr BOLTON: How do we stand in relation to it?—The CLERK: The Medical Officer will have to make an official report in the first instance. and then notice will have to be served on the owner, giving him a certain time to put the building in order. If he fails to comply, proceedings can then be taken before the magistrates.—Mr BOLTON: Meantime, if anyone is injured, who will be responsible?—The CLERK: The owner; he has had notice of its condition.—The matter was then left with the Clerk to take the necessary steps.

APPLICATIONS FOR WATER.

Applications were made to connect with the water main recently put down in Kate's Lane from the following:—Houses and premises occupied by Mr Wm. Lawes, Miss Hodgson, Mr George Dickinson, and Mr John Armstrong.—Mr SIMPSON said he did not see that they could make any exception, and moved that the applications be granted.—Mr LATTIMER: What size is the pipe?—The INSPECTOR: One inch.—Mr LATTIMER : Will that allow connections to be made? The INSPECTOR: Yes, I have made provision for the connection at each place.—The motion was carried.—The CHAIRMAN said that it would be well that all connections should come before the Council before being made. It was hardly fair that a servant of the Board should do work before it was ordered.—Mr LATTIMER: I think it was a wise policy to make arrangements for these connections, and save expense. No harm would be done if they were not required.—The CHAIRMAN: How does he know where to put them?—Mr LATTIMER: He would use his judgment.—The CHAIRMAN: He has no right to use his judgment, He should have orders from the Board.—Mr MILLICAN: He would know they were to be applied for.—The CHAIRMAN: He has no business to know anything.

SANITARY CONDITION OF THE TOWN.

Mr DOWSON asked when the Inspector would be likely to complete his report on the sanitary condition of the town and district. They expected it three months ago.—The INSPECTOR pointed out that he had been kept busy carrying out the works of water supply, and that the weather was sometimes not favourable. The report was in progress, but would take some time. —Mr NEVIN remarked that they had a report on a portion of the property, and he would like to press for the completion of the report in the incoming month, so that they might meet and discuss the whole.—The INSPECTOR said he would endeavour to have it for next Meeting.

ALSTON WATER SUPPLY.

Mr SIMPSON in accordance with notice, moved that the engineer be instructed to prepare a plan and estimate for a new service of pipes from the Town Head to the reservoir. He pointed out that while the main service pipe through the town was a 3-inch one, that from the Town Head to the spring was only 2 inches. It was impossible to fill a 3-inch pipe from a 2 inch one and consequently they did not get the benefit of the supply they had. He had at first thought of an enlarged reservoir, but he believed the necessity that might be done away with if they put in say a 4 inch Pipe for a certain distance, then a portion of 5 inch, and lastly, near the reservoir, a few yards of 6 inch pipes. They had three times as much water as they required, but at present, two-thirds of it was wasted by the insufficient pipe. —Mr BOLTON: What is the distance? Mr SIMPSON: 800

yards.—Mr DOWSON: I suppose this is not to decide finally on doing the work. Mr SIMPSON : No, I only want a plan and estimate. —The CHAIRMAN pointed out that the subject was before them in October, and was then postponed on the ground that the time was not opportune.—Mr HOLMES: Is the work at Leadgate finished?—Mr SIMPSON Don't bring that up.—Mr BOLTON: We have had no complaints here about want of water.—Mr SIMPSON: We had in the summer, and even some this winter. We have a splendid supply, but it is wasted.—Mr NEVIN seconded Mr Simpson's motion. They would be bound to do this sometime, and the water supply was often short at the high end of the town.—Mr WARD thought they should have some more evidence of scarcity of water before doing this.—Mr LATTIMER raised a point of order. Could this matter be brought on now, when under the bye-laws, a matter which had been disposed of could not be brought up again within six months.— The CHAIRMAN said that when he saw it on the agenda his first impression was that the subject could not be brought on again. But it seemed that they had not yet sanctioned the new bye-laws, and unless they took the old bye-laws as still in force, then Mr Simpson was in order.—Some discussion took place on this point, but the CHAIRMAN ultimately decided to take the sense of the meeting on Mr Simpson's proposal, Mr SIMPSON remarking that he had never brought forward a similar motion before, and he only wanted a plan and estimate. —Mr HARRISON said they were not asleep. They knew this was the thin end of the wedge, which would only need another bat to drive it up to the head.—Mr BOLTON moved, and Mr WARD seconded, that the matter stand over for six months, and this was carried by 7 votes to 3.

HIGHWAYS.

The Highway Surveyor had no report to make, but Mr LATTIMER drew attention to the condition of a footpath near Nentsbury.—The SURVEYOR, in answer to the Chairman, said it was the path from Nentsbury Bridge to Island Cottage. It would be attended to as soon as it conveniently could.—Mr LATTIMER expressed himself satisfied. His attention had also been called to the old road past the Primitive Chapel at Nentsbury which was in a dangerous condition in places. He asked if it was within the Council’s jurisdiction.—The SURVEYOR thought it came under the County Council as it was an alternative route to the main road for loads that could not be got under the water troughs.—The CHAIRMAN: It is a concession to the mining company to allow them to carry their troughs over the road. If the matter came before the Highway Committee, they might order the removal of the troughs.—Mr HOLMES maintained that this was not the case. The piece of road referred to was the old main road. The troughs were there perhaps a century before the present main road went under them.—Mr HARRISON added that if they referred to the minutes they would find that the late Surveyor was distinctly instructed to protect this road.—The INSPECTOR said the new road was made when he was nine years old. This road was the main road before that.—Mr LATTIMER moved, and Mr BOLTON seconded, that the Surveyor put up a railing where required, and this was agreed to.—Mr HARRISON complained with reference to the road from Dykeheads to the school, that in wet weather the children got wet footed in going to school.—The SURVEYOR said that everyone in Nenthead would admit that the parish roads were very much improved. As to the mud, they could not consolidate broken stones without binding.— Mr HARRISON: I am not speaking of dirt, but of water, which can easily be got off by ditching.—Mr WALTON said

if ditching was the remedy required, it should be done, and it was agreed that the Surveyor attend to the matter.

GOVERNMENT INSPECTORS OF MINES REPORTS
Report of Mr Hedley 1896
12th February 1896, SETTLINGSTONES, BARYTES, FOURSTONES
FATAL ACCIDENT REPORT CONCERNING THE DEATH OF EDWARD HENDERSON AGED 38.

The men were preparing to fire, when a mass of stone and ore weighing several tons, fell and caught deceased. The place had been officially inspected during the shift, but neither manager nor the men appear to have apprehended any danger. The working place measuring from the loose stuff on which the men were standing was not more than 6ft or 7 ft. high.

Of the Edward Henderson's named in the census, for this area, the miner below is the only one I could not track to the 1901 census.
In 1881, at Low Green House, William Henderson, farmer of 39 acres, aged 58, his wife Jane 52, children Thomas, Ag. Labourer, aged 26, Edward, lead ore miner, aged 24, Jane 16, William, Ag. Labourer, aged 21, and Elizabeth aged 12
In 1891, at Fell House Allendale, William Henderson, farmer, aged 68, his wife Jane 61, and son Edward, farm labourer, aged 34.

15th February1896 (Hexham Herald)
WEARDALE

Death from a blasting shot at Frosterley. Henry Burrup who was terribly mutilated by a blasting shot at the Frosterley Quarry of Messrs Pease and partners, died on Tuesday. He was injured on February 1st and was terribly disfigured.

A shot of 7 balls of dynamite had gone off in his hands he was aged 57.
In 1891, at Butts, Frosterley, Edward Henry Burrup, limestone quarryman, aged 46, born Suckley, Worcestershire, his wife Mary aged 33, born Penrith (died 2nd quarter of 1891, aged 34), children William 15, John 14, George Henry 12, Emma 10, and Mary 6.

19th February 1896 (Northern Echo)
SAD FATALITY IN TEESDALE
TWO YOUTHS BURIED ALIVE

A fatal accident occurred at the London Lead Company's Coldberry, washing rake on Tuesday morning, by which two youths, named Thomas Anderson and William Coatsworth lost their lives. Coldberry Lead mine (which is situated about three miles from Middleton in Teesdale) has not been worked for some years past, and what are known as the "cutting heaps," which are an accumulation of matter from which the lead ore had been separated during the period the mine was working, contain a considerable quantity of ore. The rewashing of these "deads" has been let by the Lead Company to Mr M. Thompson, an experienced washing master, who had employed at time from three to six youths to assist with the work, which was not of a heavy nature. On Tuesday morning, while the two youths named were employed with this work, a slip took place probably owing to the frozen nature of the surface, and the unfortunate lads were buried in the debris. Assistance was quickly procured,

and the bodies were recovered, about two hours later, but life was extinct. Dr Neligan was present when the bodies were recovered and in Anderson's case, artificial respiration was tried for a considerable time but without effect. The sad occurrence has cast quite a gloom over the locality. Anderson is the second son of Mr Ralph Anderson, Farmer, Bell Edge, while the other youth, whose leg was also broken, is the only son of Mr Wm. Coatsworth, farmer, Hudeshope.

22nd February 1896 (Northern Echo)

THE TEESDALE FATALITY
INQUEST AND FUNERAL

The inquest on the bodies of Thomas Anderson (20) and William Coatsworth (15), who were killed by the subsidence of the cutting heap at Coldberry Washing Rake on Tuesday, was held at the Cleveland Arms Hotel on Friday afternoon. Mr James Hope was elected foreman of the jury, and the inquiry was conducted by Coroner Proud. Mr Mellican watched the case on behalf of the London' Lead Company, and there were also present Mr Bell, H. M. Inspector of Mines, and Mr Walker, assistant-inspector, and Inspector Cameron.—

Ralph Gowland coal miner, Tow Law, said that the deceased Thomas Anderson was his nephew. Thomas Bowron, farmer, High Dyke, cousin to William Coatsworth also gave evidence of identification.

Matthew Thompson, ore contractor, said he last saw deceased at work between eight and nine o'clock on Tuesday morning. They were loosing the cuttings down.

By the coroner: "The heap is about 25 or 26 feet high."

Anderson was working with a "back" and the other boy was standing some distance away. Water was running at the bottom of the heap. About three-quarters of an hour after he went back and found the heap had shipped in on one side, and the two lads were completely covered up, together with their tools. He immediately went for assistance and called Richard Hunt and Robert Grieve who commenced to get them out. He went for further assistance but was not present when the bodies were got out. When he left them one boy was some distance from the other. He (witness) was standing on the top of the heap and talked to them. The boys had worked with him two years.

Robert Grieve, lead miner, Middleton in Teesdale, said he was near the place when the accident happened. He heard Mr Thompson shout, and when he went he found a rush of cuttings had come in and buried the two lads. Along with Richard Hunt, he commenced to dig them out. They worked for three-quarters of an hour when other men came. It was about three and a half hours before the bodies were recovered. They were both dead.

By Inspector Bell (H.M. Inspector of Mines): There would be about 3 feet of stuff on the first man (Anderson) and about 7 feet on Coatsworth. He had not seen the place in the morning.

Richard Hunt, lead miner, corroborated this statement by last witness.

Inspector Bell said there was always great danger when the heaps were at an angle greater than 45 degrees.

The Foreman (James Hope) here said, as a practical man, he could have worked at the same place without anticipating any danger.

Mr Thompson, further questioned, said he had often cautioned the boys, and always looked after the work himself. He had had charge of similar work for over thirty years, and had never had an accident.

The Coroner said very great precaution ought always to be taken, and it would be better if a man was always left in charge instead of boys.
The Foreman, I do not think that there is any blame to be attached to Mr Thompson, or deceased workmen. The Jury after a short consultation returned a verdict of "Accidental death."
The funeral, which took place in the afternoon amid every token of respect, was attended by some hundreds of people, including all the leading officials of the Lead Company, and tradesmen of the district, … The deceased were both interred in one grave.

22nd February 1896 (Hexham Herald)

ACCIDENT IN TEESDALE

On Tuesday two youths aged about 17 met a sad death at Coldberry mine about four miles North West of Middleton Teesdale. The mine when worked by the London Lead Company was a very rich one and the refuse heap was being rewashed by the Master Washer Mr Matthew Thompson of Burn Bank, and three youths named Nixon, Anderson and Coatsworth. Whilst the lads were filling the tubs with refuse the banks gave way and they were at once buried in the falling matter. Assistance was soon rendered but Nixon was the only one rescued alive.
William Coatsworth born 1881.
Thomas Anderson born 1876
In 1891, at Hudeshope, Middleton in Teesdale, William Coatsworth, farmer, aged 41, his wife Jane 40, children William 10, Mary J. 8, Annie 5, Elizabeth E. 1, and lodger Matthew Bradwell, leads miner, aged 22.
In 1891, at Bell, Newbiggin, Ralph Anderson, leads miner, aged 49, his wife Mary Ann 46, sons John, lead miner aged 21, and Thomas 15.

Deaths

Stanhope 14th inst., aged 70, Joseph Roddam.
In 1871, at Ireshope Burn, Joseph Roddam, lead miner, aged 50, his wife Mary 42, children William, lead ore washer, aged 15, Thomas 10, and Mary A. aged 6.
In 1881, at East Lane, Stanhope, Joseph Roddam, limestone quarryman, aged 60, his wife Mary 52, sons William, limestone quarryman, aged 25, and Thomas, limestone quarryman, aged 20. In 1891, at Stone House, Stanhope, Joseph Roddam, limestone quarryman, aged 70, his wife Mary 62, sons William, limestone quarryman, 35, and Thomas, limestone quarryman, 30.
Alston, 15th inst., aged 23, John Moffat.
In 1891, at Thirlwell Lane, John Bailey, Ag. Labourer, aged 58, his wife Ann 63, grandson Joseph Moffatt, farm servant, aged 28, and grandson John Moffatt, tailors apprentice aged 18.
See 28th March 1868, 27th May 1871, 20th November 1875, and 11th March 1876.

22nd February 1896 (The North Cumberland Reformer)

SCHOOL BOARD.—The monthly meeting of this Board was held on Saturday, Mr R. Elliott presided, and Messrs H. Walton, H. Bell, and T. Harrison were also present, with the Clerk (Mr T. W. Dickinson), and the Attendance Officer (Mr N. Walton)—A letter was read from the secretary to the Nenthead and Tynedale Co, declining to accept a cheque for £10 in settlement of last half year's rent of

school, and stating that the rent of school for last year was £50. — After a long discussion, it was decided to offer to pay up the arrears to Martinmas 1895, at the rate of £30 per annum.
A letter was read from Mr Petty calling attention to the condition of a gate and the drainage to boys' yard, and also that no advance of salary had been granted to Miss Harrison, she having been engaged by the sanction of the Inspector for another year.—In reply to a question from the chair, the Clerk said Miss Harrison's term expired on March 31st.—Nothing was done in the matter.
A circular was read from the Science and Art Department, enclosing a list of questions, and asking for appointment of a custodian.—The Chairman said that the clerk had been appointed in the past.—The Board, however, suggested that some local custodian would be preferable, and Mr Robert Bell was selected — The Attendance Officer's report for the month was as follows:—

29th February 1896 (Hexham Herald)
Deaths
Weardale, Cows Hill, 21st inst., suddenly aged 75, Phoebe Peart.
In 1851, at Copt Hill, John Peart, lead miner, aged 21, his wife Phoebe (Watson, married 4th quarter of 1850) aged 29, daughter Esther 3 months, step children, Joseph Watson 10, John Watson 9, Sarah Watson 6, and Mary Watson 6.
In 1861, at Burtreeford, John Peart, lead miner, aged 31, his wife Phoebe 40, children Esther 10, Walton 4, Ladler 1, step children Joseph Watson, lead miner, aged 20, John Watson, lead miner, aged 19, and Mary Watson 16.
In 1871, at Heathery Cleugh, John Peart, lead miner & small farmer, aged 41, his wife Phoebe 50, children Esther 21, Walton, lead ore washer, aged 14, Ladler, lead ore washer, aged 11, and Abraham, lead ore washer, aged 7.
In 1881, at Cogley, John Peart, lead miner, aged 51, and his wife Phoebe 60.
In 1891, at Cows Hill, John Peart, lead miner, aged 61, his wife Phoebe 70, and Ralph Beck, draper & grocer, aged 44.

29th February 1896 (North Cumberland Reformer)
NENTHEAD.
EVENING CONCERT.
On Thursday night, Feb. 20th, a concert was given, under the auspices of the Nenthead cricket club, in the Board School, by a company of vocalists and musicians from Brampton and Carlisle. Elaborate preparations had been made, and a good evening's enjoyment was anticipated. The concert was timed to commence at 7-30. Long before that time the room was well filled, the people turning out in large numbers. Perhaps it was a desire to patronise the cricket

club, or to hear the performers who came with a good reputation, or to give a cordial welcome to the chairman, who was to make his first public appearance, or all these combined that induced the natives to assemble in such force. However this might be. the company quite exceeded all expectations. A large and varied programme had been arranged. C. Fernau, Esq., the new manager of the mining company that has lately taken over these mines, occupied the chair. In his opening remarks he expressed his pleasure at being present, and made a few allusions to the new company. His statements were highly appreciated, and the audience gave him a most enthusiastic reception. The programme was well given, and the frequent encores showed that the people appreciated the efforts of the performers. …

SUDDEN DEATH.

Another illustration of the uncertainty of life was given on Saturday last in the death of Master John George Spark, son of Mr T. Spark. butcher, of this town. The circumstances made the event all the more sad. The boy had gone to learn farming with his uncle at Murton Hall near Appleby, about five weeks ago. He had enjoyed good health seemingly till last week, when he felt unwell, though able to stir about till Friday when getting no better medical aid was called. Nothing serious was apprehended at the time, but getting worse on the Saturday morning his father was wired to at Alston. There was much anxiety felt in the town as the boy was much respected. Proceeding as quickly as possible Mr Spark reached Murton Hall only an hour or two before the end came. Having become unconscious, he never spoke to his father, which made the matter all the harder. On returning to Alston on Sunday afternoon, there were anxious enquiries of Mr Spark, and the sad news soon spread, causing deep and heartfelt sorrow for the bereaved relatives. The interment took place on Wednesday afternoon, the funeral being made public. There was a numerous company of friends from town and country. …

The cause of death, we understand, was diabetes, which had seized him in its worst form. Being only 15 years of age, it is another illustration that the young die as well as the old, but there is the consolation of knowing that his end was peace.

4th March 1896 (The Times)

Deaths

Wilson: On the 29th Feb., at Broomhaugh, Riding Mill-on-Tyne, in her 85th year, Sarah, last surviving daughter of the late Jacob Wilson, of Alston House, Cumberland.

In 1871, at 3 Garden Terrace, Westgate, Newcastle, Henry Vipond Wilson, land owner & merchant aged 53, sister Sarah Wilson, annuitant, aged 59, and sister Elizabeth Fair, widow, annuitant, aged 65.

In 1881, at 9 Winchester Terrace, Newcastle, Henry Vipond Wilson, aged 63, sister Sarah Wilson, annuitant, aged 69, and sister Elizabeth Fair, widow, annuitant, aged 75.

In 1891, at 9 Winchester Terrace, Henry V Wilson, general merchant, aged 73, and his sister Sarah Wilson, living on her own means, aged 79.

7th March 1896 (North Cumberland Reformer)

ALSTON RURAL DISTRICT COUNCIL
HEALTH STATISTICS FOR 1895.

The annual reports of the Medical Officers, Drs. Carson and Short for Nos. 1 and 2 districts respectively were read. No. 1 District (Alston). —For this district Dr. CARSON stated that the two previous reports showed a low death rate, 13.40 in 1893, 12.20 in 1894. But considering the decrease of population, the low birth rate and the consequent high mean age of the inhabitants, it was to be expected that certain years would show a high rate of mortality. Unfortunately, this had been the case with 1895. The deaths had been 43, 18 males and 25 females, and the rate 25.1 per 1000. Deducting one death, an infant not belonging to the neighbourhood, and three in the Workhouse, the rate was reduced to 22.8. With the exception of diarrhoea, the district had been free from any epidemic to cause this high rate. The outbreak of diarrhoea, was in Autumn, and was no doubt due to the warm moist weather prevailing then. Influenza in a mild form prevailed during the earlier and latter parts of the year. There was only one case of diphtheria, and a few cases of pneumonia among children during the summer. All recovered, but one adult died later on from this cause. The deaths from heart disease were 8, nervous disease 6, phthisis 4, other diseases of the respiratory organs 2, cancer 3.

The ages at death were:—	**1894**	**1895**
Under 1 year	2	2
Over 1, and under 5	1	3
" 5, " 15	1	1
" 15, " 25	2	0
" 25, " 65	7	15
" 65	10	22
	23	43

Of the deaths, 5, or 11.6 per cent. were over 80; 12, or 28 per cent. over 70; 26, or 60 per cent. over 60; and only 8, or 18 per cent. below 40. These percentages indicate the main cause of the high death rate. The infant mortality was 27 per 1000; the zymotic death rate and rate from consumption each 2.3 per 1000. He then called attention, in connection with the high rate from consumption, to a very important health precaution which was almost entirely neglected, the ventilation of bedrooms. He had often been astonished to see, even on a fine sunny day, the bedroom windows closed, or only opened in such a gingerly fashion as to suggest that there was some danger in admitting too much fresh air, whereas the real danger lay in the tainted and unventilated atmosphere of the sleeping apartments. The births registered were 37, 15 males and 22 females. the rate being 21.6 per 1000. The report concludes:—"With reference to the work done during the past year, almost all remains to be accomplished of what I sketched last year to fulfil the requirements of the low district. You have been devoting your energies to the needs of the high district, but having satisfied the wants of that district, I hope that you will now devote some attention to the Alston programme by completing water supply at Alston and Leadgate, and causing the landlords, singly or in combination, to provide ashpits and closets for their tenants. A report has been sent in of the result of our house to house inspection of part of the district. The inspector of nuisances will present his report on the remainder during the present quarter. When you receive the full report, you have intimated, your intention to consider what action requires to be

taken. I shall then have certain proposals to make for your consideration, which, I hope, may meet the difficulty which exists in providing these necessary Conveniences. In my numerous inspections, I have noticed that the pressure brought to bear by the Sanitary Inspector has led to more frequent emptying of ashpits and middens. I would, however, call your attention to the unsatisfactory state of the refuse tip on the Fair Hill, and the dangerous condition of the unoccupied house on the Butts. It ought to be pulled down, or I am afraid some regrettable accident may result."

The CHAIRMAN This water supply has been a great grievance to me. I think about a dozen people have complained to me this week about taps being left continually; running. Those at the Town Head complain of want of water, and say it is someone's neglect. I am sorry to mention it again, but it is a most unsatisfactory matter altogether, and whether you extend the mains or not, before anything more is done I think we should have some definite plan laid down, and some authority we could depend on to make a satisfactory job of it. (Hear, hear.) It is very unsatisfactory for large ratepayers outside to have to contribute to a system which is a disgrace. As to the Fair Hill, I am pleased to inform you that steps are in operation to remedy the nuisance. These large accumulations of ashes are placed there by the people for whose benefit the Fair Hill was made use of but who will not put themselves to the trouble to deposit their ashes on the place provided for them, but tumble them down where ever it is handiest. It must be understood that the Fair-Hillis not paid for by this Board, or by the people who use it. A committee took it in hand as a place for ashes, and they made regulations to keep it in a sanitary condition, and the very people who should know better throw it in their faces that they will do as they like. We wish to make it publicly know the place will either be closed if this continues, or the offenders will be brought up for trespass. I will not mention names, but it is a disgrace that when this place is provided people make it a nuisance.—Mr SIMPSON thought if the Fair Hill was managed by the Council people would pay , more attention to the rules. With regard to the cost of Alston water supply, they had not spent above half of what had been spent at Nenthead and elsewhere. Alston had two-thirds of the rateable value of the parish, and there were ratepayers in the town who paid as much as any farmer outside. If the Council did not mind, it would not be a £100 job, but a thousand or two thousand one they would get in for. —Mr HARRISON moved that they get on with the next business; Mr Simpson's remarks were quite out of order.

No. 2 District. —Dr. SHORT reported that for the first time he had divided the district into two localities, which would enable him to give a more exact estimate of where the incidence of disease was most frequent, and a more accurate knowledge of the various conditions affecting the health of each. The total deaths were 30, males 17, and females 13, the death rate being 17.9, the lowest since his appointment seven years before. Of these, 22 were in Nenthead, and 8 in Garrigill, the respective rates being 21.7 and 12. or nearly 2 to 1. The ages at death are thus classified:—

	Under 1	Over 1 and under 5	5 15	15 25	25 65	Over 65
Nenthead	7	2	2	0	4	7
Garrigill	0	0	0	1	2	5

The infantile mortality was 170 per 1000, or 23.4 below the previous year. That all the deaths of infants occurred at Nenthead was due to the fact that a severe epidemic of whooping cough visited the district, from which Garrigill was exempt. The influenza epidemic also was more virulent at Nenthead than at Garrigill. Two deaths, returned as due to gastric and intestinal catarrh, were probably due primarily to influenza. The births numbered 41, 17 males, and 24 females, or at the rate of 24.4 per 1000, 5.3 more than that of 1894. In Nenthead, the births were 26, and in Garrigill 15, the respective rates being 25.6 and 22.6 respectively. Of zymotic disease, whooping cough and influenza prevailed in the early part of the year and in the third quarter. There had been one case of scarlet fever imported from Tynemouth. A remarkable feature of the influenza epidemic was that cases of a similar character occurred simultaneously in various widely scattered parts of the district. The extreme prostra and lassitude characteristic of the disease was well marked. There was one death from typhoid of a singular character. A boy went to Bent's Fair, Weardale, and the day being hot, drank a large quantity of impure water. He took ill next day and the case ended fatally. Frequent visits had been made, and attention was again drawn to the great want of privy accommodation, and the absence of ashpits, which led to nuisances being committed, and which could not be abated till these necessary conveniences were provided. After the report of last year, the Board decided to issue an intimation to the owners concerned to rectify these defects, but, with few exceptions nothing had been done. The accumulation of ashes and decaying vegetable matter close to the well supplying Dyke Heads needed to be promptly attended to. Since the new pipes had been put in, the supply to Nenthead had been pure and constant, but those to Hillersdon, Church Lane and White Hall, though from the same source, were liable to pollution in wet weather, evidently from a leakage in the pipes above where the new pipes were put in, and the inspector should be instructed to look to the matter. There was a great improvement in the water supply to Holmes Foot.

THE WEARY WATER QUESTION.

A petition signed by a large number of residents at Town Head was read. The petitioners complained of the inadequate water supply at their part of the town, and stated that from February 18th to 21st the tap at the Police Office, which supplies 40 houses was dry, and the constable had to request that all possible economy must be exercised with regard to the lower taps. A deputation waited on the Council in March last. Since then a public well had been put in at Kate's Lane. Several private connections had been made but the petitioners had not received any consideration. They protested against such a state of things existing any longer and called on the Council to take steps to remedy it. The CHAIRMAN pointed out one serious feature of the case. The School was often without water, either for sanitary or drinking purposes.—Mr SIMPSON: All that is wanted is an extension of the water-main.—Dr CARSON: The want of pressure is the cause. If a larger pipe were put and a larger tank at Springfield, there would be no complaints at all. (Hear, hear.) — The CHAIRMAN: If you run it out at the bottom as fast as you run it in at the top, and the pipe at the Townfoot is larger than the pipe at the Town Head how can you get pressure.—Mr MILLICAN contended that the cause of the top taps going dry was because the lower ones were kept running to keep them from freezing at this season. There was plenty of water if it was rightly managed. Perhaps the private taps were left running too.—Mr SIMPSON: I don't think they are.—Mr MILLICAN: The

Inspector cannot watch every house.— Mr SIMPSON: The work was commenced 7 years ago and done bit by bit, £10, £15, and £20 being spent at a time. When the work was half done Nenthead and Garrigill made a claim, and Alston was put aside till they were done. Now their members block our way.—Mr DOWSON said that if in order he would like to make a motion.—The CHAIRMAN: If it is not to spend money. —Mr DOWSON: It is not; so long as Mr Boltons amendment stands it blocks the way. This want of water is constantly complained of; we had it last summer when there was no frost. We cannot look for a remedy by watching every tap; the only feasible one is Mr Simpson's scheme, and I would move that Mr Bolton's amendment be rescinded.—The CHAIRMAN: You must give notice of that.—Mr DOWSON: It is not to spend money.—Mr SIMPSON: My motion was not to spend money, it was only for an estimate.—Mr BOLTON doubted if there was any authority for saying the water ran short in summer. He did not object to Alston getting a good water supply; but he objected to putting in an urban supply at rural cost. They would want a supply to every house.—Mr SIMPSON: We are fighting about a mere matter of £70 or so. Complete the scheme and you will hear no more complaints for ten or a dozen generations.—The CHAIRMAN: Why should the large ratepayers outside be mulcted in this way, when the fault lies in the system itself?—Mrs CORE: You are putting the cart before the horse. —Mr SIMPSON : The larger pipe is below the smaller.—The CHAIRMAN: Then you should have been flogged for putting it in.— Mr SIMPSON: We want the scheme completed.—Mr WARD remarked that they did not object to Alston people bringing Tyne down the street if they paid for it, but they wanted private taps to every house.—Dr. CARSON observed that it cost him £10 to make the connection to his house, and he did not regret it. There was plenty of water to go to every house if the scheme he and the Inspector devised was completed.—Mr BOLTON: Would it be out of order to ask for the cost of the separate supplies?—The CHAIRMAN: You can give notice.—Mr BOLTON gave notice accordingly for next meeting.—With regard to Mr Dowson's motion to rescind Mr Bolton's resolution, Mr SIMPSON said he would give notice of a motion to meet the case.

MISCELLANEOUS.

The CLERK reported 15 inmates in the house, and 34 vagrants relieved.—A circular from the Daventry Union, in favour of taking steps to expedite the report of the Royal Commission on Vaccination, was laid on the table.—It was agreed to inform the Carlisle Guardians that the Alston Board had sent up a resolution to the Local Government Board, asking for the 4s grant to lunatics in workhouses.—It was agreed to support the Coventry Union in endeavouring to obtain legislation to secure the education and protection of the children of tramps. —The circular from the Local Government Board dealing with the question of vagrancy was read. It is somewhat lengthy, but the purport chiefly is that the existing regulations are not carried out as they should be, especially those with regard to detaining all professional vagrants two nights, the most diverse practice prevailing.—Tenders for painting the workhouse were opened, and that of Mr W. Barton for £6 15s was accepted.—The INSPECTOR submitted an estimate for improving the water supply to the workhouse at a cost of £23.—The CHAIRMAN said the sum seemed large, but if the work was carried out, the supply would be brought through their own land instead of Mr Horrocks', where it was at present liable to pollution.—It was agreed that the work be carried out.—The collector's monthly statement for February showed

arrears at beginning of the month £475 13s 11d; collected £182 17s 9d; arrears on February 29th £292 16s 2d.

14th March 1896 (Hexham Courant)
Deaths
At Allenheads, 13th inst. aged 60, John Parker, interment at St Peter's tomorrow (Sunday).
In 1881, at Allenheads, John Parker, farmer of 63 acres employing 2 labourers, aged 45, his wife Sarah 41, children Margaret 15, Thomas F. 13, Joseph 10, and John 3. In 1891, at Allenheads, John Parker, contractor, farmer, aged 55, his wife Sarah 51, children Margaret 25, Thomas F. 23, Joseph 20, and John 13

11th April 1896 (Hexham Courant)
Deaths
At Stanhope, 1st inst. aged 47, George Gowland.
In 1891, at East Lane, Stanhope, Robert Gowland, widow, retired limestone quarryman, aged 72, son George Alsop, limestone quarryman, aged 42, and domestic servant Margaret Camble aged 19.
George Gowland, quarryman dropped down dead on the way home from work.
At Rookhope, 4th inst. aged 27, John *(sic)*Hetherington.
William Harold Heatherington died suddenly whilst walking along the road with his sister. (Jane Emerson)
Thomas Hetherington married Susan Emerson, 1st quarter 1863, registered at Hexham.
In 1871, at Hylton Terrace, Rookhope, Thomas Heatherington, Iron Miner, aged 32, his wife Susan 33, children, John E 7, William H 4, Thomas E 2, and daughter in law, Jane Emerson 13.
In 1881, at Hilton Terrace, Rookhope, Thomas Heatherington, limestone quarryman, aged 42, his wife Susan, 43, daughter in law, Jane Emerson, dressmaker, aged 23, sonsm John E, labourer, aged 17, William H, lead ore washer 14, Thomas E 12, and Joe 2. Thomas E and Joe were born at Stanhope, the others were all born at Allendale.
In 1891, at Blue Row, Rookhope, Thomas Heatherington, living on his own means, aged 52, his wife Susan, children, Jane 33, Thomas E, lead miner, aged 22, and Joe 12.
In 1891, William H Heatherington aged 24, is working as a farm labourer,at Sunnyside Farm, Greencroft, Durham.
Thomas Heatherington, died 2nd quarter 1898, aged 59, registered at Weardale.
In 1901, at Hylton Terrace, Rookhope, Susan Heatherington, widow, aged 63, daughter, Jane Emerson 43, and son Joe, Platelayer, aged 22.

18th April 1896 (The North Cumberland Reformer)

NENTHEAD.
DEATH OF A NENTHEAD MAN IN CANADA.

News has recently been received of the death of Mr Matthew Coates, formerly of Nenthead, which took place in Toronto, Canada, on March 14th 1896. The

sad intelligence came as a surprise, the illness having been sudden and severe. Mr Coates left Nenthead to try his fortune on Canadian soil about 11 or 12 years ago, and seems to have been very successful, so much so that he at various times employed a considerable number of workmen. His favourite employment here was connected with horses; on the other side of the ocean, he took up with the same. and. as a contractor, was doing exceedingly well. In winter he generally migrated to the lumber camps, and was engaged in drawing wood to the river side, which was floated down when the thaw set in. He was so employed this winter, and it appears caught a cold, which developed into a severe attack of inflammation of the lungs. He worked up to Saturday, the 7th of March, but on the following Tuesday he started for home, a distance of 500 miles, attended by two medical men. His recovery was anticipated, but on the Thursday he took a turn for the worse, and never rallied. He arrived at Toronto on the Friday, and died on the Saturday. Every attention had been given him, but without avail. A large number of people followed his remains to interment, amongst those being several members of the Sons' of England Lodge, of which he was a member.

The corpse was deposited in a vault until the thaw sets in, the frost making it impossible to dig a grave. The bulk of the people in this place remember Mr Coates as being of a hearty and genial disposition, and his untimely end at the comparative early age of about 38 years, has caused general regret. He paid a visit here about three years ago, and his interesting conversations at that time were much appreciated. Much sympathy is felt for the mourning relatives.

Buried at Necropolis Cemetery, Toronto on 30th April 1896.

In 1881, at Wardway Foot, Nenthead, Mary Coates, aged 47, son Matthew 23, and nephew Thomas Coates aged 7.

Matthew Coates left Liverpool, on the Hibernian, arriving at Canada 10th August 1883. See 12th January 1895

ALSTON SCHOOL BOARD.

Held on Saturday. Present, Messrs R. Elliot (chairman), Harrison, Walton, Bell, Rutherford, Dickinson (clerk), and Walton (Attendance Officer).

A letter was read from the Secretary of the Nenthead and Tynedale Lead and Zinc Company intimating their willingness to accept £30 as rent for one year due November 1895 tor Nenthead School and also the same amount to November 1896. The question of rent for the future must be settled with the new company.— The Chairman said that he had seen Mr Fernau (the manager) and he had intimated that they could go on at the same rent.—The Board thought it would be better to have an agreement. Something should be done in the meantime to have the premises put into proper repair before the examination. There were certain matters that wanted attention, a drain to be repaired and a little paint needed and also new gates. It was resolved to have the drain and the painting done and to ask the new Company to put new gates on as the old company had promised to do so.—A letter was read from the master (Mr Petty) intimating that Miss Harrison would shortly terminate her engagement and asking the Board to consent to the appointment of a girl as monitor. It was decided to grant this with a view of the girl becoming a teacher.— Several cases of non-attendance and applications for release were attended to. The notices sent out last month to certain parents respecting non-attendance of their children having been unheeded, it was decided to carry out the law and summon them. —A letter was read from Mr T. Lattimer, on behalf of the newly formed

Burial Board at Nenthead, asking for the use of the class room for their meetings free of charge. The request was granted seeing that it was a matter concerning the ratepayers.—The attendance was as follows.—

	On Books	Average.
Nenthead	126	115
Nenthall	36	31
Tynehead	12	8
Garrigill	70	57
Leadgate	28	26
Alston (High)	106	94
Alston (National)	57	49
Alston (Infants)	71	50
	506	430

25th April 1896 (Hexham Herald)

WEARDALE

The rapid decline of the lead mining industry of the western regions of Tynedale and Weardale is forcibly shown in the fall in the value of lead from £21 per ton in 1874 to £9 15s per ton in 1894. In 1896 the price is £11 2s 6d. Lead was £11 in 1734, it attained the highest price in 1854 when the price was £21. The decline of the industry is due to the increased supply from foreign sources.

9th May 1896 (North Cumberland Reformer)

Marriages

At the Primitive Methodist Chapel, Alston, on the 2nd inst., by the Rev. W. Farries, Stephen Charlton, Byers Hope, Allendale, to Elizabeth Ellen Collinson, of Island Cottage, Nenthead.

In 1901, at Island Cottage, Stephen Charlton, lead miner, aged 31, born Hexham, his wife Elizabeth E 31, born Alston, and son John J 1. In 1911, at Nenthall, Nenthead, Stephen Charlton, lead miner, driller & blaster, aged 40, his wife Elizabeth aged 40, and son John James aged 11.

At the Wesleyan Chapel, Alston, on the 7th inst., by the Rev. E. Crump, John Anderson (son of Nicholas Anderson, Garrigill) to Mary (Polly) Bales, Alston.

See 15th February 1890, 12th March 1890, 17th February 1894

16th May 1896 (The North Cumberland Reformer)

ALSTON SCHOOL BOARD

A meeting of this Board could not be held on Saturday as three of the members were engaged in the Assessment Committee

Attendance

The Attendance Officer's report for the month was as follows:—

	On Books	Average.
Nenthead	140	127
Nenthall	37	31
Tynehead	12	10
Garrigill	70	54
Leadgate	33	28
Alston (High)	105	91
Alston (National)	57	51
Alston (Infants)	75	70

The percentage varies from 77 at Garrigill to 93.3 at Alston, and reaches the average all round of 87 percent.

21st May 1896 (Cumberland Pacquet, and Ware's Whitehaven Advertiser)
La Societe des Mines et Fondnries de Zinc de la Vieille Montagne, of Angleur, Belgium, has just acquired some rights to mine zinc and silver lead ore at Alston, Cumberland.

23rd May 1896 (The North Cumberland Reformer)

NENTHEAD NEWS AND NOTES.

The company that are at present working these mines are about to introduce another change which will have a considerable effect upon the owners of horses and carriers in general. A prominent feature of this locality has always been the large amount of traffic on the road from Nenthead to Alston. Somewhere between 20 and 30 horses' have been required to convey the produce to the railway station. The cost of carriage must have been a very serious item; but it has been done at a tremendous low price, and it is really a matter of surprise how the contractors have been able to make wages at it. This, however, is all to be changed. A traction engine is to be utilized for that purpose. Steam has done a lot to curtail expense, but it remains to be seen if it will have a like effect in this instance. Current gossip says that £1700 will be saved in carriage. If that is proved to be a fact, it will most certainly make a considerable difference in the dividends. The people would have been much more gratified if it had been a railway, as that is what we should have had long ago.

The usual route for carts, etc., has been by the main road leading direct to Alston. It was, however, generally supposed that the engine would not be allowed to travel on Alston streets, therefore it was expected it would go round by Clarghill and Blagill, a distance of about seven miles. According to the latest arrangements, however, the mineral will be taken over Killhope to Wearhead station, and shipped at Hartlepool instead of Newcastle. Coal, etc., will consequently be brought from Wearhead instead of Alston. To many who have an eye to keeping down the rates this will be of great importance as it is hardly likely these roads will require as much attention as they have previously done. But as a matter of fact, they are county roads, and any difference it may make to the expense of the county will not be much felt.

30th May 1896 (The North Cumberland Reformer)

THE HEALTH OF THE DISTRICT

The Medical Officer of No. 1 district (Dr. Carson) reported that for the quarter ending March 31st there had been 5 deaths, including that of a stranger, a pedlar. found on Hartside, Excluding this, the rate for the quarter was 2.3 per 1,000, or 9.2 per 1,000 per annum. The births registered were also 5. One death was due to croup, one to pneumonia, and one to consumption. There had been one case each of diphtheria and erysipelas, but the precautions taken had prevented any extension. Influenza in a mild form had been prevalent, and an epidemic of skin disease bad involved the closing of the church school for ten days. Kate's Lane had been provided with a public well, Leadgate had got an abundant and permanent supply of spring water, and the inmates of the workhouse had been similarly attended to. As the season for visitors had

arrived, attention should be given to the road near the station, the Burn bank, and such like places.—Mr H. Walton remarked that the water supplied to Leadgate was so hard that it could not be used for all purposes.

For No. 2 district, the Medical Officer (Dr. Short) reported 5 deaths, 3 males and 2 females, the rate being 2.98 per 1.000 for the quarter, the lowest for several years. Except for an epidemic of influenza, which had caused most of the sickness, the district had been free from disease of a contagious or infectious nature. A house to house inspection at Nenthead showed that many were without privies. Drains at the School were defective and the privies unsatisfactory. The wells at Hillersdon and Whitehall wanted attending to. The births registered were 6, 3 males and 3 females—The Clerk said that he would now present his report on the water and sewerage expenditure. The amount expended in the Alston Ward for the last ten years ending March 25th last was £210 17s 10d, an average of £21 11s 9d, or 3.63d per £ on the rateable value; Nenthead, £202 11s 11d, average £20 5s 2d, or 3.46d in the £ on the rateable value; Garrigill. £67 19s 8d, £6 15s 11d a year, or 1.14d in the £ on the rateable value. The preparation of the statement had covered 28 sheets of foolscap.—Mr Ward remarked that if he had gone back 50 or 60 years the amount for Garrigill would not have been more.—Mr Millican: What does all this amount to now we have got it.—Mr H. Walton: It is information.—Mr J. R. Walton: It was expected that Alston had cost a good deal more.—Mr Nevin thought it would be well if they had a report of the whole expenditure —poor-law, sanitary, highway, and school board, in the same form for the information of the ratepayers, and he would like to move that such a return be presented, say in two months' time if it was not going to involve too much work for the Clerk.—The Chairman pointed out that every opportunity was given to any ratepayer to get the information for himself.—Mr Pickering: Yes; the books are open to the inspection of any ratepayer for a month.—The Chairman: The return should be recorded in the minutes, but for the future I think we should let all such matters lie, sink our differences, and work amicably together. (Hear, hear.)—The Clerk intimated that now he had finished this he would proceed with the preparation of the minutes for printing.

30th May 1896 (North Cumberland Reformer)
Marriages

At the Congregational Church, Alston, on the 26th inst., by the Rev. W. Farries, Matthew Wright of Warwick Bridge, to Nora Jane, second daughter of the late John Nelson of Alston.

2nd June 1896 (Northern Echo)

A WEARDALE MINER'S DEATH.
FATAL CARELESSNESS.

On Monday an inquiry into the death of **John Nattrass (67)**, miner, Daddry Shields, took place— before Mr Deputy-Coroner Badcook; Mr Plummer, H.M. Inspector of Mines; Mr S. Watson, manager of the Lead Company; and Mr J Hill, in Daddry Reading-room. —John Lonsdale, Side Head, miner and farmer, said he was working with Nattrass on Friday afternoon in Greenlaws mine. Witness saw a prop was wanted, but deceased was not willing. The bouse was being taken away, which slackened , the sides and the bad ground became visible, and he (witness) urged that the prop should be in, but deceased would

not consent. It waa their duty to have put it in. Witness could not do it without deceased's help. Witness continued to let away bouse into the hopper, and saw the fatal lump coming and cried "Nattrass, it's coming!" and then it fell, striking their light out. He was caught within the second portion himself and shouted for help till he got his leg clear, and he never saw deceased again.—George Watson, Side Head, said he heard the fall And went to the spot. He met Lonsdale coming up the bouse and was told Nattrass was buried. It took three hours and a half to get him out down the hopper, and he was dead. He was not careless in his work. Deceased was so much bruised by the fall that if he had been got out instantly he would have been dead.—Mr Plummer: Had you plenty timber?— Witness: Yes.—Was it dangerous?—Witness: Yes now, but not before.—Mr Paterson, a resident in St. John's, said a rumour was current a man had left the place where deceased was killed, as it was so dangerous.—The Coroner said he could not listen to rumours,—Mr Paterson (bridge inspector for the C.C.) said the man in question was working fot him who refused to work at the place.— Mr Plummer said he had known men leave a place that was perfectly safe. He had carefully inspected the place, and thought deceased alone to blame for not doing as his mate Lonsdale wanted him.—The Coroner and jury concurred, and a verdict of "Accidental death" was returned.

6th June 1896 (Hexham Courant)

WEARDALE

A MAN BURIED ALIVE

On Friday **John Nattrass**, a miner was buried by a fall of earth in the Daddry Shield lead mine, Weardale. He had gone to work about two o'clock, and the fall took place about five o'clock, when his partner gave alarm, Nattrass being then completely covered by earth. Every effort was made by a party of willing hands to rescue the poor fellow, but it was not till 7:30 that he was extracted and he was quite dead.

Deaths

At Eastgate, Weardale, 31st ult. aged 73, Ann widow of the late Thomas Moore.

In 1891, at the Cross Keys Inn, Ann Moore, widow, aged 68, and son Thomas, grocer & draper, aged 25.

At Daddry Shield, Weardale, 29th ult. aged 57, John Nattrass.

In 1841, at Windy Side, John Nattrass, lead miner, aged 30, his wife Ann (died 3rd quarter of 1848) aged 20, children Hannah 9, Ralph 7, Joseph 5, and John aged 3.

In 1851, at Windy Side, John Nattrass, widow, lead miner, aged 43 (died 1st quarter of 1855), children Hannah 19, Ralph, lead miner, aged 17, Joseph, lead miner, aged 14, John 12,? daughter 9, Elizabeth 7, and Cuthbert 3.

In 1861, at Side Foot, Mount Pleasant, Stanhope, John Nattrass, lead miner, aged 22, and his wife Isabella (Douglass, married 4th quarter of 1859 registered at Weardale) aged 20. Also in 1861, at Mount Pleasant, Cuthbert Nattrass, lead ore washer, aged 13, sister Ann 19, and nephew John 1 year.

In 1871, at High Wood Meadows, John Nattrass, lead miner, aged 31, his wife Isabella 30, and daughter Elizabeth A. 4

In 1881, at High Wood Meadows, John Nattrass, farmer, aged 42, his wife Isabella 40, children Elizabeth 14, and Sarah Jane 8.

In 1891, at Daddry Shield, John Nattrass, lead miner, aged 53, and his wife Isabella 50. In 1901, at Daddry Shield, Isabella Nattrass, widow, aged 60. Isabella Nattrass died 3rd quarter 1902, aged 62.

12th June 1896 (Northern Echo)

On Thursday, **Thomas English**, Lanehead, whilst at work in Boltsburn Mine, Rookhope, accidentally fired a shot in his hand, injuring him seriously about the head and face.

In 1841, at Cogley, St John's, Stanhope, John English, lead miner, aged 35, his wife Mary, 40, children, Edward 13, Mary 10, Ralph 8, Sarah 6, John 4, Thomas 2 and Ann 5.
John English died 4th quarter 1849, registered at Weardale.
In 1851, at Cogley Hall, Heathery Cleugh, Mary English, widow, aged 47, children, Edward, lead miner, aged 23, Sarah 16, John, lead miner, aged 14, Thomas, lead miner, aged 11, Ann 9, and grandson, John English 3.
Thomas English married Sarah Watson, 3rd quarter 1859, registered at Weardale.
In 1861, at Wellhope, Heathery Cleugh, Thomas English, lead miner, aged 21, his wife Sarah 21, and son, John 1,
In 1871, at Wellhope, Heathery Cleugh, Thomas English, lead miner & farmer, aged 31, his wife Sarah 31, children, John 11, Mary 9, Thomas 5, and Joseph aged 2.
In 1881, at Wellhope, Heathery Cleugh, Thomas English, lead miner, aged 41, his wife Sarah 41, children, John, lead miner, aged 21, Mary 19, Thomas 15, and Joseph 12.

Sarah English died 3rd quarter 1885, aged 45, registered at Weardale.

Thomas English married Margaret Featherstone 2nd quarter 1887, registered at Weardale.
In 1891, at Green Field, Heathery Cleugh, Thomas English, lead miner, aged 52, his wife Margaret 32, sons, Joseph, lead miner, aged 22, and Emerson Thompson aged 3.
Thomas English died 2nd quarter 1900, aged 61, registered at Weardale.

In 1901, at Westfall, Weardale, Margaret English, widow, aged 40, sons, Emerson t, lead miner, aged 13, Edward N 7, and Stanley 2.
In 1911, at Dyke House, Ireshopeburn, Margaret English, widow, aged 49, sons, Emerson Thompson, carter at Spar mines, aged 23, and Stanley aged 2.

13th June 1896 (Hexham Courant)

ALSTON
POLICE COURT

The only business before the court, which met on Friday, last, was the renewal of the license for the storage of explosives by the Vieille Montagne Zinc Co., Nenthead.

13th June 1896 (The North Cumberland Reformer)

ALSTON SCHOOL BOARD.—There were present on Saturday Messrs R. Elliot (chairman) and H. Bell, and T. W. Dickinson (clerk). As there were not sufficient members to form a quorum, the meeting was not held. The following are the average attendances at the schools for the past month;—

	Attendance	
	On Books	**Average.**
Nenthead	145	130
Nenthall	37	33
Tynehead	12	9
Garrigill	70	57
Leadgate	36	35
Alston (High)	108	91
Alston (National)	56	42
Alston (Infants)	85	66
	544	463

At the monthly Petty Sessions on Friday, the renewal of the licence for the storage of explosives by the Vieille Montague Zinc Co., Nenthead was granted.

NENTHEAD.

DEATH OF A NENTHEAD MAN IN AMERICA.

The sad news has recently been received of the death, at the premature age of 40, of Mr Thomas Stephenson, late of Nenthead, which occurred on the 11th of May last. His death was the result of an accident. Mr Stephenson left Nenthead in February, 1892, proceeding to Brandon, Manitoba, where he found employment at farm work. After staying there for upwards of a year he went to Oregon, and was engaged as a ranch man. His next shift was to Sparta, where he worked at mining. Owing to the mine being closed he removed to Baker City, and from thence to the place where the accident occurred, viz., Sturgill Bar. It appears he was engaged along with other men in running a deep open cut, the place being worked night and day, and he had just gone on for the night shift. He commenced to take down some dirt from near the top of the bank, using a ladder to stand on. He, had been working for about an hour, when without any warning the bank caved in and he was killed instantaneously. It took about half-an-hour to get the body out. The breast bone was broken and crushed in, and his body other- wise badly bruised. He was interred the following day. An account in a local paper states that deceased was highly respected, and wreaths were sent from various public bodies. Mr Stephenson intended to return to farm work the following week. The news has been received with regret in this place, as Mr Stephenson was highly respected while residing in the locality, and it appears he has been equally respected in the various places where he has taken up his abode. Much sympathy is felt for the relatives of the deceased.

Eden Valley Cemetery, Baker County, Oregon
www.findagrave.com

In 1881, at Pasture House, Nenthead, John Stephenson, lead miner & farmer of 23 acres, aged 51, his wife Elizabeth 51, children, Thomas, lead miner, aged 24, Margaret, dairymaid, aged 16, Elizabeth 14, and John 6.
In 1891, at Dykeheads, Nenthead, John Stephenson, lead miner, aged 61, his wife Elizabeth 61, children, Thomas, lead miner, aged 35, Elizabeth 24, and John, lead miner, aged 16. See 5th April 1884, and 9th May 1891

20th June 1896 (Hexham Courant)

ALSTON
DEATH OF CAPTAIN POLGLASE

It is with sincere regret that we chronicle the death of Captain James Polglase, manager of the Nentforce and Coanwood quarries. … On Monday, last he complained of pain in the chest and Dr Short was called in. On Tuesday morning he was no better, inflammation of the lungs accompanied by great weakness of the heart rendered the case a very bad one. … he succumbed to the complaint about half past seven on Wednesday night. … Born at Gremoe, Cornwall, in 1824, he spent the earlier years of his life in his native county and was connected with the mines at Camborne and Liskeard. In 1850, he emigrated to America and was manager of the Bruce Copper mines, Lake Superior. After several years spent abroad, he returned to England and managed tin mines at Bodmin in Cornwall, and other places. Subsequently he was manager of Great Laxey, Isle of Man, and Caldbeck Fells, in Cumberland. About 15 years ago he was appointed to the Green Hurth mines in the Alston District where he continued until the formation of the Nentforce Limestone and Coanwood Whinstone Quarry Companies about three years ago *(The Prospectus of the Coanwood Whinstone Company Ltd., stated in January 1894: "The directors have engaged the services of Capt., J. Polglase, of Hundy House, Alston, a mining and quarrying expert of 40 years' experience as manager; …")*. … The funeral, which is a public one, will take place today (Saturday) at three o'clock in the Alston cemetery. He leaves a widow and three daughters.

In 1861, at Bridge? Cottage, Bodmin, Cornwall, James Polglase, metallurgist & mineralogist, aged 37, his wife Jane V. 35, children Lydia O. 8, Annette J. 6, Adeline P. 2, and sister in law Lydia Oliver, governess, aged 37.
In 1871, at Nudge? Cottage, Bodmin, James Polglase, mining engineer, aged 49, his wife Jane 48, children Lydia 18, Annette 16, Adeline P. 12, and sister in law Lydia Olver, teacher, aged 55.
In 1881, at Camont Bridge, Penrith, James Polglase, mining engineer & assayer, aged 56, his wife Jane Vyvyan, aged 55, children Lydia Oliver 35, Annette Jane 22, and Adeline Pauline 20.
In 1891, at Green Hurth, Teesdale, James Polglase, lead mine manager, aged 63, his wife Jane V. 63, daughters, Lydia O. 32, Annette J. 29, and Adeline P. 26.
In 1901, at Hundy House, Alston, Jane Polglase, widow, aged 74, Lydia O., boarding house keeper, aged 37, Annette J., boarding house keeper, aged 35, Adeline P. fancy goods dealer shop, aged 33, and boarder Jane E Bainbridge, living on own means, aged 40.
Jane Polglase wife of James died 2nd October 1901.

27th June 1896 (The North Cumberland Reformer)

NENTHEAD

Technical Education.—The Nenthead Art Class is represented at the Exhibition held during the past week at Tullie House, Carlisle, under the auspices of the Technical Education Committee of the County Council. There are six exhibitors, whose work is generally of a very meritorious character. It comprises nine examples of drawing in light and shade. Joseph E. Beck has three exhibits, John James Atkinson two, and Jos. Heslop, Thomas Angus, William Atkinson, and John C. Holmes one each. The latter has obtained a certificate of merit.

27th June 1896 (North Cumberland Reformer)

Deaths

At Town Head, Alston, on the 25th inst., Mary relict of the late Thomas Lee, butcher, aged 70.

At Alston, on the 19th inst., Anne, wife of John Bright, aged 27 years.

11th July 1896 (North Cumberland Reformer)

ALSTON SCHOOL BOARD.

The monthly meeting of this Board was held on Saturday, the members present being Mr Elliott (chairman), Mr Rutherford, and Mr H. Bell, the clerk (Mr T. W. Dickinson), and the attendance officer (Mr N. Walton).

ATTENDANCE.

The monthly report was as follows

	On books	Average.
Nenthead	145	137
Nenthall	37	32
Tynehead	12	10
Garrigill	70	57
Leadgate	36	30
Alston (High)	111	90
Alston (National)	55	45
Alston (Infants)	85	69

A list of absentees from the Nenthead and the three Alston schools was presented, and it was resolved to take proceedings against them after the holidays.

ALSTON CONGREGATIONAL CHOIR TRIP.

On Saturday June 27th the Alston Congregational Church Choir had their annual excursion, Mr Robert Lee, King's Arms Hotel, undertaking their conveyance to Staward-le-Peel. The weather was fine. It was Staward annual pic-nic, held amid the ruins of an old Roman castle, which by the deep declivities that surround it, appears to have been an almost impregnable stronghold. The river Allen winds in and out among the rocks at a great depth below, and the wooded banks which stretch as far as the eye can see form as fine a piece of woodland scenery as can be wished for. The afternoon was mostly spent in rambling on the wooded slopes, gathering the honeysuckle, &c. which abound among the rich foliage that almost encloses the winding paths. The small Spa Well which bubbles up by the right side of the Allen (it having the same savour but not so strong as Gilsland Spa) was also visited. After this tea was had. There was also an efficient band, which after performing a nice selection of popular

music dropped into the merry polka, &e., when the light fantastic became the order of the day, the grace exhibited by the ladies especially showed that the art is not neglected in the dale, while numerous games by those who preferred them were quite as heartily engaged in. Most of the pic-nic people cleared off with the band before the Alstonians had arranged to end their enjoyment, so they filled up the remaining time by singing "Auld Lang Syne," and other songs. A farmhouse was found where lemonade &c., was procurable and where in the midst of the jokes that were prevalent a dish of salad and other dainties disappeared from the kitchen table, while the good woman served the drinks from the milk-house. Whether such jokes are included in the list that are supposed to go free on such occasions, the kind lady after discovery would undoubtedly be dubious. After, however, one of the most enjoyable trips that has been held, the party launched into the mist and hazes of Whitfield Fell homeward bound, arriving safe in the small hours of Sunday morning.

Deaths

At Clarghyll Head, Alston, on the 3rd inst., Nicholas Edgar, aged 91 years.

In 1881, Nicholas Edgar, farmer of 276 acres.

At The Raise, Alston, on the 5th inst., Sarah Norman, aged 83 years.

11th July 1896 (Hexham Herald)

ALSTON

The long looked for traction engine, which is to convey the mineral from the Nenthead mines to Alston Station has arrived at last. It reached Alston Station on Tuesday, and was lit up and taken to Nenthead on Wednesday along with two waggons, journeying by Clargill and Blagill. Some four or five waggons are to come, and if all goes straight the engine will soon be performing the journey twice a day. It is said that the Company are trying to arrange for the erection of a siding or depot at the Townhead for the purpose of unloading the mineral and reloading with coal. If this be so, the engine will travel the main road between Alston and Nenthead, and make the journey thrice a day. This will, of course, necessitate carts to carry the material from the depot to the station.

18th July 1896 (North Cumberland Reformer)

Deaths

At Alston, on the 13th inst., Margaret Ann, wife of W. R. Little, spirit merchant, aged 52 years.

18th July 1896 (Hexham Courant)

Marriages

At Alston Primitive Methodist Chapel, 12th inst. Thomas Gill of Clitheroe, to Mary Atkinson, Appleby.

In 1901, at Bruntley Syke, Alston, Thomas Gill, coalmine hewer, aged 34, his wife Mary 28, daughters Beatrice M 5, and Dorothy A 3.

In 1911, at Kings Arms Lane, Thomas Gill, coalmine hewer, aged 42, his wife Mary 38, children Beatrice May 15, Dorothy Annie 13, Thomas Norman 9, William 3, and Elsie 1.

Deaths

At Nenthead, 7th inst. aged 60, William Hudspeth (of the firm Hudspeth and Cowing).

In 1851, at Hillersdon Terrace, Edward Hudspeth, wood cutter, foreman, aged 39, born Hamsterly, his wife Hannah (Richardson, married 18th April 1831, Middleton) aged 40, born Middleton, children Elizabeth 20, born Middleton, Frances, dressmaker, aged 18, born Middleton, William, wood cutter, aged 15, born Middleton, and Edward 10, born Middleton.
In 1861, at Ivy Cottage, Nenthead, William B Hudspeth, millwright, aged 25, his wife Hannah (Armstrong, married 14th March 1858, Nenthead) aged 26, children Frances E. 2, and John E. 5 months.
In 1871, at Hill Top, Nenthead, William B Hudspeth, millwright, aged 35, his wife Hannah 36, children Frances Elizabeth 12, James Edward 10, and Thomas 9.
In 1881, at Hill Top, Nenthead, William Hudspeth, millwright, aged 45, his wife Hannah 46, children Frances E., dressmaker, aged 22, James E., joiner, aged 20, John 7, and niece Jane A. Armstrong, household assistant, aged 21.
In 1891, at Dirt Pot, Allenheads, William Bowman Hudspeth, widow, mechanical fitter, retired, aged 55, son Thomas, single, draper, aged 29, son in law John Cowing, grocer, married, aged 35, and daughter Frances E Cowing, married 32
See 31st January 1891, 27th June 1891, and 18th July 1896.

18th July 1896 (The North Cumberland Reformer)

NENTHEAD
NOTES AND NEWS.

One of the principal drawbacks connected with this place has been the want of steam power and the railway system. Being a distance of miles from a railway station, it can easily be imagined what disadvantages have to be contended against. At various times there have been rumours that the railways at Weardale and Alston were to be connected and the route has been several times surveyed, with an idea of continuing the line from Alston to Nenthead. Either scheme if adopted would be hailed with considerable delight by the residents, but as often as the hopes have been raised, just so often have they been dispelled; and it is very doubtful if these good things will ever come to pass. Passenger traffic is thus carried on under difficulties, and the same may be said in regard to the export and import of the place. Hundreds of tons of spelter ore have been carted away yearly; but the present company are making a new departure in the mode of conveyance. Steam power is to be utilised, but not on rails. A traction engine has been purchased. It arrived on Wednesday, and the people were naturally anxious to see it (This paragraph ought to have been inserted last week, but was misdirected, and arrived too late). The engine has been built by Messrs Fowler, of Leeds and has been exhibited at the Royal Show. The driving wheels measure 20 inches and stand 7 feet high. It can be worked up to 50 horse power. It is calculated that a considerable saving in the cost of carriage will be effected. The route, until other arrangements are made, will be by Blagill and Clarghill a distance of about 7½
miles. On Wednesday the journey was completed in 2 hours and 15 minutes. The Road Surveyor accompanied them the first journey, and the road and bridges seem to have stood the test very satisfactorily. On Thursday the trucks were loaded with about 16 tons of spelter, and conveyed to Alston. Should the experiment answer, it will make many changes in the course of time.

25th July 1896 (Hexham Courant)
Deaths
At Alston, Physic Hall, 18th inst. aged 59, Thomas Carr.
In 1881, at 5 Front Street, Alston, Thomas Carr, provisions dealer, aged 43, his wife Margaret 43, and visitor Hannah Stout, married, housekeeper, aged 41. In 1891, at Physic Hall, Thomas Carr, retired grocer, aged 53, and his wife Margaret 53.
At Alston, West View, (the residence of her daughter Mrs M. Tindle) 22nd inst aged 87, Mary widow of Joseph Walton, registrar.
In 1891, at Town Hall, Alston, Mary Walton, widow, aged 81, son Nathaniel, relieving officer, and registrar, aged 44, and domestic servant Elizabeth Irving aged 29.
See 4th November 1871, 17th September 1887, & 23rd March 1895.

25th July 1896 (The North Cumberland Reformer)

DILAPIDATED PROPERTY.

Mr DOWSON drew attention to the old house on the Butts, the slates were many of them ready to fall, and a chimney as well. — The CHAIRMAN thought the Surveyor had got instructions to have all the dangerous parts removed, both on the Butts and the other house at Nenthead.—The SURVEYOR said he had not, and was instructed to have this done forthwith.

THE NENTHEAD TRACTION ENGINE.

The SURVEYOR said that on the 15th inst. the traction engine had commenced running on the road from Nenthead to Alston Station. There had been no damage up to the present, it had crushed a good part of the road material in, but next month there might be a great deal, and he should like instructions how to proceed. He had kept a separate account of the sum spent on the road in the last month.—Mr MILLICAN: Including road metal?—The SURVEYOR: Yes.—The CHAIRMAN said that he had no wish to put any hindrance in the way of the Company using the road, but the Surveyor should keep an account of all extraordinary expense caused by the engine until some arrangement had been come to. He found the company would be quite amenable to reason, and both willing to contribute and to keep down damage. (Applause.) An arrangement would be come to with regard to the county road, and they could deal with the district road in the same way.

MEDICAL OFFICER'S REPORT.

The quarterty report of the Medical Officer of No. 1 District showed that 6 deaths had been registered, 4 females and 2 males. The births numbered 15, the death rate for the quarter being 3.5, or 14 per 1000 per annum, and the birth rate 8.7. The district had been healthy, and a few nuisances which existed would be reported by the Inspector.

A LONGSTANDING COMPLAINT.

The Inspector's report was then read. He complained of an ashpit in Kate's Lane, which was so full of ashes and other filth as to be a public nuisance. One of the parties concerned declined to pay for the cart man, alleging that she was unable to do so.—Mr WARD: Can the owners be compelled to do it?—The CHAIRMAN: No, if the tenants create a nuisance they must remove it. —Mr PICKERING moved that the parties have notice, and this was carried.—The Inspector also reported a privy at Hundy Head as being in a filthy condition, and the tenants declined to clean it.—Mrs CORE said that the agent had let part of

the premises to some tramps, who had made the place referred to filthy, and left it so.—The CHAIRMAN: Then he is responsible as well as the others.—It was agreed to give notice.—He also reported an obstruction in the Mill Burn near the cottage occupied by Messrs Tatters. The cellars were frequently flooded with filthy water from the Burn, causing serious damage to property besides being injurious to health.—This had been reported on March 28th.—The CLERK said that at 3 o'clock on Wednesday morning with the river a little in flood, the occupants were awakened by the rush of water into the cellar, and found it a foot deep, and it had since been flooded to the depth of 18 inches. Unless something was done they would be obliged to leave the house.—Mrs CORE: Is it the fault of the sewer or of the cellar?—The CLERK: Of the sewer. It was stopped before, and we got out a quantity of old tins, wire, and as much cocoa nut matting as would have covered this floor.—Mr J. R. WALTON: It is a great shame.—Mr DOWSON: And will be continued. People put all their refuse on the Burn Bank.—Dr. CARSON: You will not cure it until ashpits are provided. People have no place to put their refuse.—The CHAIRMAN: I thought the Burn Bank was closed?—Dr CARSON: They go higher up and deposit slaughter house refuse, old wall paper, and rubbish of all kinds. A suggestion is made to cover the Burn up, but unless ventilation is provided for, the sewer gas would cause a greater nuisance still.—The CHAIRMAN: It is a matter we have always with us. I must confess I have fault to find with the Alston people. A great deal of trouble was taken to find a refuse depot, and they abused it. They do not assist us to improve the insanitary condition of the place. The only remedy I can see is to put gratings over the openings. — The INSPECTOR: Is it my duty to attend to these grates?— The SURVEYOR: My father put one in, and it was torn out.—Mr MILLICAN: The roadmen should attend to them. It was arranged that the grate the Surveyor mentions should be cleaned once a week, but the men did not go once a month, and it got stopped in a flood and had to be torn out.—Dr CARSON: I believe the Mill Burn is a public sewer, and if you put in grates and they are choked you will be responsible for any damage caused.—The CHAIRMAN: How do you make it a public sewer?—Mr HOLMES: It is a mill race, the public sewer is down the middle of the street.—Dr CARSON: There are conveniences erected over it.—The Chairman: That is an encroachment. We authorise no one to put anything in.—The CLERK: The County Council use the Burn as well, so they are concerned.—Mrs CORE: You said it was allowed to be a public sewer, and must be maintained.—The CHAIRMAN: I was alluding to the sewer made by the Highway Authority.—Mr HOLMES: Does not a mill race belong to the owners?— Mrs CORE: What right have we to put grates on private property? —Mr LATTIMER: If it is private property can we not compel the owners to do something? —Mr PICKERING: I move that this be adjourned.—On the understanding that the Inspector attend to the existing nuisance near Messrs Tatter's premises, this motion was agreed to.

25th July 1896 (Hexham Herald)

ALSTON RURAL DISTRICT COUNCIL

The surveyor asked for instructions with regard to damage done on the road by the Vieille Montagne Zinc Co.'s traction engine travelling daily from Nenthead by Blagill and Clarghyl, to Alston Station. The cost of repairing damages up to present is £3 13s 6d. The chairman suggested that the surveyor be instructed

to repair all damages of an extraordinary nature and keep a separate account of them. This was agreed to.

11th August 1896. (London Gazette)

The Companies Acts, 1862 to 1890.
Company Limited by Shares.
SPECIAL RESOLUTIONS OF THE NENTHEAD AND TYNEDALE LEAD AND ZINC COMPANY LIMITED. PASSED 17TH JULY 1896. CONFIRMED 4TH AUGUST 1896.

AT an Extraordinary General Meeting of the Members of the above named Company, duly convened and held at 4, St. Nicholas' buildings, Newcastle upon Tyne, on the 17th day of July, 1896, the following Special Resolutions were duly passed, and at a subsequent Extraordinary General Meeting of the Members of the said Company, also duly convened and held at the same place, on the 4th day of August, 1896 the following Special Resolutions were duly confirmed: —

1. "That the Nenthead and Tynedale Lead and Zinc Company Limited be wound up voluntarily.
2. " That Mr. W. M. Henzell be appointed Liquidator for the purpose of winding up the affairs of the Company, and that the winding up be conducted by the Liquidator subject to the control of the present Directors as a Committee of Inspection, and they shall have power to fix the Liquidator's remuneration, and two of such Committee shall form a quorum."

J. C. SWAN, Chairman.

22nd August 1896 (Hexham Herald)

ALSTON RURAL DISTRICT COUNCIL

The Medical Officers report for the quarter ending 30th June for No. 2 district was read. During the period three deaths had occurred of which two had been children under one year. This gives a death rate of 1.79 per 1000. Influenza prevailed during the early part of the quarter causing one death. The district appears to be now completely exempt. Cases of Whooping Cough have occurred in Nenthead and Garrigill being imported into the former place from Edinburgh and in the latter from Newcastle. One death has resulted in a child of 8 months old. The birth rate for the quarter is 6.56 per 1000, the birth returns showing 7 males and 4 females.

22nd August 1896 (The North Cumberland Reformer)

ALSTON

The Belgian Company are developing their means of transit from Nenthead to Alston with considerable vigour. The traction engine brings its loads of ore to Alston station twice a day, but the circuitous route which has to be taken (by Fore Shield, Blagill, the Loaning, and Lowbyres) consumes so much time that it is said the company propose to establish a depot at the Town Head behind the Primitive Methodist Chapel, whence the produce will be carted through the town to the station. This shortening of the distance will probably enable the engine to make three or more journeys *per diem*, and save the expense of road repairing which, judging from the holes already made in soft places about Crook Bank, Fore Shield, and the Loaning, must be considerable.

THE TRACTION ENGINE AND THE ROADS.

The SURVEYOR reported that the cost of repairs to the district roads, caused by the traction engine between Alston and Nenthead was £9 13s. He had had great difficulty in getting carts to do the carting, owing to hay time, but he had done his best to keep them right.—Mr LATTIMER said some parts were scarcely passible a little out of Nenthead. If someone should be hurt in the dark, how about the expense then? Would the Council be responsible? He thought a light should be placed at the most dangerous places. —Mr HARRISON also complained of the state of the road.—The SURVEYOR asked if Councillor Lattimer could prove that the roads had not been level at dark. The roadman had put it right always as soon as the engine past.—Mr HARRISON asked who had to do with the district roads?—The CHAIRMAN: The County Road Surveyor; and our own Surveyor, as he would explain again, had instructions to keep the road in repair. He had been doing his best, as they had heard.

MR H. KEARTON'S APPLICATION.

Mr HUGH KEARTON made application to join a contemplated sewer from Mr Shaw's property at Hundy Head with the sewer which it is proposed to put in at Vicarage Lane.—Mrs CORE: Was it not passed to put the sewer in at Vicarage Lane?—Mr SIMPSON: It was passed but never done.—The CLERK read the minute on the subject.—Mr SIMPSON moved that the sewer be made, and that leave be granted to connect Mr Shaw's sewer with it, and it was carried.

NUISANCES.

The SANITARY INSPECIOR reported that the nuisances at Kate's Lane, Hundy Head, and Mill Burn had been removed. At the latter place grates had been put in to prevent further stoppages.

MEDICAL OFFICER'S REPORT FOR NO. 2 DISTRICT.

The report for the second quarter is a most satisfactory one. During the period three deaths have occurred, of which two have been of children under one year. This gives a death rate of 1.79 per 1,000. Influenza prevailed during the early part of the quarter, causing one death. The district appears to be now completely exempt. Cases of whooping cough have occurred in Nenthead and Garrigill, being imported into the former place from Edinburgh, and into the latter from Newcastle. One death has resulted in a child eight months old. There is no fresh matter of sanitary importance to bring to your notice, and I consider the district is in a fairly satisfactory state. The birth rate for the quarter is 6.56 per 1,000, the birth returns showing 7 males and 4 females.—The report was adopted.—Mr SIMPSON asked if the report respecting the water mains bad been brought in.—The CHAIRMAN said it had not.—The INSPECTOR said he had the report.—The CLERK asked if he had had the assistance of the Works Committee?—The INSPECTOR: No. —The CLERK said it could not be presented till this had been done.—It was understood that this would be attended to.

Deaths.

WILKINSON.– At Nenthead, on the 2nd inst., Hannah Wilkinson, relict of the late Thos. Wilkinson, blacksmith, aged 79 years.

In 1851, at Hill Top, Thomas Wilkinson, blacksmith, aged 34, born Garrigill, his wife Hannah (Parmley married at St John, Garrigill 23rd January 1840?), aged 34, born Park, Alston, children Mary 10, Jonathan 8, Henry 6, John 4, and Elizabeth 1.

In 1861, at Hill Top, Nenthead, Thomas Wilkinson, Blacksmith, aged 44, his wife Hannah 44, children, Jonathan, lead miner, aged 18, Henry, lead miner aged 16, John, lead ore washer, aged 14, Elizabeth 11, and Thomas 8.
In 1871, at Hill Top, Nenthead, Thomas Wilkinson, Blacksmith at Smelt Mill, aged 54, his wife Hannah 54, sons John, lead miner, aged 24, and Thomas, lead miner aged 18.
In 1881, at Garrigill Gate, Thomas Wilkinson, blacksmith, aged 64, and his wife Hannah aged 64.
Thomas Wilkinson snr. died 2nd May 1890, aged 73.
See 14th May 1869, 9th December 1871, 7th July 1877

28th August 1896 (Northern Echo)

ROOKHOPE MINERS ON STRIKE

For many months back the miners of Rookhope have been earning a mere pittance, the average for the last month being 11s 6d per man per week. Leaving out a partnership which had done better than the others the average was 9s 2½d per man per week, and this in highly dangerous and unhealthy lead mines. The men came out on strike on Tuesday, declaring that they cannot possibly live on so small a wage.

29th August 1896 (North Cumberland Reformer)

Deaths

At Bank Lane, Alston, on the 22nd inst., John Pattinson, builder, aged 60 years.
At Kings Arms Lane, Alston, on the 24th inst., John Lowe, lead miner, aged 64 years.
See 21st August 1841, 4th June 1852, 17th November 1868, 28th June 1873, 25th March 1876, 27th May 1882, 20th June 1885, 4th April 1891, and 3rd February 1894.

5th September 1896 (Hexham Courant)

INTERVIEW WITH MR J MILLICAN

Among Alston men who have made their mark, and have risen from comparatively humble circumstances, to positions of affluence and of honour, Mr J Millican, formerly of Tynehead is a worthy example. It is about 18 years since Mr Millican left his native place for Queensland, and since that time has been closely identified with the mining industries of that country. He is junior partner in the firm of Messrs E D Miles & Co., mining agents of Charters Towers, and has been twice Mayor of that town. Mr Millican is at present on a visit to this country, partly taking a holiday, and partly for the object of making known the mineral resources of his adopted country. With this in view he is travelling in the United Kingdom, and has visited, and will visit, various places on the continent of Europe. From an account of an interview which the "Special Commissioner," of the "British Australasian," had with Mr Millican in London, and which appeared in the columns of that paper, we glean a few items relative to the mining industry of Queensland. Speaking of the condition of the industry when he left six months ago, Mr Millican said things were looking remarkably well. Generally everybody in Charters Town District had the utmost confidence in the future. When he first went the deepest mines in the district were not more than 300 to 400 feet deep, now the mills United and the New Brilliant Extended were down to 2,400 feet. He did not think there was the slightest fear about the deep

level mining in Charters Towers being a success. Most of the shafts had been sunk with local capital, but Mr Millican adds, "I am sure the richness of our colony only wants to be more widely known to be fully appreciated by English capitalists. Last year we crushed 249,519 tons of stone for 251,577 ozs., of gold. We declared £248,448 2s 10d in dividends, the calls during that period being £92,710 13s 6d, which I think you will agree with me is not by any means unsatisfactory. But bear in mind that this is not the biggest yield by any means. In 1892 for instance the return was 259,304 ozs., the dividends paid being £341,947, while the calls were £115,508. Let me tell you however, that there was more prospecting done in new ground during the past year than for some time previously, and there is a considerable area of desirable ground awaiting the advent of capital to work it."

See 30th May 1866

5th September 1896 (North Cumberland Reformer)

ALSTON SCHOOL BOARD

Held on Saturday. Present:—Messrs R. Elliot (chairman), T. Harrison, J. Rutherford, H. Bell, and H. Walton.—The Inspector's report for Tynehead School was read, which showed the school to be creditably conducted. The grant amounted to £27 1s 6d. There will be no inspection in 1897.—A short discussion took place respecting home lessons for the children attending the Nenthead School, several parents having expressed their disapproval of the system.—Mr HARRISON moved that the clerk write to the master that the question of night lessons had been before the Board and asking him to modify them, complaints having been made by parents.—The attendance was reported as follows:

	On books.	Average.
Nenthead, open 2 weeks	148	127
Nenthall , open 2 weeks	38	32
Tynehead, open 2 weeks	11	7
Garrigill, open 3 weeks	75	48

Leadgate, Alston High, National, and Infants' School having only been opened one week no returns were made.

ALSTON BOARD OF GUARDIANS.

The fortnightly meeting of this Board was held on Saturday, the members present being Messrs H. Walton (in the chair), G. Pickering. J. R. Walton, A. Bolton, H. Dowson, W. Ward, T. Harrison, W. Holmes, J, Nevin, J. Millican, and Mrs Core, the Clerk (Mr T. W. Dickinson), the Relieving Officer (Mr W. Walton), the Rate Collector (Mr Bell), and the Workhouse Master (Mr Dalton).

THE MEDICAL OFFICERSHIP OF NO. 2 DISTRICT.

The CLERK reported that he had received no applications for the post of Medical Officer and Public Vaccinator for No. 2 District.—It was decided to postpone the appointment for a fortnight. —A letter from the Local Government Board drew attention to the appointment by the Board of a deputy to perform the duties of Dr. Masterton, of No. 2 District, and pointed out that the Board had no legal power to appoint such deputy, unless an application was made by such Medical Officer.—Mr MILLICAN: Dr. Short has been acting as deputy.—The CLERK: Yes: but the Board had no power to appoint him. The only thing we can do is to explain that at the time the deputy was appointed, Dr. Masterton was

not in a position to appoint one himself.—Mr PICKERING moved that this be done, and the motion was carried.

PRIMITIVE METHODIST CHAPEL. —On Sunday Mr Scot, of Harwood, preached twice in the Primitive Methodist Chapel, when collections were taken in aid of the choir fund.

ON Friday afternoon a trip from the east coast brought 488 excursionists to Alston. They enjoyed themselves amazingly, and the quantity of heather and rowan berries carried away was, as Dominie Sampson would have said, "prodigious." If this goes on rowan tree raising may become a profitable side branch of farming in the Alston district. Of heather the natural supply may be expected to meet the demand for some time to come.

12th September 1896 (Hexham Courant)

Deaths

At Free, Natal, 31st July last, aged 26, suddenly, **Ernest Millican**, formerly of The Grove, Alston.

In 1861, at Sandgate South, Penrith, John G. Millican, attorneys, articled clerk, aged 19, was boarding with Thomas Hall (shoe maker) and family.
In 1871, at The Grove, John G Millican, attorney & solicitor, aged 29, his wife Louisa J. (Stagg, married 21st July 1868) aged 27, son Ernest 1, domestic servant Naomi Pickering aged 38, and nurse, & domestic servant Ann Walton aged 23. In 1881, at Battle Hill, Hexham, John Hyslop, schoolmaster, aged 55, his wife Ann 52, son John A. 11, boarder Ernest Millican 11, and domestic servant Isabella Laing aged 19.
In 1881, at The Grove, John G. Millican, solicitor, aged 39, his wife Louisa J. 37, children Lilian 9, Alice 7, and domestic servant Elizabeth Todd aged 19.
In 1891, at Bank Top, Alston, John G Millican, married, solicitor, (unemployed) aged 49, children Ernest, articled clerk in solicitor's office, aged 21, Lilian 19, and Alice 17. See 24th August 1878, & 23rd April 1898

12th September 1896 (Hexham Herald)

WEARDALE

The lead miners of Rookhope on Saturday attended the Newhouse Offices of the Weardale Lead Company, who offered the men the same terms they struck against, which were refused, and no settlement was come to.

19th September 1896 (The North Cumberland Reformer)

ALSTON DISTRICT COUNCIL

MEDICAL OFFICER.

Dr. E. W. Short was appointed medical officer and public vaccinator for No. 2 district in succession to Dr. Masterton, on the motion of Mr PICKERING, seconded by Mr BOLTON.

ANOTHER DANGEROUS HOUSE.

The INSPECTOR reported that the north end of a house in the Market Place, occupied by Mr Phillipson, was in a dangerous condition.—Mr SIMPSON intimated that Mr Phillipson had arranged to have the house repaired, and the Council agreed to take no action.

BURIAL BOARD FOR NENTHEAD.

A resolution in favour of adopting the Burials Act having been passed at a ward meeting at Nenthead, the Council agreed that the committee should be

appointed to form the Burial Board, the four members representing the ward being included amongst them. The members of the committee are Councillors T. Harrison, W. Holmes, A. Bolton, T. Lattimer, Messrs R. Bell, J. Waites, J. Spark, W. Sinclair, and W. Thompson. The committee will meet to discuss the matter and report thereon to the next meeting of the Council, whose clerk will have to be present at the first meeting.

A petition was laid before the Council signed by several of the inhabitants of West Nenthead, with regard to a privy that was built some twenty-five years ago by the late London Lead Company for their workmen, and has still been in use by the public until a few weeks ago. It appears a gentleman having bought a piece of land adjoining, lays claim to the privy as being part of the plot, and has taken it down and appropriated the stones for another purpose. The petitioners, therefore, approach the Council to see if they can afford them any redress for the summary manner they have been deprived of this accommodation. The Council consider that they have no jurisdiction, and it is for the petitioners to prove their claim. If this cannot be done, the Sanitary Inspector has received instructions to inspect the neighbourhood, and report its requirements to the next meeting.

26th September 1896 (North Cumberland Reformer)

NENTHEAD. AGRICULTURAL SHOW.

The twenty-first annual exhibition of cattle, horses, sheep, shepherds' dogs, and pigs was held on Saturday on the usual ground. The day was not one of the most favourable, heavy showers falling at intervals, but the field is well sheltered, and the attendance was very good under the circumstances. The entries in the various classes were remarkably full, and all classes—except whiteface sheep—showed an advance on the previous year Of the shorthorns there were 46 entries, and it is difficult to speak too highly of the quality of the exhibits. Considering the elevated nature of the district the whole class was really remarkably good, and would have done credit to any local show in the kingdom. Bulls were not strongly represented, but the class comprised some useful looking animals. Here the Hudgill herd was well to the front as usual, Mrs Bright taking first honours in all the three classes. The cow and heifer classes evoked a much larger competition, and it is safe to say that there was scarcely an inferior animal amongst them. The Dyke Heads representatives were most successful, and Mr Moffat also secured the special prize given by the Society for the best animal in the cattle classes with a remarkably smart heifer under two years old. Galloways are not a strong feature at this show, only two classes being allotted to them in conjunction with crossbred cattle. Now that they seem to be coming more into favour in the north at least, it might be a question for the management whether they could not offer a little more inducement to breeders of Galloways to compete. Of horses, as might be anticipated in a district where the plough has practically no existence, ponies were the pick of the classes, and considerable amount of interest was shown in the open competition for ponies under 14½ hands. Mr Foster, of West Allendale, whose representative holds an unbeaten record for the year, was again placed first, but some considerable time was given to deliberation by the judge before announcing his decision. It is fair to say that it met with the approval of the company generally, although a good many were inclined to favour the recipient of the second ticket. Leicester's, as remarked above, showed a slight falling off, and the blackfaced,

though strong in numbers, were not in the opinion of some regular frequenters of this show, equal in quality to those of previous shows. These ebbs and flows, however, of particular classes, are incident to all shows. Taken all round a better show has seldom been held at Nenthead. It has, by the way, attained its majority, this being the twenty-first exhibition, and certainly shows no diminution in interest and attraction Dinner was provided as usual by Mr Emmerson Peart at the band room to which, at the conclusion of the judging shortly after four, the company adjourned. …

3rd October 1896 (The North Cumberland Reformer)

ALSTON BOARD OF GUARDIANS.

The fortnightly meeting of this Board was held on Saturday, the members present being Mr Councillor Richardson (chairman), Messrs H. Walton. J. R. Walton, T. Harrison. H. Dowson. J. Nevin, W. Ward, and W. Holmes, the clerk (Mr T. W. Dickinson), the Relieving Officer (Mr N. Walton). the Rate Collector (Mr H. Bell), and the Workhouse Master (Mr Dalton).—The CLERK read a letter from the Local Government Board intimating that on the production of proper vouchers from the auditor the Board would sanction the expenditure incurred in connection with the special vaccination period, and also that incurred during the period during which Dr. Short acted as deputy medical officer in place of Dr. Masterson.—The case of a deaf and dumb boy, who has been placed in an Institution at Newcastle, was referred to. The boy has been seven years in the Institution and is now 14 years of age. It was pointed out that if he was allowed to remain some time longer he might acquire some trade which would enable him to earn a living, whereas if brought away at present he would probably become a permanent inmate of the Workhouse. No action was therefore taken.—The MASTER reported that a girl who had been boarded out had come to pay a visit over the week-end. She was looking well and happy. General satisfaction was expressed at the result.—The Master's report showed 16 inmates in the house against 13 last year, vagrants relieved 30; imbeciles in the workhouse 4, inmates in the asylum 9.

SCHOOL BOARD

The monthly meeting of this Board was held on Saturday, the members present being Messrs T. Harrison (in the Chair), H. Walton, and H. Bell, the clerk (Mr T. W. Dickinson), and the attendance officer (Mr N. Walton). An application by Mr Petty, schoolmaster at Nenthead, for an increase of Salary, was discussed, and left over till next meeting.

	Attendance	
	On Books	**Average.**
Nenthead	151	132
Nenthall	34	30

Alston (Infants)	64	52
Alston (High)	113	104
	545	470

VOLUNTEER CUP SHOOTING.

The 36th annual prize shooting by efficient members of the Alston Rifle Volunteer Corps took place at Skelgill range on Friday and Saturday. The conditions were 200 and 500 yards, seven shots at each distance. The cup for the Alston section was won by Private J. Bell, with a score of 58; the cup for the Nenthead section was won by Private W. Hetherington, with a score of 35. A handicap was also shot, the chief prizes going to Private Dowson, Private Hodgson, Private Hind, Lance-Corporal Nixon. Private Lee, Private Armstrong, Lance-Corporal Tatters, Private Bell, Private Scott, Corporal Henderson, and Private Snowden.

The Alston Cup was won last year by Pte. W. Lee, it being the first time of shooting for the cup. Nenthead Cup was won last year by Lance-Sergt. T. Milburn.

On the Saturday previous the recruits shot for prizes, Pte. T. Kearton being the best with 24 points at 200 yards, seven shots, taking 1st prize of 10s., the other prize-winners being Pte. J. Armstrong and Pte. T. Martin, 5s., each; Pte. J. Robinson. Pte T. Cousins, and Pte. F. Calvert, 2s 6d each; Pte. R. Bell and Pte. D. Moore, divided 2s 6d. We understand that arrangements have been made whereby Sergt. Instructor N. Blezard will remain at Alston, and not have to leave, as was expected some time ago.

FRIENDLY SOCIETY TRIP.—On Thursday, through the kindness of the Misses James, of Clarghyll Hall, the members of the Kirkhaugh Branch of the Young Men's Friendly Society were given a trip to the Roman Wall and Hexham. Leaving Alston in the morning they travelled by rail to Haltwhistle, thence going by the Roman Wall to Bardon Mill. Descriptive lectures and explanations were given on the route by Miss James. Joining the train at Bardon Mill, they proceeded to Hexham and inspected the fine old Abbey, after which they were entertained to tea. The weather being fine, a most enjoyable day was spent.

SUDDEN DEATH.—We regret to announce the sudden death of Mrs Atkinson, widow of the late Joseph Atkinson, Middle Farm, which occurred on Thursday. Mrs Atkinson had been spending the day with her brother, Mr Walton, at Annatwalls, and was being driven home by her son, Mr W. Atkinson, when illness commenced, and about an hour after their arrival at home she died before medical aid could be procured. Deceased was in the 77th year of her age, and death was due to heart disease.

10th October 1896 (Hexham Herald)

dered that notices be served on the owners to provide proper accommodation.

17th October 1896 (The North Cumberland Reformer)

ALSTON RURAL DISTRICT COUNCIL

The third quarterly report of the Medical Officer of No. 2 District was read, and stated that the health and sanitary condition of the district continued satisfactory. He did not think there had ever been so little sickness prevalent. No infectious or contagious disease had appeared, and with regard to this, he

congratulated the Council on having adopted the Contagious Diseases Notification Act, which would confer an inestimable boon on the inhabitants, besides giving him facilities for forming an accurate opinion of the state of the district. There had been a few cases of diarrhoea, but not of a serious nature. The births and deaths during the quarter had been equal, the rate being 3.58 per 1000.

AN UNDESIRABLE STATE OF THINGS.

The Inspector farther reported that five cottages and one lodging house at West Nenthead, the property of four owners, were entirely without privy or ashpit accommodation, and the result was a nuisance in the field through which the water supply flowed.—The CHAIRMAN: I think we should give notice.— Mr MILLICAN: Have the owners land on which to provide the necessary accommodation.—The CHAIRMAN: They must obtain it.—Mr MILLICAN: There would be no excuse if they had the land.—Mr LATTIMER understood the difficulty was owing to the removal of the existing accommodation by a person who claimed to have bought the land on which it stood.—The Chairman: That is for the other owners to look after.—Mr PICKERING: I rather think he did purchase the land on which the privy stood, but as far as he is concerned, he is willing to allow the public to use it.—The Chairman: I suppose we are all agreed that notices must be served. —The motion was adopted.

WATER SUPPLY.

An application to lay a water pipe across the road at Dykeheads to supply some new farm buildings was granted on the motion of Mr Harmon.

A DANGEROUS FOOTBRIDGE.

Mr W. WARD drew the attention of the Council to the state of the footbridge over the low part of Nattrass Gill. Many of the short cross boards were completely rotten and had given way, leaving open spaces where passers over might slip through. The cost would only be a few shillings. He did not anticipate that the Alston members would offer any opposition, as one-half the bridge was in Alston Ward, and the other half in Garrigill Ward. He moved that the Surveyor be instructed to get the work done.—Mr MILLICAN in seconding the motion, remarked that he quite agreed with Mr Ward, except the latter part of his speech, as if the Alston people were not wishful to help their neighbours and the country generally.—The SURVEYOR said the bridge had never been taken over by the Council.—Mr WARD: It is an acknowledged public footpath, and must belong to the Council.— The motion was then carried.

HIGHWAYS.

The SURVEYOR, in his report, asked permission of the Council to put in a new culvert, about 60 yards in length, between the Hexham road at Loaning Foot House, and the Hudgill Burn road at Mount Healey. The existing culvert had been crushed by the traction engine, and the water flowing over the road was damaging it considerably.—Mr PICKERING: A stitch in time saves nine. I move that it be done.—Mr BOLTON: I second it.—Mr LATTIMER: Should we not have an estimate of the cost ?—The CHAIRMAN: We have no discretion in a matter of this kind. We are responsible for the maintenance of the roads, and the work must be done, whether it costs a penny or a thousand pounds. When we undertake any new work, then it is necessary to have an estimate.—Mr DOWSON: Every day increases the amount of damage.—Mr H. WALTON: Why more now than before?—The CHAIRMAN: Because the culvert is crushed in, the Nenthead engine has been along the road.—The motion was carried.

THE TRACTION ENGINE AND THE ROADS,

Mr H, DOWSON said he would like to draw attention to a matter of great importance whether they considered it so or not. Great complaints had been made during the last three or four weeks about the way the engine was using the roads. It kept always to the one track, pressing up the road on each side and in the centre. When a loaded cart or vehicle met the engine, they had great difficulty in getting past, especially with hay. He held that other people had as much right to the road as the Nenthead engine, and he thought they should be instructed to draw to one side, and allow a reasonable portion of the road for others to pass on. It would also be better for the road if the track was varied. He moved that they he asked to do this.—The CHAIRMAN: You are not dealing with the main roads, I presume.—Mr DOWSON: It travels on both.—The CHAIRMAN: If any person is obstructed in using the road, they have their remedy. You are opening a wide question, and it would have been better to give notice. I have heard no complaints, nor have any been brought formally before the Council.—Mr DOWSON: There have been complaints to members.—The CHAIRMAN: They should be brought in a regular manner.—Mr DOWSON: I think it is a member's duty to bring these matters forward when they are brought to his notice.—The CHAIRMAN: But in a regular manner.—Mr H. WALTON: I assume the great evil is on the main road. —The CHAIRMAN: The Highway Committee of the County Council is competent to deal with that.—Mr HARRISON: We had better leave the matter alone for more reasons than one. The road at some places near Blagill, for instance, is too narrow to allow a load of hay to pass the engine.—The CHAIRMAN intimated that the road there would be widened. He expressed the opinion that the Council should not do anything to place an obstacle in the way of the development of an industry from which the district was deriving great benefit.—Mr PICKERING remarked that it was well the matter had been brought forward, as the Council had thereby got some information it might not otherwise have got. He thought it was the duty of any Councillor receiving a complaint to bring the matter before the Council and let the latter decide.—The matter then dropped.

THE STEAM ROLLER.

Mr LATTIMER said that some time ago the Council sent a requisition to the County Council asking that the steam roller be sent to their roads. The traction engine was having a serious effect, and had necessitated the putting on of large stones, and if the steam roller could be brought to level them down they would have a better road. Could the Chairman give them any information as to whether it would be coming?—The CHAIRMAN: You are dealing with me in a different capacity from what I am here. But I may inform you that there is not the shadow of a shade of a chance of its coming. (Laughter.) We are anxious, as I said before, to put no obstacle in the way of the development of the industry of the district. Cyclists, and drivers of vehicles, and what we may call the upper ten, must waive their privileges for a time.

VICARAGE LANE.

The CLERK drew attention to the Vicarage Lane. Since the Council got the sewer laid down it was in a most disgraceful state, and not safe after dark. Nothing had been done since the sewer was laid down to reform the surface.—The CHAIRMAN: Is it the work of the Sanitary Inspector that has left the lane in such a state?—The CLERK: Yes.—The CHAIRMAN: Then I think the best way will be to give him notice to put it in order to the satisfaction of the Surveyor.—

Mr PICKERING: I fancy the Surveyor will have to do it. He might as well do it at once.—The SURVEYOR: We have stones to do it with.—Mr PICKERING: I move the Surveyor be instructed to do it.—Mr NEVIN seconded, and the Surveyor said it should be done the following week.

EVENING CLASSES.—The evening classes conducted at the High School in former winters will be recommenced on Tuesday by Mr Core if a sufficient number of pupils is forthcoming. The subjects will be commercial arithmetic, mensuration, human physiology, and geography. It is to be hoped that the young people will take this opportunity of improvement offered to them. The charge is small and within the reach of all. Mr Core will attend at the school on Monday night to take the names of pupils.

24th October 1896 (Hexham Herald)

Marriages

WEARDALE

Much interest is centred in the present visit of the Weardale Lead Company's directors from London to the dale, accompanied by Mr De Bock Porter of the Ecclesiastical Commission, Whitehall, as important results are expected there from.

31st October 1896 (The North Cumberland Reformer)

SCHOOL BOARD

ATTENDANCE.

The attendance at the various schools for the month ending October 23rd was as follows:

	On books.	Average.
Nenthead	151	132
Nenthall	35	31
Tynehead	11	8
Garrigill	75	63
Leadgate	37	33
Alston, High	114	105
Alston National	59	47
Alston Infant	67	52

A number of scholars were reported at the previous meeting for irregular attendance, and several of the parents appeared before the Board to explain the cause. The general excuses were bad weather, sickness, and distance from school. They undertook to send them when the weather permitted.—The Inspector reported that the order at Nenthead School was now satisfactory, and the results of the examination in elementary and class subjects very good. The total grant earned was £118.—Mrs Jane Robson, school-cleaner, having resigned on account of ill-health, Mrs Dixon, Overwater, was appointed at a salary of £10 a year.

7th November 1896 (Hexham Herald)
Deaths
Alston, Butts, 30th ult., aged 75, Mary widow of William Graham.

In 1891, at Quaker Square, Stanhope, Thomas Rutherford, retired limestone quarryman, aged 59, his wife Jane 57, sons Thomas, limestone quarryman, aged 29, John George, limestone quarryman, aged 20, William W., limestone quarryman, aged 19, daughter Frances J. 16, and aunt Margaret Dalton, widow, living on own means, aged 83.

14th November 1896 (The North Cumberland Reformer)
ALSTON RURAL DISTRICT COUNCIL
THE SANITARY STATE OF TUE DISTRICT.
The CHAIRMAN said that he wished to make a few remarks on sanitary matters. He was sorry to have to say that they met with anything but an agreeable sensation at the last County Council meeting. In the returns of the Medical Officer of Health he found that Alston stood in the worst position in the county in regard to the death rate and sanitary matters. From the reports of the various Medical Officers in the county, collected by Dr. Barnes, he found that Alston had the lowest birth rate and Longtown the highest. The highest in urban districts was 30.33, and in rural districts 25.25. The highest death rate in the rural districts was in Alston No. 1, and was 25.10 per thousand, against 12.20 in 1894, 13.40 in 1893, and 25.70 in 1892. It also showed the highest death rate from consumption, and No. 2 district had the highest infant mortality. Diarrhoea was also very prevalent in both districts, and caused three deaths. With regard to water supply Dr. Barnes also particularised several places in the parish where it would have to be provided. A short abstract, which he would read, would give them the idea he wanted to be at. "Dr. Barnes has also prepared summaries of the reports of the different medical officers. Some of them show several places still suffering from defective water supply. The attention of the General Purposes Committee was drawn to Dr. Barnes' report and the Chairman said they would lose no time in considering it, and reporting. But in the present state of the law, the powers of the County Council to interfere were very limited, and he was afraid not much could be done. All they could do was to make a report to the Local Government Board as to defects, and they could take action." He thought it would be wise to consider carefully what plans could be dealt with, not only with regard to water supply, but as to the sanitary condition of the district generally. As to water supply his opinion had been all along that a large and definite scheme should be prepared for the whole district, not necessarily to do it all at once. It would be the best and cheapest way in the end. He believed they had plans of the Alston scheme, and if a large committee or the whole council as a committee would take the matter up, they could have these plans and see what really could be done. He felt it his duty to tell them this, as no doubt reference would be made to the Local Government Board, and the matter might be taken out of their hands. There was another matter connected with the roads. An expression of opinion had been given by the Highway Committee of the County Council that the accounts for the main roads and the district roads should be kept distinct, with separate sets of men for each. One other thing he

might mention which would comfort his friend Mr Lattimer, he was expecting the steam roller every day (Hear, hear from Mr Lattimer). He had got a letter from a gentleman in Northumberland asking him if he could find an opening for a steam roller. He had met the gentleman in Carlisle. and arranged the matter, and the roller might be here any day.—Mr LATTIMER: This is quite a surprise, but I am sure it will be to the benefit of the council and the parish generally.

MEDICAL OFFICER'S REPORT.

Dr. CARSON, medical officer of No. 1 District, reported that the health of the district for the quarter ending September 30th was very satisfactory, though the death rate was high owing to the death of a number of old people. The number registered was 11, one being a visitor, and the rate for the quarter was 6.4 or excluding the visitor 5.8 per two. Of the whole, 8 were over 60 years of age, one dying at the ripe old age of 1000. The modest birth rate of 1.1 per 1000, was accounted for by two births. One mild case of diphtheria and two of measles had been reported. The first case of measles developed in a visitor who had caught the infection at Byker, and it gave rise to another in the house, but spread no further. There had been cases of diarrhoea, but not so severe as in 1895. The Infectious Diseases Notification Act came into force on August 15th, and would be of great service in preventing the spread of infectious disease that might be brought by visitors in a state of convalescence.

THE NENTHEAD DIFFICULTY.

The INSPECTOR reported that he had sent notice, according to the instructions of the Council, to the parties concerned at Nenthead to provide sanitary convenience to their cottages.—The CLERK submitted replies from the three owners, two of whom intimated that they had given orders for the necessary work to be carried out, while the third expressed his willingness to pay his share in a joint scheme.

21st November 1896 (Hexham Herald)

WEARDALE

DEATH ON THE FELLS

The sad death of a young man named John Rowell, lead miner of Rookhope, in Weardale has occurred. In company with four others deceased walked about 8 miles over the fells on Sunday to witness the Braes of Derwent Hounds. In returning they were overtaken by darkness and fog and were lost to each other. Only four arrived at their destination. On Sunday an unavailing search was made, but on Monday a search party of over 100 men was organised and the dead body of the missing man was found on the fells. Deceased was 23 years of age.

Inquest verdict, deceased died from exhaustion as a result of getting lost on the fells.

In 1851, at Middle Brandon Walls, Linzgarth, John Brown, lead miner, aged 25, and his wife Jane (Hogarth, married 1st quarter 1851, Weardale) aged 20. Jane was buried 11th January 1856. Probate records show John Brown of Hilton Terrace, Rookhope, Stanhope, County Durham, miner, died 21st March 1895. Administration (with will) Durham 28th February to Elizabeth Rowell widow. Effects 10s

In 1861, at Broaddale House, Linzgarth, Thomas Brown, farmer of 11 acres, aged 65, his wife Jane aged 73, son John Brown, widow, lead miner, aged 36,

son Joseph, lead miner, aged 33, granddaughters Jane Brown 18, and Elizabeth Brown 5.

THY WILL BE DONE.

In 1851, Elizabeth Rowell aged 21 was working as a servant for the Stobart family, at Chapel House, Keenly, Allendale. In 1851, at Tedham, Hannah Rowell, widow, aged 47, children Margaret 18, Wilkinson, lead ore washer, aged 14, Thomas, lead ore washer, aged 12, William, lead ore washer, aged 10, and Joseph Rowell 1.
In 1861, at Coalpits, Allendale, Joseph Rowell, lead miner, aged 19, his sister Elizabeth, housemaid, keeper, aged 30, and nephew Joseph Jonson Rowell aged 11.
In 1871, at Low Shield Close, Allendale, William Rowell, single, miller, aged 27, and his nephew Joseph Johnson Rowell, labourer ironstone, aged 20.
Joseph Rowell married Elizabeth Brown 2nd quarter 1875, reg. Weardale.
In 1881, at Hilton Terrace, Rookhope, Stanhope, Joseph Rowell, lead miner, aged 30, his wife Elizabeth aged 25, children John Brown 7, Thomas Brown 6, Joseph Rowell 3, and William Rowell 1 (buried at Rookhope 12th May 1885).
Joseph Rowell died 24th February 1888, aged 38.
In 1891, at Blue Row, Stanhope, Elizabeth Rowell, widow, aged 35, children, John Brown, lead ore dresser, aged 17, and Jane E. Rowell, 8. In 1901, at Hylton Terrace, Rookhope, Elizabeth Rowell, widow, and her daughter Jane Elizabeth, dressmaker, aged 18.
In1911, at Hylton Terrace, Rookhope, Elizabeth Rowell, farmer, aged 55, and her son Joseph, lead miner, aged 32.

28th November 1896 (Hexham Courant)

THE NENTHEAD LEAD MINES.

The mining prospects of this locality have undergone a great change since Vieille Montagne Company took possession of the whole works. New hands are being employed every week, in fact no one who has a practical knowledge of mining is turned away. During the past six months about 100 extra men have been engaged, the consequence being that the district is assuming a much more lively appearance. The benefits are being felt not only in the immediate locality, but in the surrounding dales as well. A large number of miners from Weardale, Allendale and other parts have been "set on". Quite a new system of working the mines has been adopted, and new trials have been made, the result being that a lot of new ground has been opened and the output considerably increased. An improvement in wages has also been made from 12s 6d and 15s to 17s per week. A large quantity of new machinery is about to be erected and new methods of driving the mills are to be adopted so that frosts and scarcity of water will not affect the working of the mill in future, as has been the case in the past.

28th November 1896 (Hexham Herald)

WEARDALE

The death of Mr Wm Lee a popular Primitive Local Preacher took place at Stanhope on Monday at the age of 40 from Typhoid Fever. *stone mason*

5th December 1896 (North Cumberland Reformer)

NENTHEAD NEWS AND NOTES.

The advent of the Vielle Montaigne Mining Company has been productive of many changes in Nenthead. As soon as they got established they adopted new systems of carrying on the concern. A considerable number of new hands were

engaged, new clerks and new masters were appointed, and a new mode of conveyance of the produce was inaugurated. The horse and cart gave way to a traction engine. Many prophecies of evil were indulged in, but it is on the move yet, although in the first week many obstacles interfered with its progress. Almost every day something turned up in the shape of the road breaking up, &c. At one time, on Crook Bank, the engine was embedded for about two days. The roads have been terribly cut up, and have necessitated the laying on of a tremendous quantity of metal. It was argued by some that the steam roller would be very useful, but its probable cost always told against the proposal to buy it. As these are county roads, all the extra work that has been done, and the cost of the roller, I believe, would have been charged to the county, so that locally it would not have made a tremendous difference to the rates. The idea of having the steam roller was however rudely destroyed. Our representative on the County Council stated, in reply to enquiries, that their "was not the least shadow of a of a chance of it coming" —and that after the Council had given a favourable reply. Further consideration, however, seems to have taken place, for the County Councillor somewhat later announced a comforting codicil, that be was expecting it almost daily. That was four months ago. But the roller, where is it? It is coming, 'by-and-bye, byand-bye." It would be difficult to give a definite description of all the new developements that have taken place in the works here. As may have been gathered from your last week's issue a number of new hands have been engaged. They hail from Alston, Garrigill, Allendale, Weardale, Rookhope and Harwood. some of them travelling as far as fourteen miles. These, as is usual, come on Monday morning and return on Friday night. New pipes are being laid from the big reservoir, a distance of about 2 miles, and the machinery will be driven on another principle to that hitherto adopted. Pressure will be the main force. It is stated that four large mining shops, to accommodate 50 each, are to be erected for the miners. Sheds are now in the course of erection for a lot of new machinery that is going to be introduced. If these things go on, the prospect must be good, as an enormous amount of money has already been expended. If what has been done during the last few months is a guide to what will be, we may expect many more changes that at present are not thought of. It is to be hoped the investors will get good return for their capital, and that employers and employed may all reap a golden harvest.

… A bit of a surprise was caused this week by the announcement that the smelt mill was to be closed. Upon inquiry, it was found that the report was too true. The smelt mill was erected in 1773, and since then has been again and again improved by additional machinery, etc., until now it consists of the following :— Six smelting ore hearths (or Scotch) furnaces, one slag hearth, two reverberatory furnaces, two refining furnaces, and a desilvering house, Rozan's patent. The producing of lead has been a diminishing quantity for a good few years, indeed, it has been almost entirely supplanted by the large quantity of spelter that is produced. To keep the mill going it has been found necessary to buy a large quantity of lead ore, and the carriage, with the carriage ot coal, will have greatly retarded the possibility of its being payable. It is said that it has gone back about £600 during the last 12 months. Although this seems to be of a retrograde nature, it is not likely to affect the prosperity that is reported. All the men employed have been engaged in other parts of the work, and the mill will be at once closed except to work up the present stocks. The stoppage will be most felt by the carriers, as they still had the conveyance of coals from the

station. It is also to be regretted that a business which has been connected with the place for upwards of a century, is to be now discontinued. A lot of the older hands that have worked there all their lives will take badly with the change of labour which they will be obliged to take up. If however, it has been absorbing a lot of the profits, this step will have a tendency to make the whole concern more profitable.

12th December 1896 (Hexham Herald)
Deaths
Stanhope, 2nd inst., aged 80, William Raine.
Allenheads, 5th inst., aged 74, Hannah widow of William Iceton.
In 1871, at Allenheads, William Iceton, engine brakesman at mines, aged 43, his wife Hannah (married 2nd June 1853) aged 49,and niece Emma Iceton 11. In 1881, at Allenheads, William Iceton, engine brakesman at lead mines, aged 53, his wife Hannah 59, niece Emma Iceton 21, and visitor Sarah J. Parker 14. In 1891, at Allenheads, William Iceton, brakesman, aged 63, and his wife Hannah 69, William had died in the 4th quarter of 1896.

19th December 1896 (Hexham Courant)
NENTHEAD
A lead miners meeting was held in the Board school on Thursday night, 10th inst., to consider the changes that have been introduced in connection with the workmen's hours. Since the new company got into full swing a timekeeper has been appointed, and the time fixed for work has not been at all acceptable to the miners. Further changes have been made this week, therefore the meeting was held to try and have the time arranged more in unison with the wishes of the men. A deputation was appointed to wait on the manager Mr Fernau, with the result that all the different workings (inside) have to be started at 6am for the morning shifts, and 2 and 10pm for the back shifts. The times before were so that the timekeeper could be at all the entrances to the mines, but it will now be necessary to appoint a timekeeper for each place.

19th December 1896 (Hexham Herald)
NENTHEAD
The mild weather that has recently prevailed has given place to hard and severe frosts. A considerable quantity of snow has also fallen. The conveyance of mineral produce to the railway station has to be done by the old system of horses and carts, as the traction engine cannot travel when snow and frosts prevail.

26th December 1896 (The North Cumberland Reformer)
SCHOOL BOARD.—The monthly meeting of this Board was held on Saturday, the members present being Mr Harrison (presiding), Mr Bell, Mr Rutherford, with Mr Dickinson (clerk), and Mr W. Walton (attendance officer). The business was routine. The attendance for the month was as follows:—

Nenthead	148	128
Nenthall	36	32
Tynehead	11	8
Garrigill	75	60
Leadgate	36	35

Alston High	108	93
„ National	51	45
„ Infant	67	52
	532	453

26th December 1896 (Hexham Courant)

NENTHEAD

The new pipes recently laid for the conveyance of water to drive the machinery at Nenthead mines have been put into use on a certain section. The frost, which has been very severe, has, however, had a detrimental effect on them, and some of the pipes have burst, necessitating a great deal of work in having them put right. *See 2nd January 1897*

MINING ACCIDENT

A somewhat serious occurred in the mines on Monday night. **Elliot Archer**, a young man belonging to Garrigill, while following his employment had one leg badly broken and the other severely fractured. It appears that he had been with his brother as partner preparing to put some props in, and before they were able to get them placed a fall of stone occurred with the result stated. Assistance was immediately procured and he was brought to bank, and afterwards conveyed home.

John Archer married Hannah Storey, 12th February 1820, at St Augustine's, Alston.

In 1841, at Ashgill, John Archer, lead miner, aged 40, his wife Hannah 40, children William, lead miner, aged 15, John, lead miner, aged 15, Thomas, lead miner, aged 15, Elizabeth 13, Joshua 11, Isaac 9, Edward 6, Adam 4, and Hannah 2.

In 1851, at Priorsdale House, Garrigill, John Archer, lead miner, aged 53, his wife Hannah 51, children, Mary 30, William, lead miner, aged 28, Joshua, lead miner, aged 20, Isaac, lead miner, aged 18, Edward, lead miner, aged 16, Adam, shepherd, aged 14, and Hannah 11.

John Archer was buried at Garrigill, 11th April 1860, aged 62.

In 1861, at Priorsdale House, Hannah Archer, widow, farmer of 1500 acres,. aged 61, children, Mary 40, William, mason, aged 30, Isaac, mason & farm manager, aged 28, James, mason, aged 15, Elliott, shepherd, aged 13.

In 1861, at Priorsdale House, Edward Archer, mason aged 25, his wife Mary aged 21, and daughter Hannah 10 months.

In 1861, at Priorsdale House, Joshua Archer, mason, aged 30, his wife Agnes, aged 27, children, Elizabeth 7, Hannah 3, and Nephew John aged 2.

In 1871, at Priorsdale House, Hannah Archer, widow, farmer, aged 71, daughter Mary 40, and son William, farmers son, aged 48.

In 1871, at Priorsdale House, Elliott Archer, lead miner, aged 23, and his wife Susannah 20.

In 1871, at Priorsdale House, Joshua Archer, lead miner, aged 40, his wife Agnes, aged 37, children, Elizabeth, house maid, aged 17, Hannah 13, Agness 9, Joshua B 7, Mary A 6, and Sarah 2.

Hannah Archer was buried at Garrigill 7th May 1875, ahed 75.

In 1851, at Windy Hall, Garrigill, Thomas Archer, lead miner, aged 24, his wife Isabella (Stephenson, married 12th April 1849, St John, Garrigill) aged 20, and son John 2.

In 1861, at High windy Hall, Thomas Archer, lead miner, aged 35, his wife Isabella 30, children John 12, Thomas 8, Mary 3, William 2 months, and visitor Elizabeth Watson 13.
In 1871, at High Windy Hall, Thomas Archer, farmer of 21 acres, aged 44, his wife Isabella 40, children John, lead miner, aged 22, Thomas, farmers son, aged 18, Mary 13, Isabella 7, Elliott 4, and Elizabeth J. 9 months.
In 1881, at High Windy Hall, Thomas Archer, farmer of 21 acres, aged 54, his wife Isabella 50, children John, lead miner, aged 32, Isabella 17, Elliott, lead ore washer, aged 14, Elisabeth 10, Hannah 8, Sarah 8, Margaret 7, and Fanny aged 4. In 1891, at High Windy Hall, Garrigill, Thomas Archer, farmer, aged 64, his wife Isabella 60, children John, lead miner, aged 42 (buried at Garrigill 4th September 1900, aged 51), Elliott, lead miner, aged 24 (buried at Garrigill, 26th May 1934, aged 67), Elizabeth J. 20, Frances 14, and grandson Allan Archer 2 years. In 1901, at High Windy Hall, Isabella Archer, widow, farmer, aged 70, son Elliott, farmers son, aged 34, daughter Elizabeth Jane 30, and nephew Allen Vipond aged 12.
Thomas Archer was buried at Garrigill 25th January 1899, aged 72.
Isabella Archer was buried at Garrigill 28th October 1905, aged 75.

2nd January 1897 (Hexham Herald)

NENTHEAD

It is now stated, with respect to the new piping being laid by the Vieille Montagne Zinc Company, that no part of it has been brought into use, and none of it has been damaged either by frost or by any other causes.

9th January 1897 (Hexham Courant)

ALLENDALE SAD ACCIDENT

Early on Wednesday morning John Bulman of Low Mill Cottages, Allendale Town, fell into a lead pan at the smelt mills and was seriously scalded. Fortunately he received prompt assistance from the men on the spot, and was immediately conveyed home where his wounds were attended to. He is progressing as favourably as could be expected under the circumstances.

16th January 1897 (Hexham Herald)

Deaths

Middlehope Green Allendale, 13th inst., aged 73, Mary Ann dearly beloved wife of John Sparke. To be interred at St Peter's on Sunday 17th at 3:30 pm.
In 1871, at High Water House, John Sparke, stonemason, aged 48, and his wife Mary A. 47. In 1881, at Middlehope Green, John Sparke, farmer of 15 acres, aged 58, and his wife Mary A. 57.
Stanhope, 8th inst., aged 45, Isaac Hornsby.
In 1871, at High Low Lady Shield Jonathan Hornsby, lead miner, aged 46, his wife Pheby 50, children Mathew, lead miner, aged 23, John, lead miner, aged 21, Isaac, blacksmith, aged 17, Emerson, stone mason, aged 16, Jonathan, labourer, aged 14, Joseph 11, and Thomas 9.
In 1881, at Cooperative Store, buildings, Thomas Brown, slate layer, aged 61, his wife Margaret 52, and lodger Isaac Hornsby, blacksmith aged 27, born Alston.
In 1891, at East Lane, Stanhope, Isaac Hornsby, blacksmith, aged 38, and his wife Margaret (Gowland, married 2nd quarter of 1886) aged 37. In 1901, at

Albert Terrace, Stanhope, Margaret Hornsby, widow, aged 47, and servant, Annie Fletcher aged 17. See 13th January 1894

23rd January 1897 (Cumberland & Westmorland Herald)

BOARD OF GUARDIANS

ALSTON

The Clerk said it was his painful duty to record the death of Mr. Simpson, who had been a member of the Board ten years, and during that time had faithfully done his duty and taken a great interest in the poor people. A letter was read from Mrs. Simpson informing the Board of her husband's death, and inviting the Members of the District Council to attend the funeral. The Chairman moved that the Clerk be instructed to write a letter conveying a vote of condolence to Mrs. Simpson and family in their sad bereavement. Mr. Millican, in seconding the motion, said he was connected in business and had lived for four years with the parents and family of the deceased, who then in his early childhood, when he (Mr. Millican) formed a strong attachment towards him which he never forgot. Mr. Pickering, Mr. J. R. Wilton, and Mr. Ward also spoke in feeling terms of the deceased gentleman. The motion was unanimously passed.

A letter was read from the medical officer of No. 2 district (Dr. Short) stating that scarlet fever was prevalent at Nenthead and Garrigill, five cases having been notified at the first and one at the latter place. He suggested that the School Board should order the schools to be closed until the fever abates. It was decided to recommend the School Board to close the school at Nenthead.

The Workhouse Master reported the number of inmates in the Workhouse as 14; vagrants relieved during the past week. 37; 4 imbeciles in the Workhouse, and 9 lunatics in the Asylum.

6th February 1897 (Hexham Courant)

Deaths

At Alston, Market Place, on Saturday, the 30th January 1897, aged 62 years, Deborah, the beloved wife of John Dryden. Who was interred in Alston Cemetery on the following Wednesday.

In 1881, at front Street, Alston, John Dryden, ironmonger, aged 34, his wife Deborah 43, and nephew Thomas W. Armstrong 10. In 1891, at Front Street, John Dryden, living on own means, aged 44, and his wife Deborah 56.

At Leadgate, near Alston, 1st inst., aged 82, Elizabeth Parmley.

In 1881, at Rotherhope Fell, Thomas Parmley, time keeper at lead mines, aged 37, his mother Elizabeth Parmley, lead miners widow, aged 66, and sister Isabella, dressmaker, aged 25.

In 1891, at Rotherhope Fell, Elizabeth Parmley, widow aged 75, son Thomas, storekeeper lead, aged 47, daughter Isabella, dressmaker, aged 35 and grandson James W Parmley 4. See 22nd January 1864, & 13th April 1872

At Holmes Foot, Nenthead, 1st inst., aged 29, Hannah Armstrong, of Lambley.

13th February 1897 (Hexham Courant)

Deaths

At Allendale, Sinderhope Lodge, 22nd ult., aged 63, John Vickers Curry.

In 1881, at Low Ellershope, John Vickers Curry, farmer, aged 45, sister Ann, housekeeper, aged 56, nephew Joseph Curry, stone waller, aged 33.

In 1891, at Sinderhope Lodge, Vickers Curry, single, farmer, aged 55, nephew single, Joseph Curry, Ag. Labourer, aged 42, and general servant Annie Kennedy aged 27.

20th February 1897 (Hexham Courant)
Deaths
At Carrshield, West Allendale, 17th inst., suddenly aged 53, John A Heatherington.
In 1851, at Loud Side, William Heatherington, lead miner & farmer of 8 acres, aged 47, his wife Elisabeth (Armstrong, married 4th June 1836, Ninebanks) aged 40, children Mary 14, Thomas, lead ore washer, aged 12, Elisabeth 11, Ann 10, William 8, John A 6, Matthew 3, and Hannah 2.
In 1861, at Loud Side, William Hetherington, lead miner, aged 57, his wife Elizabeth 58, children Thomas, lead miner, aged 22, Elizabeth 21, Ann 20, William, lead ore dresser, aged 18, John, lead ore dresser, aged 16, Matthew, lead ore dresser, aged 13, and Hannah 12.
In 1871, at Loud Side, John Armstrong Hetherington, lead ore miner & farmer of 9 acres, aged 26, and his wife Jane (Lattimer, married 2nd quarter of 1869) aged 25, and daughter Hannah E. 4 months.
In 1881, at Carrshield, John Hetherington, widow (Jane died the 4th quarter of 1879, aged 33), farmer of 22 acres, aged 36, children Hannah E. 10, Sarah 7, Marion 3, and general servant, Frances A. Lee, aged 26. In 1891, at Loud Side, Carrshield, John A Hetherington, widow, farmer, aged 46, daughters Sarah 17, and Marion 13.

27th February 1897 (Hexham Courant)
Marriages
At Nentsbury Primitive Methodist Chapel, Thomas W Armstrong, Butts, Alston, to Isabella Armstrong, Hudgill.
In 1901, at Butts, Alston, Thomas W Armstrong, labourer at lime works, aged 30, his wife Isabella D 33, and nurse child Ernest Raimont 2.
Deaths
At Haltwhistle, 15th inst., aged 18 (by pit accident) John W. Robinson, of Clitheroe, Alston.
In 1881, at Clitheroe, Alston, Thomas Robinson, lead miner, aged 32, his wife Mary Jane, (Archer, married 3rd qtr 1876, registered at Alston) aged 33, children, John W, stone breaker, aged 14, Elizabeth M 12, and Ann A 1.
In 1891, at Clitheroe, Alston, Thomas Robinson, lead miner, aged 42, his wife Mary J, aged 33, children, John W 14, Mary L 12, Ann Alice 10, Esther 8, Amy 6, and Thomas 4.
In 1901, at Clitheroe, Alston, Thomas Robinson, lead miner, aged 51, his wife Mary Jane, aged 44, Mary Lizzie 22, Ann Alice 21, Esther, stocking worker, aged 18, Amy 16, and Thomas 14.
In 1911, at Clitheroe, Alston, Thomas Robinson, road surface man, aged 62, his wife Mary Jane, aged 56, Amy 26, Thomas, lead miner, aged 21, grandsons, John William Robinson, 8, Albert Robinson 7, and Redmus Buller Robinson 2.
Thomas Robinson died 1st quarter 1915, aged 65, registered at Alston.
At Alston, 19th inst., aged 40, Sarah A Veitch, of the Crown Hotel.
At Howburn, Alston, 23rd inst., Samuel Septimus, youngest son of Henry Walton. *Aged 33*

5th March 1897 (Carlisle Patriot)

ALSTON DISTRICT COUNCIL.

Mr T. Richardson presided at the meeting of the Rural District Council on Saturday.

A Dangerous House. —A letter was read from Mr W. Walton, again calling attention to the dangerous state of Mr Philipson's house, and stating that if the matter was not immediately attended to he would be compelled to appeal to a higher authority. —The Clerk: This is the third complainant we have had, —Mr Millican: If any member had been in Mr Walton's place we should have had half a dozen. The window was made and the stone ready, and there is nothing to hinder the work being done. The wall had been giving way for three or four years, and had been plastered time after time. -—Mr Dawson said there was some misunderstanding about this matter. It was not Mr Philipson's fault nor the mason's. The mason had given notice to the man working in the shop to remove his goods, as he was going to do the work on the Monday following. But the man's master (Mr Proudfoot) objected to move them, as he had the shop until May and had no place to remove them to. —In reply to the Clerk, the Inspector said the owner had had notice, but not written notice. —It was agreed, on the motion of Mr Walton, seconded by Mr Millican, that a written notice be given to the owner to have the place repaired in a month.

Water Scheme. —In accordance with notice, Mr Nevin called the attention of the Council to the minutes of the 6th December last with regard to Mr Bolton's motion for the Sanitary Engineer to prepare plans and estimates for the whole scheme of the Alston, Garrigill, and Nenthead Wards, and that the extension of the Alston water main have the preference. Mr Ward said be considered it unnecessary and unjust for outside ratepayers to have to contribute to bring water into the town of Alston to run to waste. He therefore moved that the extension of the Alston water main be postponed for twelve months. —Mr Lattimer said it ought to be sufficient authority when resolutions in the minutes of previous meetings had been passed, for the work to be proceeded with. —After a long discussion, Mr Nevin's motion that the extension of the Alston main be at once proceeded with was carried by 8 to 4, and it was agreed that the Sanitary Engineer be instructed accordingly.

The Health of the District. —Dr Carson, the Medical Officer of Health, presented his annual report for the Low District. There was a total of 31 deaths, giving a death-rate of 18.13 per 1000 for the year. There were 19 deaths, or 61 per cent, from the age of 60 and upwards to 91, and 11 deaths, or nearly 36 per cent., at 70 years and above. The rate of infant mortality, measured by the number of deaths under one year, per 1000 births was 34 The zymotic death-rate, or the death-rate from the seven principal zymotic diseases, was nil. The death-rate from consumption for 1896 was 2.3 per 1000 of the population, and the death-rate from respiratory disease (excluding consumption) was the same. Twenty-nine births only were registered for the whole year or 16.9 per 1000

6th March 1897 (Hexham Courant)

WEARDALE

THE WEARDALE MINES

A number of men employed at the Ironstone mines of the Weardale Iron Company are now off work, the notices received from the employers having terminated on Saturday last. A goodly number of miners from Weardale are

now employed at the Nenthead Spelter Mines. But for the activity of the latter the look out for the dale would be gloomy in the extreme.

Deaths

At King's Arms Lane, Alston, 2nd inst., aged 53, Joseph Smith, foreman porter at Alston Station.

12th March 1897 (Carlisle Patriot)

NENTHEAD CEMETERY

The committee having in hand the provision of a burial ground at Nenthead have come to terms with the owners of the estate known as Foulard, and 1 ½ acres of land have been set out to form the new cemetery.

20th March 1897 (Hexham Courant)

In Memoriam

In affectionate remembrance of Hannah beloved wife of Thomas H. Smith, who died at Crook Bank, Nenthead, March 21st 1896, aged 53 years.

In 1861, at Greenends, Nenthead, George Smith, lead miner, aged 60, born Hexham, his wife Mary 58, children, Mary 33, Thomas H., lead miner, aged 27, John, lead miner, aged 26, George, lead miner, aged 23, Jonathan, lead miner, aged 20, grandson, Watson Smith 6, and granddaughter, Jane Smith 2.

In 1871, at Greenends, Nenthead, Thomas Smith, lead miner, aged 37, his wife Hannah 29, born Allendale, niece, Mary Hannah Martin 6.

In 1881, at Greenends, Nenthead, Thomas Smith, lead miner, aged 38, his wife Hannah 38, niece, Mary Han Martin, dressmaker (appr), aged 16, and adopted son William Lee Currah aged 3.

In 1891, at Foulard, Nenthead, Thomas Smith, lead miner, aged 56, his wife Hannah 49, niece, Isla Josephine Smith 2, visitor, Mary Yeats, widow, aged 64, and visitor Herbert Rutherford, aged 4. See 21st November 1868, 28th September 1872, 16th September 1882, & 11th October 1884

27th March 1897 (Hexham Courant)

ALLENDALE

THE LEAD MINES

The working of the Nenthead lead mines continues to be carried on with great vigour, and there is a most promising outlook. Almost every week additional men from the Wear and Allen are being employed. Those mines on the Allendale side, which have been leased by the Nenthead Company, are also giving promise of good results. So many men have started work in the district during the last few months that it is difficult for those engaged to secure lodgings, and houses are not obtainable. Many houses are now tenanted that have not been occupied for years, while others that were in a dilapidated condition are being repaired and fitted up for habitation. Part of the old smelt mill is being fitted up for lodgings, and it is expected that forty or fifty will be housed there.

2nd April 1897 (Newcastle Chronicle)

Deaths

DISASTER AT A LEAD MINE
… news of a terrible accident at the Snaefell Lead Mine, situate at the foot of Snaefell mountain has been received there (Douglas Isle of Man). It appears that 22 men descended the shaft on Monday morning and were overpowered by the effects of Black Damp. Four of them were got out alive. Relief gangs were soon busy at work endeavouring to reach the other men but there is little hope that they will be brought out alive. … Search parties assisted by Mr Williams the Government Inspector on Tuesday discovered and brought to the surface 19 bodies. No more now remain in the mine.

NENTHEAD
LEAD MINING
During the last few months a large amount of Spelter ore has been accumulated on account of the company not sending any of the material away. As it goes abroad to be smelted, the exporting is suspended during the winter months, and the stocks in hand are thus very large. An enormous amount of material is also in hand to put through the mills. With the extra hands employed the output is considerably increased, and although the mills are kept going night and day, they can hardly keep pace with the dressing of the mineral. When the new scheme is put into working order, it is expected that the present mills, with the additions that are being erected, will make a considerable difference. The traction engines were again put on the roads last week, and the carts have been employed to cart the Spelter to the station, so that large quantities of "black jack" are now being daily sent away. The roads have been receiving considerable attention during the cessation of traffic, a large quantity of metal having been put on.
Deaths
At White Hall, Nenthead, 8th inst. aged 49, Ridley Graham, lead miner.
See 30th December 1882
At Garrigill, 8th inst. aged 68, John Holmes, lead miner.
In 1861, at Dodberry, John Holmes, lead miner, aged 32, his wife Sarah 34, children Jane 6, and Thomas 3. In 1871, at Garrigill Gate, John Holmes, lead miner, aged 42, and his wife Sarah 44. In 1881, at Garrigill Gate, John Holmes, lead miner, aged 51, and his wife Sarah 53. In 1891, at Garrigill, John Holmes, lead miner, aged 62, and his wife Sarah 65. In 1901, at Nest View, Garrigill, Sarah Holmes, widow, aged 75. Sarah Holmes died 2nd quarter 1904, aged 76, registered at Alston. See 18th December 1841
At Foulard, Nenthead, 10th inst. aged 59, Dinah, wife of Jonathan Shield.
In 1891, at Foulard, Jonathan Shield, lead miner, aged 50, his wife Dinah 53, sons Thomas Roddam, lead miner, aged 21, and Joseph William, lead ore washer, aged 13. See 22nd October 1881.

15th May 1897 ((Cumberland & Westmorland Herald)

ALSTON BOARD OF GUARDIANS.

At a meeting held on Saturday, the Clerk reported the death of the Workhouse Master, Mr. Dalton. They were all aware of the attention that Mr. Dalton paid to his duties, and the interest be took in the inmates, both old and young. The Chairman said that the Guardians had lost a good officer, and if they were not able to retain the matron (Mrs. Dalton), the loss would be serious. He moved that a vote of condolence and sympathy be sent to Mrs. Dalton. Mr. Pickerington seconded, and Mr. Millican, in supporting the resolution, said Mr. Dalton was a model master. The motion was unanimously carried.

THE DIAMOND JUBILEE.

The Clerk read a communication from the Local Government Board in which the guardians were informed that they could make modifications in the workhouse as to diet, &c., and relax to a certain degree the discipline for the Jubilee Day as they thought fit.

Mr. Pickering moved, and Mr. Millican seconded that the food for the day be on an improved scale, as the matron thought fit.

The Clerk said that in some places extra allowances were being made to the out-door poor. Mr. Dawson moved that 1s. extra be allowed for adults and 6d. for children for resident out-door poor, subject to the approval of the Local Government Board. This was carried.

PARISH COUNCIL.

A letter was read from tho County Council recommending that the Council join with the other Councils in sending an address of congratulation on Her Majesty's 60 years' reign and asking the Council to authorise the Chairman of the Council to sign such an address. Agreed.

Sanction was given to the Committee for the now cemetery at Nenthead to borrow £430 repayable over 30 years. This was required to enable them to get on with the contracts.

29th May 1897 (Hexham Courant)

Deaths

18th June 1897 (Carlisle Patriot)
NENTHEAD
The Mining Company will entertain their workmen and other residents, to the number of about 1400, to a knife and fork tea on Jubilee Day. Sports will follow, and a ball in the school will wind up the rejoicings.
ALSTON
Alston is to be very gay on Jubilee day. The revels will be opened at two by a procession marshalled in the following order: —The committee, clergymen and ministers of all denominations, the magistrates, the District Council and officials, Rifle Volunteer Band, the Volunteers, the Swan Benefit Club, the football club, and Mechanics Friendly Society, cyclists and the Sunday School children. The children and old folks will be entertained to tea in the Town Hall at three, and afterwards there are to be sports both for children and adults. A bonfire will at ten o'clock be lighted on Park Side, an elevation about 1400 feet above sea level, and half an hour later the celebrations will conclude with a display of fireworks.

25th June 1897 (Carlisle Patriot)
NENTHEAD
The Jubilee was celebrated at Nenthead on Tuesday with great rejoicing. There was a procession of about 1000 persons through the village to Holmes Foot and back by Overwater. Through the generosity of the Vieille Montagne Zinc Company a substantial knife and fork tea was provided in the Board School for the scholars attending the Sunday and day schools, the employees, their wives and families, and other invited guests. The large staff of carvers and waiters were taxed to the utmost in attending to the wants of upwards of 1500 people. Sports were held in a field at the Hill Top for valuable prizes, which were subsequently distributed by Mrs Fernau. At dusk a huge bonfire was lighted on Rake Top, and a brilliant display of fireworks took place, after which a dance

was held in the Board School to the music of the brass band. No expense was spared by the company or effort on the part of the Chairman (Mr Fernau), the secretary (Mr T. Lattimer), and a large energetic committee to make the day an entire success and most enjoyable to all. The day and Sunday scholars were presented with Jubilee medals.

26th June 1897 (Hexham Courant)

NENTHEAD

The death is announced of **Mr John Joseph Millican** mining engineer, which took place *(22nd inst)* at his residence, The Grove at Middleton Teesdale. The deceased gentleman who was chief agent to the London Lead Company was the only son of the late Tinniswood Millican of Nenthead *(aged 59)*

3rd July 1897 (Hexham Herald)

WEARDALE

News has reached Weardale of the death of a Stanhope man in Australia, **Simon Elliott** (64) who went out during the rush to the gold mines.

Deaths

Yerville, West Australia, March 22nd suddenly aged 64, Simon Elliott, mine manager. Late of Clunes and Crewick, and formerly of Stanhope, husband to Catherine Elliott, Talbot Street and father of Mrs W. Staff, Eureka Street.

Coolgardie Miner 24th March 1897
DEATH OF AN OLD RESIDENT.

Yerilla March 23

One of our most popular residents departed this life on Monday in the person of Mr. Simon Elliott, underground boss of the Yerilla claim, at the age of 64. Mr. Elliott was a well known figure on the Ballarat goldfield forty years ago. This is the first death that has taken placeat Yerilla. Everybody attended the funeral, and Mr. St. Ansell lead the Masonic burial service, during which Mr. Elliott's friends were deeply moved. He leaves a large family in Ballarat and two sons in Yerilla. He died from natural causes.

Western Argus 15th May 1917

10th July 1897 (Hexham Courant)

ALLENDALE
CARRSHIELD

These mines were opened last Monday week after having now been closed for many years by the company working at Nenthead. At present only a few miners are employed opening out the old workings, but before long it is anticipated that many men will be engaged in work.

10th July 1897 (Cumberland & Westmorland Herald)

NENTHEAD.—Mr. Joseph Thompson, mining agent, of Nenthead, died on Wednesday morning at the age 57. Mr. Thompson who was well known in northern mining circles, was one of the agents of the London Lead Company until they disposed of the mines to the Nenthead and Tynedale Lead and Zinc company. He continued to serve that company in the same capacity during the time they were interested in that place, and when the Vielle Montaigne Zinc Company came into possession eighteen months ago, he was installed as one of the officials, and remained with them with them until his death.

ALSTON & DISTRICT NEWS.

SCHOOL INSPECTORS REPORTS.—The following are the Inspector's reports for Tynehead and Nenthead Board Schools and Alston (High)

Undenominational.—*Alston*: "The instruction is thorough and the discipline highly satisfactory."
Nenthead: "Though the school has been closed for eleven weeks during the latter part of the year, the children are well advanced both in elementary and class subjects. The teachers labour under such serious disadvantages that no time should be lost in dividing the room into two, or even three divisions, by means of sliding partitions."
Infant Class: "The teacher has a pleasant manner, and portions of the work are fairly effective. Object lessons should be better illustrated, and care taken that the younger children are constantly and suitably employed. The insufficient desk accommodation demands immediate attention. H. J. Lattimer has obtained a first class in the Queen's Scholarship Examination."
Tynehead: "The master continues to manage this little school fairly well, but two or three points require attention. The girls must receive instruction in needlework. Recitation must be committed to memory before the end of the year, and the attendance should be summarised up to date. Unless proper provision is made for the instruction of girls in needlework, Mr. Lords will be unable to recognise the school as satisfying the conditions of annuity grant (article 85b of Code). H. M. Inspector reports that provision is not made in the first, second, and third standards of the school for object lessons (article 85b of the Code). The grant is paid this year under Article 92. I am to warn the Board that it may be withheld another year unless the required provision is made. The Inspector also reports that provision is not made throughout the school for instruction in Swedish or other drill or suitable physical exercises (article 101 i). The higher grant for discipline and organisation is paid this year under Article 92. I am directed to warn the Board that it will not be paid another year unless the required provision is made.

In 1891, at Front Street, Alston, Joseph Walton, widower, mining engineer, aged 59, daughter Mary 34, son John J. no occupation, aged 32, Alice M. E. 23, and boarder Frank Jones, Wesleyan minister, aged 27.
See 30th March 1889, 25th May 1889, & 11th May 1907.

14th August 1897 (Leeds Times)

DEATH OF SIR ISAAC HOLDEN
THE G.O.M. OF YORKSHIRE.

Sir Isaac Holden died rather suddenly at his residence, at 1-15 yesterday morning, from pulmonary asthma, which caused his family much anxiety a few weeks ago. The recent illness of Sir Isaac will be in the minds of readers. Sir Isaacs recovery from that illness seemed complete, for he has since taken exercise almost daily, and as late as Thursday he walked in the grounds with

his elder son— now Sir Angus Holden—and afterwards went in this carriage to the borders of Lancashire Moor. He was in his 91st year.

Sir Isaac was born in humble circumstances, and by the exercise of great industry and splendid mechanical genius, built up a great fortune as the inventor of woolcombing machines, and as a wool- comber. He entered Parliament through the Knaresborough constituency in 1865, but in. 1868 he had to compulsorily retire owing to the new Reform Bill. He tried several other divisions subsequently, and the fourth time, in 1882, saw him returned as one of the old North-West Riding representatives. In 1885 Mr. Holden was elected for the Keighley Division, which he continued to represent until 1895. Before retiring from Parliamentary duties he was created a baronet, and only last month he was one of four gentlemen invested with the honorary freedom of the borough of Keighley. All religious and philanthropic institutions and movements in Keighley and district partook of his benevolence. He is succeeded in the title by Mr. Angus Holden, Liberal Member for the Buckrose Division of Yorkshire.

Sir Isaac Holden has shown himself to be a man of remarkable adaptability and industry. He was the son of Isaac Holden, who kept a small farm and worked a lead mine at Nenthead, near Alston, in Cumberland. In 1801 the lead mine was exhausted, and then Mr. Holden removed to Scotland, and Sir Isaac was born in 1807 at Hurlet, a small village adjoining Nitshill, between Paisley and Glasgow.

The Holden’s were poor people, and the lad, seeing what was going on around him, felt that his father could not afford to keep him at school, so, young as he was, he looked round for employment, and engaged himself as “drawing boy” to two weavers. When the family removed to Johnstone, Isaac went to work at a cotton mill.

Later Isaac Holden was in a position to quit the factory and return to school. When he was 15 his father apprenticed him to a shawl weaver, but the work was past his strength and he relinquished it at the end of two years, returned to his studies and became a school teacher under Mr. John Kennedy, a noted mathematician and lecturer on physics, chemistry, and history to various Paisley and Glasgow institutions. In 1826 his father died, and Isaac Holden found his mother and younger brother dependent upon him. He remained with Mr. Kennedy until he was 21, when he made his first venture into the world, and engaged himself as mathematical teacher to the Queen’s-square Academy in Leeds, the principal of which was Mr. James Sigsten

He returned to Scotland in 1830, and in that year Mr. William Townend, a member of the firm of Townend Bros., of Cullingworth, near Bingley visited Glasgow, and engaged Mr Holden as bookkeeper. This was the turning point in his career. He gave himself up to business, and during the 16 years he was in Messrs. Townend's service, he was steadily preparing himself for the particular work, which he afterwards adopted as the chief object of his life machine woolcombing. In about a year it was found that Mr. Holden’s proper sphere was in the mill, and in 1833 he persuaded the firm to try Collier's woolcombing machines. They brought loss and trouble, and in 1836 Mr. Holden was given charge of them, and he succeeded in applying improvements, which enabled them, to be worked to advantage. As Messrs. Townend were disinclined to spend money on experiments, Mr. Holden joined Mr. Lister, of Bradford, in 1846. He improved Mr. Lister's machine, which was taken to France, in the hope of it having a better chance than in England. There was much opposition to the

machine, but Messrs. Lister and Holden established a successful woolcombing business in France, while in 1850 Mr. Holden introduced the square- motion machine, which afterwards became the best in the trade. In 1858 Mr. Lister retired from the French concerns, and Mr. Holden buying his interest the firm of Isaac Holden and Sons was established. The St. Denis works were relinquished in 1860 and works for a time started in Bradford. £20,000 was spent in experiments and the works were relinquished. Sir Isaac's patents involved him in his early days in much litigation, and he crossed the English Channel five nights in a week, alternately attending the courts in France and doing business in England. Of the many lawsuits he had in France he never lost but one.

Isaac Holden married Mary Forest 11th May 1790, at St Augustine's, Alston, witness Jonathan Holden.

Children:

Isaac born 7th May 1807, Hurlet, Paisley, Glasgow, Died: August 13, 1897,

Isaac Holden married Marion Love (daughter of Angus Love) 6th April 1832.

Children of Isaac and Marion Holden:

Angus born 16th March 1833

Edward born 14th January 1835

Mary born 26th November 1838

Margaret born 2nd July 1842.

Marion Holden died 4th April 1847, aged 36.

Alston District Council
A letter was read relative to the Nenthead Cemetery. The committee appointed has entered into contracts for the required work.

21st August 1897 (Hexham Courant)
Deaths
At Barney Craig Cottages, West Allendale, 14th inst. aged 71, Jane widow of Thomas Whitfield, Dykenook.
In 1871, at Thomas Whitfield, cartman, aged 49, his wife Jane 45, children William, wagon driver at lead mines, aged 19, Annie, home assistant, aged 18 Joe, lead ore dresser, aged 15.
(In 1881, at Low Craig, Alston, Jane Whitfield, widow, farmer of 150 acres, aged 55, and son William, farmers son, aged 28.?)
In 1891, at Blue Row, Carrshield, Jane Whitfield, widow, aged 65, son William, farmer, aged 39, and grandson Thomas W Whitfield 7 years. In 1901, at Blue Row, William Whitfield, single, farmer, aged 50.
At Middleside, West Allen, 10th inst. aged 56, Thomas beloved husband of Margaret Wailes.
In 1861, at Holme Foot, Caleb Cousin, lead miner, aged 51, his wife Mary 49, son John D. 7, step son Joseph Wailes, lead miner, aged 22 and step son Thomas Wailes, lead miner, aged 19.
Thomas Wailes married Margaret Graham, 2nd quarter 1867, registered at Alston.
In 1871, at Dyke Heads, Alston, Thomas Wailes, lead miner, aged 29, his wife Margret 27, and son Joseph Stephenson 2.
In 1881, at Middle, Ninebanks, Thomas Wailes, farmer of 33 acres, aged 39, his wife Margaret 37, son Joseph Stephenson 12, and daughter Sarah 8.
In 1891, at The Middle, Ninebanks, Thomas Wailes, farmer, aged 49, his wife Margaret 47, and daughter Sarah, domestic servant, aged 18.
Probate 1911, Thomas Wailes of The Middle, West Allendale, Northumberland, farmer who dieds 10th August 1897, Administration, Newcastle upon Tyne 12th August to Joseph Stephenson Wailes farmer. Effects £201 3s 1d.
Probate 1922, Margaret Wailes of The Middle, West Allendale, Northumberland, widow died 24th November 1921 Administration Newcastle

upon Tyne 6th July to Joseph Stephenson Wailes farmer. Effects £451 13s 11d. See 14th January 1843, 1st June 1866, and 14th October 1871.

28th August 1897 (Hexham Herald)

WEARDALE

A rich vein of lead ore is reported to have been struck this week in Rookhope, one of the Weardale Lead Company mines.

4th September 1897 (Hexham Herald)

Deaths

London, Tynedale, St John's Road, Putney Hill, the residence of his son, 29th ult. aged 75, Thomas John Bewick, late of Haydon Bridge.

Probate records give: — Bewick Thomas John of 12 Iddlesleigh Mansions, Westminster Middlesex, and of Broad Street House, Old Broad Street, London, died 29th August 1897, at "Tynedale" St John's Road, Putney Hill, Surrey, Probate London 9th October to Thomas Burrell Bewick, civil and mining engineer. Effects £17043 5s 9d.

Thomas Burrell Bewick married Margaret Theresa McKenzie, 2nd quarter of 1891, registered at St Giles, London.
In 1901, at Queens Square, Bath, Thomas B. Bewick, civil & mining engineer, aged 44, his wife Margaret T. aged 34.
Thomas Burrell Bewick, died 5th February 1907, aged 50.
Probate records give Bewick Thomas Burrell of "Tynedale" St John's Road, Putney Hill, Surrey died 4th February 1907, Probate London, 3rd April to Margaret Teresa Bewick, widow, and William Henry Phillips and William Stanley Tucker gentlemen. Effects £28671 2s. In 1911, Margaret Teresa Bewick, widow, aged 45, born Dublin, Ireland, was living at 39 St John's Road, Putney.
See 13th November 1863, and 15th March 1865.

11th September 1897 (Hexham Herald)

WEARDALE

A handsome stained glass window in memory of the late Mr Robert Walton of Stanhope House (owner of the Castleside Smelt Mills), a well known local philanthropist, has been unveiled in Stanhope Wesleyan chapel.

NENTHEAD

This old-established show took place at Nenthead on Saturday. The weather being beautifully fine, there a large attendance. The entries were in advance of previous years, and considering the confined area, the exhibits were very satisfactory, especially short-horn cattle and blackfaced sheep. There was also a grand display of ponies in the open class. Mr. J. L. Forster. West Allendale, being an easy first. Prizes were offered for trotting, which secured a good entry. The Nenthead Brass Band enlivened the proceedings with popular airs. …

25th September 1897 (Hexham Herald)
Marriages
Stanhope Primitive Methodist Chapel, Obadiah Martindale, Stanhope to Miss Gardner, Frosterley.
Thomas Martindale, married Jane Sprute14th March 1816, at Stanhope.
Thomas Martindale died?
In 1841, at Daddry Shield, Stanhope, Jane Martindale, widow, aged 50, children, Isaac, lead miner, aged 20, Joseph, lead miner, aged 20, Obadiah, lead miner, aged 15, and Jane 12.
In 1851, at Daddry Shield, Stanhope, Jane Martindale, widow, children, Obadiah, lead miner, aged 25, and Jane 22.
In 1861, Jane Martindale, widow, aged 74, born, Allendale, boarder, Thomas Bloodworth, widower, labourer, aged 32, born Rutlandshire Oakham, and boarder, John Bloodworth, 5.
Jane Martindale, died 24th April, 1864, at Stanhope.
Obadiah Martindale married Hannah Nattrass, 23rd June 1853, at Stanhope.
in 1861, at Windy Side, St John's, Stanhope, Obadiah Martindale, lead miner, aged 35, his wife Hannah aged 29, children, Ann 6, Jane 5, Thomas 3, and Hannah 1.
Hannah Martindale died 2nd qtr 1861, or 4th qtr 1861.
Obadiah Martindale married Sarah Jackson, 4th quarter 1864, registered at Stanhope
In 1871, at Windy Side, St John's, Stanhope, Obadiah Martindale, lead miner, and farmer, aged 45, his wife Sarah aged 25, children, Ann, dairymaid, aged 16, Thomas, labourer, aged 13, Mary J 6, Joseph J 4, Obadiah 2, William 6 months, and nephew, John Bloodworth, Iron stone, labourer, aged 15.
Obadiah Martindale died 3rd quarter 1880, aged 55.
In 1881, at Windy Side, St John's, Stanhope, Sarah Martindale, widow, aged 38, children, Thomas, lead miner, aged 23, Mary Jane 16, Joseph J, lead ore dresser, aged 14, Obadiah 12, William 10, John F(Featherstone) 8, Whitfield 6, Isaac 5, and George 7 months.
In 1891, at Thimbleby Hill, Weardale, Stanhope, Sarah Martindale, widow, farmer, aged 46, children, Joseph, limestone quarryman, aged 14, Obadiah, limestone quarryman, aged 22, William, limestone quarryman, aged 20, John F, limestone quarryman, aged 18, Whitfield, limestone quarryman, aged 16, Isaac, farmers son, aged 15, and George 10.
In 1901, at Thimbleby Hill, Weardale, Stanhope, Sarah Martindale, widow, farmer, aged 55, children, Whitfield, limestone quarryman, aged 26, Isaac, limestone quarryman, aged 24, George Henry, limestone quarryman, aged 20, and grandson, Wilfred Martindale, limestone quarryman, aged 17.
In 1911, at Thimbleby Hill, Weardale, Stanhope, Sarah Martindale, widow, farmer, aged 65, children, Isaac, limestone quarryman, aged 35, George Henry, limestone quarryman, aged 30, and grandson, Wilfred Martindale, , limestone quarryman, aged 27.
Sarah Martindale died 1st quarter 1927, aged 81, at Weardale.

In 1901, at High Bishopley, Frosterley, Obadiah Martindale,quarryman limestone, aged 32, his wife Margaret Ann, 27, daughter, Mary Jane 6 months.
In 1911, at High Bishopley, Frosterley, Obadiah Martindale, limestone quarryman, aged 42, his wife Margaret Ann, 37, children, Mary Jane 10, Farman Wilfred Gardner 6, Francis Annie 3, and Florence May 3 months.

Deaths
Stanwix, 20th inst. Mary Eldest daughter of the late Jacob Walton of Greenends, Alston. *See 8th January 1881.*

AT THE HEAD OF FOUR RIVERS. —1

AN ANCIENT LEAD MINING CENTRE.

A NEW ERA OF PROSPERITY FOR NENTHEAD.

(BY OUR SPECIAL CORRESPONDENT)

In the wild Pennine Hills in the east of the county of Cumberland, in the west of the county of Durham. and in the south-west of the county of Northumberland, where in a small area the South Tyne, the Wear, the Allen, and the Tees have their sources, the scenery is not wanting in great natural grandeur, while in many a favoured spot it is both picturesque and romantic. The region of Alston Moor and its vicinity was formerly, in point of its mineral wealth, one of the richest tracts of country in Great Britain, or perhaps in the world. Lead, zinc, copper, silver, iron, coal, barytes, and alabaster, as well as good stone for building purposes, are found. Were it not for those treasures of the mine, the wild hills and narrow dales, lonely and dreary as some of them still are—though that is to many townsmen (who seek health and reinvigoration in quiet rest among the bracing breezes of their elevated moorlands) their chief charm—would have been the very embodiment of solitude and waste land. It is true that rough farming to as great an extent as the poor nature of the moorland soil permits is now, as it has from time immemorial been, carried on, and the hillsides are dotted with as many neat and clear, stone-built, white-washed farmsteads as there are hard-working families who gain support from the breeding and rearing of sheep and cattle and from dairying and poultry-keeping. The trout in the burns and rivers, and the grouse and other game on the moors and in the woodlands of the valleys have always attracted sportsmen to the district, while the pure air, wild flowers, heather, brambles, and cloudberries form irresistible attractions to townsfolk in search of a healthy resort to which to take their youthful families for the holidays. Hence, to many a Tyneside child, and adult as well for that matter, the mention of Alston recalls memories of sunny, happy days, inspiriting breezes, tanned complexions, and large appetites.

THE LEAD MINES AND MINERS OF ALSTON MOOR.

Those who have sojourned even a short time in the district cannot have avoided noticing how large a proportion of the population is devoted to lead mining, and how distinct a character the lead miners possess a combination of all the best qualities of the miner—civility, industry, and intelligence—with the excellent traits of the dalesmen of the fell country of Cumberland, Durham, and Northumberland—moral and religious cultivation, and simple, rugged, and transparent bounty and integrity. The steadiness and plain solidity almost, amounting to stolidity, of the miners' character are seen in their homes, which are models of cleanliness and order, furnished with simple and substantial comforts, and manifesting every appearance of frugal and lowly prosperity. In the popular mind, Alston, as the market town of the district, is looked on at the

Metropolis of South Tynedale, but, so far as the mining is concerned Nenthead must now be taken as the centre. Nenthead as a village is of recent origin, ancient maps and records containing no record of it, for it sprang into being so recently as the middle or last part of last century. But lead-mining has been carried on around Nenthead on and under Alston Moor for many centuries. Some consider that it is probable that the Romans worked the hill-sides for lead, though it is disputed whether the Alston mines were known to the Romans, whose Maiden Way, however traversed part of the district. But it is on record that they have been steadily worked since the reign of the last Norman king. Of course, at first the mines of Alston Moor, after they had been discovered at the surface, would long be worked there as outcrops before mining proper was resorted to. Many years ago, a miner found very near the surface in Browngill-Vein about Thoughtergill Syke an old opening drift in which were a number of iron tools-of a very antiquated form, much oxidised, and with the tools were a few coins which were pronounced by a local antiquary to date back to the reign of William Rufus, who founded Newcastle. From the Norman Conquest up to 1650, however, it is estimated that the average yearly quantity of lead produced from the Alston mines must have been very small. In 1611 the mines were considered to be exhausted and worthless. Previously in 1468 Edward IV. had granted, the. mines to Richard, Earl of Warwick, John Earl of Northumberland, and others, but the King Maker was killed in 1471 at the battle of Barnet, and another grant was made in 1475 to Richard, Duke of Gloucester, the King's brother, after Richard III., to Henry, Earl of Northumberland, and others, and after this grant nothing is known of the Crown's connection with the Alston mines till after the Pretender's rising, when the Crown again took possession in 1717. Afterwards the manor and the mines came into tho possession of the Derwentwater family with whom they remained till the attainder and execution of the last Earl of Derwentwater, when they were settled by Act of Parliament on Greenwich Hospital. A lasting and expensive monument of these last owners of the mines is constituted by the grand aqueduct called Nent Force Level, which extends from Nenthead underground for a distance of 5 miles to near Alston, where it comes out to the light of day. This work was cut through the rock of the intervening hills by order of the trustees of Greenwich Hospital as a means of draining the mines on the estate. Its lower mouth is near to the pretty waterfall on the Nent called Nent Force. Boats used to be kept in it, and guides used to take visitors up it for some distance and explore the subterranean waterway from its mouth on the north side of the Nent, 100 yards from Nent Force and 200 yards from Alston Railway Station. It was projected by the great engineer, Mr. John Smeaton, on behalf of the Greenwich Hospital Commissioners; partly as a means of prospecting for lead ore —-for which purpose it proved a dismal failure—and partly to drain the mines of water, but owing to its containing two almost perpendicular drops, it is impossible to utilize it for the carriage of minerals between the village of Nenthead and Alston Station. It cost upwards of £110,000, and, commenced in 1776, took over 66 years to make. The inaccessibility of the district and lack of communications, however, would have served to keep the mining industry of comparatively insignificant proportions had it not been for the extraordinarily rich deposits of ore, while the agricultural population would never have grown beyond the limits fixed by the productiveness of the soil.

MODERN DEVELOPMENT OF THE MINES.

Up to the beginning of this century, the roads were very rough and broken, but in 1823 an Act of Parliament was obtained for making new roads from Alston to Penrith (over Hartside), to Brampton, and to Hexham, and for these the services of the celebrated road-engineer, MacAdam, were obtained, while subsequently roads were made by way of the valleys of the Nent and South Tyne to Weardale over Kilhope and to Teesdale over Yad Moss. In 1852 the railway to Alston was opened, and this further helped to bring Alston and its lead-miners into communication with the rest of the world. Meantime, up to the end of the last century a great increase in mining speculation took place.

The mines had been greatly developed as compared with the extent to which they had been worked in medieval times. This was in great part due to the introduction of foreign workmen and foreign methods from the Continent. The application of gunpowder to blasting purposes completely revolutionized the art of mining. It was first used in Hungary and was afterwards introduced into England by German miners brought over by Prince Rupert to work the Ecton mines in Staffordshire. Gunpowder was used in Somersetshire about 1648, but in the Alston district does not appear to have been used for blasting the hard rock in which the lead is found till the end of the 17th century. It was not till the end of the 19th century that the mines were first opened out and drained in a systematic way, when levels were made from the surface on each important stratum and on the thrown down cheek or ____ of the vein. The facilities for draining the mines offered by the levels cut from the surface rendered pumping engines in a great measure unnecessary. The first hydraulic pumping engine erected in the manor of Alston is believed to have been erected in Rampgill mine about 1768, and the Earl of Carlisle and Co., placed the first water wheel for pumping water in the manor in the Tyne Bottom mines in 1780. The Germans are recorded to have been the inventors of the hydraulic engine which Lord Armstrong 300 years later improved in important particulars. A water engine was placed in the Goldscope Mine near Keswick, by some German miners in the reign of Queen Mary. It is somewhat curious also, in connection with recent developments at Nenthead, that in 1-59 a German one Tillman, a native of Cologne, held the mines by lease. In 1768 there were 119 lead mines in the parish of Alston, the yearly output at that time being about 20,620 bings (8,244 tons), worth about £70,000. In 1858 there were about 48 mines in operation belonging to the Lords of the Admiralty (as representing Greenwich Hospital), the aggregate output of these and of about 24 mines in the manor of Tynehead being 5,382 tons of ore, and in 1881 the output was even less, being 2,129 tons.

THE LONDON LEAD COMPANY.

The Alston Moor lead mines were formerly leased and worked by the London Lead Company, previously known as the Quakers' Company, and at a later date as the Governor and Company. Their chief works were in Bristol. Their arms are those borne on the weather-beaten sign of the Miners' Arms, the excellently well-kept and comfortable hotel in the village of Nenthead. The sign, for a copy of which the writer is indebted, as well as for; many historical facts given in this article, to Mr. Wm. Wallace's "Alston Moor: Its Pastoral People, Its Mines and Miners." was painted in bright heraldic colours in London 80 years ago. and it is interesting to note that it has remained to this day untouched since it was first put up, and is now in want of a fresh coat of paint, to say nothing of repairs. It

bears on a round shield, besides devices representing various implements used in lead-mining, the legend, “The Arms of the Corporation for Smelting Lead with Pitcoal and Seacoal,” and the motto, “spectatur in igne.” This company obtained a charter, dated October 4. 1692, for smelting down lead with pit coal and sea coal, and in 1704-5 amalgamated with the Royal Copper Mine Co. in Wales, and “the Ryton Smelting Co. in Alston Moor.” There being no such place as Ryton in Alston Moor, it is supposed that the lead of the Alston Moor mines was smelted in the parish of, but not actually at Ryton-on-Tyne, Blaydon (or Blei-ton, the lead town) being suggested, as the probable site of smelting and refining works for the lead products of the upper Derwent, Allendale, and Alston mines. The origin of the term Quakers’ Company is hazarded in a tradition that the company was set afoot by some Quakers preaching, who on visiting the North Country valleys, were struck with the poverty of the miners and suggested to their friends on their return to London that it would be a kindness to subscribe a little capital so as to furnish the miners with regular employment. The London Lead Co. in 1883 sold their mines (leases) and all their property in Alston Moor to the Nenthead and Tynedale Lead and Zinc Co., which had Mr. J. C. Swan as its chairman of directors, thus terminating a commitment with the Alston Moor mining district which had lasted for 179 years, and probably with the Ryton (or Blaydon) portion of the company for 200 years.

THE PRESENT COMPANY.

In January, 1896, the mines were transferred to the Societe Anonyme des Mines and Fonderies de Zinc de a Vieille-Montague, which has its head offices at Liege, and, though mainly composed of Belgian capitalists, is of a cosmopolitan character in its operations, having in various parts of Europe many large concerns: besides a dozen establishments in Belgium, nearly as many in France, a similar number in Germany, mines and works in Sweden, Sardinia, Spain, and North Africa. This company is now in possession of some 9 mining properties, comprising all of any importance, in that rich mineral-bearing district of Northumberland. Cumberland. and Durham of which Nenthead is the centre. The predecessors of the present company, the Nenthead and Tynedale Lead and Zinc Co., Ltd., which concern was formed in 1882 with a capital of £120,000 in £1 shares, to acquire the royalties, mills, works, machinery, &c., of the London Lead Co. and of the Tindale Spelter Co., worked the mines during a period in which the price of lead was relatively depressed, and seeing that they devoted their main attention to the lead ore and not to the line, zinc had not much encouragement to develop their venture, nor did they possess the capital, and therefore, the facilities for launching out into a new channel as the present leases have done.

Gradually the number of miners employed dropped off, as did the rate of the miners' earnings. The following quantities of ore were raised by them in the years 1890-95, being the 6 years immediately preceding the acquisition of the mines by the present company: —1890, lead ore, 2,372 bings (2½ bings going to the ton); zinc ore, 3,844 tons. 1891, lead ore, 1930 bings; zinc ore, 3,946 tons. 1892, lead ore, 1,943 bings; zinc ore, 5,388 tons. 1893, lead ore, 1,779 bings; zinc ore, 5,416 tons. 1894, lead ore, 2,050 bings; zinc ore, 5,524 tons. 1895, lead ore, 2,127 bings; 4,726 tons.

When the Societe des Mines and Fonderies de Zinc de la Vieille Montagne came upon the scene in the beginning of 1896 they continued the mines and works pretty much the same style as had been done by their predecessors,

feeling their way gradually and learning as they went on the capabilities and requirements of the property. The ore was mined by the same methods as before and crushed and extracted from the rock in which it is found in the Jigging houses and washing floors left by the old firm. The crushing mills are the same as those employed in extracting gold and silver ores from the hard rocks in which they are deposited, and the crushed rock and ore are then classified by being passed together with water through a series of hollow, perforated cylinders, whence they are conveyed to the jigging machinery, where, suspended in water, they are jigged and washed in such a manner that the mineral ores are separated from the crushed rock in which they are contained. The finer portions are further washed in a buddle so as to recover as much metal as possible. This was the old process of recovering both lead and zinc but the Belgian company has introduced new machinery and improved the old so as to render the plant of a more modern type. They have laid dean several vanner washing machines, which separate the metal from the waste or refuse in a much more perfect degree than was aver done before—so much so that it has paid the new company in an even more handsome manner than it did their predecessors to treat twice over again the whole of the waste heaps left by the old London Lead Company in order to recover what the old company could never save by their imperfect methods.

LEAD NOW SECONDARY TO ZINC.

One of the chief reasons why the present lessees of the Nenthead mines are succeeding better financially then did any of their predecessors is that they recognised more fully then it was ever recognised before that their chief attention must not be devoted to the lead in the mines but to the zinc, which in olden times was treated as a waste product, and has really only been appreciated at its true value during the latter part of the present century. To the old London Lead Company lead was almost their first and last object, and even to the Nenthead and Tynedale Company the zinc was of quite secondary importance, possibly because of the higher price brought by lead as compared with the zinc, the proportion of value being as 5 to 2. In many places in the mines it was found that the prior workers had worked the levels or flats almost exclusively for lead, and, where the two were found together, had, as far as practicable, taken the one and left the other, or, where the zinc abounded but the lead was not in sufficient quantity, had abandoned the flat or vein with its wealth of zinc, and sought elsewhere for lead. All this has now been changed. Another reform the new company introduced as soon as experience pointed the way was to abandon the old; smelting mill where formerly, under the Nenthead and Tynedale Company, much of the lead ore was roasted, smelted, refined, and reduced into a marketable article. There was also a desilvering house in which the silver contained in the lead was extracted by the Rozan patent process; but the smelting house has now been laid off from active use, the lead ore being taken over to Weardale to be smelted, it bring found that the lead found in the Nenthead mines was not sufficient in quantity to keep the Nenthead smelt-works in full employment, while tho same condition of things prevailed at the Weardale smelt-works, whereas now the produce from the two mining districts keep the latter smelt works continually occupied. The zinc ore in the Alston and Nenthead mines after being crushed and worked so that the metal is recovered to an extent hitherto unparalleled in the district, is carted to Alston whence it is conveyed by train to Tyne Dock, and there shipped to Belgium

whence on arrival at the company's works in the interior it is treated by the method which the Vielle Montagne were first to acquire work. The Nenthead district is now therefore free from the poisoning effects of those fumes from the smelting houses which had formerly to be conveyed through long flues far away to the unpopulated summits of the hills and the workmen who up to the close of last year carried out the smelting operations, sometimes to the detriment of their health, are not therefore deprived of employment, but are now engaged in much less injurious, indeed altogether innocuous occupations

9th October 1897 (Newcastle Daily Chronicle)

AT THE HEAD OF FOUR RIVERS. —2

A NEW ERA OF PROSPERITY FOR NENTHEAD

THE VIEILLE MONTAGNE CO.

(BY OUR SPECIAL CORRESPONDENT)

There is now being wrought at Nenthead something altogether in the nature of a revolution in the ancient lead-mining district of the Alston district. Since Mr. Fernau, the manager of the Nenthead mines, took over his duties, he has lost no time in developing a policy whose highest recommendation it that it has evoked the admiration, approbation, and respect of the entire mining population. The policy to which all the miners of the district had become accustomed was one—necessitated by the limitations of inadequate capital—of cheese-paring economy which, it is to be feared, interfered somewhat with the fullest and most efficient production and productiveness.

PELTON WHEELS.

Mr. Fernau, while observing due economy in all respects showed very soon that he was the agent of a very powerful, resourceful, enterprising, and wide-awake company to whom expense was no object so long as it was necessary to the development of the mines. The first step was to modernize the plant and bring it all thoroughly up. to dote so as to secure the recovery from the maximum of metal therein contained. Mr. Fernau has during the present year largely augmented the washing floor plant both by-the construction of additional jigging machinery, and by the discontinuance of the old buddles and the substitution of vanners. In place of the old water-wheels as a means of supplying motive power for the machinery, he has substituted Pelton wheels working under very high heads ranging from 300ft. to 570ft. Under the enormous pressures generated by these heads, the jet of water which works the Pelton wheel seems like a solid bar of steal, and actually has the property that it cannot be cut in two with a hatchet. The Pelton wheel thus actuated consists of a small bucketed wheel of very much less proportions than the pre-existing water- wheels, and is actuated by a single jet of water under the pressure above indicated. This not only gives superior power but effects a very great economy of water.

MACHINE ROCK DRILLS.

These alterations are not yet completed, but a few weeks will see them in full work, and but a little longer time will be required for the installation of rock-drilling machinery of the very latest pattern, by means of which it is intended to largely augment the productiveness of the mines besides—and this is contrary to the fears of some of the old-fashioned and unthinking miners—rendering possible the employment of more manual labour even than at present. Further

developments in a similar direction are in progress or contemplation for introducing the very newest and best plant and machinery into what is already the most extensive and most important lead and zinc mining concern in England.

NEW ROYALTIES ACQUIRED.

The mining properties in Alston district originally acquired by the Vieille Montagne Co. have been vary considerably added to by the acquisition of new royalties in Allendale, Weardale, and Tynedale, and it is hardly too much to say that from the Vieille-Montagne's point of view, which is pre-eminently one of zinc rather than lead, every mine of considerable value in this part of the Pennines has been acquired.

UTILIZATION OF ALL SURPLUS LABOUR.

Not only so, but all the available labour has been attracted to Nenthead, too. It is a sight unique on Alston Moor up to the present year to see the dalesmen from the adjacent valleys of the Allen, the Wear, and the Tees coming over the fells on a Monday morning to their work in the Nenthead mines each with two white wallets slung pack-wise by a connecting string over his shoulder, these wallets containing a week's provisions. Every dalesman willing to work under the new company can and does get it. I heard an amusing story from a miner-farmer at Nenthead anent this. It is six months, he told me, since a tramp was seen at Nenthead, and the last one was so hard pressed to take work at the washing floors of the mine that he fled like a scared crow from the place—and probably told his brethren of the road, for no member of the tramp species has dared to show his face at Nenthead since. There is by no means a difficulty in obtaining work at Nenthead; the difficulty—and it is a very real one—lies in obtaining lodgings, for every house and cottage is full, and most of the occupiers have the utmost of their spare accommodation taxed by lodgers. The cottagers, indeed, are unable to supply sufficient accommodation for the extraneous workmen, and the Vieille-Montagne Company have had to utilize several buildings connected with their works as barracks or sleeping and eating houses, the men preparing their own meals and performing their own domestic duties during the five days of their residence in Nenthead. Many of the miners in Nenthead, and most of those who journey every week to their work from a distance, have little allotments of farm or garden land, some keeping a cow or two besides pigs and poultry, and some launch out into farming on an even larger scale, keeping sheep of hardy mountain breed, so that they require the Saturday and Sunday to spend at home on their plots and farms. A minimum of 3s 5d a day is liberal pay to workmen whose wages for the same work in lead mines in some of the neighbouring dales have long averaged 2s. to 5s. less per week, and even 7s less in some places, while occasionally miners have even made so little that they have ended the year in debt, for the work has not been so regular uniformly lucrative as it now is at. Nenthead. Work at Nenthead goes on, night and day without intermission in three-shifts of 8 hours each, both underground and at the washing floors, and the wages are paid with promptitude every month.

NO FLUCTUATION OF WAGES.

The old system of bargains, which used to prevail in the Alston district and still prevails in Weardale, has to a very great extent been done away with. Under this system the miner was allowed to speculate by taking a certain length—so

many fathoms—of work in the mine and being paid so much a ton for all the ore he produced, and in this way a man who was lucky might make a good deal of money while another man who was unlucky might make very little or perhaps none. He might and often did, spend on his living and on his stores for use in the mine, such as gunpowder for blasting, more than be earned. Mr. Fernau was the first to introduce into the district the new system of guaranteeing to every man a minimum wage, even if he got little or no ore, and thus every miner got a living wage, where formerly there had been much discrepancy between the condition of the fortunate and the unlucky workman. But a limited system of bargaining is still in vogue so as to give scope for the superior and skilled workman to earn more money than the moderate or poor one. The payment of the work man's full due every month—his full living wage plus the turn to which he is entitled on account of his limited; bargain work—instead of a quarterly payment of wages (anticipated in most cases by. a process of subbing**,** or obtaining advances; and sometimes more than anticipated, for it often used to happen that a man by his bargain obtained so little that in drawing his "subs" he had exceeded the amount to which he was entitled for the ore he had won, and ended the quarter in debt to his employers instead of being to the good) has been greatly-appreciated by the miners; and hence it results that workmen flock to the Nenthead Company's service from the neighbouring dales. This migration of labour has prevailed to such an extent that some other lead mines no further, away from the homes of the miners, and sometimes not so far**,** are complaining of a scarcity of labour.

The advantages of all this to a mining district like that of Nenthead, which has in the past known and suffered so greatly from the vicissitudes of the lead trade, do not need to be pointed out.

STILL BRIGHTER PROSPECTS FOR THE FUTURE.

The greater-portion of the lead originally contained in the veins under Alston Moor has been extracted since the property came into the hands of Greenwich Hospital, and it is thought—perhaps wrongly, as Mr. Fernau opines—by competent authorities that no extensively productive lead mines remain to be discovered. During the last 12 years and more the low price of lead prevented any hopes of raising lead ore profitably from old worked mines, but fortunately at the present time there has been a recovery in the price of lead to a figure which it has not reached for 15 years, and this enables many workings to be wrought which *a* decade of years and more ago had to be closed on account of the hopelessness of profitably employing capital or labour.

ZINC THE LEADING ARTICLE.

But a part altogether from lead zinc is likely in the near future to be a boon and a blessing to the Nenthead miners since it is evident that the mines have got into hands capable of producing zinc of an economic value sufficiently high to leave a profit even after paying the cost of raising from the mine, extracting from the ore. trans-shipment to a foreign country, and smelting and manufacturing across the sea. For some time before the present company acquired the mines zinc had been worked to much advantage according to the English method; but no other firm in the world, perhaps, could or can work it so economically and profitably as the Vieille Montagne Co. This firm was founded in 1837— so that the present year is that of its Diamond Jubilee— by the heirs of Dominique Mosselman, having then a capital of 7000,000 francs, divided into 7,000 shares of 1,000 francs each. At the present moment, this capital represents but a

fractional part of the value of the huge concern, for the shares are worth in the market more than 5 times their nominal value. The industry is one that has grown with the political and industrial development of Belgium. At the time when the independence of Belgium was proclaimed, the Societe de la Vieille-Montagne was not in existence, nor was the zinc industry.

EXTRACTION OF ZINC A PROCESS OF RECENT ORIGIN.

Zinc, in fact, was scarcely known and less understood. It was apparently known to the ancients—to the Romans—in connection with the art of making brass, and in a less hazy fashion to the old inhabitants of India and to the Chinese, for at an early period it was converted into articles of utility and ornament in both those countries, and it was brought from the East by the Portuguese long before it became an article of commerce in Europe. But, though Paracelsus had described its distinctive properties in the 16th century, zinc as a modern European product and commodity may be said to have been discovered only at the beginning of the present century, so that it is one of the youngest of the useful metals. The commercial process of isolation was discovered by chance in 1806 by l' Abbe Deny after 25 years of patient research, and the secret then came into the possession of Dominique Mosselman. The discovery of iron, lead, copper, tin, silver, and gold is lost in the impenetrable mists of antiquity; that of zinc, except in the ancient civilizations of the Far East, dates back only a little over 90 years. For long centuries certain minerals called calamines found at Vieille-Montagne at Moresnet in Belgium had been used by the braziers of Stolberg, Liege, and Namur to alloy with copper to form brass, but how or why was not exactly understood until the Liege chemist, l' Abbe Deny, succeeded in isolating the mysterious metal called zinc, and, after the discoverer of it had ruined himself, and his works had passed to Dominique Mosselman, success was delayed in establishing it as a profitable commercial commodity till after Mosselman's death, and till his heirs and executors founded the Societe de la Vieille-Montagne. This company developed and perfected the process of smelting the metal from the ore and of manufacturing it for the multitude of industrial and domestic purposes to which it is adapted. The Vieille-Montagne Company may be said to know all about zinc that is known and much more than most other people know. No other firm in the world can produce and manufacture it so economically, and, while they have certainly not a monopoly, they have distinctly the lion's share of the zinc trade of the world—a trade that has grown to immense proportions and that is likely to grow in the future in a similar degree to its extension in the past.

THE USES OF ZINC.

Zinc is used in cast form in the manufacture of objects of art, statuettes, &c., as giving, when bronzed, results rivalling in perfection those of bronze, at six times less cost; its use in engraving and as an alloy is well known, as is that of the galvanization of telegraph wires, some sorts of wire cables, ironwork, &c. The employment of incorrodible and non-rusting sheet zinc for the roofs of buildings, for the keels of wooden vessels, and for domestic purposes need only be barely mentioned, and the superiority of zinc oxide over lead in the manufacture and manipulation of white paint is one of the most valuable of the uses to which zinc is being increasingly put. Zinc white, or oxide of zinc, is rapidly coming into great favour as a substitute for white lead, oxide of lead, for it is purer in colour, and does not tarnish and blacken on contact with sulphuretted hydrogen; but its

greatest advantage is that it is non-poisonous, and therefore can be used by operative painters as well as manufactured into a pigment—without the deleterious effects produced by white lead in the course both of its manufacture and of its employment as a pigment. Its great service as one of the metals used in the production of electricity it one which is by no means likely to decrease in these days of universal telegraphs and telephones. Zinc is now the principal agent used in the glazing of paper, having ousted all the different substances formerly used.

THE VIEILLE-MONTAGNE CO. AND THE ZINC INDUSTRY.

The name of Vieille-Montagne is to well knows all over the commercial world—just as that of Dunlop it familiar wherever cycles are known—that it is not necessary to trace the progress of the gigantic firm or show how it has grown from its debut in 1837, when it produced only 2,540 tons of zinc, and gave employment to only 932 workmen, till now it has absorbed one concern after another, and gives employment to close upon 30,000 persons, and turns out one-fifth part of the world's production of zinc. Already it is a huge concern even in an age of colossal industrial enterprises, and its recent establishment of itself in the rich mining district of Alston is a matter of profound congratulation, since it means that the mines in the heart of the northern end of the Pennines have at last fallen into hands that will know how to make them succeed, and that henceforth they will be worked with all the advantages which can be conferred by practically boundless capital and the most skilled and competent management—a management that even at the present time gives promise of ultimately, and that at no distant date, controlling the zinc trade of the world. What this betokens to the dales folk of those districts of Northumberland, Cumberland and Durham can best be imagined by realizing what the great Elswick firm has been to the inhabitants of Tyneside. The Vieille-Montagne Co., has ever shown itself keenly interested in the welfare of its employees. In every country and every district where it has founded branches of its extensive operations it has established institutions having for their object the amelioration of the social condition and physical and intellectual improvement of its workpeople. Insurance societies, accident funds, savings banks, fixed scales of salaries, old age pensions, model workmen’s houses, with funds for -enabling, employees to purchase their own homes, infirmaries and hospitals, sick funds, libraries, schools, churches, and other provisions of a like character have been made for establishing harmony between masters and men with a success that has been so complete that a strike is unknown in the history of the company's operations, so successfully have the wise heads of the firm worked to combat any cause likely to give rise to antagonism between capital and labour. Well, then, may we wish “Success to the Vieille-Montagne” in its mining operations in the North of England. A firm of enterprising, enlightened, and liberal minded employers ready to employ all the surplus labour of the surrounding ales, giving regular and continuous work, and paying the full market value therefor, is entitled to, a sympathetic welcome.

12th November 1897 (Carlisle Patriot)

ALSTON DISTRICT COUNCIL.

Mr H. Walton presided at the meeting of this District Council, on Saturday. — Mrs Core moved that the Lords of the Admiralty be asked to hand over the

Market Place, and to give a subscription towards its repair. —The subject, it appeared, had been before the Manor Court, and it was decided to write to the steward respecting it. —Mr Nevin moved that the present water pipes from the Townhead to the spring be replaced with new and larger pipes. —The Engineer said the cost would be about £131 15s. —Mr Bolton thought that the scheme for the whole parish should be considered. —The motion was carried by six votes to five.

12th November 1897 (London Gazette)

DUBBY SYKE MINING COMPANY LIMITED.

NOTICE is hereby given in pursuance of section 142 of the Companies Act 1862 that a General Meeting of the Members of the above Company will be held at No. 4 Saint Nicholas-buildings Newcastle-upon-Tyne on the 14th day of December next at 11 o'clock in the forenoon for the purpose of having an account laid before them showing the manner in which the winding up of the Company has been conducted, and the property of the Company disposed of and of hearing any explanation that may be given by the Liquidator and also of determining by Extraordinary Resolution, the manner in which the books accounts and documents of the Company and the Liquidator thereof shall be disposed of.—Dated November 8th 1897.
J. IONS CLARK Liquidator.

20th November 1897 (Hexham Herald)

Deaths

Stanhope, 14th inst. aged 50, Mary wife of Isaac Brown, late of Allendale.

In 1841, at Mill Shield, West Allen, Joseph Brown, lead miner, aged 35, his wife Mary 30, daughter Jane 6 months, and Samuel Brown, dresser of lead ore, aged 14.

In 1851, at Hartley Cleugh, West Allendale, Joseph Brown, lead miner, aged 46, born Allendale, his wife Mary 40, born Alston, children, Jane 10, Robert 8, Isaac 6, and nephew, Samuel Brown, lead miner, aged 21.

Joseph Brown was buried at Carshield, 24th November 1854, aged 49.

Samuel Brown was buried at Carshield, 14th March 1855, aged 24.

In 1861, at Carshield, Allendale, Mary Brown, widow, aged 49, sons, Robert, lead miner, aged 18, and Isaac, lead miner, aged 16.

Mary Brown was buried at Carshield, 23rd May 1864.

Isaac Brown married Mary Henderson 18th February 1865, at Ninebanks.

In 1871, at Ninebanks, Allendale, Isaac Brown, Ironstone miner, aged 26, his wife Mary 25, children, Margaret A 5, Thomas H 4, Mary E 2, and Mildred J 1 month.

In 1881, at Martin Street, Stanhope, Isaac Brown, limestone quarryman, aged 36, his wife Mary, 35, children, Thomas H, labourer, aged 14, Mary E 12, Milly J 10, Hannah M 8, Joseph W 5, and Sarah E 2.

In 1891, at Martin Street, Stanhope, Isaac Brown, limestone quarryman, aged 46, his wife Mary aged 45, children Thomas H., limestone quarryman, aged 24, Hannah M. 18, Joseph W., limestone quarryman, aged 15, Sarah E. 12, Isaac 9, and Violet E. 8 years.

In 1901, at 16 Martin Street, Stanhope, Isaac Brown, widower, limestone quarryman, aged 56, children, Hannah Maria 28, Joseph William, limestone

quarryman, aged 25, Isaac, limestone quarryman, aged 19, and Violet Ethel 18
Isaac Brown died 1st quarter 1908, aged 63, registered at Weardale.

23rd November 1897 (Penrith Observer)

DEATH OF A CUMBERLAND MINISTER IN AMERICA.

News has come to hand of the death of the Rev. Tom Thompson, late of Nenthead, in Evanston, U.S.A. Mr. Thompson was a well-known and popular local preacher in the Alston circuit, and emigrated with his brother some four or fire years ago with a view to entering the American ministry. Since going out he made excellent progress, having been appointed to several important stations, always doing good service and being well received wherever he went. It appears that he had taken up his residence in Evanston for the winter with the object of attending college during the session. He contracted a cold, which developed to pneumonia, and expired after a week's illness. He was interred at Rose Cemetery, Chicago, and his remains were followed by a large number of students and friends.
See 18th June 1892, 1st October 1892, 2nd September 1893, 28th October 1898, 29th July 1899, & 12th January 1901.

27th November 1897 (Hexham Courant)

WEARDALE

John Ridley, while following his daily avocation in one of the Upper Weardale lead mines on Friday had a marvellous escape. A huge lump of stone fell upon him. He was got out from underneath it very little worse except a few bruises.

Deaths

At St John's Chapel, Weardale, 19th inst. Mary wife of Harrison Barnfather.
In 1841, at Keld, Muker, Yorkshire, Joseph Barnfather, lead miner, aged 25.
Joseph Barnfather married, Elizabeth Milner 4th quarter 1842, registered Reeth, Yorkshire.
In 1851, at Muker, Yorkshire, Joseph Barnfather, lead miner, and farmer of 5 acres, aged 37, born Westmorland, his wife Elizabeth 32, sons, Harrison 4, and James 1.
In 1861, at Low Pries, Stanhope, Joseph Barnfather, lead miner, aged 47, his wife Elizabeth 42, children, Harrison, lead miner, aged 14, james, lead miner, aged 11, Hannah 9, and Joseph 3.
Joseph Barnfather died 1st quarter 1867, aged 53, at Weardale
In 1871, at High Chesters, Stanhope, Elizabeth Barnfather, widow, farmer of 4 acres, aged 56, children, Harrison, lead miner and Wesleyan preacher, aged 24, James, labourer, aged 21, Hannah 19, and Joseph 13.
Elizabeth Barnfather died 2nd quarter 1881, aged 62, registered at Auckland, Durham.
Harrison Barnfather married Mary Philipson 1st quarter 1873, at Weardale.
Mary Barnfather died 3rd quarter 1878, aged 29 years
Harrison Barnfather married Mary Martindale, 3rd quarter 1880, registered at Weardale.
In 1881, at Daddry Shield, Stanhope, Harrison Barnfather, grocer, aged 35, his wife Mary 37, and Fanny Marindale, draper aged 34.
In 1891, at St John's Chapel, Harrison Barnfather, grocer, aged 45, born Swaledale, and his wife Mary 48, born Stanhope.

In 1901, at St John's Chapel, Stanhope, Harrison Barnfather, grocer & shopkeeper, aged 54, and his wife Mary J 40.
Probate 1908: Harrison Barnfather of St John's Chapel Stanhope county Durham died 13 July 1908 Probate to Mary Jane Barnfather widow and William Thompson post office clerk. Effects £1125 8s 3d.
Harrison Barnfather died 3rd quarter 1908, aged 61, registered at Weardale.

9th October 1897 (Hexham Courant)

WEARDALE LEAD COMPANY'S REPORT

The report of the Weardale Lead Company stated that after providing for a payment of £500 for rent and royalties there is a profit for the year of £286. AS the £25,000 of Debentures fell due on the 30th June, the directors took steps to renew them; but experienced difficulty in doing this, they determined to make a call of 10s per share. Important discoveries are reported to have been made at two points on the property.

NENTHEAD

THE LEAD MINING INDUSTRY

The industry has undergone a change for the better during the last 12 or 13 months under the management of the Vieille Montagne Zinc Company. The closing of the smelt mill was a procedure which was detrimental to the employment of labour, but the miners have received a substantial increase of wages ranging from 12s 6d to 17s per week, this being a change which was much needed. The chief aim of the company is the production of Spelter. To further this development the mines have been worked on practically a new system, and considerable quantity of new and improved machinery has been erected so that the mineral can be separated more rapidly. One of the main drawbacks is the limited house accommodation, so that the bulk of the new men

added to the works live outside the place. The improved condition of things is not only felt in the immediate locality, but Weardale, Allendale (West and East, Harwood, Garrigill) and Alston, places where employment was difficult to find have also benefited, as large batches of men from these places have been employed. The mines in West Allendale, formerly worked by Mr W B Beaumont, which have been closed for some considerable time, have been leased, and work has been resumed, while Carrshield, which at one time was an important mining centre, may shortly resume its animated appearance. The same remark applies to Garrigill. Mines which have been closed for seven or eight years are now being reopened and mining, which is said to have been about exhausted in these districts, is resuming fresh vitality.

7th December 1897 (Penrith Observer)

IN THE MATTER OF THE COMPANIES ACT 1862 TO 1893 AND OF THE DUFTON MINING COMPANY LIMITED

The Creditors of the above named Company are required on or before the 17th day of January 1898 to send their names and addresses and the particulars of their Debts or Claims and the names and addresses of their Solicitors (if any) to Mr William Gibson of Dufton, near Appleby in the county of Westmorland the Liquidator of the said Company and if so required by Notice in writing from the said Liquidator are by their Solicitors or personally to come in and prove their said Debts or Claims at such time and place as shall be specified in such Notice or in default thereof they will be excluded from the benefit of any distribution made before such Debts are proved.

23rd December 1897 (Carlisle Patriot)

ALSTON ITEMS

The monthly meeting of the Alston School Board was held on Saturday last. Mr R. Elliot in the chair. A communication having been sent to Mr Fernau relating to a site for a new school at Nenthead, a reply was read from him stating that the land at Holmes Foot belonged to the Nenthead and Tynedale Lead and Zinc Company, and he could not, therefore, make an offer of the proposed site to the Board. Mr Bell suggested that a committee of the Board should meet at Nenthead previous to the next School Beard meeting to consider the question of a site, and, if possible, to select a suitable place. Application could then he made to the company. He thought the matter should not be delayed any longer. It was agreed that the committee meet at Nenthead and that Mr Fernau be asked to meet with them.—A precept for £100 for scholarships was signed. — A long list of attendance defaulters was read, the bulk belonging to the Infant School, Alston.

30th December 1897 (Carlisle Patriot)

SUICIDE AT GARRIGILL

A determined suicide took place on Monday, Joseph Richardson, miner, 65 years of age, was found by his nephew in his bedroom with his throat cut. He was quite conscious and when asked what he had been doing said “I’ve cut my throat, but I did not intend to have been like this.” He died a quarter of an hour afterwards. He had done no work for 22 years, having suffered from dropsy. A razor, a carving knife, and a bucket were found in the room.

5th February 1898 (Hexham Herald)

NENTHEAD

Alston School Board, propose to erect a new school at Nenthead, and, after a survey, have fixed upon what is considered a likely site.

Deaths

Garrigill, Middle House, 24th ult. aged 84, John Blacklock.

In 1861, at Rice House, Alston, John Blacklock, shoe maker & ale house keeper, aged 46, his wife Ann 38, sons John, clog maker, aged 19, Jonathan 9, James 3, and house servant Isabella Watson aged 16.

In 1891, at Middle Houses, John Blacklock, shoemaker, aged 77, and his wife Ann 67.

Nenthead, Fair View, 24th ult., aged 53, William Dickinson, Lead Miner.

See 6th December 1890

8th January 1898 (North Cumberland Reformer)

ALSTON.

RURAL DISTRICT COUNCIL.

The monthly meeting of this Council was held on Friday.

WATER SUPPLIES.

The circular from the Local Government Board, relative to water supplies impressing on Local Authorities the necessity of providing pure and abundant supplies of water, and of guarding against pollution, as well as of carefully examining into all existing supplies from whatever source, and remedying anything unsatisfactory, was read.—The CHAIRMAN remarked that they were free from anything mentioned in the latter clause.—Mr DOWSON: We can scarcely get anything but pure water here, we get it direct from the source.

THE ALSTON EXTENSION.

Mr NEVIN asked if the Inspector had got any instructions to commence with the extension of the Alston Main. If they allowed it to drift, it would be spring, and they had meadows to cut through.— The CLERK: I might state that I arranged with the Inspector this morning that he should get in tenders for the supply of pipes.—The CHAIRMAN thought it was quite understood that the Inspector was authorised to proceed.—The CLERK: He had not to take proceedings until we had funds in hand to defray the liability.—Mr DOWSON: Will he submit the tenders to the Council, or choose for himself.— The CHAIRMAN: I expect he will show them to the Council.—The CLERK: He has generally selected them himself.—Mr DOWSON: This is rather a larger job than usual, perhaps it would be as well to refer the tenders to the Council.—Mr LATTIMER: Will he give public notice?—The CLERK: No, he generally writes to certain manufacturers who supply pipes.—Mr LATTIMER thought tenders should be advertised for, to give local men an opportunity of tendering, and moved accordingly.—Mr PICKERING seconded.—The CLERK said that the Inspector could write to local men as well to ask for tenders.—On a division, an amendment moved by Mr J. R. WALTON, that the Inspector write for tenders without advertising, was carried.—It was further decided that the tenders be submitted to the Works Committee, and that the Inspector also advertise for tenders for the cutting of the drains.

The CLERK read a report from the secretary to the Northern Counties Institution for the deaf and dumb, relating to a boy from Nenthead who is at present an inmate. It stated that his conduct and progress were most satisfactory.—It was

agreed to ask the County Council a higher price for the broken stone supplied from the workhouse, the price of unbroken stone having been raised recently. On the motion of the Chairman votes of thanks were accorded to Mr Horrocks, and the Clerk for providing the inmates of the workhouse with dinner and tea on Christmas Day.

Deaths

On New Years Day, George Dickinson, of Alston, the beloved father of the Rev. T. M. Dickinson, Carlisle, aged 78 years. For upwards of fifty years a most efficient and highly esteemed class leader, and local preacher in the Wesleyan Church.

In 1891, at Front Street, George Dickinson, retired butcher, aged 72, his wife Elizabeth H 64, son, George, butcher, aged 29, and daughter, Martha E 25.

15th January 1898 (North Cumberland Reformer)

ALSTON POLICE COURT

DRIVING WITHOUT LIGHTS. Thomas Vipond, carter, Nenthead, was charged with driving a wood waggon on the Nenthead Road on the night of December 2nd without being provided with lights.—P. C. Parker proved the case, and a fine of 1s and costs was imposed.—Victor Peart was also charged with driving a trap at Nenthead on the night of the 30th December without having lights affixed to the same. The case was proved, and defendant was fined 1s and costs.

12th February 1898 (Hexham Courant)

Deaths

At Allenheads, 6th inst. aged 44, Margaret Ridley, youngest daughter of the late John Ridley of West Allen.

In 1841, at Limestone Brae, West Allen, John Ridley, lead ore miner, aged 35, his wife Elizabeth (Swindle, married 2nd June 1827, at Ninebanks) aged 30, children Jane 13, Barbara 10, John 8, Mary 5, Henry 3, and Besse 1.
In 1851, at Limestone Brae, West Allendale, John Ridley, mining agent & farmer of 25 acres, aged 45, his wife Elizabeth 42, children Jane, 22, John, assistant land surveyor, aged 18, Mary 15, Henry 13, Besse 10, Sarah 8, Thomas 6, Hannah 3, Barbara 7 months, and grandson William Ridley 1 month.
In 1861, at Low Limestone Brae, John Ridley, lead mine agent & farmer of 25 acres, aged 55, his wife Elizabeth 53, children Mary 25, Henry 23, Bessie, dressmaker, aged 20, Sarah 18, Hannah 13, Barbara 10, Margaret 7, and William 10. In 1871, at Blackett Terrace, Carrshield, John Ridley, widow (Elizabeth died 2nd quarter of 1866, aged 58), retired lead mines agent, aged 65, daughters Sarah 28, and Margaret, dressmaker, aged 17.
In 1861, at Allenheads Lodge, John Ridley, land & mine surveyor, aged 28, his wife Elizabeth 26, children John C. 3, Thomas W. 1, Hannah E. 1 month.
In 1871, at Parsonage House, Allenheads, John Ridley, land and mine surveyor, aged 38, his wife Elizabeth 36, children John C. 13, Thomas W. 11, Hannah E. 10, Henry F. 8, George D. 6, Louis E. 3, Norman B. 2, Fred 1, and domestic servant Mary A Watson aged 16.
In 1881, at Parsonage, Allenheads, John Ridley, widow (Elizabeth died 4th quarter of 1878, aged 44), mining engineer, aged 48, children Hannah E. house keeper, aged 20, George D. monitor at elementary school, aged 16,

Louis E. 13, Norman B. 12, Freddie 11, Dora 7, and Margaret Ridley, annuitant, aged 27.
In 1891, at Allenheads, John Ridley, widow, mining engineer, & surveyor, aged 58, daughters Hannah E 30, Dora 17, sister Margaret Ridley 37, and Isabella Padgett, Wesleyan evangelist, aged 53.
In 1901, at Allen Lodge, John Ridley, land bailiff & surveyor, aged 68, and domestic servant Elizabeth Heslop aged 24.

ALSTON SCHOOL BOARD

ATTENDANCE

The ATTENDANCE OFFICER reported the attendance as follows:—

	No. on books.	Aver. attendance.
Nenthead (open 2 weeks)	139	99
Nenthall	35	29
Tynehead	13	8
Garrigill	73	51
Leadgate	28	21
Alston (High, open 3 weeks)	102	85
Alston (National)	44	35
Alston (Infants)	70	49
	504	377

The poor attendance at Nenthead was owing to the influenza. The question of a site for the proposed new school at Nenthead was considered in Committee, correspondence being read from Mr J. C. Swan on the subject.

19th February 1898 (Hexham Courant)
Deaths
At Lea Hall, Allenheads, 15th inst. aged 77, John Spark.
In 1841, at Allenheads Village, Hannah Spark aged 55, John Spark, lead ore miner, aged 15, Robert, lead ore dresser, aged 15, and Joseph, lead ore dresser, aged 15.
In 1851, at Lea Hall, John Spark, lead ore miner, aged 30, his wife Frances (Whaley, married 26th May 1850, St Peter, Allenheads) aged 26, brothers Robert, lead ore dresser, aged 28, and Joseph, clog maker, aged 36.
In 1861, at Allenheads, John Sparke, lead ore miner, aged 40, his wife Frances 37, and house servant Jane Peart aged 16.
In 1871, John Spark, lead ore miner, aged 50, his wife Frances 46, and domestic servant Mary J Dixon aged 17.
In1881, at Lea Hall, John Spark, widow (Frances died 4th quarter of 1871, aged 47), lead miner, unemployed, age 60, and domestic servant, Sarah J. Liddle aged 21.
In 1891, at Lea Hall, John Spark, widow, lead miner retired, aged 70, and domestic servant Jane Short aged 57.

5th March 1898 (Hexham Herald)
Deaths
Allendale, Turramurra, Sidney, Australia, 9th January, aged 35, Thomas William Hutchinson, late of Newcastle upon Tyne and formerly of Allendale.

William Hutchinson married Elizabeth Waggott, 4th quarter 1856, registered at Hexham.
In 1861, at Dirtpot, Allendale, William Hutchinson, lead miner, aged 32, his wife Elizabeth 33, sons, James 3, and John R 6 months.
In 1871, at Rope Heugh Cottages, Allendale, William Hutchinson, lead miner, aged 42, his wife Elizabeth 45, sons, James 13, and Thomas W 8.
William Hiutchinson, died 3rd quarter 1879, aged 50, registered at Hexham.
In 1881, at 18 Shumac Street, Elswick, Newcastle, James Hutchinson, labourer, aged 23, brother Thomas W, Mechanical Draughtsman, 18, and mother, Elizabeth Hutchinson, widow, aged 53.
Elizabeth Hutchinson, died 4th quarter 1885, aged 57, registered at Newcastle.

12th March 1898 (Hexham Courant)

NENTHEAD LEAD MINES

The briskness in lead mining, reported a few months ago is still being maintained. The number of men employed is larger than has ever been known before at one time and the output is far in excess of previous years. The new machinery is now in full swing, all the difficulties have been surmounted, and the mills are working very satisfactorily night and day. A boring machine has been introduced *(and is being worked at what is known as the sump*) and a start made with it this week, the results so far being satisfactory.

Deaths

At Middleton in Teesdale, The Grove, 7th inst., aged 57, Jane widow of the late John Joseph Millican.
See 17th August 1844, 2nd September 1876, 24th August 1878, 5th April 1879, 8th February 1896, & 26th June 1897.

12th March 1898 (The North Cumberland Reformer)

LEAD MINING AT NENTHEAD:

The activity in this industry reported a few months ago is well maintained, and the largest number of men are now employed that has ever been known at one particular time. Consequently, the output is far in excess of previous years. The new machinery recently introduced is now going in full swing, and although at first difficulties were met, the mills are now working very satisfactorily night and day. The mills for the separation of the metal at one time were entirely dependent on a good supply of water for propelling purposes. Now, however, that is remedied. When frosts prevail, and water may not be obtainable, the mills are propelled by steam power. The chief item of interest relating to the inside operations is the introduction of a boring machine, the success of which will have an important bearing on the working of the mines in the future. This is being worked at what is known as the "Sump." Four-inch pipes have been conveyed down a shaft about 60 fathoms, a Pelton wheel placed, and thus a large pressure is obtained. A start has been made this week, and the results so far are very satisfactory.

SAD DEATH OF A FARMER NEAR ALSTON.

An inquest was held on Thursday afternoon at the house of Mr Nevin Heslop at Nenthead before Mr Arthur Lee, deputy coroner for East Camberland. touching the death of Mr Henry S. Bright, farmer and miner, of Nenthall, whose body was found on Tuesday morning in the corner of a field on the right side of the road leading from Nenthall to Nentsbury. Mr Walton, Cocklake, was appointed

foreman of the jury. The first witness called was Jane Bright, widow of the deceased, who gave evidence to the effect that her husband was at the market at Alston on Saturday last, and came home late at night He had had some drink but was sensible, and counted his money over before going to bed. She saw that be had 2 £5 notes and one sovereign beside some loose silver. He put the money in his purse again. He left home about eleven o'clock on Sunday morning, and went in the direction of Nentsbury. She was quite certain he had no drink in his pocket. That was the last time she saw him alive.
He was 41 years of age. She mentioned his absence to the children on Monday but to no one else. On Tuesday morning she got very anxious, and asked T. Vipond, a cartman, if he had seen her husband, but he could give her no information. She was preparing to go in search of him when she got tidings of his having been found dead. He had sometimes been away for a day or two before.
Isabella Lee, a girl about 11 years of age, said she saw Bright going towards Nentsbury when she was coming home from Sunday school. She last saw him near Joseph Redshaw's gate.
Jeffery Bendle, who is employed on the roads, spoke to the finding of the body. He had occasion to go over the wall into Mr Allison Teasdale's field on Tuesday morning about 9 o'clock, and as he was stepping over the wall he saw the body of a man, apparently dead, lying in a corner. He called to another workman, Joseph Roddam, and they lifted the body up. They recognised deceased, and sent a message to his wife. The body was quite stiff and seemed to have been lying some time. Deceased was in a kneeling position. He did not see any drink in a bottle until the arrival of Sergt. Farrar and P.C. Parker, who searched the body. It would be difficult to see the body from the road. He had never been in the field since Sunday, and he last saw deceased alive on the Friday previous. He knew deceased was much addicted to drink.
Dr Christie, assistant to Dr Carson, Alston, said he was sent for on Tuesday morning and examined the body. He found deceased was quits stiff. He had the body removed home. The face was flattened through lying on the ground, but then were no marks of violence A little blood had been coming from the right nostril. Deceased had been dead some hours, but he did not think the body had laid since Sunday, but he thought it had laid over part of the previous night He saw a bottle that had been found on the deceased containing about a wine-glassful of rum. The body smelt very strongly of Rum. He considered that the cause of death was exposure while under the influence of drink.
Sergt. Farrer stated that he searched the body and found two £5 notes and £4 10s in loose cash, two clay pipes, matches and tobacco, and a bottle containing rum in the inside pocket of the coat He saw no signs of a struggle. He had inquired at all the public houses in Alston, Nenthead. and Nentsbury, but had failed to find out anything about the movements of deceased since Sunday. No one admitted selling him any drink.
The Coroner Said it was difficult to make out where deceased had got his drink. It appeared that he must have spent at least 16s since leaving home. None of the publicans admitted having seen him, but the drink must have been purchased somewhere.
After a minute's consultation the jury returned a verdict of "Death from exposure while under the influence of Intoxicating drink." Deceased leaves a widow and 7 young children. *See 12th April 1884*

12th March 1898 (Hexham Herald)

WEARDALE

The death of Mrs Vickers Hodgson *(Mary)* widow of the late Vickers Hodgson of Westgate House, occurred last week end (2nd inst). Her husband was one of the pioneers of the iron trade in Weardale.

14th March 1898 (Sunderland Daily Echo and Shipping)

NEW INDUSTRY FOR THE NORTH.

Messrs Fry, Everett, and Co. have been joined by some important financiers of the highest standing, who intend to erect large smelting works in the North of England to carry on their process for the treatment of sulphide zinc ores. At present the most important zinc-mining establishment in the North of England is that the Vieille Montague Co. at Nenthead, near Alston. But zinc-smelting is not carried on at Nenthead, the ore produced there being crushed and washed on the spot and then shipped from the Tyne to Belgium. The establishment of zinc-smelting works in the North of England would therefore mean the introduction of a new industry in this district.

26th March 1898 (Northern News)

NENTHEAD CO-OPERATIVE SOCIETY.

In the interest of the above Society, a new feature was introduced in the shape of a Demonstration held on Tuesday, 22nd inst., the object of which was, or is, to awaken interest in the Co-operative movement in the village.

The demonstration took the form of a public meeting in the Large School Room, which was nearly filled with an appreciative audience. Stirring addresses were given in support of the movement by Messrs. J. WARWICK (Chairman of the Co-operative Union for the Northern Section), and W. STOKER (member of the C.W.S. Committee), who by their experience and knowledge of Co-operative principles were able to set forth all the advantages of being a member of the Co-operative Society. Facts and figures were given by the above gentlemen relative to the widespread influence of the Co-operative movement, hitherto not altogether understood in this neighbourhood, the inhabitants of which have been benefitted indirectly by the existence of a Co-operative Society in their midst. The proceedings were enlivened by the attendance of the Nenthead Brass Band, under the leadership of Mr. JOS. ENGLISH, who in no small measure added to the enjoyment of the evening. Councilor HARRISON, one of the pioneers of the Co-operative movement in this village, presided over the meeting.

Votes of thanks concluded this part of the programme, after which a knife and fork supper was provided, the provisions being of an abundant character.

The tables were gracefully presided over by the following ladies:

Misses E. HETHERINGTON, M. DICKINSON, E. A. ANGUS, H. WATSON, A. SPARK, M. THOMPSON, P. COUSIN, and F. RICHARDSON, Mrs. R. MARTIN and Mrs. R. WALTON acted as bread cutters, and Mrs. W. SPARK and Mrs. J. THOMPSON as tea infusers. Messrs. C. ARMSTRONG and R. MARTIN surely had a hard time carving, as they were seen to have their coats off.

Dancing was heartily indulged in during the rest of the evening, music being supplied by the untiring zeal of the band in attendance. The rendering of the National Anthem brought a very enjoyable evening to a close.

ALSTON NEWS
DRAUGHT MATCH

A match between seven members of the Alston Union Club and seven persons from Nenthead village, having been arranged, it was played at Alston on Friday night last, and resulted in a win for the home team. This is the third time they have met, and on each occasion the Alston team have been victorious. We understand that the Nenthead team have been practicing a good deal during the past winter, having had a draught league with a view, undoubtedly, of turning the scales at the next time of meeting.

There is an old saying that practice makes perfect, and should the Nenthead team keep going on, possibly they may combat with their opponents more successfully in the future.

After the match supper was provided by the Alston team, and on the motion MR. FERNAU, seconded by MR. T. LATTIMER, the best thanks of the Nenthead friends was accorded to the Alston team for the manner in which they had been entertained.

The following are the scores, each playing three games...

ALSTON.	W'n	D'w
W. LEE	1	0
R. NIXON	2	1/2
J. BRAMWELL	2	0
G. DICKINSON	2	1/2
J. BOWMAN	1	0
T. M. SUMMERS	2	0
H. HALL	2	0
NENTHEAD	**W'n**	**D'w**
C. J. FERNAU	2	0
T. LATTIMER	0	1/2
W. SINCLAIR	1	0
DR. SHORT	0	1/2
F. RICHARDSON	2	0

2nd April 1898 (The North Cumberland Reformer)

ALSTON DISTRICT COUNCIL
MEDICAL OFFICERS REPORT.

The report of Dr. Short, Medical Officer for No. 2 District (Nenthead and Garrigill) for the year 1897 was submitted as follows

“I beg to present to you the annual report for 1897 on the health and sanitary condition of No. 2 District.

“At the outset I will allude to the remarkable improvement that has taken place in the mining industry, the chief staple of employment upon which so much depends the welfare of the district, as well as that of Alston and the surrounding villages.

Under the able management of the Vielle and Montagne Company, one of the richest mining companies in the world, the industry has by leaps and bounds

grown into the most active and flourishing condition. Machinery of the latest and most modern invention has been erected, and new mines have been opened out. Miners, and those with families, have been flocking to the place in quest of employment and as a consequence there has been a considerable increase in the population, and to such an extent that there is not a house but is occupied. In fact often complaints have been made to your inspector and myself of overcrowding, but to this reference will be made later on. I have estimated the population as 1875, an increase of 200 on that obtained at last census, and have apportioned that increase 150 to Nenthead, and 50 to Garrigill.

"*Deaths.*—The total deaths registered were 31, 17 males and 14 females, and on the estimated populations this gives a death rate of 16.5 per thousand. I should mention that among the deaths are included 8, 3 that were returned uncertified and 1 due to self-inflicted injury. There is an increase on the death rate for last year, which was remarkable for being the lowest for several years. The increase in 1897 is due to the heavy incidence of mortality among infants under one year; to an epidemic of , scarlet fever, which resulted in 4 deaths, and to the large proportion of deaths over 65 years of age.

"Births.—The number of births during the year amounted to 44, 21 males and 23 females, the birth rate being 23.46 per thousand.

"Distribution.—In the distribution of deaths in the two localities, 20 occurred in Nenthead, or 17.1; and 11 in Garrigill, or 15.4 per thousand. More deaths occurred from scarlet fever, and of infants under one year in Nenthead than in Garrigill. In Nenthead 31 cases of scarlet fever were notified, and of these three were fatal, in Garrigill there was only one case which ended fatally. Of those above 25 and under 65, there were in Nenthead 6 deaths, and in Garrigill one. Among the former the cases of death were as follows:—Heart Disease 1, scarlet fever 1, diseases of the nervous system 2, phthisis 1, pneumonia 1. The death at Garrigill was due to phthisis,

"Infantile Mortality.—The infantile mortality is excessively high this year, amounting in all to 10 deaths, 7 in Nenthead, 3 in Garrigill, and giving a rate of 227.2 per thousand births. The causes that have been in operation in producing this high mortality do not come under the head of preventive causes, as no deaths have been due to diarrhoea as the remit of improper feeding, or wilful neglect Weak and puny infants, some prematurely born have come into the world, and have survived their birth a few days or weeks, and in one case only was scarlet fever the cause of death, of an infant four months old"

"Zymotic Diseases.—There have been 4 deaths from the diseases included under the term zymotic one in Garrigill, and 3 in Nenthead. Of the latter, one was uncertified, they were all doe to scarlet fever, the mortality from which was 2.13 per thousand."

"Scarlet Fever.—Scarlet fever appeared in the district at the end of 1896, and assumed an epidemic form at the beginning of 1897, necessitating the closing of the Nenthead Schools. This step to all appearance abated the spread of the disease, but during the year at intervals of two or three months, there were periodic recrudescence's of the disease, though mild and short lived. I attribute these occasional outbreaks to the imperfect way in which isolation, and disinfection have been carried out. It is singularly rare in country houses and I allude especially to those occupied by the working classes to secure a room unreservedly for the infected patient Besides this there is another difficulty in the way of successfully combating against the spread of the disease, and it is

to prevent children from infected houses mixing with other children that are untainted, and the difficulty is very much enhanced when the schools are dosed In fact, I am beginning to doubt whether the ordained method of closing schools in all epidemics does the good one expects, and especially so as regards country places."

"Influenza-—Simultaneously with scarlet fever, an epidemic of influenza made its appearance at the beginning of the year compelling me to close the Nenthead School. In several of these cases eruptions resembling scarlet fever and measles were visible rendering it somewhat difficult in differentiating these cases from those of the zymotic diseases that were then prevailing. Influenza has been present more or less throughout the year. Cases were numerous at the beginning of the year, and at the end of it; all "Nenthead and his wife "fell victims to it, but no deaths occurred. The pulmonary form the disease so often met with was not severe, in other cases the stomach and bowels were the principal organs effected, especially in children."

"Measles.—An epidemic of measles broke out in Garrigill at the beginning of the year, the source of the infection being from Newcastle. The Garrigill school was closed for some weeks. The outbreak was of a mild character, and no deaths occurred."

"Erysipelas.—One case of erysipelas was notified from Garrigill. "

"Phthisis.—There were three deaths from phthisis, 2 of them in Nenthead, one of a person 71, the other 49 years of age. One death occurred in Garrigill, at the age of 33. The death rate from this disease is 1.6 per thousand."

"Respiratory Diseases.— Pneumonia has been conspicuous by its absence except in a mild form, and then as a sequel to influenza. From respiratory diseases only one death has been returned, due to capillary bronchitis. In an infant a few weeks old."

"*Closure of the Smelt Mill*.—I have to report that at the beginning of the year, the Smelt Mill at Nenthead was closed, with results most beneficial to the health of the district, and there has not been a single case of lead colic under observation throughout the year. Those who worked in the mill were pasty-looking, anaemic, and thin, but since the closing of the mill they wear a far different complexion, look florid, robust, and healthy. I prognosticate that a marked diminution in the death rate from phthisis and renal disorders, will result from the closing of the mill."

"*Sanitary Work*.—Along with your Inspector, who has never failed to comply with the demands I have made upon his time, and has always rendered me efficient help, a house to house inspection was made, and I am pleased to say, that the results as regards a great part of the district we visited have been satisfactory, for there has been an abatement of the nuisances that prevailed at well as improvement in defective sanitary conditions. It is with pleasure I report that to several houses new privies eve been erected, and others are in the course of erection. Still, the majority of the condemned houses are without sufficient privy accommodation.

I cannot help drawing your attention to this, and asking you to take stringent measures in effecting an improvement which has been long felt and wanted. You have had your attention drawn to this sanitary defect for many years now, and have been slow in taking action. May I hope that before the end of another year you will have compelled every owner of property to provide sufficient privy accommodation."

"*Water Supply*.—In regard to water supply I cannot speak of it in terms of approbation. in rainy weather at most of the wells, the water is unfit to drink owing no doubt to surface contamination from defective pipes. Before any radical and permanent improvement can be effected, new pipes will have to be laid down in place of the old ones. I think it is a useless expenditure of money, the patchwork method that has been adopted in remedying this defect I cannot, with any definiteness attribute any diseases to the impure water supply, but I desire this fact may be kept In view that an impure water has a detrimental effect on the health of the inhabitants, and should therefore receive prompt attention. Two hundred yards of glazed socket pipes cemented have been laid down from High House to the Nenthead Wells, and I trust that the scheme in contemplation to improve the water supply for Nenthead and Garrigill will soon be in execution" *"Alleged Overcrowding*.— During the year complaints of overcrowding were made to the inspector and myself and a special investigation was instituted to discover whether there was any justification for these complaints. We went from house to house making special inquiry as to the number of occupants, as well as taking the cubic contents of the rooms. We found that in a few instances the number was just barely compatible with health, and warnings were given that no more be taken in. The "Barracks" was also Inspected, this used to be the store room in connection with the Smelt Mill, and has been converted into a room for the accommodation of "walleters" as these are called who work at Nenthead during the week, going home over the week-end, and who bring their weekly provisions with them in a wallet. The place affords accommodation for 42, and there were only 39 at the time we visited it"

Mr PICKERING remarked that he did not agree with the Medical Officer as to the increase of population in Garrigill There was more likely be to a decrease.

THE MARKET PLACE

The SURVEYOR submitted report and estimates as to the repair of the Market Place, drawn up after inspecting it in company with the Inspector and the committee appointed for the purpose. Alternative estimates were given, one for repaving on the slope, and one for forming the place into squares. For paving with freestone setts, and forming the footpath, which is 40 yards long by 7 ft wide, the amount was £80 12s 4d, for forming five squares of varying sizes with concrete, and stone wall support at each end £121 12s 6d.—A general opinion was expressed that squares would be unsuitable, both as being dangerous, and rendering access to the shops abutting on the Market Place difficult—Mr WARD: Does this footpath belong to the public or to the Lords of the Admiralty.—Mr PICKERING thought the public would have a right of way over it. With these estimates before them the question was were they prepared to take over the Market Place.—The CHAIRMAN: Had we not better adjourn the matter for the new Council to deal with. We have this estimate before us, we are not bound to go directly into it—Mr PICKERING agreed, and moved that the matter be adjourned.—Mr J. R. WALTON seconded, and it was agreed to

THE ROADS

The SURVEYOR presented his estimate of the stone required for the roads, amounting to 350 cubic yards. In reply to Mr DOWSON, he said that did not include the metal required for the road used by the traction engine, which could not be estimated. They migh put on two engines. He drew attention to the dangerous state of the road between Overwater and East Nenthead. It was a portion which the Nenthead Company had appropriated to their own use, and

were liable to repair. The London Lead Company put up a bridge, and had since then kept up this portion. The new Company had putdown more rails, causing the approach to be steeper and more dangerous, and it was almost impossible for vehicular traffic to get over without risk of injury. Foot passengers also complained, and waggons were sometimes left blocking the road way. He had spoken to the agent, who had promised to attend to the matter, but nothing had been done. Previous to the London Lead Company renting the mines, it was a public road and bridle road, but they brought the refuse heap forward, built the bridge, and repaired the road.—A letter from Mr John Archer, West Nenthead, was read, stating some of the above particulars, calling the attention of the Council to the matter, and the CLERK stated that he had seen Mr LATTIMER who could not remain to the meeting owing to the storm. Mr Lattimer endorsed all that Mr Archer said, and also told him that only a few nights ago a female had a narrow escape from injury in crossing the line. The public had a right of way over the road, and the Company had no right to obstruct it.—It was agreed that the Clerk communicate with the manager of the Company.

A JOB FOR THE CHAIRMAN.

The Inspector reported a nuisance on the road side near Clitheroe, arising from a large accumulation of rubbish deposited by residents in the cottages there.—Mr J.R. WALTON: That is the County Council business. (Laughter.)—Mr DOWSON thought the County Council should have notice to remove it.—The SURVEYOR said that he had removed accumulations in this place before. The residents had no other place of deposit but the roadside.—The INSPECTOR: My suggestion is that the County Council be requested to clear this away at once, and that the Surveyor give notice that anyone depositing rubbish here in future will be prosecuted.—On the motion of Mr DOWSON, seconded by Mr PICKERING, it was agreed to write to the County Council Surveyor.

THE OLD DIFFICULTY.

The INSPECTOR further reported several properties, chiefly at Townfoot, Alston, which were yet without privy or ashpit Some had no ground available on which they could be erected. Refuse was still deposited on the Millburn Bank — The CHAIRMAN: They should be stopped.—The INSPECTOR said that for those who had failed to provide sanitary accommodation in compliance with the notices he had served, the next thing the Council could do was to bring them before the magistrates.—- Some discussion took place with regard to taking farther steps with those who had neglected to comply with the notices, although they had available land, but no action was taken.

NO ASSETS.

The Clerk stated that there were no funds in hand for carrying out the water main extension at Alston. The work must either be deferred till May, or they must go on trusting to be able to borrow the money. The pipes had been delivered, but not all

paid for.—It appeared that the cost of the extension will considerably exceed the estimate made by the Inspector in 1896, and some remarks were made by Mr WARD on the matter.—The INSPECTOR explained that since the estimate was made iron pipes had gone up 11s per ton.—The Council came to no decision.

SCHOOL BOARD.

The monthly meeting of the School Board was held on Saturday. Present Mr Elliott (Chairman), Messrs. H. Walton and H. Bell, Mr Walton (attendance

officer).—The ATTENDANCE OFFICER asked for some six summonses to be taken out for non- attendance but the members decided to issue notices before proceeding further.—The attendance for the past month was given as follows:—

Attendance

	On Books	**Average.**
Nenthead	140	119
Nenthall	33	24
Tynehead	11	7
Garrigill	73	56
Leadgate	28	22
Alston (High)	101	84
Alston (National)	44	33
Alston (Infants)	68	49
	498	394

Deaths

At Garrigill, on the 19th ult., after a long illness patiently borne, Elizabeth, the beloved wife of John Ward, aged 55 years. *See 24th August 1872*

2nd April 1898 (Hexham Herald)

WEARDALE

Influenza is raging in Weardale just now. At Stanhope both the doctor and nurse have been down with it.

WEARDALE COUNCIL MEETING

The lead mine shops in **Rookhope** and their insanitary condition was also discussed at the meeting. Relays of miners using the same beds was condemned. One man getting into bed as another got out was thought to be a speedy method of spreading disease. It was also thought the mine shops might be kept much cleaner than at present.

16th April 1898 (Hexham Courant)

Deaths

At Paradise Farm, Highcliff, Peninsula, New Zealand, 19th January, in her 57th year, Mary the dearly beloved wife of Thomas Lee.
At California, 5th February aged 73, Mary wife of the late Thomas Ridley, Contractor, late of Allendale.

6th April 1898 (Hexham Herald)

Deaths

Gateshead, North Bourne Street, aged 69, Hannah widow of John Hutchinson, late of Nenthead.
See 15th April 1871

23rd April 1898 (Hexham Courant)

Marriages

At the Registry Office Hexham, 9th inst., Thomas fifth and youngest son of William Ridley of Gaunerton, to Anna, third daughter of Joseph Dargue, of Scotch Hall, Allendale.

Deaths

At Hayring, Nentsbury, 16th inst. aged 56, John George Millican.
See 28th July 1868, and 24th August 1878

23rd April 1898 (Penrith Observer)

DEATH OF A LOCAL SOLICITOR

On Saturday John George Millican. solicitor, for some time with the late Mr. T. G. Cant, solicitor, Pemith, died at Hay Ring, Nentwater, near Nenthead. Deceased. who had not been in practice for some time, had resided during the past four years with his cousin, Joseph Liddle, and had been suffering since the commencement of last month from influenza and bronchitis. Dr. Christie, Alston, attended him, and last saw him on Friday, when he ordered deceased to be kept in bed. About three o'clock on Saturday afternoon Mr. Liddle went into Alston on business, leaving deceased in charge of a neighbour, Mrs. Pattinson. At a quarter to six Mrs. Pattinson went in again and found deceased in a sitting position on the floor of the bedroom with his back resting against the bed. She went to tell her husband, and as he and Walton Holmes, Grassfield, were about to enter the house Mr. Liddle arrived. They all went in together, and found deceased quite dead. Dr. Christie certified death to be due to heart disease.

30th April 1898 (Newcastle Courant)

RECREATION GROUND FOR ALSTON

A meeting called by the Jubilee Committee has been held in the Town Hall Alston, to consider the question of purchasing the fields known as the Fairhill for the purpose of a recreation ground. The committee have been in communication with the Lords of the Admiralty, who have offered the field which covers about 5¾ acres, for £200. The question was fully considered, and a large majority voted in favour of the purchase. The money will be raised by private subscription, the estimate being about £400 for the purchase and putting the field in proper order.

ALSTON.—As an evidence of the activity in the mining industry at Nenthead, another traction engine and two waggons have arrived at Alston this week for the purpose of conveying the traffic to Alston. The present engine has lately been traveling day and night.

28th May 1898 (Hexham Herald)

ALSTON

As an evidence of the activity in the mining industry at Nenthead another traction engine and two waggons have arrived at Alston this week for the purpose of conveying traffic to Alston. The present engine has lately been travelling night and day.

NENTHEAD
FATAL RESULT OF AN ACCIDENT

About two weeks ago, while some carriers from Nenthead, were loading wood waggons at Alston Station, a large tree which was being hoisted to the waggon slipped and a lad about 15 years of age named Joe Teasdale of Nenthead who was in charge of a horse, being unable to get out of the road was severely hurt, his thigh being broken in 2 places, a large cut above the knee, and it was feared that he had received some internal injury. He was conveyed home and after much suffering expired on Monday morning.
In 1891, at Wellgill, Nenthead, John Teasdale, gamekeeper & farmer, aged 33, born Haltwhistle, his wife Ann 35, born Alston, children William 9, born Haltwhistle, Joseph 6, born Haltwhistle, Thomas S. 1, born Alston, and farm servant Thomas Vipond aged 23.

28th May 1898 (The North Cumberland Reformer)

THE INQUEST.

An inquest was held in Mr K. Peart's Miners' Arms, Nenthead, on Tuesday, May 24th, before Mr J. B, Lee, coroner, Mr A. Bolton, being foreman of the jury.—John Teasdale, father of deceased, said deceased was 14 years old on the 2nd of April. He had been employed on the washing floors, bat latterly had been going with a horse and cart leading coal from Alston, and occasionally assisting Thomas Vipond with wood waggons. Thomas Vipond was in charge. Witness expected deceased would be with his own cart, but might assist with wood waggons. About midday deceased was brought home in a carriage by Alan Dickinson and another gentleman. Dr. Short was brought and had attended him since. Deceased said the accident would never have happened if the wood had been beside the crane and lifted with it. Witness saw the waggons when they left that morning, but not being much used they were all right as far as he could see. He had never heard of any complaints about waggons nor any accidents before.—The Coroner: Can you attach any blame to anyone?—Witness: The

only blame I think was on account of the timber being laid by the Railway Company where there was no crane, and it had all to be lifted by manual labour.—The Foreman: Vipond is looked upon as an expert in wood leading?—Yes.—The Foreman: There was a lot of timber and it could not all be laid beside the crane.—That I can't say.

Dr. Short said he was called to see the deceased, on the Wednesday afternoon 11th May at his father's residence at Wellgill, Nenthead. He found deceased suffering from shock, and from an oblique fracture running from before, backwards between the middle and lower thirds of the right thigh. He also had a severe contusion of the knee-joint of the same side, the joint was very much swollen, the swelling being due not so much to the bruising of the soft parts around it, as to the excessive effusion of synovial fluid (which is normally present) into the joint. There was also a gaping wound 4½ inches in length running across the axis of the injured limb and situated an inch or so below the knee-joint.

Having sutured the wound and brought the edges together with silver wire and silk cord, he set the fracture and kept it in position in the ordinary way by means of Liston's long splint. On applying the bandage to fix the splint to the side of the chest and abdomen, the deceased complained of abdominal tenderness, but there were no symptoms of a definite nature to suggest that he had received any serious internal injury. For a bit he seemed to progress most satisfactorily, his appetite was good, he slept fairly well and his bowels acted regularly. He had an attack of bilious vomiting, but no importance was attached to this as when in health he was periodically subject to such attacks.

On Thursday 19th May, 1898 persistent vomiting set in, the pulse increased in frequency and the patient looked very ill. Witness then began to apprehend that there was serious abdominal trouble and suggested to the parents the advisability of a consultation with another medical practitioner. Dr. Spiers, of Haltwhistle was telegraphed for, and having seen and examined the deceased, he confirmed witness's apprehensions.

in spite of medical treatment, the patient gradually grew worse, the vomiting became more persistent, the bowels failed to act; tenderness over the abdomen was more pronounced and colicky pains complained of: gradually increasing weakness set in and death ensued on the morning of the 23rd May, 1898.

On the same day witness made a post-mortem examination of the abdominal contents and found the stomach much dilated, both small and large intestines were intensely congested and there was an excess of fluid in the peritoneal cavity. Tubercular nodules were also seen in the peritoneum covering the intestines, a condition in which inflammation might easily be set up from injury however trivial.

He was of opinion that death was due primarily to peritonitis induced by abdominal contusion, and that it was accelerated by a fractured thigh, and by other injuries which the deceased had sustained.

Thos, Vipond said he lived at Wellgill, and was a carter. Deceased was in the habit occasionally of going with him to help him. He was employed by J. Teasdale. Deceased had been with him a few months. He had had 16 year's experience in leading wood, and had been leading some days before the accident. Sometimes he got help from the station men, or anybody about They loaded generally from the crane wharf, beside coal teams. They just loaded where they lay off the timber. It was much more difficult from wharf where there

was no crane. He complained about it being laid there to Wm. Hall, the foreman porter who was engaged by the Mining Company to arrange for the receiving and dispatching of goods. Hall said there was no room beside crane for it. He did not know about it being safe, it was a lot harder. Alan Dickinson, Moffat, and other two or three men were helping him. Hall was sometimes there, and sometimes his man. Witness then described to the jury how difficult it was to load timber without a crane, and how the tree slipped and fell on to the boy.
The police report stated that deceased was a cart driver, working for and living with his father, John Teasdale, Wellgill. He had been a strong, healthy boy. Between 10 and 11 on Wednesday, the 11th of May, he was engaged in company with Thomas Vipond loading timber (vis., trees) at Alston Railway Station on to a wood waggon by hand. They had got one tree on the waggon, and were in the act of putting on the second, when the block of the wood waggon on which the wood lays gave way, and fell over on the deceased. It was immediately lifted off. He then said his leg was broken. He was brought home. Dr. Short attended deceased up to his death.
In reply to the Foreman, Sergt. Farrar said it was on account of the crane being full up with timber that some of it had to be laid on the other wharf, but they should have two cranes.
Alan Dickinson gave an account of the accident similar to that of Vipond.
This concluded the evidence, and the Coroner, in addressing the jury, said everybody employing manual labour had to use every possible means to avert accident. As to this particular accident, it seemed quite clear that from the wharf where the timber was loaded, sufficient means had not been adopted by the providing of a crane, and their duties were to say whether it amounted to criminal negligence. Their verdict could only apply to that and not to any civil damages. Perhaps they would decide there was negligence but not criminal, and the accident would not have occurred if a crane had been provided. They were practical men, and be left it with them, but he certainly thought there required some improvement at the particular wharf where the timber was loaded when deceased received his injury.
The jury retired, and after a brief consultation returned the following verdict and rider :—"Accidental death, but they wish to add a strong recommendation to the Railway Company to provide better arrangements for loading and unloading timber, especially by having a crane on the wharf beside the coal teams."

11th June 1898 (Hexham Courant)

NENTHEAD

FATAL ACCIDENT

A sad accident by which a young man named **Thomas Hutchinson** came to his end occurred on the main road near Nenthead on Monday. The deceased was employed by the Vieille Montagne Zinc Co., to go along with one of their traction engines as flagman and brakeman to the wagons. ... Deceased was a labourer and resided with his mother Jane Hutchinson, in Crown lane, Alston, and was employed by the above company to attend their traction engines conveying zinc ore from Nenthead to Alston station. One journey between the two places had been performed. About 11.30 am the second journey was commenced, the train consisting of a traction engine with two wagons, each containing eight tons of ore. John Leach as driver and John Irwin as steerman, were upon the engine. Robert Irwin was acting as flagman in front of the engine

and the deceased was acting as brakesman, his duties being at the rear of the wagons. When about half a mile up the hill from Nenthead, the driver stated that the deceased took a sling chain from the engine, and when he last saw him alive he was carrying the chain towards the last wagon. The chain was sometimes used when there was any difficulty in getting up banks. The engine was then going about three miles an hour. He did not miss the deceased till he got to Haggs almost half a mile from where the body was found. He sent the steerman and flagman back to look for deceased, and while they were doing so they met a messenger coming from the direction of Nenthead, who told them the body had been found on the road. The deceased was found by Frank Beck of Nenthead and James Pears of Nentsbury. Sergt. Farrer was communicated with, and in company with PC Parker, was quickly on the spot. The deceased was lying face downwards with the right arm stretched out, and the left arm under his chest. The wheel of the last wagon, it is supposed, had passed right over the body. ...

Deaths

At Nenthead 6th inst. (by accident) aged 21, Thomas Hutchinson, son of Jane Hutchinson, Crown Lane, Alston.

In 1891, at Crown Lane, Alston, Jane Hutchinson, single, charwoman, aged 47, sons Thomas, stocking knitter, aged 13, and William 10.

11th June 1898 (North Cumberland Reformer)

SCHOOL BOARD.—The monthly meeting of this Board was held on Saturday. Present—Messrs R. Elliot (Chairman), H. Bell, and J. Rutherford.—A letter was read from the Education Department relating to the question of children leaving school at Nenthead, and who had not received certificates of exemption and were under age. The question was before the Board at the previous meeting, and it was decided to reply that the ages given the Board did not correspond with those given the Inspector. The Department now asked what evidence had been produced by the parents as to the children's exemption and fitness for leaving school. It was resolved to reply that no evidence was given, but merely a statement that they were of age. The Board would, however, be more careful in the future.—It was resolved to employ Mr Davidson, of Newcastle, as architect for the building of the new school and school house at Nenthead.—The attendance was reported as follows:—

	No. on books.		Average atten.
Nenthead	147		132
Nenthall	32		28

Marriages

At St. Augustine's Church, Alston, on the 9th inst., John Joseph, eldest son of Joseph Lancaster, miller, and corn merchant, Alston, to Margaret Pattinson,

youngest daughter of the late Joseph and of Mrs Dawson, Park View House, Alston.

18th June 1898 (North Cumberland Reformer)

NENTHEAD.

NENTHEAD WESLEYAN CHAPEL.

The above place of worship has been closed for about six weeks for the purpose of repairing and repainting. During the same period the organ has also been thoroughly overhauled and enlarged. Several new stops have been added including horn, dulciana and pedal bourdon and other changes have been made calculated to be of lasting benefit. The work has been done by Messrs Nelson and Co., organ builders, Durham, who have given entire satisfaction. The repainting of the chapel has been done by Mr Jonathan Rutherford, Nenthead, who has manifested considerable amount of taste in the selection of colours that blend harmoniously together. The work, which is of a somewhat difficult nature on account of the character of the building has been done in a highly satisfactory manner. The chapel was re-opened on Tuesday last. The day was beautifully fine. At 3 p.m. a sermon was delivered by the Rev. C. J. Back of Hebburn-on-Tyne. At 5 p.m. an organ recital was given by Mr F. Willey, of Haltwhistle. …

25th June 1898 (North Cumberland Reformer)

ALSTON RURAL DISTRICT COUNCIL.

The report of the Medical Officer for No. 2 District for the quarter ending March 31st last was read. In it Dr Short stated that the deaths registered had been 10, 7 males and 3 females, the rate for the quarter being 5.33 per 1,000. The births were 5, all females, or at the rate of 2.66 per 1000. Influenza was prevalent at the beginning of the quarter. and caused several deaths The district was not clear of the disease, for several cases of a mild type had recently come under observation. The district had enjoyed perfect immunity from scarlet fever, but three cases of measles had occurred at Nenthead, the disease having been imported from West Allen. Due precautionary measures had been taken, and so far there had been no further spread. He wished again to direct attention to the water supply at Nenthead, which was impure during rains. At Garrigill School there was a total absence of water, and there had been little progress in providing privy accommodation since his last report.—The CHAIRMAN: I thought there had been a number in course of erection.—The INSPECTOR said nothing been done beyond what he stated in his last report. They could not expect all to be done at once when neither masons nor joiners could be got. — Mr DOWSON thought this report would give the Local Government Board an idea that they were shuffling With the question, when they put it alongside the reply that the Clerk was instructed to send from last meeting, that the work was in progress.— Mr THOMPSON pointed out that the report before them only brought matters up to the 31st March, and that the Inspector's report was much more nearly up-to-date, and really came after the report now before them.—Mr HARRISON endorsed the Medical Officer's remarks about the water supply at Nenthead, and said he should like the Inspector to give attention to it at the source.—The INSPECTOR said he would do so at once.

THE ALSTON WATER QUESTION.

The INSPECTOR reported that the work of laying the new pipes had been brought within six roods of the source in the Spring Field.—A letter from Mr Richard Gibson, Chapel Terrace, was read, asking that a stand-pipe might be placed where the new pipe joined the other. There was a waste water pipe already laid from there to the town sewer. Such a stand-pipe would be a great convenience to dwellers in Chapel Terrace, the existing one being some distance off.—Mr WARD: How far off is the existing one?—The CLERK: Fifty or sixty yards.—Mr WARD: That may be a long way in Alston. We don't think much of 600 yards in the country.— Mr THOMPSON: Nothing would be wanted but the stand-pipe, and it would be more convenient for dwellers in the Terrace.—Mr WARD: Do they propose to pay for it themselves?—Mr THOMPSON: The cost would be trifling anyway.—Mr BRAMWELL moved that the letter lie on the table till the main was completed —Mr WARD seconded.—The INSPECTOR, in reply to Mr Thompson, said the pipe could be as easily erected after the main was completed as during the, laying, and the motion was agreed to.

9th July 1898 (Hexham Herald)

WEARDALE

The output of iron ore from the Grove Head mine, Wearhead, Weardale is to be increased by 100 tons per week.

As Thomas Wall (16) was returning from work in Bolts Burn Mine, Rookhope, on Tuesday *(5th inst)*, he was killed by a large stone falling from the roof upon him.

James Wall married Tamar Cruddas, 8th February 1834, at Middleton in Teesdale.

In 1841, at Egglestone, Durham, James Wall, smelter, aged 30, his wife Tamar aged 30, Henry 6, Elizabeth 5, Mary Jane 1, and Thomas Cruddas 10.

In 1851, at Mossfield Burn, Rookhope, James Wall, Lead Smelter, aged 41, born Eggleston, his wife Tamar aged 41, born Middleton, children, Henry, lead ore washer, aged 16, Elizabeth, general servant, aged 14, Mary Jane 10, James 8, and son in law Thomas Cruddas, lead smelter, aged 20, born, Patterdale, Westmorland.

In 1861, at Boltsburn, Rookhope, James Wall, Butcher, aged 50, his wife Tamar aged 50, children, Elizabeth, dressmaker, aged 24, Mary J, house maid, aged 20, and James, horse driver, aged 18.

In 1871, at Boltsburn, James Wall, butcher, aged 62, and his wife Tamar 60.

In 1881, at Boltsburn, James Wall, butcher, aged 71, and his wife Tamar 69.

Tamar Wall died 4th quarter 1886, aged 75.

James Wall snr, died 3rd quarter 1889, aged 79.

In 1871, at Hylton Terrace, Boltsburn, Rookhope, James Wall, Iron miner, aged 28, his wife Elizabeth (Oliver, married 2nd quarter 1867, at Weardale) aged 23, children, Cecily 4, George 2, and Elizabeth 1 month.

In 1881, at Hilton Terrace, Boltsburn, Rookhope, James Wall, lead miner, aged 38, his wife Elizabeth 33, children, George 12, Elizabeth 10, Joseph 6, James 4, and John 1.

In 1891, at Blue Row, Rookhop[e, James Wall, general servant, aged 48, his wife Elizabeth 43, children, Joseph, lead ore washer, aged 16, James, lead ore washer 14, John 11, and Thomas 9.

TO BE WITH CHRIST
RIP
WHICH IS FAR BETTER

IHS

IN LOVING MEMORY
OF
THOMAS WALL
WHO WAS KILLED
BY A FALL IN THE MINE
JULY 5TH 1898
AGE 16 YEARS

In 1901, at Boltsburn, Rookhope, James Wall, jun, lead miner aged 21, his wife Pollie (Foster, married 4th quarter 1900, at Weardale) aged 21. Also James Wall snr, lead miner, aged 58, his wife Elizabeth, 54, and son John, lead miner, aged 21.
James Wall died 2nd quarter 1909, aged 66
In 1911, at Rookhope, Eastgate, Elizabeth Wall, widow, aged 63.
Elizabeth Wall died 2nd quarter 1815, aged 67.

16th July 1898 (Hexham Herald)
Deaths
Nenthead, 13th inst., aged 47, Peter Swindle.
Died from pneumonia.
In 1851, at Low Dykeheads, Sarah Swindell, pauper, lead smelters widow (Husband Peter), aged 72, son John, married lead ore smelter, aged 33, his wife Elizabeth (Smith, married 17th November 1849, Nenthead) aged 42, children Jane 6, Peter 4 months, and visitor Thomas Walton, merchants son, aged 14.
In 1861, at Low Dykeheads, Sarah Swindle, widow, housekeeper, aged 81, son John, widow, lead smelter, aged 42, granddaughter Jane, house maid, aged 16, and grandson Peter 10.
See 20th June 1865
In 1871, at Low Dykehead, Peter Swindale, lead ore smelter, aged 20, and his wife Ellen aged 20.
In 1881, at Bridge End Cottage, Nenthead, Peter Swindle, lead ore smelter & farmer 0f 13 acres, aged 30, his wife Eleanor 30, sons John 9, and Isaac W. 4. Also at Bridge End Cottage in 1881, John Swindle, widow, lead ore smelter, aged 62.
In 1891, at Kings Head, Peter Swindle, cartman, aged 40, his wife Ellen 40, sons Johnnie, waggon driver, aged 19, Isaac Walton, waggon driver, aged 14,

father John Swindle, widow, labourer, aged 72, and domestic servant Mary Jane Shield, aged 20.

16th July 1898 (Newcastle Journal)

BUILDERS desirous of **TENDERING** for the ERECTION of NEW BOARD SCHOOLS, and MASTER'S HOUSE at Nenthead, for the Alston School Board, are requested to send their names to the undersigned, on or before July 28th together with a deposit of £1, which will be returned on receipt of a bona fide Tender. Bills of quantities will be supplied, drawings may be seen, and all other information obtained on application.. The lowest or any tender not necessarily accepted —Thomas Davidson, Architect, 33 Grainger Street W., Newcastle-on-Tyne.

23rd July 1898 (North Cumberland Reformer)

ALSTON RURAL DISTRICT COUNCIL.

Water Supply in No. 2 District.—The INSPECTOR said nothing had been done to improve the water supply since the Medical Officer's report. The pipes in the main between Hard Edge end Nenthead had been cemented—Mr BOLTON asked the Inspector if he was aware that since this work was done the water had been muddier and dirtier. After a few hours rain it was muddy and yellow.—The INSPECTOR: The pipes at the high end are not cemented. It is similar to Garrigill.—The CLERK: I think it would simplify matters if we were to reply that the Alston water supply had been completed, and that at Nenthead and Garrigill would now be proceeded with.—Mr PICKERING said It would entail a good deal of expence, most of the drains would have to be overhauled, the pipes had been inefficiently put in, the rain water got into them. They should be done thoroughly, and no tinkering as had been dons previously. (Hear, hear from Mr Thompson)—Mrs CORE: Do you mean the work lately had not been well done.—Mr PICKERING: No.—Mr DOWSON: Done in the days of the old Board.—It was agreed to reply as suggested by the Clerk.

Sanitary Accommodation.—In reference to want of privy accommodation et Nenthead, the INSPECTOR said that four privies had been completed and four were on the way.—Mr LATTIMER: Haae ell the delinquents got notice?—The INSPECTOR: Not all, there are some more to send out.

Medical Officers' and Inspector's Reports.—For No. 1 District (Alston) Dr. Carson reported 4 deaths and 5 births during the quarter. One death was that of a non-resident, and deducting this the rate was 1.75 per 1000 for the quarter, or 7 for the year. Except for a few cases of chicken-pox, the district was free from any epidemic. He called attention to the fact that the butchers in many instances had communication from they got rid of the offal, from their slaughterhouses to the Mill Burn, through which and thereby caused a very offensive nuisance, to which he had frequently directed attention. Peremptory orders should be given to close these communications, and the butchers should be notified that any one offending will be prosecuted.—Mr DOWSON said he was glad Dr. Carson had mentioned this matter. Was it a fact that a dead calf had been pulled out of the Burn at the grating?—The INSPECTOR believed it was the case.—Mr DOWSON: That will give an idea of the state of matters.—With respect to No. 2 District Dr. Short reported 8 deaths, 5 being males end 3 females. One death was of a non-resident, which being deducted left the rate 3.73 per 100. Two of the deaths, very sad ones, were the result of accidents.

The district has been free from contagious and infectious disease, barring a few cases of influenza. He was making an inspection of the whole district, and would report again on the privy accommodation, and also give attention to the water supply.—With regard to the Mill Burn the INSPECTOR reported as follows:—At Chapel House, back of the Burn, my attention has been directed to a nuisance in the Mill Burn, within six yards of the above dwelling house. It consists of a considerable accumulation of slaughterhouse offal, the smell from which is exceedingly offensive, and injurious to the health of the inhabitants living near. Something must be done to stop this practice of putting slaughterhouse refuse and dead carcasses into the Burn, instead of taking them out of the town, and burying them, so that they cannot be reached by dogs, etc.—In regard to the last named matter it was agreed that the butchers have notice at once to cut off communication with the Burn.

ALSTON WATER EXTENSION.— On this matter the Inspector reported "The laying of the new water main from the Town Head to the source in the Spring Field is now completed. with the exception of a rose for the end of the pipe in the cistern, and some dressing up at each end. There is an ample supply for all purposes at present."— A letter from Mr John K. Yeates was read, demanding £2 as compensation for damage for cutting the drain and going on his land from March to the present time, and asking that the drain sods be properly laid, as they were only pitched on.—The INSPECTOR said that the drain was not completed, and he was instructed to have that done, further consideration of the claim for damages being deferred.

A BREAK AT NENTHEAD.— The Inspector further reported that there was a leakage from one of the water mains at Nenthead on the main road east of the bridge, and it would be well to ascertain whether it was from the main to Holmes Foot, or that belonging to the Vieille Montagne Zinc Co., as it was doing considerable damage to the main road.—He was instructed to take the necessary steps.

30th July 1898 (Hexham Courant)

Marriages

At Brunswick Chapel, Newcastle, 26th inst., by license, Joseph eldest son of Thomas Kindred, Wanwood, Alston to Lillie, eldest daughter of John Birkett, Light Shield, West Allendale.

In 1901, at Eastbourne Avenue, Gateshead, Joseph Kindred, bricklayer, aged 25, his wife Lillie 26, children Auburn 2, Eva 5 months.

Deaths

At Kate's Lane, Alston, 24th inst., aged 68, Jane, wife of William Keenleyside.

In 1861, at Town Head, Jane Keenlyside, lead miners (White, married 15th March 1857, Alston) wife, aged 30, sons Thomas 2, James 3 weeks, domestic servant Elizabeth Vipond aged 28, and boarder Isaac White, butcher, aged 39; William was at Fell Top, Newbrough, listed as a lead miner. In 1871, at Over Burn, Alston, William Keenlyside, lead ore miner, aged 36, his wife Jane 42, children Thomas 12, James 10, Isaac 7, and Mary J. 7 months.

In 1881, William Keenleyside, married, lead miner, aged 44, was boarding at 16 Market place, Corbridge.

In 1891, at Kates Lane, Alston, Jane Keenleyside, married, aged 62, children Thomas, postman, aged 32, Isaac, labourer in stocking factory, aged 26, and

Mary J., domestic servant, aged 20; William was at North Broomhill, East Chevington, working as a coal miner.
At Stanhope, 25th inst., aged 29, Dorothy wife of Ralph Bainbridge *(butcher)*

6th August 1898 (Hexham Herald)
Marriages
Toronto, June 29th Henry Yeates of Lampton Mills, late of Wolsingham to Ada Maddinson of Frosterley Co. Durham.
Deaths
Anderson's Bay, Dunedin, New Zealand, June 3rd aged 84, W. J. Johnson, late of Pods Bank, Allendale.

13th August 1898 (Newcastle Courant)
PIT FATALITY NEAR NENTHEAD.
On Tuesday, at Haggs Mine, near Nenthead, worked by Messrs Thompson of Weardale, a man named Stephen Watson of Cowshill, Weardale, was killed outright, and another named Joseph Peart of Wearhead was so seriously injured that he died soon after. It appears that the two men had been following their usual employment when a piece of rock fell upon them.

13th August 1898 (Hexham Courant)
ALSTON
FATAL MINING ACCIDENT
On Tuesday afternoon a serious accident occurred at **Nentsbury mine** near Nenthead, by which two miners named **John Watson, aged 58, and Joseph Peart, aged 28**, natives of Weardale lost their lives. From the statement made by the men who were present at the time it appeared that Watson who had been working all the morning in company with another man named Fairless, at what is known as a "heading" was just about to leave the place when a large piece of rock fell from the heading and killed him instantly. At the same moment the younger man, Peart, was passing the place and was struck by the end of the falling rock and frightfully injured. The men on the spot at once did what they could for the injured man, and got him out of the mine, where Dr Short and Dr Carson attended to him, but he only breathed a few minutes. The medical men both gave it as their opinion that it was utterly impossible to save his life, such was the extent of his injuries. Both men had their legs and arms broken, and both had spinal injuries. Each of the men are married and leave families. An inquest was opened on Wednesday afternoon at the Horse and Wagon Inn, Nentsbury, but after taking evidence as to the identity the coroner adjourned the inquiry for the attendance of the Inspector of Mines, who was unable to be present.
John Watson lived at Burtreeford, near Cowhill, leaving a widow and grown up family. Joseph Peart lived at Grain, near Cowshill, and left a widow and 3 young children
In 1891, at Burtree Ford, John Watson, lead miner, aged 49, his wife Sarah 48, children Stephen, lead miner, aged 22, Elizabeth Emma 18, and John Joseph aged 12.
In 1891, at Low Grain, Joseph Peart, lead miner, aged 71, his wife Elizabeth 60, son John, lead miner, aged 43, son Jacob, stone mason, journeyman, aged 40, grandson, Joseph Peart, lead miner, aged 22, born Australia.

13th August 1898 (Hexham Herald)

DEATH OF MR THOMAS SOPWITH.

Mr Thomas Sopwith M.I.C.E., F.G.S., has died at Lismore, Oban, N.B. Mr Sopwith was an eminent mining and civil engineer. He was born at Newcastle upon Tyne on 2nd July 1838. After being educated at Allenheads, Northumberland, and Bruce Castle, he was articled at the works of Sir W. Armstrong and Co., Elswick. He left there in 1859 for the "W.B" Lead mines Allendale and Weardale, when he received his training as a mining engineer. About 1862 he visited, the chief mining centres of the Continent, and eventually aided by Mr W. B. Beaumont, acquired important lead mines at Linares, Spain (*approx. 80 miles east of Cordoba*). The Spanish Lead Company was formed to work these mines, with Mr Sopwith as manager at Linares, where his abilities and perseverance resulted in the establishment of one of the largest and most important mining and smelting works in Spain. On the reorganisation of the Company in 1880, he became managing director of the new firm under the name of T. Sopwith and Co. (Limited) which position he held at his death. He also himself owned nearly half the shares of the company. He reported on various mines in Europe and America between 1864 and 1890 and his opinion was highly valued. He wrote various papers on lead and copper and other mining and scientific subjects, and contributed to various newspapers and periodicals. He married, in 1866, Miss Lydia Gertrude Messiter, of Wincanton, Somerset, and she and seven daughters and one son survive him. His death was the result of an accident while out shooting with his son and friend. He was interred at Brookwood Cemetery.

20th August 1898 (North Cumberland Reformer)

NENTSBURY MINIING ACCIDENT

THE INQUEST

The adjourned inquest, touching the death of John Watson and Joseph Peart (previously reported), was held at the Horse and Waggon Inn, Nentsbury, on Tuesday afternoon, before Coroner J. B. Lee. Mr Hedley, Chief Inspector of Mines, and Mr A. D. Nicholson, Assistant Inspector, were present. Mr J. Thompson, solicitor, represented the Mining Company, and Messrs Stephen Watson and John Erwin were present on behalf of the deceased miners—Plans of the mine were submitted by Mr Wm. Thompson, of Alston, and by Mr Nicholson, who had visited the scene of the accident on the previous Thursday, and Mr Thompson was sworn as to the accuracy of the plan produced by the Inspector, which he stated was a good representation of the place.—Evidence was then given by Joshua Fairless (who was working with the deceased man, Watson), John Peart, W. Rutherford (foreman at the mine), and Stephen Watson (son of deceased man, Watson). From the evidence, it appeared that J. Fairless and the deceased, Watson, had been working at one of the "headings " in the mine on the morning of the accident. They were working for barytes and blende, and after each shot they gathered up the barytes that had fallen into pails. During the morning they had frequently been under the end of the "heading" picking up the barytes. About 12:30 they were relieved by other two workmen and were proceeding to another part of the mine to work when a large piece of stone fell from, the heading end as they were passing through under it and struck Watson killing him instantly. Peart was passing that way with a pail in his hand which he had been to bring for use at another heading. The

stone caught Peart as he passed, inflicting such injuries that he died in a short time. The Chief Inspector closely questioned the witness Fairless as to whether due care had been taken to ascertain whether the stone at the heading end was sound. Fairless said they had tried the end by "rapping," but it sounded solid and neither he nor Watson apprehended any danger. They were doing nothing extraordinary, but were working the mine in the usual way. He had been a miner 41 years, and Watson was also an old miner and a very careful man. He had examined the place since and found that there was a very unusual bed where the stone had come off. If the stone had been smaller it might have sounded "bad" when rapped, but the stone was a very large one and it was no unusual thing for a stone of that size to sound solid even when it was bad.—W. Rutherford, foreman, also spoke to the unusual nature of the bed above the stone.—Mr Nicholson, assistant inspector, said he had inspnted the workings on August 11th two days after the accident, and had made the sketches that the jury had seen. There was nothing unusual about the mine in his opinion and it would be almost impossible to have forseen the accident. The stone was too thick to sound "bad "by "jowling." The The vein was from 9 ft. to 9 ft 3 in. wide and the working was of the ordinary kind.—In reply to Mr Erwin, the Inspector said the stone would fall about 5 ft at the end where the men had been working and at the other end of the stone the height would be 10 ft. The stone had fallen on the slope made by the debris, and the average height from the roof would not be more than 7 ft.. He considered it as quite a safe height for men to work under if the roof was good. The jury returned a verdict of "Accidental death." The Coroner said he thought the verdict was a proper one, and he was sure they were all indebted to Mr Hadley and Mr Nicholson for the assistance they had given in the inquiry.—Mr J. Thompson, as representing the Mining Co., said he wished to express their deep regret at the untoward accident that had been the subject of inquiry and to say that they deeply sympathised with the friends of the deceased workman.

20th August 1898 (North Cumberland Reformer)

ALSTON RURAL DISTRICT COUNCIL

The monthly meeting of this Council was held on Saturday. …

BURNBANK.

The CLERK said he had not had an opportunity of conferring with Mr Davidson, agent to the Lords of the Manor, with reference to the prevention of the accumulation of refuse on the Burnbank.

THE NENTHEAD ROAD DIFFICULTY.

The CLERK said he had communicated with Mr Davidson with regard to the road between Overwater and East Nenthead. Mr Davidson was not able to give him any information, but in his (the Clerk's) opinion the public had acquired a right over that road, and the District, Council would be liable if anything should occur until the road was put into a proper state. They had certainly used it over thirty years.—The CHAIRMAN said that Mr Fernau claimed, and would defend a right to the road for the company. Only the Overwater people had a right to it —Mr STOREY: What length of time gives a right of way?.—The CLERK: Twelve years —Mr J. R WALTON: Have we done repairs.—The CHAIRMAN: Not over the heap. The late Surveyor denied all liability to repair the road. To satisfy some people we did some repairs to the road through the village, but it is a long time ago.—Mr WARD: In my opinion it is not necessary for this Council to do

anything, so long as people are allowed to pass over.—The CHAIRMAN: I don't expect they will hinder anybody.—Mr THOMPSON : The Clerk has just stated his opinion that we will be liable for any mishaps through the road not being in proper condition. It is better we should know where we are.—Mr J. R. WALTON: Will the company keep the road in repair?—The CHAIRMAN: They deny the public right.—Mr STOREY: Mr Bolton said there was some plan for alteration.—MR BOLTON said he did not know if that still held, but he had lived at Nenthead twenty years, and never knew the road in better condition. As to the waggons passing, the tramway ran through the streets of Newcastle and other towns.—The CHAIRMAN: But the objection is to waggons standing and blocking the way.—Mr BOLTON: That cannot be avoided.—Mr LATTIMER said the question in his opinion was not whether the road was satisfactory, but who was liable in case there was any mishap. It was now in a satisfactory condition, but it would not have been if the Council had not interfered, which showed that the Council had some authority. He quite agreed with the Clerk that the Council had acquired jurisdiction over it. If the company at one time had jurisdiction they had lost it In his opinion, the Council would be responsible in case of accident, and before anything was done to the road the Council should be consulted. The Council should see that it was kept in proper repair, and that no obstructions were allowed. They knew the industry could not be carried on without some interference with the way, but there should be as little delay as possible. If the company would display a little more common sense, and work hand-in-hand with the Council, the matter could be arranged easily.—The CHAIRMAN: The public have never been interfered with.—Mr LATTIMER: There is notice up to the effect that the passage of the tramway is dangerous, and that trespasser, will be prosecuted.—The CHAIRMAN: Then it is clear the company takes the responsibility —Mr LATTIMER: That does not clear us.—The CHAIRMAN: Has the Highway Board ever done anything to the road? Mr LATTIMER: We have become liable by time. If we allow the notice, we lose our right —Mrs CORE: If the public have a right, they cannot be trespassers.—The CHAIRMAN: The people at Overwater have a right, and the rest of the public have never been refused the use of the road, but the highway authority has never done anything to it.—Mrs CORE: The people of Overwater are the public.—Mr LATTIMER: The public have acquired a right, and it is the duty of this Council to look after the public right —Mrs CORE: I do not think we have any right to repair the road, but such a notice as has been described should not be allowed.—Mr LATTIMER: If rightly looked at, the company had no right to put down new rails without consulting this Council. We cannot deprive them of the right they have held a certain number of years, but new rails are different.—Mr THOMPSON: We cannot go on in this way for ever. The question has arisen whether the public have a right to this road, and if we are in doubt we should take counsel's opinion.—Mr LATTIMER remarked that they had only the statement of one party.—The CHAIRMAN said he had simply given to the Council the information given to him. He did not say or imply that he accepted that statement. He had given the Council the information, they could do as they thought best about it —Mr BOLTON thought a great deal too much was being made of this matter. No one denied the public right to walk over this ground. Not only this ground, but the company's works at Nenthead were walked over in all directions. The company paved this road, and never asked the public for a farthing, and here they were cavilling over a paltry line to run a few waggons on.—The

CHAIRMAN: It is not worth fighting about —Mr THOMPSON gave notice that at next meeting he would move that the Clerk take counsel's opinion on the question as to whether the public had a right of way over this road.

Deaths

At Hill Top, Nenthead, on the 18th inst., William Angus, aged 78 years.

See 13th June 1874

27th August 1898 (Hexham Herald)

ALSTON

A few days ago the mortal remains of the late Joseph Nattrass, aged 79 years were interred in Alston cemetery. … He was occupied during the most part of his life as a cart man.

In 1851, at Butts, Alston, Anne Nattrass, proprietor of houses, aged 71, son Joseph, cartman, aged 31, and grandson Robert Nattrass 6.

In 1861, at Water Greens, Alston, Joseph Nattrass, farmer & carter, aged 42, his wife Mary (Nixon, married 15th September 1855, Alston) aged 40, children Mary A 14, and Robert 11.

In 1871, at Butts, Joseph Nattrass, cartman, aged 51, his wife Mary 48, and son Robert, Ag. Labourer, aged 21.

In 1881, at Butts, Joseph Nattrass, widow, carter & farmer of 2 acres, aged 61, and son Robert, road labourer, aged 31. In 1891, at Butts, Joseph Nattrass, widow, carter, aged 71, and son Robert, roadman, aged 41.

3rd September 1898 (North Cumberland Reformer)

SCHOOL BOARD.—The monthly meeting was held on Saturday, the members present being Mr Elliot (Chairman). Messrs H. Bell. and J. Rutherford.— The Attendance Officer reported that owing to the schools having been closed for the holidays he had no attendance report to give. —A letter was read from Mr Davidson. the architect for the new schools at Nenthead. asking for the Board to appoint a Nenthead member, who might show intending contractors the proposed site. Mr Harrison's name was decided upon.—The Clerk intimated that the election for members of the Board would take place in October.

10th September 1898 (North Cumberland Reformer)

NENTHEAD

FLORAL AND HORTICULTURAL SHOW.

The forty-ninth annual exhibition in connection with the Nenthead Floral and Horticultural Society was held on Saturday in the Nenthead Board School. The show divided into three sections, viz., open class, district class, and window class, and the number of entries in the various classes exceeded that of last year. The quality was also quite superior. Cut flowers were an exceptionally good show, while pot plants were of a high standard. Vegetables and fruit were the only points in which there was a falling off, this being attributable to the spring frosts that prevailed. There was keen competition for the premier awards. A number of special prizes were offered by various supporters of the show, which contributed greatly to the success of it. A speciality which elicited a large amount of attention was a competition amongst the school children, prizes being offered for the best specimens of handwriting in different standards. The organisers of the show are to be congratulated on the general arrangements, which were creditably carried out under the secretary, Mr W. Moore, and the

committee. The following acted as judges:—Mr Taylor, from Little and Ballantyne, Carlisle, for flowers, fruit, and vegetables; Messrs Bolton, Fernau, and Bell, for drawing and writing; Mrs Button, Mrs Bell, and Mrs Fernau, for bread and sewing. The attendance during the evening was very large. The Nenthead Brass Band rendered an interesting programme of music during the proceedings. At the conclusion of the show a public dance was held, and was largely patronised.

17th September 1898 (Hexham Herald)

WEARDALE

Mr T. D. Bolton, who died at Newcastle last week at one time was agent for the London Lead Company in Weardale, in the balmy days of lead mining, when lead was selling at £24 a ton. ...

In 1861, at Stanhope, Thomas D Bolton, manager of lead works, aged 31, his wife Mary 27, children Edward W. 7, and Hannah 5.

In 1871, at Stanhope, Thomas Dobson Bolton, manager & shareholder of lead ore manufacturing works, aged 41, his wife Mary 37, son Edward William, clerk assisting father, aged 17, daughter Hannah 15, and domestic servant Hannah Wilson aged 25.

In 1881, at Horn Hall, Egglestone, Thomas Dobson Bolton, widow, manager of lead works, aged 51, brother William Bolton, clerk in lead works, aged 40, sister in law (brothers wife) Margaret Ann Bolton 28, son in law William Fawcett, ship worker, aged 30, daughter Hannah Fawcett 25, grandson Frederick Stanhope Fawcett 3 months, house maid Frances Elizabeth Wearmouth aged 20, and general servant Annie Bainbridge aged 16.

Intelligence as just been received in Weardale of the **death in New Zealand of Mr George Walton,** a former resident of the dale at the age of 50 years. Mr Walton had risen to a prominent position on the engineering staff on the railway in the above colony. His death occurred very suddenly from heart disease. He leaves a widow and six children.

ALSTON

A fatal accident occurred to an employee of the Vieille Montagne Lead and Zinc Company, travelling with the traction engine between Nenthead and Alston. At Blagill 2 miles from Alston, a driver learning the road and riding on one of the waggons observed that the engine had run over a man. It was found to be the flagman, who generally travels about twenty yards in front. He was found to be much crushed and was immediately brought back to Alston in a conveyance but he died before being examined by a doctor. The mystery of the case is that no one saw the man until he had been run over. The deceased John Erwine of Nenthead is about 29 years of age well known and respected in the village. … The deceased was the only support for his mother.

In 1861, at Dykeheads, John Erwin, lead miner, aged 53, his wife Ann (Blacklock, married 6th June 1829, Alston) aged 53, children Miles, lead miner, 27, Jacob, lead miner, 23, John, lead miner, 21, Ann 18, Jane, dressmaker, aged 15, Stephenson 13, Matthew 11, and nephew Jacob Blacklock 7.

John Erwin died 2nd quarter 1861.

In 1871, at Dykeheads, Ann Erwin, widow, aged 63, daughter Jane 25, son Mathew, lead miner, aged 20, nephew Jacob Blacklock, lead miner, aged 17, and grandson John Erwin 2.

In 1881, at Dykeheads, Ann Erwin, lead miners widow, aged 73, daughter Jane Erwin, widow, aged 35, grandson John Erwin, lead ore washer, aged 12, and granddaughter Lizzie Ann Erwin 6.
In 1891, at Dykeheads, Jane Erwin, single, aged 45, son John, lead miner, aged 22, and daughter Elizabeth A. aged 16.
In 1901, Jane Erwin was living at Dykeheads, with illegitimate daughter, Florence A. Ridley aged 9. In 1911, she was living with her daughter Elizabeth. Elizabeth Ann Erwine married Frederick Thomas C Ridley 4th quarter 1899. In 1911 at Mill Cottage, Nenthead, Fred Ridley, foreman fitter at lead & zinc co., aged 33, his wife Annie 37, children Winnie 10, Edith 9, John 8, mother in law Jane Erwin aged 68, and grand child Florence Annie Erwin aged 18.

Deaths

Dunedin, New Zealand, aged 50, George Walton, formerly of the Travellers Rest, Weardale.

17th September 1898 (The North Cumberland Reformer)

ALSTON
RURAL DISTRICT COUNCIL
NENTHEAD WATER.

A petition was submitted, signed by fifty ratepayers at West Nenthead, asking the Council to give immediate attention to the water supply, as it was liable to contamination, and the health of the inhabitants was endangered in consequence. The memorialists pointed out that this was the second time they had petitioned.—The CHAIRMAN said he had received a letter from a ratepayer calling attention to the same matter.—The SANITARY INSPECTOR said that two schemes were available, one was to improve the present service at a cost of £18, the other to bring a new supply from the Colliery Hush, which would cost £120. The latter was more abundant, and would supply the whole of that district and provide a better supply for a well at Nenthead.—In reply to Mr Bolton, he said East Nenthead could also be supplied from this source if the water was brought in proper pipes. The water supply there at present was only precarious.—The CHAIRMAN: Is the present supply not sufficient? Mr BOLTON: It is not to be relied on, the quantity varies.—The CHAIRMAN thought it would be very desirable to have both the supplies analysed. If the present supply was not satisfactory they could take the other.—Mr T. HARRISON pointed out that the analysis might be misleading. At present the water might be found quite satisfactory, but if they took samples when someone was dipping sheep it might be very different. By the larger scheme the water would be got from a source which could not be contaminated from sills or mines. If they took the cheaper scheme, and the water went down into the sills, they would have to lay the pipes up into them. If they took the larger scheme he thought some of the proprietors and tenants might give some assistance.—Mr W. HOLMES said he knew the place, and if pollution got in it must be through some cleft in the rock. If they found that sewage still got in after laying proper pipes, they would have to abandon the scheme, and go in for the larger one after all.—The CHAIRMAN: We should have an analysis of both springs. —Mr PICKERING thought it would be a mistake to go in for the cheaper scheme. The water was impure, and could not be made pure. He moved that the Council adopt the larger scheme.—Mr BRAMWELL was not convinced that the present supply could not

be kept pure.—Mr HARRISON seconded the motion of Mr Pickering, who agreed to include in it that the water be analysed.—In reply to Mr Ward, the INSPECTOR said the supply in the larger scheme came from a level which drained two pits—Mr BOLTON said that was the case, but the water was clear of lime, chemicals, superphosphates, and animal pollution Mr WARD moved, and Mr BRAMWELL seconded, that the water of both supplies be analysed.—Mr HARRISON pressed the claims of West Nenthead, where there were 300 people who should not be obliged to bring water three of four hundred yards.—The CLERK here interposed with the remark that there was a letter from the Local Government Board on the agenda, which would seriously affect, not only the Nenthead Ward, but the whole district, and he would ask the Council to consider it in committee.— The Council agreed to do this before discussing the Nenthead water supply any further.—At the conclusion of the Committee meeting it was decided to adjourn the matter till next meeting.

THE MARKET PLACE.

The reported that along with Mr Millican and Mr J. R. Walton he had interviewed Mr Lambert and Mr Davidson, representing the Lords of the Admiralty, with reference to handing over the Market Place. These gentlemen stated that the Lords of the Admiralty would hand it over, but wished to retain the tolls. They would recommend the Lords of the Admiralty to contribute a sum, perhaps half the cost towards putting the Market Place in repair. —Mr BOLTON: How much would it cost?—The CHAIRMAN: The cost was estimated at £75 or £77, but we are not in a position to make an application yet —Mr PICKERING moved, and Mr J R. WALTON seconded, that the matter be adjourned till plans and estimates had been prepared.

NENTHEAD ROAD.

Mr THOMPSON in accordance with notice, moved that counsel's opinion be taken as to whether the public had a right of way over the road at Overwater. He said there was a difference of opinion on the subject. The Clerk had told them that in his opinion the public had a right, but some members dissented from that view. Under the Act of 1894 the Council had to protect all public rights of way. if the public right was admitted he would withdraw his motion, but if a portion of the members still held that the road was a private one he should press his motion. He understood that a notice had been put up by the Mining Company cautioning people.—Mr BOLTON denied that any notice had been put up.— Mr THOMPSON observed that at any rate the right of the Council to see the road put into such order as it would work had been dispelled.—Mr DOWSON seconded the motion —Mr HARRISON said no one questioned the public right of way from Overwater to Nenthead, and it would be unwise to incur expenditure for counsel's opinion on an undisputed question.—Mr BOLTON agreed.—Mr HOLMES said that the heaps over which the road passed were transferred in 1882 and 1896, and the CHAIRMAN added that the Highway Authority had always disclaimed responsibility for the road —After some further discussion the motion was put and lost.

STREET IMPROVEMENT.

Plans were submitted from Mr Roberts for substituting steps for the present steep incline which leads through the archway near the Ewe and Lamb Inn, and considerable discussion ensued. —Mr THOMPSON said that it had always been a matter of dispute whether this road was repairable by the Council.—Mr J. R. WALTON moved, and Mr BOLTON seconded, that the matter stand over

until the Market Place was completed.—Mr THOMPSON moved. and Mr LATTIMER seconded, that Mr Roberts be allowed to carry out the work, but Mr WALTON'S motion was carried.

FATAL ACCIDENT,
INQUEST.

On Tuesday last an inquest was held at the Swan's Head Inn, Alston, touching the death of John Erwin of Nenthead, a young man in the employ of the Vieille Montagne Zinc Company, who was killed by being run over by a traction engine, belonging to the Company, on the day previous. Coroner J. B. Lee opened the enquiry, and Mr J. H. Millican was foreman of the jury. Mr Fernau was present on behalf of the Company.

G. W. Barron stated that he knew the deceased well. He was 29 years of age and was employed as flagman to go with the traction engine that conveyed "jack" from the Nenthead mines to Alston station. He (witness) was also employed on the day to go with the engine. John Lamb was driver, Barron Dryden was steering, and the deceased was acting as flagman. Three others were also with the train, witness, Kenneth Simpson, and A. Anderson, They had two wagons loaded with jack attached to the engine. They left Nenthead a little after ten o'clock, and got to Alston at one, and delivered the jack. They stayed at Alston till two o'clock. During their stay they were all at the Blue Bell except deceased who stayed with the engine at the station. They had two glasses of beer at the Blue Bell. They were never in any other Public House, and started on the return journey about 2 o'clock. When between Corby Gates and Blagill Hill Top, as he was riding in the first wagon, he heard the men shout and saw the deceased lying on the road behind the wagons. When he got into the wagon a minute or two before he saw deceased in front of the engine. He thought he would be about 30 yards In front. He (deceased) was walking a little to the right hand side of the road. At that time Lamb the driver had his head down, and was damping down his fire, and he noticed that Barron Dryden steered to the right hand side of the road in order to roll down a ridge of rough stones. Kenneth Simpson and Anderson saw deceased lying on the road before witness, and they shouted to the driver, who stopped immediately. Lamb then sent witness for assistance, and Mr Jackson, farmer of Blagill, came with his trap and took deceased to Alston. Deceased made no statement as to how the accident happened. He was quite sensible when they got to him. Deceased, when he saw him in front would be walking about three miles an hour. Deceased never took drink. He was a local preacher and teetotaller

John Lamb, the driver of the engine was next called. He stated that he had been a driver for 10 or 11 years. Their rules for driving were that the flagman should not be less than 20 yards from the front of the engine and they could not travel move than 4 miles an hour. In the condition of the road at present it would be imposable to get a greater speed than 4 miles an hour. At the time of the accident, he was preparing his fire and knew nothing about it till be heard the men behind give a shout. He then stopped and got off his engine and went to deceased. He said to him, "Johnny, how has this happened," and deceased replied. "I don't know," and he mentioned his mother. The last time he saw deceased he was 30 yards in front. The engine would be travelling 3½ to 4 miles an hour. Deceased was not running when be saw him in front. He (witness) had no drink except two glasses of beer with his bait at the Blue Bell, and one glass before be left Nenthead in the morning. In reply to Mr Fernau, witness said the

deceased did not seem to have sufficient food with him, and one of the men had given him part of a little meat pie at the station. Deceased had been spoken to on the previous Saturday about getting too near the engine. He (witness) had bad some trouble in getting deceased to keep a proper distance in front.
Barron Dryden corroborated the evidence of the previous witnesses, and stated that at the time when the accident occurred, he was steering the engine a little to the right side of the road to roll down a ridge of rough stones, and had his eye on the hind wheel of the engine on the right hand side, but could give no account as to how the accident occurred. Questioned as to the drink they had had on the road, witness said they had none between Nenthead and Alston. A quart of beer was brought out to them at Nentsbury, but they would not take it.
Joseph Jackson gave evidence as to bringing the injured man to Alston. He was quite conscious all the time and said he had been knocked down and run over. Deceased was asked if he had taken a fainting fit and he replied that he had not.
Kenneth Simpeon, (a driver newly engaged by the Company, and who had come to Alston to have a look at the road), gave evidence as to coming to Alston with Jackson. The deceased was lying in the trap, but he never heard him state he had been run over. He did not think it possible for deceased to say he had been knocked down without him (witness) hearing.
Joseph Jackson (recalled) said he thought all the men were present when deceased said he had been knocked down. He heard deceased say so more than once.
A. Anderson also gave evidence, but was unable to throw further light upon the affair.
Police Sergeant Ferrer said that about 20 minutes past four on the day in question, he got word about the accident and found that deceased had been brought into the town by Jackson and Simpson. He was taken into the Swan's Head, and laid on to a bed. Here hie injuries were attended to by Nurse Kirsopp of the Bolton Hospital, who happened to be passing as the man was being carried in. In the meantime, doctors had been sent for. All was done for him that could be done, but he expired in about 20 minutes after his arrival at the Swan's Head.
Dr. Carson sad he examined the body after death. There was a deep wound on the top of the right thigh, and the thigh and knee of the left leg were broken The lower part of the body was terribly crashed where the engine bad apparently gone over him.
After a long consultation in private, the jury returned a verdict of “Killed by being ran over by a traction engine belonging to the Vieille Montagne Zinc Company,” and added a recommendation that in future one of the two men on the engine be always in a position to keep a look out on the road In front of the engine.
The jurymen and the witnesses handed over their fees to the mother of the deceased.
Deceased was very much respected in the district. He was a Primitive Methodist local preacher and a Sunday school teacher, and great sympathy is felt for his mother and sister in their sad and sudden bereavement.

Deaths

At Alston, on the 5th inst., Elizabeth, widow of the late Wm. Walton, shoemaker, Alston, aged 67 years.

24th September 1898 (Newcastle Courant)
NENTHEAD SCHOOL BUILDING CONTRACT. —At an adjourned meeting of the Alston School Board the tenders for the new school and masters house at Nenthead were considered, the contract being ultimately given to Mr E. Peart, Weardale, whose tender was as follows: —Schools, £1,258 18s; master's house, £481 12s 6d; boundary walls, £263 3s 8d —total, £2,003 14s 2d.

8th October 1898 (North Cumberland Reformer)
Deaths
At Church Gates Inn, Alston, on the 4th inst., John, eldest son of the late John and Isabella Dawson, aged 47 years.
In 1881, at Thirlwell Lane, Alston, John Dawson, blacksmith, aged 64, his wife Isabella (Pattinson, married 30th July 1846, at Alston) aged 54, children, John, blacksmith, aged 29, Hugh, blacksmith, aged 27, Jane Ann 24, and William W., labourer in woollen mill, aged 22.
Isabella Dawson died 6th September 1898, John Dawson snr., died 24th May 1897.

NENTHEAD
DISCOVERY OF ORE AT HIGH FORCE
The Nenthead Vieille Montagne Company, who commenced a trial some time ago for spelter ore near to High Force, have been successful in cutting a fine vein containing ore of good quality. More men will be engaged shortly at the mine, it being contemplated to work the place on a larger scale.

29th October 1898 (Hexham Herald)
DEATH OF HUGH LEE PATTINSON
Mr Pattinson who was in his 69th year died in London where he had for some years resided, on Friday week. The deceased gentleman was the son of the well-known discoverer of the process of de-silvering lead. His father at one time manager of a soap factory at the Ouseburn subsequently became Assay Master for the Greenwich Hospital, Alston. He was an able chemist, and discovered the new mode of separating silver from lead whilst managing Mr Beaumont's Lead Wharf and Smelt Mill at Blaydon. This led to Mr Pattinson becoming prosperous and shortly afterwards the chemical works at the Felling were established. The original title of the firm was John Lee and Company. On the death of Mr Lee, the tile was changed to H. L. Pattinson and Company. … Mr Pattinson senior died about 40 years ago. … The firm ceased to exist about 13 years ago. … Mrs Pattinson is a sister of Mr Hugh Shield Q.C.
See 20th September 1850, 12th November 1858, 12th November 1858, 19th November 1858, and 28th November 1868.

SCHOOL BOARD

... the Education Department, approving of the plans for the new school at Nenthead and sanctioning the borrowing of the money (£2,310) from the Public Works Loan Office, the repayment extending over a period of 30 years.

29th October 1898 (Hexham Courant)

MARRIAGE OF A NENTHEAD MINISTER IN AMERICA

News has come to hand of the marriage of Rev Jonathan Thompson late of Nenthead with Miss Josephine Staley of Port Heron, Michigan. Mr Thompson left Nenthead about six years ago (with his brother who died about 12 months ago) and both of them entered the Methodist Episcopal Ministry. He is now labouring with some success in Richmond, Michigan.

See 20th November 1897

4th November 1898 (Durham County Advertiser)

THE NENTHEAD VIEILLE MONTAGNE ZINC COMPANY, who are making so energetic development at Nenthead, employing several hundreds of men, commenced a trial some time ago for Spelter near to High Force, and have been successful in cutting a fine vein containing ore of good quality. More men will be engaged shortly at the mine, it being contemplated to work the place on a larger scale.

12th November 1898 (The North Cumberland Reformer)

MEDICAL OFFICER'S REPORT

Dr. CARSON reported with reference to No. 1 District, that dating the quarter ended September 30th, 11 deaths had been registered. These included a visitor and a young man belonging to the high district who was accidentally killed by a traction engine. Deducting these the death rate for the quarter was 5.26 per 1000 per quarter, or at the rate of 21.04 for the year. The death rate for the two preceding quarters was very low, and the present high one was due to deaths at an advanced age. Diarrhoea was very prevalent during September and caused one death, but there had been no cases of Infectious disease. Ten births had been registered. A nuisance caused by the removal of a midden which had to be brought out into the middle of the potato market to be carted away, and which on the last occasion was allowed to lie some hours, had called forth some uncomplimentary remarks. More frequent emptying was desirable. —With regard to No. 2 District Dr. SHORT reported 7 deaths, 6 males and 1 female. Two were persons not belonging to the district, and deducting these the death rate for the quarter was 3.6 per 1000. The births were 9, 5 males and 4 females, giving a rate for the quarter of 4.8 per 1000. There had been no cases of contagious or infectious disease except influenza. The illness of the Inspector had delayed the completion of the inspection. The water supply of West Nenthead was complained of as polluted, and there was just occasion for the complaint. The water possessed a strong odour and was unfit to drink. Evidently the sewerage from the drains above percolated through the strata, but samples had been submitted to the County Analyst. The main sewer had been blocked by rubbish brought down by the recent floods and should be attended to or the obstruction might get worse.—The CHAIRMAN said the Surveyor would know something about the sewer.— The Surveyor asked which sewer was meant, and the Chairman having explained, he said he had not been accustomed to

clean it out. He thought it was the ditch water that caused the obstruction. There was a grate and he had seen it choked on the top with night soil and such like.—Mr HOLMES remarked that tons of rubbish had been brought down by the flood and must be somewhere.—The Chairman: The Surveyor will look to it and report.—With reference to the complaint by Dr. Carson of the nuisance caused by depositing a midden in the potato market, the INSPECTOR said that the party concerned had promised to clean it out oftener.

NENTHEAD WATER SUPPLY

A report from Dr. Short drew attention to the analysis of the existing water supply at West Nenthead which is very unsatisfactory. The well should be closed at once, as the use of such water was seriously prejudicial to the health of the inhabitants. Analyses of the two samples of water were submitted from the County Analyst. With reference to the first, which was from the well at present in use, he stated that it was so highly polluted as to be dangerous as drinking water, and the well should be closed at once. The second sample, if filtered, would be suitable for domestic use though somewhat hard. A detailed analysis was given, from which it appeared that the first sample contained ferruginous matter, vegetable debris, and living moving organisms. In the second sample, which has a hardness of 9½ degrees before boiling and 4½ after boiling, there was under the micro- scope a heavy deposit, chiefly ferruginous matter —In reply to Mr Storey, the Inspector said the first sample was taken from the well.

Mr STOREY thought it should have been taken higher up before it entered into the common tile pipes which convey the water to the present well, pointing out that it might he contaminated on the way.

Mr BOLTON said it was very necessary to know what sort of water they were using. If the Council wished for an analysis of the water at the source they might get it; but hie Impression was that it was contaminated before it entered the tile pipes. He did not believe it was spring water, but that some at least cams from a burn.—The Inspector agreed that the water was contaminated at the source owing to the broken strata through which it came. That was also the doctor's opinion. If they would refer to his report. There were farm-buildings and land that got surface dressing above the source. He could not have got a sample from the source at any one point, and only after a lot of work.

Mr THOMPSON asked if there was a sufficient supply at the source. It seemed to him that the supply was gathered all the way down.

Mr PICKERING Said there was not The analyst also was against that supply. He moved, that a supply be brought from the upper source whence the second sample was obtained.

Mr BOLTON seconded.

Mr THOMPSON: Are we satisfied with the analysis?

Mr BOLTON: We don't know where to get a better.

Mr BRAMWELL hoped that the work, if done, would be done effectually (hear, hear). He understood there was enough water to supply other parts of Nenthead.

The motion was carried.

Some discussion took place as to the pipes.—The Inspector said his idea was a 2-inch galvanised pipe from the spring.

Mr STOREY: And three inches below as at Alston (laughter).

The INSPECTOR: No. One inch

Mr STOREY Suggested a three-inch pipe, and that the pipes be joined with flanges and not with lead, but the Inspector pointed out that that would be expensive as the pipes most be laid straight, whereas the course was zig-zag.
Mrs CORE hoped there would be no such mistake as was made at Alston, when they were told the pipes would be about a hundred weight each, while some were pearly double.
The INSPECTOR denied having stated that the pipes would be a hundredweight each. That was the weight of a 3-inch pipe, 4 and 6-inch were much more.—In reply to Mr Bolton he said a 2-inch pipe would bring all the water there was.
Mr STOREY moved that the 3-inch pipes be used but on a division the Inspector's suggestion was adopted by 7 votes to 6.

19th November 1898 (The North Cumberland Reformer)
Death
At 219 Jefferson Street, Newcastle-on-Tyne, on the 16th inst., Nanny eldest daughter of the late Joseph and Ruth Blacklock, Nenthead, aged 53 years. Interment Saturday at 2 p.m., at Elswick Cemetery.

3rd December 1898 (Hexham Herald)
NENTHEAD
The death of **Mr Thomas Hetherington** took place on Monday night, after a prolonged illness. The deceased was one of the oldest inhabitants of the place, was born at Nenthead in the year 1810 *(born 20th July 1811)*, and had thus attained to the age of 88. He commenced work when he was eleven years of age, and was employed until about four years ago, having been actively connected with the Nenthead mines for about 74 years under the London Lead Company and the Tynedale Lead and Zinc Company.

St John's Church Yard, Nenthead

ERECTED
IN
AFFECTIONATE REMEMBERANCE
OF
ALICE JANE, DAUGHTER OF
THOMAS & MARY
HETHERINGTON
OF NENTHEAD
WHO DEPARTED THIS LIVE
MARCH 14TH 1865
AGED 5 YEARS AND 6 WEEKS
JOHN THEIR SON
DIED MAY 15TH 1890
AGED 36 YEARS
ALSO OF THOMAS FATHER OF
THE
ABOVE WHO DIED NOV 28TH 1898
AGED 87 YEARS
ALSO OF MARY WIFE OF THE
ABOVE
WHO DIED JANUARY 10TH 1915
AGED 92 YEARS

In 1841, at Nenthead hill Top, John Hetherington, mine agent, aged 65, his wife Alice 50, children Thomas, smelter lead ore, aged 25, Christopher, apprentice shoemaker, aged 15, Ann 14, and Robert 10.
In 1851, at High Fair Hill, Thomas Hetherington, lead ore smelter, aged 39, sister Ann, housekeeper, aged 24, and brother Robert, joiner, aged 19.
In 1861, at Hill Top, Thomas Hetherington, smelting overman, aged 49, his wife Mary 38, children John 7, and Alice J. 3.
In 1871, at Nenthead, Thomas Hetherington, overman at smelt mill, aged 59, his wife Mary 49, and son John 17.
In 1881, at Nenthead, Thomas Hetherington, lead works overman, manufacturing, aged 69, his wife Mary 59, and son John Hetherington, theology student aged 27.
In 1891, at Ivy Cottage, Nenthead, Thomas Hetherington, assayer of metals, aged 79, and his wife Mary 68.

ALSTON

The sum of £21 7s was distributed at Alston on Saturday to the poor residing at Nenthead, this being the annual income from the Langhorn charity. There were 19 applicants.

WEARDALE

The death is announced of Mr Joseph Bee of the New York detective department at San Francisco, California. The deceased was born in Weardale but went to America when quite young. He was first employed in mining pursuits, but in the course of time became attached to the police force rising by degrees until in 1884, when Chief Lee's the Captain of the detective department drafted Bee on to his staff. … The deceased visited Weardale two years ago and was the guest of the Scotland Yard Chiefs while in London. Mrs Longstaff of Low House, Westgate Weardale is a sister of the late Mr Bee.

Joseph Bee died 30th October 1898, aged 53, at San Francisco, in 1896, he was living at 1706 Broadway, San Francisco.
In 1841, at Lane Hill, William Bee, lead miner, aged 40, his wife Jane aged 30, children, Mary 9, Hannah 6, and William 4. In 1851, at Lane Hill, Jane Bee, widow, aged 41, children Mary 18, Hannah, dressmaker, aged 15, William, lead miner, aged 13, and Joseph 5.
In 1861, at Lane Hill, Stanhope, Jane Bee, lead miners widow, aged 51, daughter Hannah, dressmaker, aged 25, grandson William Longstaff 4, and son Joseph, lead miner, aged 15.
In 1871, at Hill, St John's Chapel, Jane Bee, miners widow, aged 63, and her daughter Hannah, dressmaker, aged 35.
In 1871, at Low House, Westgate, William Longstaff, mason, aged 42 (son of John Longstaff & Phoebe Vickers), his wife Mary (married 1854, Stanhope) aged 38, children Phoebe J 16, William, iron stone miner, aged 14, John 11, and Frank V 7.
In 1881, at Low House, Westgate, Stanhope, William Longstaff, formerly mason, aged 52, his wife Mary 48, children William, mason, aged 24, John, mason, aged 21, Frank Vickers, labourer, aged 17, and servant Hannah Carrick 25. William Longstaff died July 1883, aged 55.
In 1891, at Low House, Westgate, Mary Longstaff, widow, farmer, aged 57, and son Frank V., farmers son, aged 27. In 1901, at Earn Well, Mary Longstaff, widow, aged 68, and general servant, Sarah E. Milburn aged 20
In 1880, in San Francisco, district 133, Joseph Bee aged 35, police officer.

In Memory of
JANE BEE,
RELICT OF WILLIAM BEE,
WHO DIED AT LOW
HOUSE,
NOV 10TH, 1880, AGED 71 YEARS.
ALSO THE ABOVE WILLIAM,
WHO WAS KILLED AT ELMFORD
LEAD MINE, JUNE 9TH 1849, AGED 45
YEARS,
AND WAS INTERRED AT
ST JOHN'S CHAPEL.

10th December 1898 (Hexham Courant)
Marriages
At St Augustine Church, Alston, 7th inst. John son of the late John Smith of Bleagate, Alston, to Caroline daughter of William Lee of Randal Holme.
In 1891, at Randel Holme, William Lee, farmer, aged 62, his wife Catherine J 53, children Margaret 27, Samuel C 25, Caroline 23, Lizzie, school mistress, aged 20, Emily, school mistress, aged 20, George 4, Willemina 13, and Joseph 11.
In 1891, at Bleagate, John Smith, farmer & cattle dealer, aged 61, his wife Frances, aged 52, and sons, Robert 27, John 25, and Thomas Walton 20.
Caroline Smith died 2nd quarter 1900, aged 33.
In 1901, at Bleagate, John Smith, widow, farmer, aged 35.
John Smith married Hannah Lizzie Bell, 2nd quarter 1903.
Hannah Lizzie Smith died 1st quarter 1907, age 32.
In 1911, at Bleagate, Garrigill, John Smith, widow, farmer, and his son John 4.

10th December 1898 (Hexham Herald)
ALSTON
On Thursday at the Alston Police Court, Thomas and Elizabeth Hind were charged as recommended by the Coroners jury by Inspector Gardner, of the Society for the Prevention of Cruelty to Children with having accelerated by neglect the death of their infant child Mary Jane Hind. … The bench sentenced the prisoners to six months imprisonment with hard labour.

Mary Jane Hind born July 1st, 1898, parents Thomas and Elizabeth Hind of Kate's Lane, Alston, died 23rd November 1898. The inquest was informed that the child instead of weighing the expected 11½ lbs., just before her death she weighed 6 lbs. 2 oz. and was emaciated, she was in a filthy condition with sores. They also had a child 1½ - 2 years old which was fine and healthy, this child was taken to the workhouse to be cared for.

James Spottiswood and his wife were also prosecuted by the same society for neglect of their children. Spottiswood was sent to prison for one month with hard labour and his wife who is in delicate health and her three children were sent to the workhouse. These are the first cases of this kind, which have been before the Alston Court.

17th December 1898 (Hexham Herald)

NEWBROUGH

DEATH OF MR WM. NIXON OF STONECROFT.

In our obituary today it is with deep regret we record the death of Mr Nixon at the age of 75 years which occurred on Friday evening 9th inst. at Haydon Bridge whither he had removed in the early part of this year from Stonecroft, that he might be more accessible to medical advice in the complaint from which he suffered for several years. His death will be received, by many friends and acquaintances in different parts of the country, with deep sympathy, he being well known in his occupation as superintendent of the ore dressing at the Stoneycroft and Greyside Mines for the long period of forty years, having begun and ended with that important company, having washed the first and last output of ore in that period.

Previous to that, he was under the Settlingstones Mining Company, the late F. Hall Esq., being the lessee of the mine and was initiated into the work of ore dressing by the late Mr John Bell of Settlingstones. Deceased was born at Whitechapel, near Haydon Bridge, but removed with his parents in early life to Stonecroft, where he continued to reside, with the exception of brief intervals of residence at Altonside and Allerwash, after his marriage. … He was one of the first promoters of the Newbrough Mechanics Institute in 1848, and continued as a member until his death. … He was a consistent member of the Newbrough Methodist Free Church for 37 years. … His remains were consigned to their quiet resting lace beside those of his kindred in Newbrough Church Yard on Tuesday afternoon in the presence of his sons and daughter and members of their family. … He leaves three married sons and two married daughters, one son and two daughters of whom are in New Zealand, and one daughter unmarried to mourn his loss.

Marriages

Stanhope Wesleyan Chapel, 17th inst. George Curry to Miss Jacques *(Margaret Alice)* both of Stanhope.

Deaths

Big Mine Run, Schuylkill Co. Pa., North America, 23rd ult. Abel second son of the late James and Martha Rutherford, formerly of Acomb, late of West Wylam.

24th December 1898 (North Cumberland Reformer)

SCHOOL BOARD.

The monthly meeting was held on Saturday, Mr Elliot in the chair. The other members present were Messrs T. Harrison, H. Bell, R. Doyle, W. Sinclair, and W. Storey. The Attendance Officer reported that several children had been attending irregularly, and he had notified the parents, with the result that the attendance had been better. The attendance was as follows:—

	On books.	Average.
Nenthead	159	129
Nenthall	37	29
Tynehead	9	6
Garrigill	75	54
Leadgate	30	27
Alston High	98	80
Alston Infant	71	49
Alston National	51	41
	530	415

Mr Sinclair gave notice that at the next meeting he would move that the day and hour of meeting be changed. No day nor hour was however specified.

28th January 1899 (West Cumberland Times)

SAD DEATH OF A THRELKELD YOUTH

RESULT OF AN ACCIDENT.

Early yesterday (Friday) morning there died at the Mary Hewetson Cottage Hospital, Keswick, a young man named John Henry Tabberer. From what we can learn the death has been the outcome of an accident at the quarries at Threlkeld on January 11th. Tabberer, who was an apprentice blacksmith, worked with his father, and it appears he had the misfortune to get his big toe injured. He was removed to the hospital, where he remained until his death *(caused by Tetanus)*. Yesterday (Friday) evening an inquest was opened at the Cottage Hospital by Mr Gorden Falcon, coroner for West Cumberland, and a jury with Mr J, W. Lupton as foreman. James. Wm. Tabberer, living at the Quarry Cottages, Threlkeld, identified the body as that of his nephew, John Henry Tabberer, aged 16 years. He was employed with his father, who was a blacksmith at Threlkeld Granite Co.'s Works. He had an accident on January 11th, and died at 12:30 a.m. on Jan 27th. The inquest was adjourned until Wednesday next in order to have the Government Inspector present.

His parents were John Henry, and Mary Ann (nee Kendall) Tabberer .
In 1891 at Prospect Hill Evington, Leicestershire, John H. Tabberer, blacksmith, aged 31, his wife Mary Ann, shoe machinist, aged 31, children, John H. 8, William 6, and James 3; all born at Leicester.
In 1901 at Quarry Cottages, St Johns in the Vale, John Henry Tabberer, blacksmith, aged 41, his wife Mary Ann 41, children, William, blacksmiths apprentice, aged 17, and James 13.

28th January 1899 (Hexham Courant)

NENTHEAD

WORKING THE MINES

In connection with the Nenthead mines preparations have been going on for some time with a view to working the mines on a different system than what has

hitherto prevailed. The Vieille Montagne Company when they took over these mines demonstrated the fact that they were not at all afraid of speculating. The last scheme is to work the mines with rock drills driven by compressed air, these replacing the old method of hand drilling. In certain parts of the mines, they have commenced this week operating with the new drills, but the conditions existing do not seem to meet with the views of the men. A meeting held on Monday night appointed a committee to interview the manager Mr C Fernau, and also to demand the following wages. Drillers, chargers and helpers 6s per day, labourers 5s, hand drillers 4s.

28th January 1899 (Hexham Herald)

ALSTON

The remains of the late John Graham were interred recently in Alston Cemetery. The deceased was one of Alston's oldest inhabitants. … During the gold boom about 40 years ago, he was one amongst many others of the district who left for Australia to woo fortune there. He remained six years … after experiencing severe hardships he returned after meeting with scant success in the way of fortune. He attained the age of 74. …

In 1871, at Nenthall, John Graham, farmer, aged 43, born Stanhope, his wife Elizabeth 34, son Gilbert Elliot 6, John Joseph 2, Mary Ann 1 month, William Edward 4, and indoor farm servant Jane Armstrong aged 17.

In 1881, at the Black Bull Inn, Front Street, John Graham, iron stone miner & innkeeper, aged 54, his wife Elizabeth 40, children Gilbert, farm servant, aged 16, William E. 14, John J. 11, Mary Ann 10, James 6, and Thomas 4.

In 1891, at Thirlwall's Lane, John Graham, coachman, aged 65, his wife Elizabeth 50, sons Gilbert E., coal agents labourer, aged 26, William E., coachman, aged 24, James 16, and Tom 14.

4th February 1899 (Hexham Courant)

NENTHEAD

A lead miner injured on Saturday night, William Richardson (28) employed at Nenthead Lead Mines, was admitted into the Newcastle infirmary, suffering from compression of the brain, said to have been caused by a fall down some steps.

4th February 1899 (Hexham Herald)

NENTHEAD

MINERS DISPUTE

The dispute as to the miners wages at Nenthead seems likely to lead to a stoppage of work. After the recent resolution of the men notices were posted at the mines that the men were to cease work in fourteen days, but those making personal applications would be reemployed. At a meeting of the men on Tuesday night it was decided that no personal applications should be made, but that negotiations should be carried on through the committee. Failing an arrangement, the men resolved to cease work on Tuesday.

9th February 1899 (Sunderland Daily Echo and Shipping Gazette)

The death occurred on Tuesday *(7th)* night of Maria Dickinson, residing at Fair View, Nenthead, said to be the highest inhabited house in England. The

deceased had attained her 95th birthday, and was not only the oldest inhabitant of the place but the oldest inhabitant of the parish of Alston.
James Dickinson, married Jane Kenady 21st June 1810, at St Augustine's, Alston.
James Dickinson, born 14th August 1823, baptised 7th March 1824, at Red Wing Chapel, Alston, son of James and Jane Dickinson.
In 1841, at Butts, Alston, James Dickinson, lead miner, aged 18, Margaret Thompson 25, and William Dickinson 9.
In 1851, at Fair View, Alston, James Dickinson, lead miner, aged 28, his wife Marie, aged 36, children William 8, James 5, John 2, and brother in law, William Little, lead miner, aged 56.
In 1861, at Fair View, James Dickinson, lead miner and farmer of 17 acres, aged 40, his wife Maria 50, children William, lead miner, aged 18, James, lead miner, aged 14, and John 12.
In 1871, at Fair View, James Dickinson, lead miner, aged 53, his wife Maria 60, children William, lead miner, aged 28, James, lead miner, aged 24, John, lead miner, aged 22, and domestic servant Isabella Gray 20.
James Dickinson, died 1st quarter, 1878, aged 54, at Alston.
In 1881, at Fair View, Alston, Maria Dickinson, widow, farmer of 20 Acres, aged 75, sons William, lead miner, aged 37, John, lead miner, aged 32, and grandson, James D Mathews, 2.
In 1891, at Fair View, Nenthead, Maria Dickinson, widow, aged 86, son William, single, lead miner, aged 47, Ellen Dickinson, widow, aged 32, children James 12, Thomas 9, Maria 7, Mary Jane 5, and William 3.
See 26th January 1878

10th February 1899 (Newcastle Daily Chronicle)

THE NENTHEAD MINERS' DISPUTE
A PROMPT AND AMICABLE SETTLEMENT

Yesterday the dispute which threatened to cause serious interruption in the prosperity of Nenthead was brought to an early and satisfactory termination. As our readers will know, the miners have had a dispute with the management of the Nenthead lead mines which culminated this week in the declining the manager's offer and bringing out their tools on Tuesday. Yesterday morning, however the men resumed work, having agreed to accept the manager's terms. When the miners become proficient in the use of the pneumatic rock-drills which have lately been introduced, they are to have wages of 4s. 6d. a day all round, whatever work do, and in the meantime they are gradually to be taught the use of the new machines. In the meantime—and this is a point conceded by the management—the handwork is not to be stopped forthwith, as had previously been announced, but will continue alongside of the machine drilling until all the miners can be taught the use of the rock drill. When this latter has been done, there will be no distinction of wages. There will be no dismissals, and no action will be taken against any of the men in consequence of the recent agitation. It should be said that these terms were arranged after the meeting Wednesday night (reported our yesterday' issue) at a conference between the manager, Mr. C. Fernau, and the representatives of the men. At this conference the moat cordial relations prevailed, and the settlement was made in the most amicable spirit on both sides. In view of the fact that Nenthead is isolated and chiefly dependent on the mining industry, it is important both to master, and man that

such cordial relations should subsist; and the speedy settlement of a dispute that would have been most regrettable and disastrous is an outcome on which the management and the miners are to be congratulated.
It will be of interest to add that Mr. Fernau, the manager, has just received orders from the Vieille Montague Co. to spare no expense in developing the Nenthead minas to the utmost of their capacity, which is presumed to be great so that there is a prospect of increased employment for the workmen of the district; and in this connection it is to be mentioned that the representative of the North-Eastern Railway Co.. who has been making a survey of the district with a view to the ascertainment of facts are to form the basis of an arrangement between the Vieille Montagne Co. and the railway company for the extension of the railway from Alston has almost concluded his task, and that that, is every reason to anticipate that in due time a start may be made with a new line of railway right up to Nenthead. This proposed line has long been a desideratum.

11th March 1899 (Hexham Herald)

ALSTON

Mr T. F. Crawhall Wilson BA., who just died at his residence, 28 Craven Park, Willesden, in his 42nd year, was the eldest son of the late Mr T. W. Crawhall Wilson of Alston House, and succeeded to the Nenthall estates at the death of his father in 1892. ... The deceased leaves a widow and three children.

18th March 1899 (Hexham Herald)

ALSTON
LANGHORNS CHARITY DEED.

At a meeting of the Parish Council, on Saturday, a question was asked by Mr Latimer of the Clerk, whether he had yet obtained possession of Langhorn's Charity deed or whether he had heard anything from the County Council Clerk regarding the application asking him to interfere in the matter. The clerk stated that he had heard nothing yet, and he was instructed to renew the request. It appears the deed in question is in the possession of the Rev. Dr. Rutherford.

18th March 1899 (Northern Echo)

WEARDALE LEAD COMPANY.
IMPORTANT DEVELOPMENT OF BOLTSBURN MINE.

Those interested in the lead mining industry in the North of England will be glad to hear of a still further development of the Boltsburn lead mine, the now famous mine where such a rich lead ore vein was cut some time ago. This vein, which traverses the district in a south-western direction through Middlehope and into Weardale, where the Old Faw Mine is being explored, and which extends from Boltsburn Mine in a north-eastern direction into the valley of Stanhope Hope., has been continuously I worked since the first important discovery referred to was made, and which was made in the limestone. We are now informed that the main level or adit has during the last few weeks gradually improved, inasmuch as the vein stuff as stated on the best of authority is worth six tons of lead ore to the fathom. For the further development of this now promising mine the energetic manger, Mr E Thompson, is installing a powerful air compressing plant for the combined purpose of working the mine by rock drills, improving and ventilating the mine, drawing water so that the underlying rock will be under control, and under this new arrangement the old fashioned kibble will be

dispensed with being replaced by cages which will not only bring out the vein stuff directly from the workings to the surface without reloading but will relieve the miners of the fatiguing climbing and descending of ladders.. The present number of men and boys employed is 150, but when the mine is equipped as above it is natural to expect not only a considerable increase in the output of lead ore, but a corresponding increase of labour.

25th March 1899 (Hexham Courant)

GARRIGILL

Sudden death of Mrs Raisbeck of Beldy, (on 18th inst., aged 56) she was walking on the road in the company of her niece Miss Florie Raisbeck and her sister in law Mrs Currah at the time. She was the widow of Mathew Raisbeck, mining engineer.

25th March 1899 (Hexham Herald)

WEARDALE

On Monday a hundred **lead miners at Rookhope struck work** owing to two of their number being dismissed. As yet the men refuse to return to work until their comrades are reinstated.

8th April 1899 (Hexham Herald)

WEARDALE

THE STRIKE OF LEAD MINERS AT ROOKHOPE CONTINUES, there are about 100 men out. The eight hours system had been introduced at the mine. One day two men left work about one hour and a half sooner than they should have done, and in consequence were dismissed. Their comrades struck work at once. In doing so they were undoubtedly in the wrong, as they should have given a fortnights notice. On account of this the employers (Weardale Lead Company) are withholding a fortnights wages. A meeting of the men was held on Monday, when a determination was expressed to hold out till the employers would agree to reinstate the two men dismissed. A deputation waited at Newhouse Offices on Tuesday to interview the manager. It is gathered that the employers will not consider the question of reinstating the two men, and as the miners are determined that they will only return to work on that condition, the strike will probably continue for a little time.

15th April 1899 (Hexham Courant)

Deaths

At Whitley Shield, West Allendale, 13th inst., aged 66, Thomas Bell, deeply lamented, interred in Carrshield Church Yard.

In 1841, at Whitley Shield, Henry Bell, lead ore washer, (Brown, married 20th December 1820, Hexham?) aged 40, his wife Elizabeth aged 35, children Sarah 11, Thomas 9, and Betsy 6.

In 1851, at Whitley Shield, Henry Bell, lead ore washer & farmer of 33 acres, aged 54, his wife Elizabeth aged 46, children Sarah 21, Thomas, lead ore washer, aged 18, and Mary 8.

In 1861, at Whitley Shield, Henry Bell, farmer, aged 64, his wife Elizabeth 56, daughter Sarah, dairy maid, aged 31, son Thomas, lead miner, aged 28, and grandson Henry Bell 5.

In 1871, at Whitley Shield, Henry Bell, married farmer of 33 acres, aged 74, son Thomas, married, lead ore miner, aged 38, daughter in law Margaret (Askew, married 1st quarter of 1871) aged 33, and grandson Henry Bell, Ag. Labourer, aged 15.

In 1881, at Whitley Shield, Thomas Bell, widow (Margaret died 3rd quarter of 1876, aged 38), farmer of 54 acres, aged 49, mother Elizabeth Bell, widow, housekeeper, aged 76, and grandson, Henry Bell, Ag. Labourer, aged 25.

In 1891, at Whitley Shield, Thomas Bell, farmer, aged 59, his niece Mary J. Bell 26, and nephew Henry Bell, farmers nephew, aged 34.

15th April 1899 (Hexham Herald)

WEARDALE

The strike of Weardale miners at Rookhope has been settled amicably.

19th April 1899 (North Eastern Daily Gazette [for Middlesbrough])

IMPORTANT PROJECT IN LEAD MINING.

An old subterranean aqueduct, five miles long, which cost about £80,000 some hundred years ago, between Nenthead and Alston, is, it is rumoured, to be brought into use by the Veille Montague Lead and Zinc Mining Company, Nenthead, for the conveyance of mineral from their mines at Nenthead to Alston

Railway Station. The aqueduct is a monument of decayed enterprise. Mr John Smeaton was the engineer, and the work was carried out on the instructions of the Commissioners of Greenwich Hospital, to whom the estates of the last Earl of Derwentwater were transferred. The aqueduct, which is cut through rock, was commenced in 1776, and took fully sixty-six yean to complete. It was designed to drain the mines in the district, and to test the bearing power of the sills. The Lead Mining Company have had to use traction haulage over the roads to the railway station, and the roads have been seriously cut up in consequence. They now intend to discontinue the use of road engines this year, and as the North-Eastern Railway Company appear disinclined to continue the railway to Nenthead, it is possible the difficulty may be solved by underground transit along the course of the aqueduct, which would have to be drained, and & railway laid along it.

28th April 1899 (Northern Echo)

WEARDALE MINERALS AND THE ECCLESIASTICAL COMMISSIONERS

Sir Lindsay Wood, responsible chief of the lessors and Lords of the Manor in Weardale, is pursuing a commendable course in giving rein and encouragement to small investors by throwing open the unleased portion of his excellent mineral field for speculation to promote industry. A trio of local gentlemen are likely to secure the right of working an excellent bed of limestone at Burtree Pasture, only a detail fixity awaiting adjustment which it is hoped will be successful, as immediate operations will begin, orders being already secured. Something it is to be feared will have to be done to keep the inhabitants in the upper part of the valley in the decline and unlucrativeness of lead mining, apparent in the low quotations of local shares in this erstwhile prosperous industry, which is not unlikely to receive healthful inflation from the recent “find” at the ironstone mine of the Weardale Iron Company at Groveheads, Ireshopeburn, whose claim to the lead was recently disallowed by the above baronet when they were represented by Mr Hollis and Mr Teasdale, and the lead company by Mr Swan, Mr Stephen Watson, and Mr E. Thompson at Newcastle.

4th May 1899 (Northern Echo)

FATAL FALL AT MIDDLETON-TEESDALE.

Henry Thompston (64). leadminer, was accidently killed at Middleton on Tuesday night. Deceased, who was in feeble health, was part occupier of a rcoom over the old hearse house near the church gates, to which access is gained by a flight of stonr stairs. On the night named, about 9.30, deceased was ascenrding the steps when he toppled backwards over, fracturing the skull, death supervening in a few minutes.

6th May 1899 (Hexham Herald)

WEARDALE

A sad burning fatality occurred last week at St John’s Chapel, whereby Mrs Gardiner of Side Foot lost her life. Her daughter had ignited the fire and gone out to a neighbours home to seek the milk. She was away only about some ten minutes and on her return found her mother in her nightdress lying burning in front of the fire. She had evidently got near the fire when her nightdress had been caught and whether owing to having taken a fit or the sudden shock to her system, being aged, life was extinct, although she was very little burnt. Her two

sons, who are home on a visit from South Africa were upstairs in bed at the time and heard nothing until they were called by their sister. *(Aged 68)*
In 1871, at Fair Hills, St John's, Stanhope, John Gardiner, ironstone miner, aged 41, his wife Francis 39, children, Thomas 7, George 5, and John 2.
In 1881, at Huntshieldford House, John Gardiner, iron miner, aged 51, his wife Frances, 49, children, Thomas, lead mine labourer, aged 17, George, unemployed, aged 15, John 12, and Mary Ann 8.
In 1891, at Side Foot, St John's, Stanhope, John Gardiner, lead miner, aged 61, his wife Frances aged 59, children, Thomas, lead miner, aged 26, George, lead miner, aged 24, and Mary Ann 18. In 1901, at Side Foot, Weardale, John Gardiner, widower, retired lead miner, aged 71, his son Thomas, lead miner, aged 37, and daughter Mary Ann aged 28.

16th September 1899 (Cumberland & Westmorland Herald)

The monthly meeting of the Alston Rural District Council was held on Saturday. Mr. H. Walton in the chair. The Inspector presented his report upon the

Nenthead water scheme and the estimated cost, viz., No. 1 scheme to convey water from Greengill to Mr. J. Archer's, £62 15s. 6d.; No. 2. from East Nenthead over the whole. £349 2s. A letter was also read from Mr. J. R. Walton, land agent. suggesting that in case No. 1 scheme was adopted it would be advisable to investigate the supply to Grassfield and Foulards farms, as he understood these farms were supplied from Greengill source.— It was resolved to experiment by diverting the water at the source and seeing if the supply was interfered with at these farms, the Inspector to undertake the work and report thereon.

18th September 1899 (Newcastle Courant)

LEAD MINING FATALITY

On Friday a young man named Hindmarch, caretaker of the crushing mill at Carrshield Mine, just beyond the western boundary of Weardale, was in the act of adjusting some of the belting when he was caught and killed. Deceased belonged to Nenthead, and was related to Mr Lattimer.

The death of Thomas William Hindmarsh is registered at Hexham, 3rd quarter of 1899, aged 22.

Thomas Hindmarsh snr married Hannah Bell 6th November 1824, at Ninebanks.

In 1841, at Whitley Shield Green, West Allendale, Thomas Hindmarsh, lead miner, aged 38, his wife Hannah aged 40, children William 10, Thomas 6, and Joseph 4.

In 1851, at Whitley Shield Green, West Allendale, Thomas Hindmarsh, lead miner & farmer of 7½ acres with 2 stints, aged 58, his wife Hannah aged 51, children, Mary 26, Hannah 25, William, lead miner, aged 20, Thomas, lead miner, aged 16, and Joe, lead miner, aged 14.

Hannah Hindmarsh, was buried at Carshield, 23rd January 1852, aged 53

Thomas Hindmarsh snr, was buried at Carshield, 10th October 1864, aged 61.

William Hindmarsh married Tamar Armstrong 4th quarter 1853, registered at Hexham.

In 1861, at Blackett Terrace, West Allendale, William Hindmarsh, lead miner, aged 30, his wife Tamar aged 35, Children Tom 7, Armstrong 4, Hannah 2, Jane 6 months, and visitor, sister in law Ann Armstrong 20.

In 1871, at Carshield, West Allendale, William Hindmarsh, lead ore dresser & butcher, aged 40, his wife Thamar 45, children, Tom, lead ore dresser aged 17, Armstrong, lead ore dresser, aged 14, Hannah 12, Jane 10, Elizabeth 8, and Phoebe 5.

In 1881, at Carshield, West Allendale, William Hindmarsh, butcher & farmer of 6 acres, aged 50, his wife Thamar 55, children, Thomas, lead ore miner, aged 26, Hannah 22, Jane, dressmaker, aged 20, and Phoebe 15.

William Armstrong died 2nd quarter 1887, aged 56, registered at Hexham

In 1891, at Blue Row, Carshield, West Allendale, Thamar Hindmarsh, widow, farmer, aged 65, children, Hannah, dressmaker, aged 32, Phoebe 24, and granddaughter, Hannah E Ridley 3.

Tamar Armstrong was buried at Carshield 15th December 1898.

Armstrong Hindmarch, married Ann Lattimer, 3rd quarter of 1877.

In 1891, at Green Pitts, Carrshield, Armstrong Hindmarsh, lead miner and farmer, aged 34, his wife Ann aged 39, children Thomas W 13, Sarah J 11, and Thamer 9. In 1901, at Limestone Brae, Carrshield, Armstrong Hindmarsh,

farmer, aged 44, and his wife Ann aged 50. Sarah Jane, and Thamar were both working as general domestic servants for John Liddle Foster, (grocer & farmer) and his family, at Carrshield.
In 1911, Armstrong Hindmarsh, farmer, aged 54, his wife Ann 60, daughter, Sarah Jane 30, and visitor Sarah Bright, aged 82.
Armstrong Hindmarsh died 4th quarter 1926, aged 70, registered at Hexham.
Probate 1925: Ann Hindmarsh of Low Limestone Brae Allendale Northumberland (wife of Armstrong Hindmarsh) died 15 August 1915 Administration Newcastle upon Tyne 4 November to the said Armstrong Hindmarsh retired farmer. Effects £60.

23rd September 1899 (Hexham Courant)

WEST ALLENDALE

On Friday, last a sad accident happened at the Vieille Montagne works, which unfortunately was attended with fatal results. It appears that a young man named **Thomas W. Hindmarch** *(22)* was in the act of Spragging a wheel, when the lever apparently slipped and rebounded hitting him under the chin and killing him on the spot. See 18th September 1899
Spragging or Sprag: a bar hinged to the rear axle of a cart or similar in such a way that it can brace the vehicle against the road so acting as a brake. Also the act of putting a length of wood between the wheels of a truck to stop it or slow it down.

23rd September 1899 (Newcastle Courant)

LEAD MINING ACCIDENT

While two miners hailing from Upper Teesdale and West Allen respectively, were blasting rock in Nenthead mine, the fuse deceiving them exploded prematurely, injuring both seriously.

Yesterday morning, Georgd Brumwell, leadmirner, Harwood-in-Teesdale, died very suddenly after drinking a cup of tea. He was aged 63 years, and latterly had suffered severely from bronchitis.

18th November 1899 (Hexham Courant)

NENTHEAD

THE MINING INDUSTRY

On Monday, considerable consternation was caused at Nenthead when it became known that between 40 and 50 miners had received notice to cease work after the 26th inst., at Nenthead, and about 30 others connected with the Allendale works. It is reported that the operations in the dressing or separating of the material are to be curtailed by discontinuing night labour.

18th November 1899 (Hexham Herald)

WEARDALE

A fatal accident occurred in one of the Weardale limestone quarries, on Friday last to a young man named Joseph Bainbridge (33) son of John Bainbridge, Bank Lane, Stanhope. He was following his daily avocation as quarryman at the Parson Byers quarry of Bell Bros., and was in the act of pinching a stone over the quarry face when the pinch is supposed to have slipped and both he and the pinch fell over the quarry edge a distance upwards of 50 feet.

In 1891, at Back Lane, Stanhope, John Bainbridge, limestone quarryman, aged 53, his wife Ann 47, children John, limestone quarryman, aged 26, Joseph, limestone quarryman, aged 25, Robert, butcher, aged 23, Thomas, limestone quarryman, aged 21, Phoebe A. 17, and William 15.

25th November 1899 (Hexham Herald)

ALSTON

PARISH COUNCIL

On inquiry being made respecting Langhorn's Charity, the Clerk stated that he had received a letter from the County Council on the matter stating that the Chairman of the trustees of the Charity (Dr Rutherford) was in communication with the Commissioners respecting the custody of the deed. ... All that they wanted to know was, who the proper authority was to have the custody of the deed. The Clerk said that the old deed was in the parish chest, but the new one was in Dr Rutherford's hands. ...

WEARDALE

News has just reached Stanhope that a Weardale farmer out in Queensland, John Newton Tweddle, at Waraba, had his farmstead burnt down by fire everything being destroyed on September 6th.

27th November 1899 (Northern Echo)

LEAD MINING IN WEARDALE.—In addition to the hundred men who terminated their notice on Saturday at Nenthead, the workmen employed by the Weardale Lead Company at Grovehead and Slitt Mines have also received notice owing to the unremunerativeness of the working, and the industry is very gloomy in the dale.

20th December 1899 (Northern Echo)

WEARDALE LEAD CO.

THE DIRECTORS AND THE COMMISSIONERS.

THE RENT AND ROYALTY QUESTION.

The ordinary general meeting of shareholders of the Weardale Lead Co., Limited (says the "Mining World") was held at the Terminus Hotel, Cannon-

street, London, E.C., on December 15th, to receive the directors' report and a statement of accounts for the year ending June 30th, 1899.
Mr George Richardson (the chairman of the company) presided, and said: Gentlemen, in the first place I must explain to you why we are so late in, issuing this report. It is only owing to our negotiations with the Commissioners. We thought it would be better if we could advise you that we had come to certain arrangements, and therefore we kept the thing open from week to week until now. We have, however, not been able to make any further progress in the meantime, but are still a, negotiating. We have a meeting with their mineral agent and the secretary to the commissioners to-morrow, when the negotiation will be further gone into. All we want is a reasonable and fair arrangement, so that we can get some profit, and they also can get a fair rent. We do not think we should be put in a different position by the Ecclesiastical Commissioners in their estates than by the Greenwich Commissioners in the Admiralty Estates. They all belong to the nation, and we do not see why one should be in a different position to the other. We think they ought to be prepared to meet us in a fair manner, as they have done hitherto. With the great increase in royalties for coal and iron, they can afford to be a little generous to people like ourselves, who have spent such an enormous sum of money. We explained to you at the last meeting if we found certain mines would not answer, we would gradually close them down, as we were not going to fritter away your money in unprofitable business, but we are happy to say that up to the present date things are satisfactory in Boltsburn. We have a few tributers at work in each of the mines at Groverake, Sedling, Craig's Level, and Killhope. Lead has now moved up a little since we last had the pleasure of meeting you, and we are enabled by that means to allow these tributers to go in and take what they can at a certain profit to us. If we can go on a little time in that way and make a profit, we shall not close the mines. With regard to the price of lead, we have sold a few lots at £18 a ton, but the actual price just now is £17 15s. We hope the price will continue at the present figure, but even at a lower figure if we make this arrangement with the Commissioners we consider we shall have reached the turning point at the mines, and we shall be working at a profit. With regard to the accounts, you will observe that we have smelted no, less lead this year than last year. That is owing to our having bought some lead ore from the Nenthead people last year. You will have noticed that there is a balance of £414 for rent and royalty credited to the working account, but that is subject to our arrangement with the Commissioners. The next point is the directors' fees. You will see that the directors have received no remuneration, but we hope that someday when we are paying you dividends that we shall have something to say to you on that point. The next item I wish to call your attention to is the calls. Since these accounts were made up the amount outstanding has been reduced to £1,578.
Mr George Hopkins, in seconding the adoption of the report and statement of accounts, said: You will observe from the revenue account that the profit made during the year was £664, but that was reduced by a further payment of £250, which we had to make to the Commissioners. In the last account, we put that down at £500, and, therefore, we had to pay £750 for the year.
Mr Holdford: I see the wages account this year, with a smaller output, has been £2,000 in excess of what it was last year. There is also some little increase in regard to interest, while there has been nothing debited for rent and royalty, and nothing for directors' fees. The directors, I know, have been very good in

foregoing their fees; but, at the same time, if we had paid the Commissioners what we have been in the habit of Paying them we should have shown a deficit on the accounts. Then I find that the amount outstanding on calls, together with the amount in hand, would represent something like a £7,800 against a debit on capital account of about £11,000, so that we are practically out of debt.
The Chairman: We are absolutely out of debt except in regard to the debentures. The increase in the wages is owing to the poorness of the mines at Groverake. Killhope. Sedling, and Old Fall. It has cast more for getting out that poor ore than was usual in the ordinary way, but now those mines are only being worked on tribute. With regard to the liability, we think that, when we get a little into smooth water and get settled with the Commissioners it will be a matter for us to see in what way we can reduce the liability on those shares. We are more anxious to do it than you are for we are large share- holders ourselves. With reference to the question of the debt, we do owe a farthing to anybody, and, what is more, we have some money on deposit in the bank, which is rather an unusual thing for the Weardale Co. Therefore, I do not think you need go home and expect a call on Christmas day even of a very small amount. We have made an arrangement with Messrs Locke, Lancaster and Co. to charge us only one-half. They have met us very fairly and I think the Commissioners might do likewise.
The motion was then put to the meeting and carried unanimously.
The re-election of Mr J. C. Swan, and Mr Maxfield as directors was carried unanimously, sympathetic references being made to the serious illness of the latter.
Messrs James Fraser and Sons were re-elected auditors, and the meeting concluded with a vote of thanks to the Chairman.

23rd December 1899 (Hexham Herald)

NENTHEAD

During some mining operation at Brownley on Wednesday a charge of dynamite exploded prematurely and two men one named Martin were severely injured about the face.

Deaths

Alston Church View, 19th inst. aged 76 Hugh Pattinson.

In1871, at Kings Arms Lane, Hugh Pattinson, joiner, aged 47, his wife Mary aged 36, children Joseph J., joiner, aged 21, Mary A., milliner, aged 17, and Hugh 12.

In 1881, at Thirlwells, Lane, Hugh Pattinson, carpenter, aged 57, his wife Mary 47, son Joseph J. carpenter, aged 31, and daughter Sarah Jane 25.

In 1891, at Front Street, Alston, Hugh Pattinson aged 67 and his wife Mary aged 57, were living on their own means.

27th December 1899 (Northern Echo)

ACCIDENT TO WEARDALE MINERS.

Whilst two miners named Jno. E. Hodgson, Westgate, and W. Martin, Nenthead, were at work in Nenthead mine a shot of dynamite exploded unexpectedly in a hole they had drilled, seriously injuring the first named about the arms and Martin about the head and hands.

30th December1899 (Hexham Courant)

WEARDALE

A son of Mr Coulthard of Daddry Bridge End, Weardale, is among the besieged at Ladysmith; George Galley of Stanhope is with the Natal Volunteers, guarding the line of communications, another native of Stanhope named Mawson is among the prisoners at Pretoria.

30th December 1899 (Hexham Herald)

NENTHEAD

The mining industry at Nenthead has during the last few weeks, assumed a different aspect from that which prevailed for the last few years. A few weeks ago a large number of miners were paid off, and during the last week a reduction has been made in the outside hands. The night shift on the dressing floors have this week been discontinued, which consequently lessens the demand for outside labourers. The bulk of the lads thus employed have been engaged for other purposes. The machinery used for separating the mineral is now going from seven o'clock to six instead of day and night. On account of the snow and frosts, the traction engines are unable to travel, and the material is being conveyed to the station by means of horses and carts, and thus a number of those paid off are able to find employment on the roads.

3rd January 1900 (Daily Gazette for Middlesbrough)

DEATH OF A REMARKABLE LADY.

A very remarkable lady has just passed away by the death of Mrs Green, wife of the Rev. W. Lionel Green, vicar of St. Budeaux, Cornwall. She was the only daughter of Mr Robert French, of Middleton-in-Teesdale, one of the representatives of the London Lead Company in its palmy days. She wrote one or two novels of considerable merit. —"Phoebe Deacon" and "Jack Smith," but she was mainly remarkable for her linguistic attainments. She could speak French and German as well as English, and was an excellent Spanish and Italian scholar, while she learnt Portuguese on her sick bed because her only son is living in Brazil. Quite recently, she rendered considerable assistance to an eminent dialectic philologist by contributions on the Teesdale district.

20th January 1900 (Morpeth Herald and Reporter)

Deaths

At Ashington, 16th inst., aged 66 years, Elizabeth, beloved wife of William Armstrong, late of Nenthead, Alston. Interment at Ashington Jan. 20th.

Isaac Armstrong married Nancy Armstrong 1st June 1822 at St Augustine's, Alston.

William Armstrong born 28th July 1835, baptised 19th September 1835, parents Isaac (miner) and Nancy of Ashgill (Wesleyan records)

In 1841, at Middle Ashgill, Garrigill, Isaac Armstrong, lead miner, aged 40, his wife Ann, aged 35, children, Christopher, lead miner, aged 15, Hannah 13, Mary 11, Sarah 8, William 5, Isaac 3.

In 1851, at Low Row, Kirkhaugh, William Armstrong, general servant, aged 16.

Probable marriage: William Armstrong married Elizabeth Jackson 3rd quarter 1860, registered at Hexham.

In 1861, at Beldy Mill, Garrigill, William Armstrong, carrier, aged 25, and his wife Elizabeth aged 28, born Allendale.

In 1871, at Chapel Houses, Nenthead, William Armstrong, lead ore smelter, aged 35, his wife Elizabeth 37, children, John 9, Isaac 8, William H 4, and Chester 2.
In 1881, at Chapel Houses, Nenthead, William Armstrong, lead ore smelter, aged 46, his wife Elizabeth 40, children, Isaac, lead miner, aged 18, William H., lead ore dresser, aged 14, Chester 12, and Annie E. 9.
In 1891, at Bothal, Ashington, William Armstrong, horse keeper, aged 55, his wife Elizabeth 56, children, William H, coal miner, aged 23, Chester, labourer, aged 22, Annie E 18, and boarder, Thomas Armstrong, miner, aged 49.
In 1901, at 16 Seventh Row, Ashington, William Armstrong, horse keeper in coal mine (below), aged 63, daughter, Annie Elizabeth 26, and general servant, Jane Ann Martin, servant, aged 17.

24th February 1900 (Newcastle Courant)
DEATH OF A NENTHEAD FARMER.—The death occurred on Monday night, at the age of 69, of **Mr. John Archer** of West Nenthead, the cause being pneumonia, following influenza. The deceased, who was one of the oldest inhabitants of the village, always took a great interest in parish affairs. A few years ago he was a prominent member of the board of guardians and was recently appointed one of the district representatives as a trustee of Longhorn's Charity. He was a member of the Wesleyan church, in which he took great interest being one of the chief movers in its erection. Mr. Archer, who was held in great esteem in the village and neighbourhood, leaves a widow, and a grown up family. *See 29th September 1863, 8 March 1865, 7th January 1868, and 24th May 1884.*

2nd March 1900 (Consett Guardian)
The Stanhope Gill lead mine, near Frosterley, is being re-started again. With the present price of lead, this waning British industry should revive. There is still plenty of the rich metal beneath the everlasting hills of the mining districts of Great Britain.

19th March 1900 (Northern Echo)
SUDDEN DEATH OF A WEARDALE FARMER.
Quite a gloom was thrown over the highest reaches of Weardale when it became known that **Mr William Rutherford**, West Blackdean, had expired suddenly on Friday. The deceased, who prior to the decay of leadmining was master ore washer (but latterly filled a responsible position at Messrs Monkhouse and Peart's whinstone quarry), was about to leave home in his ordinary health when he was seized with apoplexy, and despite the united efforts of Dr. Wolffe and Easton never regained consciousness, and died in a few hours. Mr Rutherford, who was 70 yeas of age. was a typical yeoman, an excellent judge of stock, and an ardent farmer, his exhibits in cattle and horses at the local shows being frequently bracketed winners, his dales pony winning the county trophy at Wolsingham. A native of the dale, he was widely known and respected. He was brother to the late Cowshill hostesses, Mrs Bright and Mrs Carr, and leaves a large grown-up family, and besides having many relatives has descendants of the fourth generation. Sorrow is accentuated by the enfeebled condition of the grief-stricken widow.

24th March 1900 (Hexham Courant)
Deaths
At Allendale, Moor Houses, 16th inst. aged 65, Thomasine, widow of the late William Ridley and daughter of the late John Chatt.
In 1871, at Leadgate, Allendale, Mary Ridley, widow, retired farmer, aged 64, and son William, lead ore smelter, aged 37.

In 1871, at Moor House, John Chatt, farmer of 72 acres, aged 77, his wife Hannah 73, son John, farmer of 50 acres, aged 32, daughters Thomasine, dressmaker, aged 39, and Jane 34.
In 1881, at 80 Courtney street, Swansea, William Ridley, foreman at the lead works, aged 48, born Hexhamshire and his wife Thomasine (Chatt, married at St Nicholas, Newcastle, on 27th May 1876) aged 48, born Allendale.
In 1891, at 80 Courtney Street, Swansea, William Ridley, foreman at the lead works, aged 57, born Hexhamshire and his wife Thomasine 58, born Allendale.
At Alston Kate's Lane, 19th inst. aged 44, John Walton, husband of Mary Jane Featherstone and second son of John Featherstone, gardener, Alston.
In 1881, at Butts, Alston, John Featherstone, widow, gardener, aged 59, daughter Sarah, housekeeper, aged 27, son John W., coal miner, aged 25, married daughter Elizabeth Fairgrieve 19, son in law William Fairgrieve, condenser minder at woollen mill, aged 21.
In 1891, at Kate's Lane, John W Featherstone, coal miner, aged 36, his wife Mary J. 29, sons Matthew H. 8, Tom 4, and Hugh W. 7 months.

John Walton Featherstone, died 1st quarter 1900, aged 44.

In 1901, at Kate's Lane, Matthew Davidson, widow, cemetery keeper, aged 64, children Thomas W. coal miner, aged 42, Mary J. Featherstone, widow, aged 39, Ethel 32, John, railway porter, aged 25, Walter, general labourer, aged 21, grandchildren Matthew H. Featherstone, wool winder, hosiery works, aged 18, Thomas Featherstone 14, Hugh W Featherstone 10, and William F Featherstone 4 years.

24th March 1900 (Newcastle Courant)
PROPERTY SALE AT ALSTON. —-A sale of property, which created a large amount or interest, took place in the Golden Lion Hotel. The property in question consisted of 63 acres 3 roods 36 perches, and owned partly by Mr W. Ward, Skylles, Garrigill, and Mr T. Spark, Appleby. Owing to the parties interested failing to agree, legal proceedings were instituted at the Alston County Court, and his Honour Judge Stevenson made an order for sale. Its contiguity to the grouse moor of Mr T. Horrocks made it a desirable allotment for grouse, and this was calculated to give it an increased value. Mr A. Elliott officiated as auctioneer. The bidding was started at £300 by Mr J. Hetherington, Garrigill: and it quickly ran up to £500, which the auctioneer stated was the reserve price, and it was ultimately sold for £705 to Messrs Carrick and Lee, Brampton, who, it was understood, represented Mr Ward, one of the parties interested.

28th April 1900 (Hexham Courant)

NENTHEAD
MINING PROSPECTS

Speaking at an entertainment in the Nenthead Board school Mr C Fernau, manager of the mining works at Nenthead who presided said that the mines at Nenthead had not; up to the present under the existing company, paid very well, this being accounted for by the fact that an enormous expense had been incurred in new and improved machinery. The adoption of the compressed rock drill had also been very costly, and the output had not correspondingly increased. He intimated that the works at Nenthead were now at a crucial stage and that if the concern did not show better results, and the present company found it necessary to curtail or suspend operations it was not probable that any other company would be able to make it pay. He therefore urged the men and all concerned to do their utmost to push the work forward as the continuation of mining operations and practically the prosperity of the place depended on the support given by the employee.

ALSTON

A distressing accident resulting in a fatality took place at the Nent Force Quarry on Friday afternoon. John Cousin, Holms Foot, Nenthead, a quarryman in the employ of the company was working on a ledge near the top of the quarry about 4 o'clock. The manager Mr Emerson and Mr Davidson, Haydon Bridge were standing on the ground just above him. Mr Davidson saw the deceased using a pick to a large piece of stone, which had been loosened by blasting, and also saw him take a drink of water from a bottle. Almost immediately afterwards deceased was seen by Mr Davidson and others falling from the ledge. He fell a distance of thirty-one feet and was taken up bleeding and unconscious. … He died on Saturday morning. … Deceased was to have been married on Sunday morning.

In 1861, at Coldron Snout, Alston, William Cousin, farmer of 24 acres aged 62, his wife Hannah 56, children William, lead miner, aged 26, Isaac, lead miner, aged 20, Jonathan, lead miner, aged 17, Henry, labourer on farm, aged 15, and Margaret 11 years.
In 1871, at Dyke Head, Jonathan Cousin, lead miner, aged 27, his wife Mary aged 24, sons Jacob 4, and John 2.
In 1881, at Nenthead, Jonathan Cousin, farmer of 10 acres, aged 37, his wife Mary 34, children Jacob 14, John 12, Mary Jane 9, Hannah 5, and Jonathan 1 month.
In 1891, at Dykeheads, Jonathan Cousin, lead miner, aged 47, his wife Mary 44, children John, lead miner, aged 22, Mary J. 20, and William 8. In 1901, at Holme foot, Jonathan Cousin, lead miner, aged 57, daughter Mary J. 29, and son William, lead miner, aged 15. See 4th April 1874, & 10th December 1887

5th May 1900 (Hexham Courant)

NENTHEAD
MINING DISPUTE

According to present prospects the works of the Vieille Montagne Mining Company at Nenthead in about two weeks time will cease operations. It appears a dispute has arisen with the boys employed on the dressing floors and the managers, the dispute being over an hour a day. The mill commences at 6 in the morning and continues till 5 at night without stopping, the boys getting

their meals in a few minutes. They waited upon Mr Fernau, the manager, and asked for an hours stoppage at the dinner hour. This request, however, it was intimated, could not be entertained consequently the bulk of those affected handed in their notices to cease work on Saturday week. Fourteen days notice has thus been given to the miners, tool sharpeners, and others employed in the mines.

Deaths

At Allendale, Dean House, 27th ult., in his 65th year, John Smith, late Sergeant Major, 2nd Battalion Dorcestshire Regiment, and survivor of the steam ship Sarah Sands.

In 1891, at The Dene, Allendale, John Smith, army pensioner, aged 55, born Allendale, and his wife Mary A. aged 39, born Scotland.

At Sparty Well, West Allen, 29th ult. aged 42, Joseph Henderson Coulson.

In 1881, at Chair Heads, Ninebanks, William Coulson, farmer of 122 acres, aged 65, his wife Mary 53, Joseph H., farmers son, aged 23, William Lee, farmers son, aged 23, Ann 19, Hannah E. 13, and domestic servant Elizabeth Hindmarsh aged 18.

In 1891, at Sparty Well, Joseph H Coulson, farmer, aged 33, his wife Eliza 28, and domestic servant Jane Martin aged 16. In 1901, at Sparty Well, Eliza Coulson, widow, living on own means, aged 38.

12th May 1900 (Hexham Courant)

NENTHEAD

THE MINING DISPUTE

Mr. A. Bolton assistant manager, under date 5th inst., writing to the Newcastle Journal, I have been requested by Mr Fernau, the manager here of the Vieille Montagne Company, to write and ask if you will kindly correct some misstatements which appeared in a paragraph of your paper yesterday's date under the following heading, Mining Dispute at Nenthead. You state that "The mills commence at six in the morning and continue till five at night without stopping, the boys getting their meals in a few minutes." The real facts of the matter are the mills begin at seven in the morning and continue till six at night. The men and boys employed are allowed three half hours during the time to get their meals. This is instead of a quarter of an hour in the forenoon, one hour at twelve for dinner and quarter of an hour at four pm. Giving three intervals of half an hour each does not interfere with the working as the hour interval at noon would do. Their working day is nine and a half hours for five days, and on Saturday they work from seven till twelve noon, and have half an hour during this time. The total hours for the weeks work is 52.

19th May 1900 (Hexham Courant)

NENTHEAD

THE MINING DISPUTE

A large number of men and boys employed in the mining operations at Nenthead ceased work on Saturday. The lads came out on strike and the men were locked out. The whole dispute seems to have arisen in connection with the hours of the lads who have been working from 7am to 6pm, finishing at 12 on Saturday. The mills were kept going the whole day, but the lads appeared to have a short time allowed for food at breakfast, dinner, and tea time. When they were off however their work was accumulating and they had to overtake it

again. The lads requested that the mill should be stopped for one hour at dinner time, they were willing to forego the time allowed for tea so that actually ten hours work would be got in. After the notices had been handed in by the lads notices were passed to all the men and they must cease work after a duration of 14 days.

26th May 1900 (Hexham Courant)

NENTHEAD

THE MINES DISPUTE

The dispute in connection with the boys employed in the dressing floors of the Vieille Montagne Mining Company at Nenthead is still unsettled. The mills have been standing idle during the last week, and the boys are all out of employment. The men locked out have been partly started again the bulk having resumed work at the instigation of the masters. No settlement has been effected with the boys, nor does it appear that any negotiations are in progress.

30th June 1900 (Hexham Courant)

WEARDALE

The Sanatorium for Consumption opened at Stanhope recently is already being taken advantage of. A dozen patients are now under treatment and accommodation is to be provided for twice as many more.

17th September 1900 (Newcastle Daily Chronicle)

NENTHEAD CATTLE SHOW.

The 25th annual show was held at Nenthead on Saturday, in splendid weather. There was a good attendance of the public. Taking into consideration the altitude of the district, the exhibits were very creditable indeed. Amongst the shorthorns some good cattle were forward, one or two of them bring particularly so, especially in the class for the beet cow or heifer above two years of age in milk calf, and the best heifer in calf under two years These classes were, in fact the best for shorthorns. Galloways were only a small exhibit, but the animals were fairly good. Leicester sheep were not perhaps up to the mark, one or two being if anything somewhat under fed. The top lamb shown by Mr. Henderson, and placed first, was a particularly good animal. Black-faced were fairly well represented. Horses were a medium lot, and in fairly good condition. Ponies also were a nice lot. The show, on the whole was very creditable for the district.

9th October 1900 (Daily Gazette Middlesbrough)

SERIOUS FLOODS IN WEARDALE.

One of the most serious floods that has occurred in Weardale for many yeas took place late on Saturday. Rain fell heavily all day, and by six o'clock in the evening, the river began to be unusually swollen, and the volume of water increased rapidly till about nine o'clock. Wooden bridges over the river at Crookled, Bridge End, and Pindor Lane, near St. John's Chapel, were swept away, while several stone bridges suffered damage. Several fields were also flooded. Much damage was done to the property of the Weardale Lead Company. At Nenthead, the river overflowed its banks, and the houses in the vicinity were flooded. The mining companies also suffered severely, about a hundred tons of spelter ore being carried down the river. The mills were unable to start yesterday morning on account of the watercourses being filled up or

destroyed. Fields were covered with slime and stones and will take a great deal of clearing.

27th October 1900 (Hexham Courant)
IN NENTHEAD great interest is at present being taken in the lead mining industry. The mining company are sinking a shaft to ascertain if there is a good supply of lead in the lower sills. So far as the work has proceeded a fairly abundant quantity of lead has been found.

NENTHEAD

The remains of the late Mr Thomas Erwine were interred on Friday at Nenthead Church Yard. He was known as the father of the village and had attained the age of 83 years.
See 5th December 1884, & 28th January 1888

17th November 1900 (Hexham Courant)
THE NENTHEAD VIEILLE MONTAGNE ZINC COMPANY, in prospecting on their sett at Langdon, Upper Teasdale have discovered fine examples of Sulphate of Barium in close proximity to the Great Burtree Ford Basaltic Dyke the terminal base line of the Yordale series of strata. The Hedworth Barium Company at present are very busy at their Barium mines at Cow Green Upper Teasdale, the output being considerably increased.

17th November 1900 (Newcastle Courant)
Marriages
At Brunswick Wesleyan Chapel, Nov. 1st, by the Rev T. E. Freeman of Nenthead, Edward William Short, physician and surgeon, Lumley, Fence Houses, third son of the late James Short, Madras, to Sara third daughter of John Archer, West Nenthead.
In 1901, at Dodds Yard, Great Lumley, Durham, Edward W Short, physician & surgeon, aged 41, his wife Sara 30, and servant, Frances Hetherington, domestic servant, aged 18.

24th November 1900 (Hexham Courant)

See 11th October 1890

15th December 1900 (Hexham Courant)

ALLENHEADS

The "Rossland Miner" contains the appended interesting account of a farewell dinner given to Mr Joseph Coates who is a native of Allendale, and the second son to Mr Joseph Coates, Civil Engineer of Allenheads, who left some 3 years ago for Rossland, British Columbia. *(To work for the British American Corporation)* … "Mr Joseph Coates leaves today for El Ora, Mexico, where he will assume an important position in the engineering department of the great Esperanza mine, which is probably the second greatest mine in the world."
See 28th June 1890, 2nd December 1893.

4th January 1901 (Newcastle Daily Chronicle)

Deaths

At Carrshield, West Allendale, 31st ult., aged 78 years, Thomas Lattimer, Grocer, &c. Interment at Nenthead Churchyard on Friday 4th inst.
See 15th July 1864

12th January 1901 (Hexham Courant)

MARRIAGE OF NENTHEAD MINISTER

News has just come to hand of the marriage of the Rev E Thompson, minister of the M.E. Church of America, under the Detroit Conference and a native of Nenthead. The bride is Miss Edith M P Lamotte of Michigan. Mr Thompson resides at Brown City and has two other brothers in the American ministry. *See 18th June 1892, 1st October 1892, 2nd September 1893, & 28th October 1898.*

12th January 1901 (Cumberland & Westmorland Herald)

ALSTON SCHOOL BOARD.

The new house at Nenthead, built by the Board, is finished, and has been occupied by the headmaster, Mr. Petty. The new schools are almost completed, and the Board hope to have them ready for use early in March. They are a fine set of buildings and will be a great improvement to the village, Miss M. Harrison has been appointed assistant mistress at the Nenthead School, in place of Miss Lattimer, released.

DEATH OF A NATIVE OF NENTHEAD

The funeral took place last week at Preston Cemetery, North Shields, of Inspector Isaac Walton, who was a native of Nenthead, and had several relatives and many friends in the Alston and Nenthead districts. For 18 years he was connected with the Borough of Tynemouth Constabulary. He was a man of fine physique. and commanding presence. A persevering young officer, he was promoted to the rank of sergeant in 1890, and in 1897 he was raised to the inspectorship. He was greatly esteemed for his trustworthiness and uprightness of character. Deceased was an ardent cyclist. A member of the Freemasons, he was made Worshipful Master of St. George's Lodge last year. The funeral was the largest seen in North Shields for many years. Mr. Walton was only 38 years of age.

19th January 1901 (Hexham Courant)

Deaths

At Green Pit, Allenheads, 12th inst. aged 81, Elizabeth, the beloved wife of the late Matthew Varty.

In 1851, at Mount Pleasant, Matthew Varty, lead ore miner, aged 39, his wife Elizabeth (Hutchinson, married 1st June 1841, Allendale) aged 31, children Matthew 8, Mary 6, John 5, Elizabeth 3, and Rebekah Jane 10 months.

In 1861, at Moss House, Matthew Varty, lead miner, aged 49, his wife Elizabeth 41, children Matthew, lead miner, aged 19, John, lead ore dresser, aged 15, Mary 17, Elizabeth 13, Thomas 9, Tingate 7, Constantine 4, Hannah 2, and Joseph 1.

In 1871, at Moss House, Matthew Varty, retired lead ore miner, & land owner, aged 59, his wife Elizabeth 51, children John, lead ore miner, aged 25, Thomas, lead ore miner, aged 17, Tingate, jobbing labourer, aged 15, W. C., jobbing labourer, aged 14, Joseph 10, Mary, dressmaker, aged 26, Hannah 12, and grandson Thomas Varty 1 year.

In 1881, at Green Pits, Matthew Varty, farmer of 4½ acres, aged 69, his wife Elizabeth 61, children William Const., lead ore miner, aged 24, Joseph, lead ore miner, aged 21, Thomas 11, Mary, dressmaker, aged 37, and visitor Thomas Freak, coal tipper, aged 27.

In 1891, at Green Pit, Mary Varty, single, dressmaker, aged 46, and her mother Elizabeth Varty, widow (Matthew died 1st quarter of 1887, aged 75), aged 71.

At Hesley Well, West Allendale, 16th inst. Margaret Dora, second daughter of Margaret and the late John Martin.

In 1891, at Hesley Well, John Martin, farmer, aged 58, his wife Margaret 48, children Rachel A. 19, Margaret D. 17, John Joseph 14, William H. 12, Mary J. 9, and Henry M. 6.

19th January 1901 (Cumberland & Westmorland Herald)

ALSTON PARISH NURSING ASSOCIATION

The annual meeting of members of the Parish Nursing Association was held in the Town Hall on Tuesday afternoon. Miss Horrocks, of Eden Brows, presided. The attendance of ladies and gentlemen was very good. The report, which was presented, showed that the work of the past year was very satisfactory indeed. The financial statement was also very satisfactory, showing that considerable interest is being taken in the work done by the association. The funds have been

contributed to very heartily. Nurse Jeffreys has been engaged during the year as second nurse, residing at Nenthead. Nurse Fraser has been re-engaged under the association, her term of probationer under the County Association having expired in October. Testimony was borne to the good work done by the nurses during the year.

Deaths

At Redwing, near Garrigill, Alston, on the 8th inst., Sarah Jane, daughter of Matthew Bramwell, aged 24 years.

See 13th December 1870, 22nd December 1883, 9th April 1887

26th January 1901 (Hexham Courant)

ALSTON

The mild weather that has prevailed during the winter months has greatly facilitated the mining operations of this district. Large quantities of "Black Jack", or Zinc ore, are being daily dispatched and the great advance in the price of lead has made that metal, which not so very long ago since was hardly worth the dressing owing to the low price, worth seeking. The mining operations are being continued with that vigour that has characterised the present company since their advent into the place. At present several important trials are being made, the ultimate success of which mean much to the whole neighbourhood. In the Rampgill mine a big venture is on hand viz, that of sinking a shaft which is intended to go to a depth of 180 fathoms or more. This is being proceeded with, night and day. It is intended to tap the lower sills, which up to the present have never been touched, and it is hoped that these lower sills will be as rich in metal as the higher sills have been. As far as the sinking has already proceeded, sufficient metal has been discovered to encourage the promoters. The new and improved machinery which has been put in the mills outside is of an extensive nature, and the prospects are certainly to be considered favourable for a considerable period.

2nd February 1901 (Cumberland & Westmorland Herald)

Deaths

At Loatburn, Alston, on the 22nd ult., Mary, wife of Wm. Lee, aged 55 years.

In 1871, at East Nattrass, Alston, Thomas Lee, farmer of 26 acres, aged 52, his wife Mary 56, children, Ann, dairy maid, aged 30, William, lead miner, aged 28, and Isabella 15. See 22nd November 1879.

In 1881, at Elba, Nenthead, William Lee, lead miner & farmer of 30 acres, aged 38, his wife Mary (Teasdale, married 9th December 1872, at Alston) aged 36, children, Thomas W 7, Joseph 5, Ralph 5, Elizabeth 3, Mary A 1.

In 1891, at Lort Burn, Nenthead, William Lee, lead miner, aged 48, his wife Mary 46, children, Thomas William, lead ore washer, aged 17, Joseph, lead ore washer 15, Ralph, lead ore washer 15, Elizabeth 13, Mary Ann 11, Frances 8, and Isabella 2.

At Garrigill, on the 22nd ult., James Moffatt, aged 56 years.

In 1891, at Garrigill, James Moffatt, game keeper, aged 47, and his wife Hannah 39.

See 5th January 1878

23rd February 1901 (Cumberland & Westmorland)
It may be interesting for the inhabitants of the district to know that the amount received by the County Council from the Vieille Montague Co., as compensation for damage done to the County roads by their traction engine is £700.

23rd February 1901 (Hexham Courant)
Deaths
At Scotswood, suddenly, 19th inst. aged 43, Garthwaite husband of Sarah Jane Hornsby, late of Nenthead.
In 1851, at Overwater, Isaac Hornsby, draper & grocer, aged 35, his wife Sarah (Dixon, married 25th November 1837, Alston) aged 35, children Thomas 12, Frances 8, Jane 6, James Shaw 2, and sister in law Ann Dixon house servant, aged 50.
In 1861, at Overwater, Ann Hornsby, grocers wife, aged 33, children Thomas, shoemaker, aged 22, Jane, house servant, aged 15, James S. 12, William 7, Garthwaite 3, and Alfred H. 1.

23rd February 1901 (Cumberland & Westmorland Herald)
CONCERT AT NENTHEAD.—The annual concert, &c., of the Nenthead Co-operative Society was held in the Board Schoolroom on Friday night The program was given by a concert party from Alston. Several pieces were heartily encored. Mr. T. W. Thompson acted as accompanist. During the evening, Mr. J. Warwick, of North Shields, Chairman of the Northern Section of the Co-operative Union, gave a very interesting and instructive address Co-operation: The attendance was very large. Mr. R. Doyle presided. Following the concert a knife and fork supper was provided, and a dance after this brought a very successful anniversary to a close. The Society has made very good progress during the past three years.
Deaths
At Nentsbury, near Nenthead, on the 14th inst., Jane Whitfield, aged 54.
Jane Whitfield was at the workhouse in 1881 & 1891, listed as being blind.

2nd March 1901 (Hexham Courant)
FATAL ACCIDENT. A terrible accident occurred at Rotherhope Fell Mine, near Alston on Wednesday afternoon by which William Watson a young man of about 28 years of age, lost his life. It appears that he was engaged in preparing a

charge of dynamite for a hole that he had just bored with a rock drill when the charge exploded causing frightful injuries. His left arm was blown nearly off and he was disembowelled. He was quite dead when the other men employed in the mine got to him. An inquest will be held.
March 9th 1901, a verdict of "Accidentally killed by an explosion of gelatine dynamite" was returned by the jury.
John Watson married Elizabeth Earl, eldest daughter of Henry Earl of Thursby, 7th February 1872, at St John's, Garrigill.
In 1881, at High Rotherhope, John Watson, farmer of 200 acres aged 42, his wife Elizabeth aged 33, born Wigton, sons, William 8, Joseph H 6, and Thomas 5.
In 1891, at High Rotherhope, John Watson, farmer, aged 52, his wife Elizabeth 44, children William, farmers son, aged 18, Joseph H, farmers son, aged 16, Thomas E, farmers son, aged 14, and Samuel 4. In 1901, at High Rotherhope, John Watson, farmer, aged 63, his wife Elizabeth 54, children Joseph, farmers son, aged 26, and Samuel, farmers son, aged 14.
In 1911, at Dryburn, Rotherhope, Alston, Ada Bell, widow, aged 77, and brother, John Watson, married, landed proprietor, aged 73.
In 1911, Elizabeth Watson, married, aged 64, born Wigton was living at Kates Lane, Alston.
Probate 1913: John Watson of Dryburn Alston Cumberland yeoman died 3 September 1913 at High Rotherhope Alston Cumberland Probate Carlisle 17 November to Robert William Elliott accountant and Joseph Henry Watson farmer. Effects £2990 2s 2d.
Possible death of Elizabeth Watson, 4th quarter 1921, aged 75, at Alston.

9th March 1901 (Cumberland & Westmorland Herald)
NURSING ASSOCIATION
From the circular issued by this Association I notice that the membership amounts to 300, namely. Alston 180, Nenthead 119, Garrigill 31. The committee report an increase of public support during the past year. As, however, they have now two nurses engaged, they desire, and I think deserve, a further increase in their income. In a short time the ladies will be going to collect the annual subscriptions it is hoped that those who are not yet members become members, and those who are may see their way to increase their donations thereby giving encouragement to those who have interested themselves and given their services so heartily to this good work. It is so gratifying to notice the list of subscribing at Nenthead, who, I am told, exceeded the amount they guaranteed to raise last year, and the committee trust there will be no falling off as in such an association as this it is most necessary to have a good balance in case of emergency. The balance sheet shows a total of £141 16s 4d, a balance of £36 6s 6d having been brought forward, and £105 9s 10d being subscriptions, donations, and interest. …

23rd March 1901 (Hexham Courant)
DEATH OF MR J. MILLICAN
… The poor know that they have lost a friend that was a "friend indeed." Beginning life 79 years ago at Tynehead he lived there part of his boyhood. Afterwards his parents removed to West Allendale and there he worked in connection with the mines for awhile. He was then apprenticed to the late Mr

Matthew Simpson of Alston, as a draper, and at the end of his apprenticeship commenced business on his own account in Alston. This he carried on very successfully for many years. He was also for some years connected with the firm of Reed and Millican of Newcastle of which firm he was at one time a partner. About 15 or 16 years ago he retired from business and ten years ago he was elevated to the magisterial bench …

Deaths

At Alston, at Croft House, 15th inst in his 80th year, John Millican J.P.

NENTHEAD

Early on Monday morning, the death occurred at Wellgill Villa, Nenthead of Mr William Lee Hornsby, the oldest inhabitant of the village in his 81st year. Mr Hornsby carried on a very extensive business in Nenthead for a period of 40 years. He was born in the village in 1821 and in 1832 at the age of 11 was apprenticed in the drapery trade at Penrith. Returning to the village in 1845, he started business on his own account. … He retired in 1885, purchased Wellgill Villa where he took up residence. His wife (nee Miss Cain of Garrigill) survives him.

Deaths

At Nenthead, Wellgill Villa, 1st inst. aged 80, William Lee Hornsby, husband of F. Hornsby.

In 1851, at Overwater, Nenthead, William Lee Hornsby, draper and grocer, aged 30, and his wife Tamar (Nixon, married at East Ward, Westmorland 4th quarter of 1844) aged 30. In 1861, at West Nenthead, William L. Hornsby, draper & grocer, aged 40, his wife Tamar, aged 41, and George Hetherington, draper & grocers apprentice, aged 17.

In 1871, at West Nenthead, William L. Hornsby, draper, and grocer, aged 50, his wife Tamar, aged 50 (died 15th November 1874), and domestic servant, Ann Hetherington aged 24.

In 1881, at West Nenthead, William L. Hornsby, draper & grocer, aged 60, his wife Fanny aged 51, and domestic servant Mary Dover aged 15.

In 1891, at Wellgill Villa, William L. Hornsby, retired draper & grocer, aged 70, and his wife Fanny, aged 61. In 1901, at Wellgill Villa, William L. Hornsby, retired grocer, aged 80, and his wife Fanny, aged 71.

9th April 1901 Mine Inspectors Report (Source: Durham Mining Museum)

GREENSIDE LEAD MINE

John William Lancaster, 09 Apr 1901, aged 37, Lead Miner.

This man and other two miners were sitting on the top of the lead ore, &c., in a hopper getting a meal, when a man in the level below opened the spout or shoot to fill a waggon, and the other lead ore, &c., rushed in carrying the three men with it. Lancaster and the other two men were seriously injured, Lancaster fatally.

It occurred at Greenside Lead Mine in Westmoreland, on April 9th, and caused the death of a miner and serious injury to two others.

These men were working in the middle level, between the 20-fathom and 40-fathom levels, at a heading ; their work consisted of blasting down the rock and placing it in a hopper out of which it was drawn into waggons, by means of slides, in the 40-fathom level. At each end of this hopper there was a way gate formed by timber set on the cheeks of the vein.

After working about three hours and a half they came back from the face of the heading and sat on the "bouse" or loose rock in the hopper to get a meal, when the slide known as "No. 2 Hopper" was drawn out in order to fill a waggon; this caused a rush of the rock which displaced the timber between the hopper and one of the way gates; the three men were carried with it to the 40-fathom level,

one of them being killed and the other two seriously injured, but I am happy to say they have recovered.
It appears that the men who opened the slide of No. 2 hopper had been instructed by the Agent at the mine to only draw from No. 1 hopper, but the man who was killed had afterwards said it would be better to draw from No. 2, and the men who did the work followed his instructions. It is to be regretted they did not do as they were instructed by the Agent, for it is probable if the rock had been drawn at No. 1 hopper it would not have come away with the rush it did as the slide is immediately underneath it, and the strain would not have been brought against the timber which was displaced.

John Elliot Lancaster married Agnes Dawson, 1st quarter 1859, registered, at Penrith.

In 1871, at Dockray, Matterdale, John Lancaster, lead miner, aged 32, his wife Agnes 35, children, Elizabeth 11, Joseph 9, John William 5, Elliot 3, and Agnes 1 year.

Agnes Lancaster died 4th quarter 1872, aged 37, registered at Penrith.

John Elliot Lancaster married Dinah Birkett, 4th quarter 1874, registered, at Penrith.

John Elliot Lancaster died 18th September 1880, aged 42, at Glenridding.

In 1881, at Highrow, Patterdale, Joseph Lancaster, lead miner, aged 19, sister Elizabeth, house keeper, aged 21, brother, John W, lead miner, aged 16, brother, Elliot, lead miner, aged 13, sister, Mary Agnes, 11, and brother James aged 8.

In 1891, at Dockray, Matterdale, John William, Lancaster, lead miner, aged 27, and his wife Elizabeth Annie (Stalker, married 1st quarter 1890, registered at Penrith) aged 28.

In 1901, at Grisedale Lodge, Patterdale, John W Lancaster, lead miner, aged 37, his wife Eliza 36, children, Alex S 8, John E 6, and Jonathan R 3.

Elizabeth Annie Lancaster, married Robert Grisedale, 1st quarter 1905.

Elizabeth Annie, Grisedale, wife of Robert Grisedale, died 15th July 1907

11th April 1901 (Newcastle Evening Chronicle)
Deaths
At 33 Chirton Street, Byker, on the 8th inst., aged 39 years, Margaret, the dearly beloved wife of Henry Barron, late of Nenthead. To be interred at Heaton Cemetery.

NENTHEAD.
Amid every token of respect for the deceased, and of deep sympathy for the bereaved family, the remains of the late Mr. Nevin Heslop were consigned to their last resting place in the new cemetery at Nenthead on Thursday week. The day being a very fine one, there was an enormous gathering from every part of

the district. Conspicuous among those present were Mr. Fernau and the whole of his staff. together with the mine agent., foremen, and other employees of the Vielle Montague Zinc Co. at Nenthead, and many others. The funeral had been fixed for 3-30, and a few minute. before that hour, the coffin, covered with white floral wreaths, was brought from the house and placed on two chairs in the garden, according to the ancient usage of the parish, and the vicar, the Rev. J. Sharp, fully vested, accompanied by the ladies and gentlemen of his choir, took his place near, and gave out Toplady's well known hymn, "Rock of Ages," which was impressively sung by the large assemblage. The cortege then moved to the church, preceded by the vicar, who, on reaching the churchyard began to recite the opening words of the beautiful Church of England Burial Service. … Mr. Cramer, the company's engineer, presiding at the organ. The procession then re-formed and wended its way through the village to the cemetery. about a mile distant. At the conclusion of the service at the grave, Newman's well-known hymn " Lead, kindly light," a special favourite of the late Mr. Heslop, was sung by St. John's Church Choir, at the request of the family, and after a "last look," the large company dispersed. It was noticed that all along the line of route little knots of people were gathered and with deeply sympathetic feeling watched the long procession pass by. The deceased was highly respected by both the managers and men, and his sad death has evoked the deepest sympathy for his family. *(Robert Nevin Heslop, Mining Agent, of Hillersdon Terrace, aged 48, buried 16th May 1901)*

In 1901, at Hillersdon Terrace, Robert N. Heslop, mining agent, aged 48, born Allendale, his wife Jane 50, born Alston, children, Joseph, joiners apprentice, aged 20, Annie M. 15, and George N. 13.

25th May 1901 (Cumberland & Westmorland Herald)

ALSTON DISTRICT COUNCIL

ALLEGED TRESPASS AT NENTHEAD. The Clerk read a letter he had received from Mr. Dalton, Loudon, about the alleged trespass at Nenthead. Five months had now elapsed and he wanted to know what the Council was doing in the matter. The Clerk was instructed to write to Mr. Dalton informing him that the work would be attended to at once. An application was also received from the inhabitant of Bruntley Syke, asking the permission of the Council to allow them to make a connection with the pipe at Physic Hall and bring the water down to their premises at their own expense. The application was granted. Mr. Pickering said that they had had no fit water to drink at Garrigill all the weekend. and he did not see why one part of the parish should be attended and the other not. The Chairmen said that these people were going to pay their own expenses, but Garrigill was not.— Dr. Carson said it was simply impossible to remedy the water supply at Garrigill except by filter beds. This was left over for further consideration.

It was also decided to notify the Local Government Board as to the appointment of the Sanitary Inspector. Mr. Core said it had been passed to send a notice to Dr. Carson, the Primitive Methodist Trustees, and Mr. Dixon, Carlisle, in connection with the bad drainage of their property. This had not been done, and he moved that it be attended to at once. This was carried.

Mr. Harrison said he was sorry to report that there was no water at the new school at Nenthead. In about fortnight's time there would be between 150 and 160 scholars in the school, and it would be a serious thing if there was no water.

He had seen the sanitary engineer in connection with the matter and he was of opinion it wanted a little alteration at the main. He asked the Council to sanction this. This was granted.

SCHOOL BOARD.

It was resolved to push forward the school yard so that it might be ready for the opening of the school on the 3rd of June.

A letter was read from Mr. Petty to the effect that Mr. Wilson, the Inspector, had recommended some new dual desks, and that he had expressed his disappointment with the gallery in the Infant Room of the new school, and had stated that the water supply was very scanty.

Mr. Bell said he did not think they ought to entertain all that Mr. Petty said. If any report come before the Board from the Inspector, then they could deal with it.

Mr. Harrison said it seemed that the room was too small for the number of children. There were 56 infants on the books. He could not see how they could do with more than 40, an there was less room in the new infant department.

The Chairman—Would this not be approved by the Education Department?

Mr. Bell—It had been altered once on the recommendation of Mr. Foster. Mr. Bell said that with regard to the dual desks he thought they ought to take note of this and deal with the matter when the Inspector came back in June. This was agreed to.

The Chairman said his opinion was that Mr. Petty ought to furnish them with what he wanted and the cost the same. The suggestion was adopted. In connection with the insufficient water supply it was decided that Messrs. Harrison and Holmes be appointed a committee to confer with the sanitary engineer, and try to remedy the defects.

8th June 1901 (Hexham Courant)

NENTHEAD

NEW BOARD SCHOOLS

On Monday morning the Board schools recently erected at Nenthead were opened. Accommodation is provided for 180 children.

8th June 1901 (Cumberland & Westmorland Herald)

SCHOOL BOARD

The monthly meeting was held in the Town Hall on Saturday. Mr. Robert Elliot presided, and the others present were Messrs. Storey, Bell, Harrison, Holmes. and Mr. N. Walton, attendance, officer. The Chairman said be supposed the boiler was now in order and the water supply had been attended to. Mr. Harrison said there was now plenty of water in the school. With reference to Mr. Petty's application for charts for school walls. Mr. Storey said he saw Mr. Petty a week ago. and he suggested that it would be better for him to go to Newcastle, make his selection. and submit them to the Board for approval. This was agreed to. …

15th June 1901 (Cumberland & Westmorland Herald)

ALSTON PETTY SESSIONS

Mr. W. Thompson applied for a new store license under the Explosives Act, 1875, for the Mining Company at. Nentsbury. Mr. J. Walton made a similar application on behalf of the Vieille Montague Company in respect of the

Cashwell and Smallcleugh Mine.—Mr. Jas. Barnes applied for a store at Greenends, and the Alston and Nentforce Mining Company for a store at Nentsbury. A licence was granted in each case.
The following premises were registered under the Explosive Act, 1875, upon application Mr. John Dawson, grocer's shop, Alston; Mr. John Hall, Windy Hall, Garrigill; The Vieille Montague Company's premises, at Smallcleugh.

WEARDALE
The employees of the Weardale Iron Company at their Ironstone mines in Weardale were on Saturday informed that instead of having their hours of labour curtailed they would have to work full time in future. It is intended to produce 500 tons weekly in lieu of 300 tons and this will necessitate the increase of the "partnership" men by 17.

6th July 1901 (Cumberland & Westmorland Herald)
ALSTON SCHOOL BOARD
NENTHEAD SCHOOL STAFF.
The Chairman reported that Miss Barron had finished her apprenticeship and passed her final examination and it would require to be settled whether the Board should retain her services or not. The Master thought that they could not do without her. The average was 134. There were four rooms and it would be necessary to have a teacher in each room. The Clerk here read a letter from Mr. Petty asking what was to be done in this case.
Ultimately it was resolved to offer to retain Miss Barron at the salary of £30, as ex-pupil teacher.

The attendance officer reported as follows:—For the four weeks ending 28th Jane:—

	On Reg.	Aver.
Nenthead	166	154
Nenthall closed for whooping cough.		
Tynehead	13	12
Garrigill	72	63

Alston High	100	90
Alston National	65	55
Alston Infant	59	47

12th July 1901 (Carlisle Journal)
OBITUARY NOTICES.
MR. JOSEPH SPARK. Garrigill.— On Sunday last, after a short illness, Mr. Joseph Spark, of High Galligill, Nentsbury, passed away. The cause of death was an affection of the brain. Deceased was well known in the village and vicinity of Alston. He carried on business as Contractor to the Nenthead Company for bringing the products of the mines to bank. He employed a good

many hands and kept a large staff of horses for this and other purposes. He in addition engaged largely in farming. He always took a lively interest in local affairs, being a member of the Nenthead Burial Committee and for some time was overseer for the parish, representing the Nenthead Ward. He was buried on Wednesday afternoon in the Garrigill Cemetery, to which village he originally belonged.

Joseph Spark died 7th July 1901.

In 1891, at Nettle Hall, Galligill, Joseph Spark, contractor at lead mines, aged 43, his wife Mary (Bardgett, married 3rd qtr 1886 registered at Penrith) aged 37, and son Joseph William 2.

In 1901, at High Galligill, Nenthead, Joseph Spark, farmer & contractor, aged 52, his wife Mary 49, children, William 12, and Arnold 7.

3rd August 1901 (Hexham Courant)

ALSTON

The funeral of the late Mrs Isaac Walton of Lowbyer Manor House took place in Kirkhaugh churchyard on Friday. (Eleanor Walton born 11th July 1816, died 22nd July 1901, her son J R Walton attended)

In 1901, at Low Byre Manor House, Eleanor Walton, widow, aged 84, daughters Mary A. 57, Frances E. 53, Elizabeth S. 53, Florence H. 44, son Joseph R. engineer & land agent, aged 46, sister Hannah Richardson 80, housemaid Elizabeth Erwine aged 31, and domestic cook Mary E White aged 30. See 30th September 1893, &28th June 1902.

3rd August 1901 (Cumberland & Westmorland Herald)

ALSTON SCHOOL BOARD

The report of Tynehead Scholl stated: "The new teacher has made a good beginning and the school is prosperous in his hands. The grant earned is £29 9s." The report of Nenthead School stated: "The teachers are diligent and successful. The writing in the higher classes needs attention. The lower division at the school is well managed. The grant earned is £137 16s against £133 8s 5d last year.

10th August 1901 (Hexham Courant)

Deaths

Died at hospital, Newcastle, NSW, Australia, on the 16th May 1901, Christopher the beloved son of the late Thomas and Sarah Dixon, Kiln Cottages, Fourstones.

17th August 1901 (Cumberland & Westmorland Herald)

Marriages

At the Primitive Methodist Chapel, Alston, on the 8th inst., by the Rev. J. G. Lane, Matthew Hill to Elizabeth Hunter, both of Garrigill.

In 1881, at High Snappergill, Garrigill, Thomas Walton, lead miner aged 64, his wife Mary 57, children, Joseph, lead miner & taxidermist, aged 38, Sarah Hunter, married, ironstone miners wife, aged 32, Guy, lead miner, aged 28, grandson, Thomas Hunter, aged 5, born Frizington, and granddaughter, Elizabeth Hunter aged 3, born Ulverston.

In 1901, at Garrigill, Mary Walton, widow, aged 77, sons, Joseph, manager of lead fuse factory, 58, Guy, lead fuse maker, aged 48, and granddaughter, Elizabeth Hunter, aged 23.
In 1911, at Garrigill, Matthew Hill, lead miner, aged 33, his wife Elizabeth aged 32, born Ulverston, children, Dora 8, Mary 7 and Ida 2
See 1st April 1882, 30th September 1882, 30th June 1883

21st August 1901 (Newcastle Evening Chronicle)
Deaths
At Wardley, Second Street, Aug. 20th, 1901, aged 88 years, Mary Hill, the dearly beloved wife of the late William Hill, native of Nenthead.

31st August 1901 (Hexham Courant)
Deaths
At Allenheads, 24th inst., Thomas Kidd aged 93.
In 1851, at Whitley Shield, Thomas Kidd, schoolmaster, aged 44, born Lanchester, Durham, his wife Frances (Hetherington, married 13th October 1838, at Ninebanks) aged 45, born West Allendale, children Mary 12, Hannah 9, Thomas 7, Jane 4, Joseph 1, and sister in law Jane Heatherington, widow, pauper, aged 64.

In 1901, at Allenheads, Thomas Kidd, widow, living on own means, aged 93 and domestic servant Hannah Henderson aged 46. See 12th July 1865.

2nd September 1901 (Newcastle Daily Journal)
INTERESTING GATHERING AT NENTHEAD. —At the conclusion of a meeting of the Alston Lodge of Freemasons, the (brethren, on the invitation of Bro. J. J. C. Fernau, proceeded to Nenthead in brakes to partake of lunch provided in the mines. The journey to Nenthead was very pleasant. After lunch had been supplied, the WM (Bro. Wm. Brown) proposed the loyal and masonic toasts. In reply to a toast to the visiting members, Mr George Renwick, M.P., said that he had come to Nenthead to get the fresh and pure air. The air above the surface was good, and even the air where they now were was better than what they were accustomed to in the House of Commons. He had spoken in many peculiar places, but he thought never in such a place as he was now in.—

The evening was most enjoyably spent, being enlivened with songs, amongst which was one rendered By Mr Renwick, M.P., entitled “Cappy.”

NEW CLUB AT NENTHEAD. —The old Board School which a few weeks ago was vacated by the scholars who now occupy the new premises has been fitted up as a club room. The club has been properly organised, and it is intended to be worked upon proper methods. The following officials have been appointed; —President Mr C. Fernau; secretaries. Dr Wright and Mr Dickinson; treasurer, Mr Bolton; committee, Messrs J. Robinson, J. Blayney, R. Doyle, M. Thompson, and E. English. A number of games have been introduced, and outside a splendid, tennis court has been provided.

3rd September 1901 (Newcastle Daily Journal)

CONCERT AT ALSTON. —A concert of a unique and interesting nature was held in the Town Hall, Alston. The proceedings commenced with a Japanese garden party, Japanese tables being placed in the hall, and refreshments supplied to the company by waiters in native costume. The appearance of the hall was most attractive. After this part of the proceedings was got through a Japanese concert was given, the principal performers being Miss Halliday, London; Miss Cowell, Newcastle; Miss Robinson, Willington; Miss Stagg, the Misses Yielder, Miss Stansfield, Miss Parkes, Alston, and Mr Lancaster, Alston; assisted by a number of others. Several tableaux were given representing popular characters, etc. The whole proceedings were highly entertaining. The proceeds were on behalf of Alston Church Funds.

DEATH OF AN ALLENDALE NONAGENARIAN. —The death has recently occurred of Mr Thomas Kidd, one of the oldest and most respected inhabitants of Allenheads. He had reached the ripe old age of 93, having been born in 1808, and had lived in the reign of five sovereigns—George III., George IV., William IV., Victoria, and Edward VII. His mental faculties were clear and vigorous to the last. He had been a resident of Allenheads since 1860, and was formerly cashier and accountant to Mr W. B. Beaumont. A letter received by his son from Mr W. C. B. Beaumont, M.P., shows the high esteem in which he was held. He says: — “My own recollections of your father go back as far as I can remember anything at Allenheads, and I know well of the esteem in which he was held by my father, and by all who were associated with him in his office, where he faithfully served him for so many years.”

21st September 1901 (Cumberland & Westmorland Herald)

NENTHEAD AGRICULTURAL SHOW.

Trotting Competitions and Collie Trials

The village of Nenthead (named after the Nent rivulet), was *en fete* on Saturday, the occasion being the annual exhibition of cattle, sheep, and horses. The show was held on the slopes of a commanding meadow belonging to Mrs. Thompson at Overwater, from whence there was a pretty view of hilly pastures and heather-clad hills. The show is purely a district competition, and the animals exhibited am brought in their natural state, as they leave their grazing grounds, many of which are situated at an altitude of over 1500 feet. The day fortunately was fine, and the popularity of the event was shown by a large gathering from the surrounding district, many lady visitors being interested spectators of the proceedings. The local band, under the lead of Mr. S. Walton, gave skilful renderings of a well chosen musical program, the effect of which, resounding

amongst the surrounding mountains, was very pleasing. Mr. Graham, of High House, is secretary, and in a quiet courteous way, with the assistance of an active committee, carried through the proceedings without a hitch. The cattle were mostly of the shorthorn breed, which to a large extent has superseded the polled galloway, of which there were only two classes. The bulls were of a useful stamp, and proved that the local stook owners realise the importance good sires. The bred sheep were not particularly worthy of note, but the blackfaced classes, whose home is chiefly on the fells, were excellent; whilst the horses, included a number of useful good stepping cobs. …

Marriages

At the Wesleyan Chapel, Alston, on the 17th inst., Thomas Arthur, eldest son of Walton Holmes, Grassfield, to Dora, eldest daughter of Mrs Simpson, Alston. *Daughter of the late William Johnston Simpson, draper, Alston.*

26th September 1901 (Cumberland & Westmorland Herald)

ALSTON SCHOOL BOARD.

The monthly meeting was held on Saturday last. …

A letter was read front Mr. Petty stating that the Inspector had visited the school on Tuesday, and had made the following entry in the Log Book: "Infant room overcrowded. It had been built to accommodate 40 and there had been an average attendance of 47 in it during the last five weeks. The gallery should be altered to make more space. On the motion of Mr. Core, it was decided to write to Mr. Foster and inform him about this entry, at the same time pointing out that the Board considered it a hardship to be required to make any alteration to the gallery, seeing such a short time had elapsed since it was approved by him. Mr. Core-- I understand from Mr. Archer's letter to the Rural District Council that the supply of water to his farm is not satisfactory. The Chairman said that there was a resolution passed that the Sanitary Inspectors look after this matter and put it right. In the first instance there was too little water, for the school complaint was made to the District Council for more water. The District Council passed a resolution that the Sanitary Inspector attend to the matter to see that the school got a better supply. The School Board was not responsible. The Clerk said that a letter had been received from the sanitary inspector informing the Board to take notice that unless the water pipes; at Nenthead School were repaired and the waste of water stopped the water supply would be cut off. The Chairman said the question was what were they to do with the leakage. There was no word from the architect and he thought it would be best to write to him enclosing a copy of the report, also a copy of the inspector's report, asking him to fix a date when he could visit the school and meet the Board. This was agreed to.

Mr. J. Bramwell's tender for coals at 16s 2d per ton was accepted and that of Mr. E. Peart for cartage at 3s 9d per ton.

5th October 1901 (Cumberland & Westmorland Herald)

Deaths

At Skelgill, Alston, on the 28th ult., Hannah, widow of John Redshaw sic. *(Joseph Readshaw)*, aged 69 years.

Marriages
At the Independent Chapel, Alston, on the 30th ult., Thomas Scott, Foreshield, to Mary Martindale, Alston.
In 1911, at High Physic Hall, Alston, Thomas Scott, cartman, aged 39, his wife Mary 35, and son, John aged 8.
Deaths
At Alston Workhouse, on the 28th ult., Sarah Walton, aged 70 years.

21st December 1901 (Hexham Courant)
In Memoriam
In loving memory of Joseph Graham late of Nenthead, who died at Gateshead, December 17th 1900. Sadly missed by his wife and daughter.
See 22nd April 1882.

11th January 1902 (Stockton Herald, South Durham and Cleveland Advertiser)

Mr Beadle (83) of Holwick Head Farm, who died last week, had from his boyhood been associated with the industries of Teesdale and the adjoining dales, and he was an undoubted authority upon local geology. Born in the year 1818 at Holwick, he came of an old Yorkshire family, and at the early age of nine he commenced to work in the mines, and was connected with lead mining up to within a short time of his decease. At the age of thirty years, the late Mr R. W. Bainbridge, who was then superintendent of the **London Lead Company**, appointed him agent for the mines in Westmoreland. After removing to Middleton- in-Teesdale. Mr Beadle was appointed to look over the works at Ashgill Head until they were dosed. It is duo to the genius of Mr. Beadle that Lady Rake Mine was discovered, and convincing the directorate of the lucrative character of the speculation, the mine was developed, and with good financial results. The deceased was a man of strong will power, and was endowed with rare common sense. He is the last of the race of old lead miners in Teesdale, and he linked the past generation of dalesmen with the present hardy men of the hills, being highly esteemed for his many virtues and manly qualities.

In 1881, at Lane Head, Middleton, Thomas Beadle, lead mine agent, aged 63, his wife Margaret Spence 60, granddaughter, Mary Jane Bellas, 19, grandson John Bellas 9, and mother in law, Mary Lee, widow, aged 87.

In 1891, at Lane Head, Middleton, Thomas Beadle, lead mine agent, aged 73, his wife Margaret 71, and grandson John Bellas, blacksmith, aged 19.

In 1901 at 9 Masterman Place, Middleton, John Bellas, Blacksmith, aged 29, his wife Elizabeth 27, children, William 5, Thomas 3, and uncle, Thomas Beadle, widower, living on his own means, aged 83.

25th January 1902 (Cumberland & Westmorland Herald)

LOSS OF A FOOT AT THRELKELD MINES.

A sad accident occurred at the Threlkeld lead mines on Tuesday, whereby a man named Robert Erwine, aged 43, lost a foot. He had been an employee at the mines for 14 or 15 years, and on Tuesday morning, whilst the machinery was standing, he was engaged lubricating some portion, and inadvertently stepped on a cog wheel, and his weight, added to the water remaining in some of the “buckets” of the water wheel, caused it to revolve, and draw his foot between it and the opposite wheel, crushing it very severely. The heavy sole of his clog must have blocked the wheels or the clog would also have been torn. His fellow-workmen when! they saw what had happened exerted themselves to the utmost to free their companion, but it was a considerable time before this was accomplished.

Erwine, who resided with his brother at Threlkeld. was taken home, and Dr. Crawford, of Keswick, sent for, who with his assistant. Dr. Mill, found it necessary to amputate a portion of the foot, leaving only the heel intact. From latest inquiry, we learn that the injured man is progressing satisfactorily.

1st February 1902 (Cumberland & Westmorland Herald)

ALSTON RURAL DISTRICT COUNCIL

Dr. Carson again called the attention of the Board to the dangerous condition of the archway leading into Grisdale's-lane. One end of this archway was subsiding at the front, and bulging out the wall of the house on which this end

rests. He warned the Council that if those concerned do not take means to immediately support this archway, he would be compelled to condemn at once the cottage over it as unfit for habitation. He further pointed out the serious responsibility the Council is incurring should anyone be injured by the wall referred to falling out.
It was resolved "That if steps be not taken to render the buildings safe within 21 days the Council will apply for a summons before the magistrates to carry the notice into effect."
The Sanitary Inspector reported another house belonging to the representatives of the late Mr. Dickinson as dangerous. Resolved that notice be sent. The Inspector also reported that there was an accumulation of refuse near the village well at Nenthead, and another at Overwater, Nenthead, near a public footpath. It was decided that notice be given in each case. The Surveyor reported that Dryburn Footbridge had been completed. He drew attention to the state of Hagg's-road, and stated that Mr. Bell. the County Surveyor, had informed him that this road was no longer recognised as a county road, and that the council could not expect, any help from that source. It was finally decided that the Clerk write to Mr. Bell and request him to meet the Chairman in connection with this matter.

1st February 1902 (Hexham Courant)
Deaths
At Allendale, Sipton Terrace, 18th ult. aged 63, Thomas Sparke.
In Memoriam
In loving memory of Nicholas Short beloved husband of Lucy Short, who departed this life at Rough Side West Allen on January 31st 1894, aged 51 years.
In loving memory of my dear father Robert Dixon of Allendale Town, who departed this life, January 31st 18901. Ever remembered by his daughter Maggie Chatt.

8th March 1902 (Hexham Courant)
NENTHEAD
On Friday evening the death occurred of Mr Edward Clements, green grocer of Nenthead. . It appears that he left home on Thursday and went to Mohope in West Allendale where it was his intention to stay overnight and return on Friday. He retired to rest in his usual health but took ill shortly afterwards and gradually grew worse until about 11 p.m. when he succumbed. Deceased started business in Nenthead some 5 years ago. … Previous to coming to Nenthead he had a business near Brampton and worked at the Spelter works for some years.
In 1881, at Spelter Works, Midgeholme, Naworth, Brampton, Edward Clements, spelter works labourer, aged 31, his wife Agnes 31, children Sarah 6, Charles W.H. 4, father in law James Walker, widow, labourer, aged 66, and boarder William Walker, furnace labourer, spelter, aged 20. In 1891, at Midgeholme, Brampton, Spelter works, Edward Clements, spelter furnace man, aged 41, his wife Agnes 41, son Charles, coal miner, aged 14, daughter Sarah 16, boarder John Grieves, spelter furnace man, aged 37, and boarder Archibald Stewart, spelter furnace man, aged 50.

In 1901, at Overwater, Nenthead, Edward Clements, green grocer, aged 51, born Ireland, his wife, born Ireland, Agnes aged 51, granddaughter Mary Railton 8, born Brampton, boarder Archibald Stewart, general labourer, aged 69, born Ireland, and general servant Emily Stewart aged 12.

22nd March 1902 (Cumberland & Westmorland Herald)
Deaths
At Alston, 13th inst., Elizabeth, widow of the late Thos. Turner aged 72 years.
In 1891, at New Road, Alston, Thomas Turner, stone mason, aged 66, his wife Elizabeth (Borrow, married 2nd April 1854, at Alston)59, married daughter, Mary E Dickinson, grandsons, Vincent W J Dickinson 5, and Thomas W V Dickinson, 2.
Thomas Turner, stonemason, died 8th October 1892, at Alston.

29th March 1902 (Cumberland & Westmorland Herald)
ALSTON RURAL DISTRICT COUNCIL
THE MEDICAL OFFICER'S REPORT.
A synopsis of the Medical Officer of Health's report showed the population to have decreased from 3384 in 1891 to 3133 in 1901; that one case of scarlet fever, one case of enteric, three cases of erysipelas (one fatal), and a fatal case of puerperal fever completed the list of disease. The Black Bull Inn, with its filthy back premises had been demolished. Four houses had been condemned and steps were being taken to close them. House refuse was now collected twice a week in Alston and once in Nenthead. The nuisance on Burnbank has thus been done away with. With regard to the water supply, the springs supplying Alston were quite satisfactory, both as regards quantity and quality. At Garrigill there has been much dissatisfaction and, although many springs have been examined, the only one found satisfactory so far had been that at Lee House Allotment. This was being analysed. 53 deaths (21 males and 32 females) were registered as having actually occurred in the parish, giving 16.9 per 1000. The births registered were 57 giving 21.7 per 1000. The report concluded by drawing the attention of the County Council to the advantageous position of Alston for a sanatorium for consumption.—The report was taken as read and Dr. Carson was reappointed medical officer of health for another year.

5th April 1902 (Hexham Courant)
GARRIGILL
The funeral took place on Saturday afternoon of the late Mr Joseph Goodburn of Garrigill, whose remains were interred at Alston Cemetery. The deceased was a well known and respected farmer. … He originally hailed from Middleton in Teesdale. About 20 years ago he came to Nenthead as clerk to the London Lead Company. He also acted in that capacity for the Nenthead and Tynedale Lead and Zinc Company during the time they worked the Nenthead mines. For a short time he was employed by the present company, but eventually retired and went to Garrigill, where he carried on farming. His wife predeceased him about 8 years ago. He was 72 years of age.
In 1851, at Hude, Middleton, Thomas Goodburn, horse keeper, aged 50, his wife Ann 43, children Joseph, assistant teacher, aged 19, Elizabeth 16, and Margaret 10. In 1861, at Hillersdon Terrace, Joseph Goodburn, clerk to the lead company, aged 29, and his wife Ann 33.

In 1871, at Hillersdon Terrace, Joseph Goodburn, commercial clerk, aged 39, and his wife Ann 43.
In 1881, at Hillersdon Terrace, Joseph Goodburn, commercial clerk, aged 49, his wife Ann 54, and domestic servant Ann Stephenson aged 21.
In 1891, at Hillersdon Terrace, Joseph Goodburn, accountant to lead company, aged 59, his wife Ann 64, and domestic servant Lucy Hannah Hill aged 17.
In 1901, at Beldy Law, Joseph Goodburn, widow, retired accountant, aged 69, housekeeper Jane Hill aged 64, and housemaid Margaret Bramsale, aged 15.
See 19th December 1840, 24th August 1860, 29th March 1890, and 28th July 1894.

12th April 1902 (Cumberland & Westmorland Herald)
Deaths
At Low Bailes, Alston, on the 30th ult., John Robert Saint, aged 20 years.
In 1891, at Low Bailes, Alston, William R Saint, platelayer, aged 32, his wife Elizabeth 31, sons, John R 9, and Ernest E 6, all born at Haltwhistle.

GOVERNMENT INSPECTORS OF MINES REPORTS
REPORT OF MR J. B. ATKINSON
3rd May 1902, Nenthead (Lead & Zinc ore), Vieille Montagne Zinc Co.
FATAL ACCIDENT REPORT CONCERNING THE DEATH OF JOHN SHIELD AGED 40.
Died 4th May, deceased and two others raised the machine of a rock drill in order to alter its position on the standard so as to drill another hole. Whilst in this position and uncramped it slipped down the standard and falling on a loose drill lying on the floor, caused it to spring up and strike deceased on the temple.
In 1891, at Garrigill, Joseph Shield, grocer & stationer, aged 70, his wife Hannah 70, son John, lead ore dresser, aged 32, daughter Harriet, dressmaker, aged 29 and grandson Thomas Shield aged 16.
In 1901, at Garrigill, John Shield, lead miner, aged 41, and sister Harriett Shield, housekeeper & grocer, aged 39.
See 11th February 1871, 3rd January 1880, 24th March 1888, 6th July 1895, and 12th October 1895.

30th April 1902 (Newcastle Journal)
GARRIGILL, NEAR ALSTON.
JOHN PYE (MOSES PYE AND SONS)
Has been favoured with instructions from the owner, Mrs Moffat, to SELL BY AUCTION,
At the ANGEL HOTEL, ALSTON, On THURSDAY, May 15th, 1902,
At 3 o'clock p.m.,
The FULL-LICENSED HOUSE, situated at Garrigill, known as the
"GEORGE AND DRAGON HOTEL,"
Containing on ground floor, Small Tap Bar Kitchen, used as a snug; Large Back Kitchen, with Cooking Range; Two Front Sitting Rooms, one with Kitchen Range: Beer Cellar, with large cellar underneath, containing Wine Bins, etc.; on first floor, Large Dining Room, with folding partition, Five Bed Rooms, and Store Room, W.C., Large Attic; Outbuildings, Four-stalled

Stable, Cooch House, Small Cow Byre, and Yard; Store room above Beer Cellar, Coal Cellars, with the usual out-houses.
The Property is leasehold, granted on a term of 1,000 years from the year 1621. Garrigill is situated 4 miles from Alston, right in the heart of the Cumberland Hills, and within the last few years has become a great resort for visitors. The places of interest near to Garrigill are Crossfell, 6 miles; Ashgill Waterfall, 1½ miles; Head of South Tyne, 5 miles, with other charming scenery in close proximity to the hotel. There is excellent Fishing in the river adjoining the village, also in the numerous Burns in the district, which is all free. It is only about six miles from head of the river Tees, where there is also excellent fishing. The Property has been in the family possession for about half a century. The lessees of the Cashburn and Nenthead shootings have for many years made the “George and Dragon" their headquarters. Mrs Moffat, the present occupier and owner, can give Immediate possession.
The Auctioneer can safely recommend this as a good and lucrative investment, and with a very little outlay more accommodation could be added.
For further particulars apply to Messrs RYOTT and SWAN, Solicitors; or to the Auctioneer, both of 7 Collinwood Street, Newcastle.

24th May 1902 (Hexham Courant)
Deaths
At Alston, 21st inst., Robert son of Hannah and the late Anthony Martindale.
See 24th October 1891.

31st May 1902 (Hexham Courant)
NENTHEAD
At a public meeting held in the assembly rooms, Mr C Fernau, who occupied the chair, announced that the Vieille Montagne Zinc Company were prepared to make a grant of £25 towards providing a knife and fork tea for all their workmen, with their wives and children. The celebration of the coronation will be similar to that of the Diamond Jubilee.

7th June 1902 (Cumberland & Westmorland Herald)
ALSTON SCHOOL BOARD.
The monthly meeting of this Board use held on Saturday, …
The Clerk read a letter which had been received from the architect Mr. T. E. Davison, pointing out that the Board's demands in connection with the unsatisfactory work at Nenthead School House and School had been sent to the contractors concerned requesting their attention , and stating also that he would communicate further on the subject in due course. It was resolved that Mr. Harrison, Nenthead, be asked to take notice of what was being done, and if unsatisfactory, to notify the Clerk to call a special meeting. It was resolved that Mr. Dixon's application for an increase of salary as caretaker be granted, to date from 1st July.

14th June 1902 (Hexham Courant)

WANTED, at once, FOREMAN BLACKSMITH; permanent work.—Vieille Montagne Zinc Co., Nenthead by Alston, Cumberland

26th July 1902 (Hexham Courant)

WEARDALE

On Friday afternoon an inquest was held by Mr Coroner Proud at the Black Bull Inn, Frosterley, respecting the death of Thomas Hall 55, a labourer employed at Messrs Ord and Maddison's, Brown House quarry, near Frosterley. The evidence showed that on the 16th inst. the deceased with Wm. Wilkinson and George Tanner also in the service of the firm, rode along the railway in the quarry known as the "Gullet" on a bogie. While going down the incline and rounding a curve the bogey came into collision with some trucks that were being pushed up the incline. On perceiving the bogey the driver reversed his engine but could not prevent an accident. The two other men jumped off the bogey and escaped unhurt while Hall fell on the line and the trucks passed over him causing serious injuries to his legs from the effects of which he died the same afternoon. Verdict accidental death.

In 1901, at New Houses, Frosterley, Thomas Hall, labourer in limestone quarry, aged 54, his wife Mary Jane 50, children Nicholas, labourer in limestone quarry, aged 25, Hannah 16, Harrison M. 13, Mary Ann 12, and Frances Jane 7. In 1911, at Frosterley, Mary Jane Hall, widow, aged 60, children Nicholas, lime burner, aged 35, Frances 17, and Harrison, lime burner, aged 23.

20th September 1902 (Cumberland & Westmorland Herald)

NENTHEAD NOTES & NEWS

On Wednesday week the death occurred very suddenly of Mr. William Archer, a resident of this place. Mr. Archer has been for some considerable time in a moderate state of health, but did not manifest any unusual symptoms, when he was unexpectedly seized with a vomiting fit and almost immediately succumbed The interment took place on Saturday in the Nenthead cemetery, and was attended by a very large number of people. The service was conducted by the Rev. S. J. Gee.

On Thursday of this week Mr. Barron Dryden, a well-known character of this place, was proceeding to his employment in the mines, being seated in one of the waggons used for conveying men to the various places, when suddenly he fell beak and died. He leaves a widow and four young children. Much sympathy is felt for the friends.

Marriages

At the Primitive Methodist Chapel, Alston, on the 13th inst., W. Henry Hetherington, to Amelia, third daughter of the late Joseph Thompson, mining agent, Nenthead, both of Hill Top, Nenthead.

In 1891, at Hillersdon Terrace, Nenthead, Joseph Thompson, lead mine agent, aged 51, his wife Mary 48, children, William, blacksmith, aged 27, Agnes Ann 21, Mary 18, Amelia 14, Sarah Jane 12, Joseph 10, Matthew Walton 8, and Kate 5. See 24th January 1891

In 1911, at Nenthead, William Henry Hetherington, blacksmith, aged 35, born Weardale, his wife Amelia 34, children, Margaret 7, and Mary Elizabeth 5.

Deaths

At West Nenthead, on the 10th inst., William Archer, aged 51 years.

See 124th June 1873

At the Workhouse, Alston, on the 15th inst., John Sproat, aged 60 years.

1st November 1902 (Cumberland & Westmorland Herald)

8th November 1902 (Cumberland & Westmorland Herald)

RURAL DISTRICT COUNCIL.

The application of Mr. Joseph Routledge for a connection between his property in the Market-place and the Council sewer, was granted.

A letter was received from Mr. J. Richardson of Wellgill, Nenthead, which stated that the question of the water supply there had been left over for six months. As that time had expired he asked the Council to reconsider the matter as the present supply was very unsatisfactory. The inhabitants were prepared to do the work themselves if the Council would provide the pipes. —This was agreed to, the whole to be done to the satisfaction of the engineer.

The inhabitants of Blagill and Skellgill presented a petition asking the Council to erect a footbridge over the River neat, leading from the village to Nenthead Road. It pointed out that the cart traffic was considerable, and the people on foot could only cross the Nent when the water was very low.—The surveyor was instructed to prepare an estimate of the cost and report.

Mr. Cardwell Harpur's draft resolutions in favour of the metric system were passed.

The surveyor reported that he had received a letter from Mr. J. P. Walton, of Greenends, pointing out the rough state the road. It was nearly impassable for carriage traffic, and two he had with him would require to be sent to the coachbuilder for repairs, besides which his family had had to do without their bicycles. He asked the Council to put the steam roller upon this part of the road.—After discussion the Clerk was instructed to acknowledge the receipt of the letter.

Mr. T. Greenwell wrote pointing out to the Council that owing to the putting in of the Butts sewer, damage had been done to his property. He asked that a committee be appointed to view the place. The request was acceded to, Messrs. Thompson, Storey. Yielder, and the Inspector being appointed.

The medical officer of health's quarterly report showed a death-rate of 14.52 per 1000, and the birth-rate 19.72 per 1000 over the whole parish. Five cases of Smallpox had been registered during July and August and Scarlet fever and measles had all been introduced by visitors. Ten weeks had elapsed since the last case of Smallpox had occurred and all the infected houses had been thoroughly disinfected. He recommended an Isolation Hospital, and hoped this matter would not be postponed until another outbreak should occur. He further pointed out that no further steps had been taken to render the archway leading to Grisedale-lane safe, or the condemned houses made habitable.

It was resolved that the Crossgill water course be cleaned out, and should new troughs be required the Inspector was instructed to get them. Another discussion took place in connection with Garrigill water supply. Mr. Storey gave notice of motion that the solution passed on April 19th namely “That the new water supply be proceeded with" be rescinded. He stated that an old plan had been found which proved that a vein ran in close proximity to the spring at Lee Houses, and he thought it would be a mistake to proceed with the work, as there was a great likelihood of the water being tapped. He further moved that the present, water supply be re-piped and three stand pumps placed in the village— On a division being taken upon the first motion there was an equal number, and, as the Chairman refused to give his casting vote, the matter was left over till next meeting, Dr. Gill's appointment as locum tenons to Dr. Carson was confirmed. The committee appointed to meet the auditor at last audit was re-

appointed to act in the same capacity in connection with future procedure regarding Nenthead Cemetery.

1st December 1902 Source: The Records of Patterdale Historical and Descriptive With Illustrations By REV. W. P. MORRIS, Rector of Patterdale Pub. 1903

GREENSIDE LEAD MINE

A miner named George Chapelhow disappeared somewhat suddenly. On December 1st, 1902, he left work at 4-30 p.m. and went to the "shops"—a sort of barracks, and about 8 p.m. he asked the master of the "washings " if he should go and turn the water(off. He was told not to go, but about 10 p.m. he got up and, lighting a lantern, told the men that he was going: to turn the water off. The sluice to which he had to go to was a mile away. The night was extremely dark, and somewhat wet. As he did not return by midnight some of the men went out with lanterns in search of him. They arrived at the sluice, but the water was not turned off, and they kept up the search all night. For a few days after searchers were despatched all over the Fell, but with no success. His stick was found, but no trace of him, and they feared then he must have got into Keppel Cove Tarn. The tarn was icebound. After nearly a fortnight's search the mystery was solved on December 13th, when the sluice was opened and the body discovered. An inquest was held on December 15th, when the jury returned a verdict of "Found drowned." He was buried in Patterdale Churchyard the same afternoon. He was 40 years of age and unmarried.

13th December 1902 (Hexham Courant)

ACOMB

CLOSING OF FALLOWFIELD MINES

The Fallowfield lead mines one of the oldest workings of the kind in the country were closed on Saturday indefinitely; and some 50 or more men and boys have been thrown idle. Much anxiety has in consequence been occasioned in Acomb, as many of the villagers were employed at the mines.

Deaths

At Alston, 6th inst. in his 75th year, Robert Scott, engineer formerly of Gosforth Colliery and Green Hurth Mines, eldest son of the late William and Ann Scott, Blucher Pit, Walbottle.

In 1841, at Blucher Pit, William Scott, waggon wright, aged 45, his wife Ann 45, children Robert, coal miner, aged 13, William 10, Alice 6, and John 3.
In 1851, Robert, engine wright, aged 23, was lodging in Westgate, Newcastle.
In 1861, at Bridge Row, Longbenton, Robert Scott, mining engineer, aged 32, sister, Alice, servant, aged 25, and brother John Scott, mining engine worker, aged 23.

At Alston, 26th ult. Samuel Whitfield aged 45.
In 1881, at Front Street, Alston, Matthew Whitfield, miller & Methodist local preacher, aged 51, his wife Tamer 56, and son Samuel, millers son, aged 24.
In 1891, at Front Street, Alston, Matthew Whitfield, miller, aged 61, his wife Tamer 66, and son Samuel, millers son, aged 33.
Matthew Whitfield died 1st quarter 1893, aged 63, his wife Tamar died 1st quarter 1898, aged 72.
In 1901, at Front Street, Alston, Samuel Whitfield, corn miller, aged 43, born Coalcleugh, and domestic servant, Sarah Scaife, housekeeper, aged 50.

25th March 1903 (Teesdale Mercury)

The Small Holdings in
TEESDALE.
AN AUTHORITATIVE
EXPLANATION.

Being under the impression that a good deal of misunderstanding and misconception exists with reference to the altered labour conditions in Upper Teesdale, owing to the closing of lead-mines as leased by Lord Barnard to the Governor and Company, we have taken the opportunity of collecting important facts in this relationship, and which we hasten to place before the public.
When, in our last issue, we published the form of an agreement which had been sent to certain of the tenantry on the Teesdale Estate, accompanied by a circular letter by Lord Barnard, we were led to believe that this was a new and modified document intended to meet the exigencies of the hour, seeing that work was no longer available in the lead-mines.
We are now authoritatively informed that the text we published last week is not that of a new agreement at all. As a matter of strict fact it is the same agreement which has been in force on the Raby Estate to for more than half-a-century, except that it is somewhat modified to meet the altered conditions of the times. The agreement contains a reference to the Agricultural Holdings' Act of 1883, which was insisted after that Act was passed, enabling the tenant to give or to receive six months' notice in writing, instead of twelve months, as the Act directs. Every tenant on this part of the Raby Estate has an agreement, and the same remark applies to the majority of the tenants in Upper Teesdale.
Every new tenant who has come on to the estate in the last four years has signed a similar form. By some oversight, however, a certain number of tenants

in Upper Teesdale had not, it seems, signed agreements, or, if they had, the agreements had been lost or mislaid. In any event the agreements were not forthcoming, and, in order to put the whole body of tenantry on the same footing, the whole of the Upper Teesdale tenants were asked to sign precisely the same form of agreement, no expense whatever being caused to them thereby for stamping or preparation.

As regards the mines in the upper dale, Lord Barnard has used most strenuous efforts to enable Mr C. Fernau, of Alston, to work Wiregill for the benefit of the people of the dale. Moreover, Lord Barnard has purchased all the plant and necessary machinery at Coldberry and Ladyrake, in order that the mines should not become derelict, and so that they might be in a position to be worked at any time the lead industry revived to such an extent as to render it possible for the mines to be worked at a profit. By the action which the Lord of Raby has taken, it will at once be seen that his Lordship has put down a considerable amount of capital in what must be regarded as a risky venture, with the ultimate, though possibly remote, hope of even yet affording permanent employment to the dalesmen.

In addition to this, so anxious has Lord Barnard bean to promote the interests of his tenants, that be has been carrying out a somewhat extensive range of land-drainage for the last year-and-a-half. In this enterprise the landlord has employed as many men as chose to apply for work, and has never refused a single man or boy who has made application for labour.

It is quite true that those farmers for whom land has been drained have agreed to interest upon the outlay, but this at the rate of 3 per cent, only, or half whet was charged in many cases, in former years. And this interest does not commence to run, until such time has elapsed as to enable the land to be improved by and after draining.

It is important and just also to remember that in every lease of minerals in Upper Teesdale one of the most strictly enforced clauses is that Teesdale men shall be employed in preference to any other.

There are many serious aspects in which the present trade depression may be viewed; and perhaps it may come as a surprise to many people to know that the regular workmen of Lord Barnard on the Upper Teesdale Estate namely, joiners, masons, woodmen, and labourers—all of whom are his Lordship’s own tenants— earn wages amounting to the aggregate to £200 per four weeks. These men are constantly employed, subject, of course, to weather conditions, and the amount stated is exclusive of £8 per week in gamekeepers' wages.

Lord Barnard fully recognises that it is difficult for men occupying small farms in Upper Teesdale—in Forest, Harwood, and about Newbiggin—to live exclusively by the holdings. His Lordship knows full well that these farms are about enough to keep a man half-going, and that he needs in addition to earn as nearly £1 per week as he can. Consequently it has been the aim and the object of Mr Fife, the chief agent, to put the equivalent in work in the way of the smaller occupiers.

Take an example. In working the barytes at Cow Green, Lord Barnard gets no more revenue from that source than he expends in road-making from Langdon Beck to Cow Green, and the Teesdale receipts actually show a dead loss of between £250 and £300 since Mr Rollin started.

In common justice and fairness these facts should be distinctly made known, and we are only too ready to place this information before our readers.

4th April 1903 (Cumberland & Westmorland Herald)

NENTHEAD NOTES.

THE NEW VICARAGE.

Now that fine weather is probable the work in connection with the above new buildings is likely to go on apace. The excavations are being proceeded with. The Vicarage is to be situated about midway between the church and the old school on an elevated site. The interior will have all the latest improvements and everything made to conduce to the comfort of the occupants. It is estimated to cost about £1800. The contractors for the building are as follows.—Joinery, painting, glazing, Mr. Jonathan Rutherford, Nenthead; masonry, Mr. Caleb Peart, Weardale; plastering, Mr. Scudamore Haltwhistle; plumbing, Mr. Jefferson, Hexham; excavations and draining, Mr. W. Lee, Nenthead. By special efforts and grants, a large portion of the estimated cost has been raised, and another bazaar will be held in the autumn in aid of the project.

8th April 1903 (Teesdale Mercury)

SALE OF PROPERTY IN TEESDALE

LONDON LEAD COMPANY'S

HOLDINGS.

We understand that the lead company who have been working the lead mines in the district for very many years are winding op the company, and have decided in a short time to tell by auction the whole of their valuable properties, situate at Middleton-in- Teesdale, Haggin Gap, Eggleston, etc. Mr R. O. Pearce, of Darlington, has been instructed to carry the whole matter through. These properties will include Middleton House, a finely built mansion, with park lands tastefully laid out, and for many years the residence of the manager. Mr Bainbridge, with gardens, etc., extensive stabling, with a noted dock tower, coachmens', gardeners', and gamekeepers' houses, certain well-built villas and cottages, and excellent, stone-built schools; also Grove Villa, a commodious residence, with stabling, etc. There will also be sold a large block of property at Masterman Place, Middleton-in-Teesdale, including some well- built dwelling-houses, reading-room, stabling, etc., besides some forty to fifty stone-built workmen's cottages and houses, with large garden plots attached. At Haggin Gap there is a small holding, whilst at Eggleston there are two good residences, with stabling, gardens, etc., and two rows of substantially-built, stone cottages, with gardens. Middleton House and certain of the property will be sold at Darlington, whilst the Masterman Place, Haggin Gap, and Eggleston properties will be sold at Barnard Castle— the whole in June. The properties have been built and maintained at great cost, and should command a good market.

6th May 1903 (Hexham Courant)

Deaths

At Sparty Lee, Allendale, 9th inst. aged 57, Joseph beloved husband of Isabella Sparke.

Joseph Spark married Mary Elliot, 27th October 1832, at St Peter's, Allenheads.

In 1841, at Sparty Lee, Joseph Spark, lead miner, aged 35, his wife Mary 30, children, Jane 8, Mary 6, John 4, Isabella 2, and Sarah 11 months.

9th May 1903 (Hexham Courant)

ALLENDALE NOTES

All interested in the mining industry of Carrshield and Nenthead will hear with regret at the intended resignation of Mr Fernau of Nenthead who, since the Vieille Montagne Zinc Company took over the mines has been manager for the firm. During the time Mr Fernau has been at Nenthead the mines have been greatly developed, and a great sum of money has been spent in laying down new plant &c. The wages bill of the company, too has been an extensive one, and altogether the last six or seven years have seen a great quickening in the prosperity of the district. I hear that Mr Fernau will leave his present position in June.

Joseph Spark married Mary Elliot, 27th October 1832, at St Peter's, Allenheads.

In 1841, at Sparty Lee, Joseph Spark, lead miner, aged 35, his wife Mary 30, children, Jane 8, Mary 6, John 4, Isabella 2, and Sarah 11 months.

In 1851, at Spart Lea, Joseph Sparke, lead miner, aged 45, his wife Mary 43, children, John, lead ore washer, aged 14, Isabella 18, Thomas 9, and Joseph aged 5.

Joseph Sparke died 1st quarter 1853, registered at Hexham.

In 1861, at Sparty Lee, Mary Sparke, widow of lead miner, farming about 15 acres, aged 51, children, John, lead miner, aged 24, Thomas, carter, aged 19, Joseph, carter, aged 16, and Hannah 12.

In 1871, At Sparty Lee, Mary Sparke, widow, aged 62, sons Thomas, iron stone miner, aged 29, and Joseph, iron stone miner, aged 25.

Mary Sparke died 1st quarter 1880, aged 70, registered at Hexham

In 1881, at Bent House, Joseph Sparke, lead ore miner, aged 35, his wife Isabella (Heslop, married 4th quarter of 1880) aged 19, and daughter Mary A. Sparke 10 months. In 1891, at Shorngate, Joseph Sparke, lead ore miner, aged 44, his wife Isabella 29, children Mary Alice 10, John Wm 9, Freddy 4, Hannah 2, and Robert Heslop 8 months.

In 1901, at Sparty Lee, Joseph Sparke, lead miner, aged 55, his wife Isabella 38, children Mary Alice 20, John Wm, lead miner, aged 19, Fred 14, Hannah 12, Robert H. 10, Sarah A. 6, and Hubert 4 months.

Joseph Sparke died 2nd quarter 1903, aged 57, registered at Hexham

16th May 1903 (Cumberland & Westmorland Herald)

NENTHEAD NOTES.

THE READING ROOM: PRESENTATION TO THE PRESIDENT

In connection with the above an interesting event took place on Wednesday evening, when a special meeting of the members was held for the purpose of making a presentation to the President, Mr. Councillor A. Bolton, who is leaving the locality. Mr. Bolton has resided in the village for 29 years and has always taken an active interest in all matters relating to the place. He came to Nenthead from Stanhope to take up the management of the smelt mill under the late London Lead Company. When that company sold out, he acted in the same capacity to Nenthead and Tynedale Lead and Zinc. Co., and under the present Vielle Montaigne Co., he has acted as an outside manager of the Smelt mill. He was a member of the Parish Council and Board of Guardians, and since its establishment has been chairman or vice chairman of the cattle show. He has also been President of the flower show for a long time, while the poultry show also commanded his patronage. He acted as chairman to the Technical Education Committee, chairman to the Burial Committee, and churchwarden. He generally was at the head of any movement of a local nature and has on numerous occasions presided at concerts and similar events. For a period of 24 years he has acted as chairman of the Nenthead Reading Room, and has always taken special interest in the progress and welfare of that institution; and, undoubtedly, the present prosperous condition of the Room is in a large measure due to the interest that he has taken in it.

The members were desirous of showing their appreciation of his many services, and the room was packed to its utmost capacity. The secretary. Mr. Wm. Thompson. presided, and said that this was an event without parallel in the history of the room. Mr. Petty. the vice-president, then made the presentation, and said they were met to do honour to one whom honour was due. …

He had great pleasure in asking Mr. Bolton to accept a chair and stick as a token of regard and esteem. …

17th June 1903 (Newcastle Daily Chronicle)

THE PROPERTY MARKET.

At the Central, Station Hotel. Newcastle, yesterday. Mr. Phillips. of the firm of Messrs. Walton and Lee, London, offered for sale by public auction…

The next lot offered was the Priorsdale Estate. near Aston. The estate was described as an agricultural. a mineral, and a sporting one. The first offer was one of £12,000. This by substantial bids increased to £21,500, at which figure the lot was withdrawn. Then the estate was submitted in lots. The farm lot. sporting, water, rents, etc.—yielded £5,000 as a first offer, and £6,500 as a last. It also was withdrawn. The Nenthead properties were then offered. They yield £300 rent. £5,000 was the starting bid for this lot. The final one was £6,750. This lot was also withdrawn.

4th July 1903 (Hexham Courant)

NENTHEAD

The workmen employed at the Nenthead and Carrshield mines have presented Mr Fernau, who has acted as manager for eight years with a marble timepiece and gold Albert, and also a handsome tea tray for his wife. Mr J. Hewitson presided over a large attendance and the gifts were handed over by Mr Robert

Doyle. Mr Fernau is going to Canada shortly in connection with some mining operation.

In 1901, at Nenthead House, J C Fernau, engineer, aged 47, naturalised Belgian, his wife Magdalena 37, children Elena 21, George, apprentice engineer, aged 18, John J. C., apprentice engineer, aged 17, Carlotta 14, Cecilia 12, Evelyn 3, Governess Daisy Roy Aged 22, cook Kate Dixon aged 31, and domestic servant Jane Roddam aged 25.

1st August 1903 (Hexham Courant)

NENTHEAD

TROUBLE AT THE MINE.

A development of a somewhat serious nature took place on Monday morning in connection with the working of the Nenthead mines. It appears that the managers recently appointed have issued new regulations in regard to the working. It has been the rule for the men to enter the level, or entrance at six o'clock. They go to the workings in small wagons, and usually the men get started to work by six thirty or seven according to the distance. According to custom the men take a few minutes rest after the exertions of getting to the places. This is to be stopped. Work is to be commenced at once, and all are to be commenced by six thirty. Monday morning what is known as the Rampgill sump men were followed in and ordered to work at once. They resented and were told that they would lose their shift. They at once returned to the bank. The men at the other workings were also informed, and all came out. Thus all work inside is stopped and between 200 and 300 men are idle. At present the outside men are not affected.

8th August 1903 (Hexham Courant)

NENTHEAD

With the close of the week the dispute with the Nenthead miners will have lasted a fortnight, and as far as can at present be seen a settlement is as far off as ever. Both sides to be firm in some of the points in dispute. As far as the men are concerned there seems to be a desire on some hands to acquiesce in the masters demands, as they believe that they will soon find that it is impossible to work under the conditions; others and these seem to be the great majority assert that they will not go in to fire as stipulated, as it means killing themselves. The dispute has narrowed itself down to firing; as the other points the men are willing to give way on, and if some arrangement could be made in regard to firing the borings after each shift the matter would soon be settled. One regrettable side of the dispute is that a number of men are leaving the locality to find work elsewhere. Every day the number of men taking their departure increases. For the last few years a large batch of Italian workmen have reside in apartments specially fit up for them and known as barracks both here and at Carrshield. At one time there would be between 50 and 60 of this class in the place. They are however rapidly returning to their own country. The local men who have resided for years in the village are also looking out for employment, so that soon the natives of the place will have vanished, and when things start again it will be with a new class of workmen. The Nenthead miners are not associated with any Trades union, so that they cannot afford to hang about doing nothing, and must needs look out for work somewhere. With the Rodderup Fell men there will now be over 300 miners idle, so that it will be felt very keenly. There have

been no conferences this week, a fact that is regrettable, for if the men and masters could get together to discuss matters there would be some chance of an arrangement being come to. Perfect order prevails.

22nd August 1903 (Hexham Courant)
Deaths
At Alston, 14th inst. Annie wife of William Walton.
In 1891, at Front Street, William Walton, butcher, aged 30, his wife Ann J. 25, born Longbenton, children Frances 2, and Robert S. 6 months.
In 1901, at Front Street, William Walton, butcher, aged 42, children Annie J. 35, Fanny 12, Robert S. 10, Thomas 9, John 7, Dorothy K. 6, Jessie 3, William S. 1, Annie B. 2 months, and domestic servant Annie Armstrong aged 21.

Property Sale, dwelling house, farm buildings, 2 cottages, and 2 closes of land containing 5 acres, 2 roods and 18 perches, situated at Wellgill, Nenthead and also a pasture field near Roughside, Nenthead containing 8 acres and 25 perches … purchased by Mr J. Teasdale of Nenthead for £350.

5th September 1903 (Cumberland & Westmorland Herald)
THE NENTHEAD STRIKE
A SETTLEMENT ARRIVED AT.
Our Nenthead correspondent writes: — After a period of nearly six weeks, the dispute between the miners and the company, has terminated, at least an arrangement has been come to whereby work has been resumed. Since the last interview between the men and the manager about three weeks ago, things have not altered at all until this week. During that period large batches of workmen have left the place, numbers having found employment elsewhere. Others have been picking up a few days' work wherever they could, and, when the weather was favourable many found occupation in the harvest fields. When the men last visited the masters they were informed that a new set of rules would be issued which would affect both the inside and outside workmen, until these were published the men could not do anything, and thus matters have gone on during the last few weeks. The first signs of something satisfactory being arranged was towards the end of last week, when an intimation was conveyed in some way to the men out of work that they could be employed at what is known as Perry's dam. This is a large reservoir situated on the road to Ashgill, and is about a mile in circumference. The water is here collected and conveyed in pipes to the places where the metal is separated. The idea at present seems to be that of increasing the dimensions of this reservoir and

thereby collecting a larger supply of water than hitherto. Many of the people argue that if this had been done seven or eight years ago, instead of putting in Pelton wheels, and inaugurating steam, it would have been greatly to the advantage of the Mining Company. However, at present the project seems to be the main one, and it is sincerely to be hoped that the speculation will be remunerative. The men that have, during the dispute, been employed outside have for a week or two been engaged at the work of enlargement. The miners were also informed that they could be engaged at the same place. Therefore on Monday morning a good number proceeded thither to take on their new work. Towards the middle of the week it was further announced that, the new rules were ready for posting, and on Tuesday they were issued. A large number of regulations are stated in regard to implements, leave of absence, and other minor details. The main point in regard to firing seems to have been met in this way: the men are to fire as near as possible when they leave their shift, and the next shift men are to start as early as they possibly can. Thus matters are somewhere just about where they were when the dispute commenced. As far as can be ascertained both aides have had sufficiency of idleness. The workings were beginning to fall in, so that it might have been a serious and expensive matter if work was not soon resumed. On Thursday morning, it is pleasing to state, a large number of the men who reside in the place commenced work again, having been out since July 26. A number of miners who do not reside in the place will probably start about the beginning of next week. On Thursday the monthly "pays" were held, but, as might be anticipated, things were on the quiet side, as only the outside men had any money to take. It is calculated that about £2000 less in cash would be paid to the men this pay-day than is usual. This will be keenly felt, as an amount like that in a rural district is of considerable importance. This amount of course applies to the miners at Nenthead, Carrshield, and Rodderup.

17th October 1903, (Cumberland & Westmorland Herald)

SAD FATALITY AT THRELKELD QUARRY

An accident, the fatal result of which has called forth widespread sorrow and sympathy in the district, occurred on Friday at Threlkeld Quarry. A young man awned James William Tabberer (a fitter in the employ of the Company), son of Mr. J. W. Tabberer, a well-known employee at the works), was engaged in removing a riveted pin from a crank in a large engine. Striking the riveted end of the pin with a hammer and chisel, a piece of the steel flew off and hit his right eye with such force that the eyeball was burst Dr. Burnett, Keswick, was on his rounds at the time, and removed the fragment of steel, about three-fourths of an inch in length, from the eye, and the young man was conveyed to the Mary Hewetson Hospital at Keswick for a further operation, which was being performed by Di. Knight and Dr. Burnett, the patient being under chloroform. The operation had been effected, but heart failure supervened, and the poor young fellow died in a very short time. An inquest was held on Saturday, by Mr. Gordon Falcon, and a jury of which Mr. J. Hope was foreman, when the facts were formally given in evidence, and the inquiry adjourned till Monday for the attendance of H.M. Inspector of Mines and Quarries.

The deceased was highly esteemed by all who knew him, being of a kindly and genial disposition, and took an active part in all youthful gatherings. He was, like his father. very fond of football, and was connected with the Penrith and District

League. The interment took plate at Threlkeld Churchyard on Tuesday afternoon, when the body was first conveyed to deceased's home at the Quarry Cottages, and then after an appropriate hymn and prayer, was followed to the Church by a large concourse of sorrowing relatives and friends. The Rector conducted the service, and alluded in sympathetic words, to the amiable character of deceased, who was a member of the choir. At the grave one of the officials of the Mechanics' Lodge, of which deceased was a member took part with Mr. Crowe in the service, and by the graveside were a number of beautiful wreaths from mistime and friends.

In 1891, at Wanthwaite, St Johns in the Vale, Nr. Keswick, James William Tabberer, blacksmith, aged 33, born Leicester, his wife Emma Louisa 31, born Leicester, children, James Wm. 9, born Leicester, Florence Lillian 7, and Herbert Ernest, 4 months, born, St Johns in the vale.

In 1901, at Quarry Cottage, St Johns in the Vale, Keswick, James Wm Tabberer, widower, Foreman, granite quarry crushing mill, aged 43, children, James Wm. engine fitter, aged 19, Florence Lillian 17, and Herbert Ernest, aged 10.

17th October 1903 (Hexham Courant)

ALLENDALE NOTES

The Allendale labour market has been and is as bad as the weather. For a period upwards of twelve weeks the mines at Carrshield have been closed and the prospects of reopening seem to be of the very vaguest order. Truly during this time a few men have been engaged in the mine relaying rails and pipes preparatory, it is said to the carrying of all Allendale mineral out to the Nenthead side of the mine rather than the Carrshield side, where also, it is said, it will be dressed. This of course would if carried out, lead to the closing of the dressing floors at Carrshield, and at a blow almost destroy the whole of the mining industry in the dale, truly a gloomy outlook for the tenants, etc., in the Allendale district, though likely to lead to an increase in activity in the Nenthead district. Matters industrially have long been under a cloud in Allendale, but if the mineral found in the Allendale estates is to be taken into another district and dressed, then surely the worst has happened that can happen.

Mined by foreign labour, and then to be taken out of the district altogether for the dressing operations, the lot of the Allendale people could have been no worse if there did not exist an ounce of mineral in the Allendale hills.

Deaths

At Alston, John Thomas Walton, boot maker, husband of Hannah Walton.

In 1901, at School Gates, John T Walton, boot & shoe maker, aged 40, his wife Hannah 38, children Joseph W., boot & shoe maker, aged 17, Eliza A. 15, Mary 12, Maud 9, Lizzie E. 7, John C. 3.

At Palmerston, North New Zealand, July 1st Bertha wife of Harry J. Luxford (nee Doyle late of Alston)

20th October 1903 (Penrith Observer)

ALSTON NOTES AND NEWS.

A STRIKE AND ITS SEQUEL- ITALIANS.

Some fifteen Italians and four Germans are coming to work at Rotherhope Fell lead mines, and sleeping accommodation is now being provided at the mines for them. Hitherto only local workmen have been employed at this mine, and

the introduction of foreign labour seems to be the sequel to the strike which took place some time ago. The men, some of whom were Italians, employed at Nenthead mines, struck work owing to some differences with their masters, and the Rotherhope Fell men, who do not appear to have had any grievance whatever, left work also. mainly, it said, because they were subjected to violent threats by the Italians at Nenthead if they did not cease work also. And the Rotherhope Fell men have been afterwards laughed at for their folly! It was misplaced sympathy, wasn't it!

AN AUSTRALIAN APPOINTMENT.

Readers will be gratified to learn that Mr. John Joseph Doyle, a native of this district, has secured a very important and valuable appointment as a mining manager in New South Wales. Australia, and will leave this country about the beginning of November for his new sphere of labour. Mr. Doyle has been under the mining companies of Nenthead since he was a boy. He commenced life under the Dougang Mining Co.. then became foreman under the Nenthead and Tynedale Lead and Zinc Co., and when this company was bought by the Vieille Montague Lead and Zinc Co. in 1896 he was still retained in its service, and took charge of the mine. After being some considerable time in the service of this company, the Llanfair Copper Mining Company in Wales. offered him the post of manager, which he accepted, and after remaining there a short time, he returned at the request of his old masters, to take charge of the Rotherhope Fell mine, which had been bought by them. He has now been offered a situation as manager by the Antimonial and Zinc Mining Co.. at Kurringo, which he has accepted, and will leave this country, as stated, very shortly. Mr. Doyle, in his capacity of manager, wherever he has been, has always won the respect, esteem, and confidence of the men over whom he had charge, which is often a difficult thing to do. While he has also retained the esteem and confidence of his employers. Loral Methodism also loses a very ardent and modest worker, and a good practical local preacher.

24th October 1903 (Hexham Courant)

ALSTON

Mr J. J. Doyle of Alston has been appointed manager for the Antimonial Zinc Mining Company at Rurringo New South Wales. He has for some time been acting in charge of Rodderup Fell Mine, which was bought some time ago by the Vieille Montagne Zinc Company. Mr Doyle who has always had the respect and goodwill of both masters and workmen is a native of Nenthead.

In 1861, at Moorcock Hall, Elisabeth Beck, widow, farmer, aged 64, daughter Jane Beck 23, granddaughter Mary Beck 1, and lodger James Robson, lead miner, aged 36.

In 1871, at Elba, Jane Doyle, widow, housekeeper, aged 31, daughter Mary Beck 11, sons John J. 6, Robert 3, and boarder Elizabeth Doyle, miners widow, aged 75.

In 1881, at Overwater, Jane Doyle, widow, housekeeper, aged 41, children John J., lead ore washer, aged 16, Robert, lead ore washer, aged 13, Elizabeth 5, and lodger James, lead ore washer, aged 54.

In 1891, at Hillersdon Terrace, John Joseph Doyle, foreman lead ore dresser, aged 26, and his wife Ann aged 28.

In 1901, John J Doyle, widow, aged 36, manager of lead mine, of Alston, Cumberland, was a boarder at Llanfair Tuliahan, St Asaph, Denbighshire

ALLENDALE NOTES

What a strange irony of fate I thought one morning this week when I saw a number of Allendale miners perforce obliged to earn a living by breaking stones on the roadside, whilst at the same time samples from all the states of Europe are apparently fore-gathering at Nenthead to deal with the very labour to which these stone breakers have all their lives been accustomed.

Deaths

At Fawside Green, Allenheads, 15th inst. aged 54, Elizabeth dearly beloved wife of John Rowell.

28th November 1903 (Cumberland & Westmorland Herald)

NENTHEAD NOTES.

During the last few years many changes have taken place at Nenthead. The policy of free imports has prevailed. Foreigners have been imported, alien emigrants have come and gone, and still many remain in our midst. As a result financial prosperity has been prevalent. Never in the history of the mines have there been so many changes in so short a time. It was well the recent strike was not of long duration, and that the men got back to work before it caused the distress so often resulting from labour troubles of a similar nature. All the native workmen were reengaged, and are again working for the Company. Fortunately not many left the village. William Wallace, in one of his books, predicted that the lead mines would soon be worked out; that was some 40 years ago. However, the mines are still working and, it would seem, will continue to for many years to come. The recent trials have proved successful, and mineral deposits have been found in the lower sills, which opens out virgin ground. It is to be hoped that this new ground may prove so productive as to remunerate the present Company for the effort and the expense which the trials have involved.

On Saturday night a meeting was held by the members of the **Lead Company's Workmen's Fund Society,** in the Rechabite Hall to consider a notice which has been sent to all the members to attend a meeting in the Assembly Room, Middleton-in-Teesdale, on the 28th inst. Hitherto the directors of the London Lead Company have been the trustees of this Society, but now having sold the whole of their property, both in the Alston Moor and Middleton districts, they have intimated their intention of resigning their trusteeship. This necessarily means that the Society must either be reconstructed or wound up. This Society has been a great boon to Nenthead and district. It is not only a splendid sick benefit Society, but has an old age pension scheme, which has been of untold value to many a member who has been fortunate enough to reach the age of 65. At the age of 65, a member ceased to pay his annual subscription, and received for the rest of his life the sum of 6s. per week. This Society has a large capital but, for many years past, few members have been admitted, and as a result the funds are gradually diminishing year by year. Could the money be properly invested, and the rules re-modelled, we think the Society might be so worked as still to continue, and hold out till the youngest member might reap his benefit. The decision of the Middleton meeting will be awaited with some amount of anxiety. It is to be hoped a wise arrangement may be made.

12th December 1903 (Hexham Courant)

£33,000 FOR TEASDALE MINERS

The London Lead Company having relinquished the lead mining Royalties in Teasdale, and the Governor and Company having wound up the concern, the question has arisen as to the disposal of the Miner's Fund, which had at one time accumulated assets to the value of about £100,000. The London Lead Company handsomely subsidised the workmen's contributions from time to time, but are now giving up the management and control of the fund which is now estimated to be worth £33,000. A private meeting has just been held, attended by about 300 members of the various branches, when it was resolved by a majority of sixty that the fund be dissolved. It is understood that the distribution of the fund will be effected through the Court of Chancery.

19th December 1903 (Hexham Courant)

Deaths

At Ropehaugh, Allendale (at her daughters, Mrs Bayne) 9th inst. aged 75, Sarah Coats, Elia House, wife of the late William Coats.

In 1851, at Hammer Shiels, William Coats, lead ore miner, aged 23, his wife Sarah (Bright, married 3rd quarter of 1850) aged 22, and daughter Mary A. 1 year

In 1861, at Mill Cottages, William Coates, lead miner, aged 34, his wife Sarah aged 32, son John 9, and daughter Sarah A 2.

In 1871, at Dirt Pot, William Coates, lead ore miner & grocer, aged 44, his wife Sarah 42, children John, lead ore washer, aged 19, Sarah A 12, Joseph W. 9, Hannah E. 5, and domestic servant Mary J Philipson aged 21.

In 1881, at Ropehaugh cottages, William Coates, lead ore miner, and provisions dealer, aged 54, his wife Sarah 51, children John, shopman, aged 29, Sarah A. 22, Joseph W., cartman, aged 19, Hannah E. 15, and visitor Thomas W. Dickinson, Wesleyan minister, aged 26, born Alston.

In 1891, at Ropehaugh, William Coats, lead ore miner, aged 64, his wife Sarah 62, daughter Sarah Ann 32, son Joseph William, Ag. Labourer, aged 29, and lodger Alfred Bright aged 11. In 1901, at Ellia House, Sarah Coates, widow, householder, aged 72, son Joseph W., lead miner, aged 38, daughter Sarah A. 42, and boarder James Murry, surgeon, aged 25, born Scotland.

At Gosforth, 2 Hedley Street, 11th inst. aged 53, Mary dearly beloved wife of William Martin, late of West Allendale.

In 1881, at Harslow, Allendale, William Martin, lead miner, aged 35, his wife Mary 30, children Lilley 8, Jane 6, and Joseph William 1 month.

In 1891, at Middle Harsley Ninebanks, William Martin, farmer, aged 45, his wife Mary 40, daughter Lillie, domestic servant, aged 18, and John W. 10. In 1901, at the Wesleyan Church, 2 Hedley Street, William Martin, platelayer & caretaker of church, aged 55, his wife Mary 50, children Lillie 28, Jennie 26, and John W. bricklayer, aged 20.

2nd January 1904 (Hexham Courant)

NENTHEAD

A somewhat disturbed state of affairs prevails at the mining village of Nenthead. A considerable number of Italian workmen have been brought to the place recently, and this has created no little feeling amongst the local workmen. Through some cause there was a somewhat serious disturbance two nights last

week, and one man who was not concerned in the affair at all was very much cut on the head, and required attention. On Saturday night a party of nearly 40 foreign workmen arrived at Alston station with the last train, and were conveyed in brakes to Nenthead. On Monday morning a party of some half dozen policemen arrived at Alston, and proceeded to the village, the authorities evidently being afraid that the disturbance might be carried still further. A state of affairs like this is out of the ordinary for such a usually quiet village, and the matter is causing considerable stir in the neighbourhood.

9th January 1904 (Hexham Herald)

NENTHEAD

Another batch of thirteen Italians arrived at Alston on Saturday from Italy, en route for the Nenthead mines. They are robust, active, athletic, class of men, similar in physique to the men in agricultural districts of Northumberland. The disturbances which occurred on Christmas day at Nenthead have not been repeated and only some three or four constables remain on duty in the village. One young man was seriously injured in these disturbances. Apparently all is quiet but there is a strong undercurrent of bitter feeling by the English against the Italian element, and those who know the district best apprehend mischief.

16th January 1904 (Hexham Herald)

WEARDALE

The funeral of the unfortunate man John Shipley Barnes who was killed last week by a blasting shot in the Greencroft Whinstone quarry, Stanhope took place at Stanhope cemetery on Sunday.

In 1901, John S. Barnes, single, Blue Granite Quarryman, aged 37, born St Leonards, Gloucestershire, was boarding at Rose Terrace, Stanhope.

30th January 1904 (Hexham Herald)

WEARDALE

A sad sequel to the late quarry accident at Stanhope, the deaf and dumb mute Ralph Harrison of Wearhead who was blown over the quarry edge, but so miraculously escaped with his life has so far as can be ascertained lost his eyesight.

Ralph's job at the quarry was to drill the holes for the shots.

In 1891, at Sedling, Heathery Cleugh, John Harrison, single, limestone quarryman, aged 36, sister Liza 43, sister Mary 46, brother Ralph, single, limestone quarryman, aged 33, deaf & dumb; nephew William Harrison 13, and nephew Joseph Matthew Brown 1 year.

In 1901, at Sedling, Heathery Cleugh, John Harrison, single, lead miner, aged 50, sister Eliza, house maid, domestic, aged 53, brother Ralph, Whinstone quarryman, aged 44, deaf & dumb; and nephew William Harrison, lead miner, aged 23.

In 1911, at Sedling Cottage, Heathery Cleugh, John Harrison, single, stone mason, for district council, aged 60, brother Ralph, no occupation, nephew William Harrison, lead miner, aged 33, his wife Mary May Harrison aged 28, and their son James Matthew Harrison aged 4.

The 1911 census confirmed that following the accident Ralph was now also blind.

13th February 1904 (Hexham Courant)

THE ITALIAN MINERS

On Saturday some 37 Italian miners from Nenthead passed through Alston, took their departure train for Newcastle, and will ship for Italy from the Tyne. It is rumoured that many more are to be sent back, if not almost all, and that the English miners will be more liberally employed. Some miners from the West Allen and contiguous districts, it appears have already been reemployed.

27th February 1904 (Hexham Courant)

Deaths

At Parkside, Allendale, 23rd inst. in his 72nd year, Ridley Nevin *(Farmer)*.

The brother of John Nevin who was agent to W.B. Beaumont's mines in West Allen, son of John Nevin, farmer Burnlow, Allendale & his wife Elizabeth Ridley. See 9th November 1861

19th March 1904 (Hexham Courant)

Deaths

At Bloemfontain, Orange River Colony, 17th February aged 39, W. J. Dixon late of Newcastle and Allendale, son of Edward Dixon, blacksmith, Catton.

23rd March 1904 (Teesdale Mercury)

TEESDALE LEAD MINERS' FUND.

At the requisition of the Chancery Judge, a final meeting of the members of the Lead Miners Fund was held it Middleton-in-Teesdale on Saturday afternoon. A large number of members attended, which included representatives from the Westmorland and Cumberland branches, the Lead Company, who have acted as managers of the concern, having decided to dissolve, wished the members to decide what had to be done with the capital, and it a future meeting it was decided to distribute amongst the members. The Chancery Judge, however, wished for a more thorough decision, and at Saturday's meeting it was decided by 244 rotes to 60 to share the capital.

9th May 1904 (Shields Gazette)

TYNE SALMON BOARD

The quarterly meeting of the River Tyne Salmon Conservancy Board was held on Saturday at the Moot Hall, Newcastle, Ald. Tom Taylor, of Chipchase Castle, presiding. The Clerk read a letter from the Haltwhistle and District Angling Association drawing attention to the pollution of the South Tyne by washings from the Nenthead Mines, and petitioning the Board to put in force the Rivers Pollution Act
The Chairman said their powers were limited in this matter. They had to prove in the first instance that fish were absolutely killed by the pollution, and secondly that the people who put it in did so knowingly; and even then they could not get an injunction. All they could get was a fine. The local powers had much greater jurisdiction.
The letter was referred to the South Tyne Committee.

14th May 1904 (Hexham Herald)

WEARDALE

Two more emigrants for Canada left Stanhope on Wednesday morning. John Bainbridge son of Mr Thomas Bainbridge, Crawley Hall, Stanhope, and Henry Vickers of Eastgate son of Mr John Vickers, White House Lodge. Thos. Bainbridge, Back Lane, Stanhope, has also left for South Africa.

14th May 1904 (Maryport Advertiser)

A CUMBERLAND MINERS' FUND WOUND UP.

In the Chancery Division, on Monday, Mr. Justice Warrington had before him the case of the Lead Companies' Workmen's Fund Society.
It was stated that the Society was founded very many years ago for the benefit of workmen of a lead mining company in Cumberland and Westmorland. Although the fund had in hand £32,915 it was said to be insolvent. It had had no new members since 1899. the Company had ceased to work, and all the employees had been discharged. The members now numbered 439. of whom 88 had attained the age of 65, when by the rules of the Society they were each entitled to receive 6s weekly. The Court was now asked to decide whether the members who had attained the age of 65 were entitled to claim their 6s per week, without regard to the claims of the younger members—in effect that those who were 65 years of age were in the position of first mortgagees.
After bearing evidence and arguments.

His Lordship made an order declaring that the Society ought to be wound up under the direction of the Court, and the interest of all parties beneficially interested in the Society should be ascertained as from 1st May, 1904. and the funds distributed amongst the members of the Society accordingly.
Sir Jonathan Backhouse and Mr. Charles Backhouse, of Darlington, were appointed trustees with the sanction of the Court.
On the Question as to whether the members of the Society who are 65 years of age and upwards are entitled to receive their annuities without deduction, the learned judge decided that such allowances are liable to deductions.

RE LEAD COMPANY'S WORKMEN'S FUND SOCIETY.

Pursuant to a judgement dated 9th May 1904, of the High Court of Justice, Chancery Division, made in the matter of the trusts of the trust funds of the Lead Company's Workmen's Fund Society, and in the action Lowes and another against the Governor and Company for Smelting down Lead with Pit Coal and Sea Coal and others 1904, L. No. 429, whereby the Court declared that the affairs of the Society ought as from the 1st May 1904, to be wound up and that the rights of all parties beneficially interested in the trust funds of the said society ought to be ascertained, and such funds distributed by and under the direction of the Court and whereby it was ordered that a scheme for the division of the said trusts among the parties beneficially interested therein be settled by the Judge and pursuant to an order dated 11th June 1904, whereby the Judge dispensed with service of notice of the said Judgement upon the members of the said society who were not parties to the action, and instead thereof ordered that advertisements be published once in the London Gazette, once in The Times, and twice each in Lloyd's Weekly Newspaper, the Penrith Observer, the Teesdale Mercury, the Darlington and Stockton Times, and the North Star (published at Darlington), giving notice of the said Judgement and of the proposed scheme for the division of the trust moneys and of the date when the same would be settled, and that a copy of the said Judgement and of the proposed scheme be sent by post, prepaid to all such members whose addresses were known to the plaintiff's Solicitors. Notice is hereby given that the Judge has directed that the SCHEME of DISTRIBUTION of the SOCIETY'S FUNDS shall be settled upon the principle of return to the Members of the Society as existing on the 1st May 1904 of their contributions, including fines of admission, but irrespective of fines or payments in respect of sick pay or weekly allowances or other benefits and without interest. And notice is hereby also given, that the scheme for the division of the trust funds among the parties beneficially interested therein will be settled in accordance with such direction, and that Wednesday the 27th day of July, at 2 of the clock in the afternoon at the Chambers of Mr Justice Buckley and Mr Justice Warrington at the Royal Courts of Justice, Strand, London, is appointed for the settlement of the said scheme.

5th July 1904 (London Gazette)

In the Matter of the Companies Acts, 1862 to 1900, and in the Matter of the GREEN HURTH LEAD MINING COMPANY Limited.

NOTICE is hereby given, that a General Meeting of the Members of the above named Company, will be held at 1, St. Nicholas-buildings, Newcastle-on-Tyne, on Tuesday, the 9th day of August, 1904, at 12 noon precisely, to receive the Liquidator’s report showing how the winding up of the Company has been conducted and its property disposed of; to hear any explanation that may be given by the Liquidator, and to pass a resolution as to the disposal of the books, accounts, and other documents of the Company.—Dated this 2nd day of July, 1904.

A. T. WINSHIP, Liquidator.

23 July 1904 (Hexham Courant)

DESTRUCTIVE FIRE AT NENTHEAD
£12,500 OF MACHINERY DESTROYED.

On Monday evening, about Nine o'clock a fire, in comparative small bounds, but destroying or wrecking machinery of the value of £12,500 in half an hour occurred on the works of the Vieille Montagne Zinc Company, at Nenthead, near Alston. One of the dressing floors or houses known as the Rampgill floor situated in the centre of the village, is built of wood with zinc roof, and the machinery inside, the most modern which can be procured for dressing the bouse, blende and barytes consists of engines, crushing mills etc. There is a great deal of woodwork about the machinery, which is more or less saturated with oil, and the cause of the fire is attributed either to the explosion of a lamp, or to oil dripping from it which somehow became ignited. In a few minutes before any effort could be made to cope with the fire, the whole building was ablaze, the machinery wrecked or spoiled owing to the expansive power of the heat, the woodwork reduced to ashes and the zinc roof and glass melted. Mr Rondevelt and Mr Wolfe, the managers were quickly on the scene, as were all the inhabitants of the village, without however, any person being able to check the flames so inflammable was the material, and so quickly did the fire spread. The Company have another dressing room at Wellgill near Nenthead and another at the Brownley Hill mines. Whether the destruction of the Rampgill floor will interfere with the employees does not transpire. The machinery, it is stated is not insured.

9th September 1904 (Sunderland Daily Echo & Shipping Gazette)

DISSOLUTION OF A MINERS
SOCIETY.

Yesterday Barnard Castle was invaded by Teesdale lead-miners, and the scene will be repeated to-day. The occasion was the distribution of the Lead-miners' Fund, the total value of which amounts to £27,643 0s 6d. The history of the fund is interesting. In 1700 or thereabouts the London Lead Company was established by royal charter, and it at one time carried on extensive mining and smelting operations in Teesdale. In 1817 a society was formed for the benefit of the miners, and was named the Lead Company's Workmen's Fund' Society. The company made considerable contributions to the fund during the earlier stages of its existence. It was managed by a general committee, and the rules provided that members attaining the age of 65 were entitled to a pension of 6s a week. This was a first charge on the society, and of late the younger men have taken exception to this. This matter was taken into the Chancery Court, and a claim was made to have the society dissolved and the affair wound up. On May 9th last Mr Justice Warrington gave judgment in the case. He said the evidence was plain that if the society was allowed to go on making the payments it had hitherto made the young members of the society would got nothing. The Court, in his opinion, therefore ought to interfere, and see; that an equitable distribution of the fund was made. His lordship accordingly made an order for the dissolution of the society, and referred the matter to chambers to settle a scheme for payment to each member. That scheme has been completed, and the money is now being paid to the members in alphabetical order. Each member receives a cheque for his amount due. Such cheque, payable, of course, at sight, is drawn upon Messrs Barclay, Bevan, and Co.

10th September 1904 (Cumberland & Westmorland Herald)

DEATH OF A CUMBERLAND MINING ENGINEER

By the death of Captain Francis of Keswick, a well-known figure was on Friday. suddenly called to join the “majority,” and those who were accustomed to see his sturdy figure and receive his genial greeting in the neighbourhood of High Hill will sadly miss him, for “the place that once knew him shall know him no more.” The deceased came into Cumberland from Shropshire more than half a century ago, and from that time, as the subjoined sketch by one who knew him well shows he has up to his death been closely identified with Cumberland lead mining ever since, and we have heard him tell how in the good old days the sum of £70,000 was yielded in a comparatively short time from Goldscope, an old working at the head of the vale of Newlands.

Although verging on ninety years (he would have reached 90 in March), his robust physique led strangers to take him for a much younger man, whilst that impression was strengthened by natural buoyancy of spirit, and the cheery optimism which was so characteristic. A week yesterday he was apparently in his usual health, but in the afternoon he was suddenly seized with apoplexy, and in a couple of hours his spirit quietly passed away.

The funeral took place on Tuesday, his remains being followed to his grave in St. John's Churchyard by a large gathering of mourning relatives, friends, and fellow towns people. Being a Wesleyan in religious conviction, the burial service was conducted by the Rev. W. R. Davidson, the resident Wesleyan minister. The first part of an impressive service was in the Wesleyan Church in Southey-Street. where the body was conveyed. Mr. Waugh, organist of a Liverpool church played “I know' that my Redeemer liveth” as the coffin was conveyed into the Church, and on leaving, the Dead March in “Saul.” The remainder of the brief service took place at the side of the grave, on which between 20 and 30 beautiful wreaths bore testimony to the affection and esteem in which the old gentleman was held.

The following appreciative sketch has been kindly supplied to us by Mr. Anthony Wilson, than whom none knew Captain Francis better.

The death of Captain Francis removes from our midst a landmark in the history of the industry with which he was connected. Bom in 1815. the year of Waterloo he had seen lead and zinc mining in its most successful period and in its time of deepest depression. Capt. Francis often told how his favourite game as a lad was the sinking of miniature shafts and the driving of minute tunnels in some convenient pile of mud, and all his life a ____ was to him an object of supreme interest. He left home about 1830 to make a tour of the lead mines in the country, and spent some years visiting what were at that time famous centres of industry. Unhappily most of these mines are now abandoned and the memory of the good old days is all that remains. Of all the many mines in Shropshire in which he worked but one remains, and in our own district the industry has nearly died a natural death. There are now five lead mines in Cumberland producing say 1000 tons of lead per month worth about £7000. In 1874 there were 24 mines producing over 2000 tons worth £30,000. The average price of lead ore in 1874 was about £15 per ton as against a present value of £7. It will thus be seen that those engaged in lead mining have been faced with extraordinary difficulty, and unfortunately all but the best mines have been abandoned, and out of 294 mines at work in 1874 but 61 survive, and many of these are probably

on the point of bankruptcy. In 1874 the value of lead produced in the kingdom was about £1,150,000, in 1902 it was £224,000.
Captain Francis knew mere about the mines of Cumberland than any other man, and he carries to his grave information that can never he regained. At different times he managed or was connected with all the well-known mines of this district. He was manager for years at Roughtengill. and Goldscope, and it is a constant cause of wonder to his friends that at the age of 80 he had the energy and pluck to take over the underground work at Thornthwaite mines. In 1901 he retired from the management at the urgent request of his family, but until his death he acted as the consulting agent and he was down at the mine only a week before his death.
Those who knew him realised his sterling worth, and his merry laugh will long echo in the onto ears his acquaintances.

William Francis of Caldbeck, married Miss Elizabeth Ann Strong, of Scotch Street, at St Mary's Church, Carlisle, on 14th August 1853.

In 1861, at Fellside, Caldbeck, William Francis, lead & copper mining agent, aged 42, born Bucknell, Radnorshire, his wife Elizabeth A 31, born Sebergham, Cumberland, children, Sarah 13, born Flintshire, John 11, born Keswick, Martha 5, born Caldbeck, William 2, born Caldbeck, and Samuel 6 months.

In 1871, at Rattenrow, Caldbeck, William Francis, lead & coal mine agent, aged 48, his wife Elizabeth A aged 40, children, John, lead miner, aged 21, Martha 15, Mary A. 14, William A 12, Lizzie 8, Adelaide 6, Georgina 4, and Richard H. aged 2.

In 1881, at Thwaite Hill, Thornthwaite, nr Keswick, William Francis, lead mining agent, aged 57, his wife Elizabeth 49, Children, Adelaide 16, Georgina 14, R. Henry 12, Kate 9, and son William A Francis, lead miner, aged 22.

In 1891, at Mold, Flintshire, Wales, William Francis, manager of lead mines, aged 66, his wife Elizabeth Annie 58. and daughter I. Kate, dressmaker, aged 19.

Probable death of Elizabeth Francis 1st qtr 1898 registered at Cockermouth.

In 1901, at 2 Ash Lea Terrace, Keswick, William Francis, widower, mining engineer, aged 82, born Bucknell, Shropshire, and daughter Isabella Kate, lady's maid, aged 28, born Caldbeck.

24th September 1904 (Hexham Herald)

ALSTON

On Monday afternoon, an accident befell a youth named Teasdale of Nentsbury who was employed carting "Black Jack" from the Nenthead mines to Alston. He was in the act of putting on the brake, which is at the back of the cart, as he was at the Townhead when a spring at the front of the cart gave way and the cart body fell back hurting the ankle of the youth.

1st October 1904 (Hexham Herald)

WEARDALE

WEARDALE LEAD COMPANY.

The report of this Company for the year ending June 30, states that 2,314 tons of ore were raised and 2,306 tons dressed and smelted producing 1,810 tons of pig lead. £3,435 had been expended during the year on improvements etc., (including cost of Boltsburn Mill) and £2,846 on exploration and development. The amount brought forward from last year was £3,169, and including the profit

of £341 for the present year there is £3,511 to carry forward. The unsatisfactory feature of the year's working is the falling off in production, which shows a decrease of 261 tons of pig lead compared with the previous year.

8th October 1904 (Hexham Herald)

WEARDALE

WEARDALE LEAD COMPANY ORDINARY GENERAL MEETING

In moving the adoption of the report, the chairman said that they would see from the report that they had not had a satisfactory year. During that time they had only produced 1819 tons of pig lead showing a decrease of 261 tons as compared with last year. The price of lead had fallen less during the year, which had materially affected their profit, and the royalties had decreased owing to the decrease in production, whilst rates and taxes were £100 up. Their new mill at Boltsburn was working well, and that mill gave them great advantage. During the last two months they had been getting into a better source of ore, but the question of water at Boltsburn had been a great trouble. However as soon as they got the water, they would be able to take the broken ore out of the mine. They were driving now in better ground. The profit for the present year was £341 17s 3d.

Deaths

Alston, Church View, 2nd inst. aged 70, Mary widow of Hugh Pattinson.

See 23rd December 1899

18th October 1904 (Shields Daily Gazette)

£600 FOR THE LOSS OF AN ARM

IMPORTANT COMPENSATION CASE

At the Barnard Castle County Court yesterday, before Judge Templer, the London Lead Company, recently carrying on mining operations in Teesdale and Weardale, applied to the Court for permission to redeem the payment of 10s 5d weekly to John Stephen Watson, of Mill, Newbiggin, lead miner. The workman was injured in December 1898, and lost an arm, and since that time he had received 10s 5d a week compensation under the Workmen's Compensation Act. The company now desired to commute the payments.

Mr J. I. Dawson, who appeared for the applicants, submitted that for £400 an annuity could be bought, and the applicants were prepared to do this.

The respondent claimed a capital sum of £756, and on his behalf Mr H. G. Taylor said. We multiply the weekly payment by the expectancy of life, and I ask your Honour to follow the same principle which was followed and affirmed by a strong Court of Appeal in the case of Pattinson v. Stephenson.

His Honour: After all, it is a matter of some doubt, because the man might live less and he might live more.

Mr Taylor: He has never been able to do any work since, and he will never be able to do any work again. The arm does not grow even in this salubrious neighbourhood. (Laughter.)

His Honour: I think it will be necessary for you to prove that the sum you claim is the actuarial value for life.

Mr Dawson: I am willing to buy an annuity for him.

Mr T. M. Barron, solicitor to the respondent, said the respondent was 39 last birthday. The actuarial expectancy for life variously estimated at 26, and the highest at 28.

His Honour: I must always deal with these things as I find them. I think myself it ought to be more than the sum named for an annuity. If you are willing to accept £600 I will give it you. £600 and costs, that is my order. He can then make sure of money.
Mr Dawson asked leave to appeal against the principle involved in this decision.
His Honour: You have a right to do that. You have 21 days.
Judgment was entered accordingly.
Jacob Watson married Phillis Milbourn 1st quarter 1862, registered at Teesdale.
In 1871, at Newbiggin, Middleton, Jacob Watson, lead miner, aged 35, his wife Phillis 35, children, Hannah 9, and John 5.
In 1881, at Mill Newbiggin, Middleton, Jacob Watson, Drainer, aged 46, his wife Phillis 44, and son John, labourer, aged 15.
Phillis Watson died 7th September, and was buried 10th September 1881, aged 45, at St Mary the Virgin, Middleton
In 1891, at Mill Newbiggin, Middleton, Jacob Watson, widower, aged 55, son John, lead miner, aged 25, and servant, Mary Dixon, general servant, aged 36.
John Watson married Elizabeth Watson, 4th quarter 1894, registered at Teesdale.
In 1901, at The Mill, Newbiggin, Jacob Watson, farmer, aged 66, his son John aged 35, and daughter in law, Elizabeth aged 32.
Jacob Watson died 3rd July 1901, aged 66, and was buried at St Mary the Virgin, Middleton.
In 1911, at The Mill, Newbiggin, John Stephenson Watson, small farmer, aged 44, his wife Elizabeth 42, and brother in law Joseph Watson 40.
Possible death of John S Watson, 3rd quarter 1938, aged 72, registered at Durham South Western.

22nd October 1904 (Hexham Herald)

WEARDALE

At the ordinary meeting of the Weardale District Council a resolution was carried to build the new infectious diseases isolation hospital on the site known as Jolly Body site at the top of East Lane, adjoining the moor.
The remains of the late Mr J. V. Walton of Witton Le Wear were interred at that place on Saturday. … Deceased was an employer of labour for many long years in Weardale. In Bollihope and at Frosterley he was well and widely known. He was brother to Mr Joseph Walton MP.

5th November 1904 (Hexham Courant)
Deaths
At Portage la Prairie, Canada, 7th ult. aged 84, Nicholas Carr late of Hay Rake, Allendale, interred on Portage la Prairie, West End cemetery.

5th November 1904 (Hexham Herald)

WEARDALE

The golden wedding of Mr & Mrs Thomas Kidd, who were married in Weardale in 1854 was celebrated on August 22nd at Allendale, Australia. The young couple emigrated in 1857. Many of their old shipmates were present at the reunion and an interesting feature was that Mr George Kidd of Ballarat who was best man at the marriage fifty years ago was present at the jubilee to cut the wedding cake.

19th November 1904 (Hexham Courant)

NORTHERN LEAD MINING

The blue book on the output of the mines and quarries, just issued, gives the detailed report of the production of lead in this district, the totals having been given from the proof sheets. In Durham eight mines have produced 2,681 tons of dressed lead ore last year, the value of the ore at the mines being £17,860. In Northumberland, two mines yielded 332 tons of lead ore valued at £2,000. Cumberland returns 869 tons of lead ore from four mines, all but one in the Alston district. The yield of all three counties is less than that of the previous year.

26th November 1904 (Hexham Herald)

WEARDALE

Thomas Forster, lead miner and farmer, Middlehope, near Westgate, was killed by a fall of stone on Friday in one of the Rookhope lead mines while following his daily avocation. He was interred at Westgate church on Monday and leaves a widow and a large family.

Government Inspectors of Mines Reports
Report of Mr Bain
18th November 1904, Wolfcleugh, Durham, Weardale Lead Co. Ltd.

FATAL ACCIDENT REPORT CONCERNING THE DEATH OF THOMAS FOSTER, AGED 28.

Fall of stone from the side. The stone should have been taken down.
Thomas Forster married Susanna Oliver, baptised 12th November 1792, daughter of George and Ann Oliver

Emerson Forster baptised 1st September 1822, son of Thomas and Susannah Forster.
In 1841, at Rispie, Stanhope, Thomas Forster, lead miner, aged 45, his wife Susan aged 45, children, George, lead miner, aged 20, Emerson, lead miner, aged 15, John, lead miner, aged 15, Ann 14, Thomas 12, Oliver 10, and Ann Oliver, aged 70.
In 1851, at Wolfcleugh, Stanhope, Thomas Forster, lead miner, aged 56, his wife Susanna 58, children, Emerson, lead miner, aged 29, John, lead miner, aged 26, Ann 24, Thomas, lead miner, aged 22, Oliver, lead miner, aged 20, mother in law, Ann Oliver, widow, aged 80, and niece, Elizabeth Dickinson, aged 15.
Thomas Forster died 4th quarter 1852, registered at Weardale
In 1861, at Boltsburn, Stanhope, John Forster, widower, aged 36, his mother Susan Forster, widow, aged 68, and niece, Susan Forster 13.
Susan Forster was buried at Rookhope, 30th May 1864, aged 71.

Emerson Forster married Jane Dixon 2nd quarter 1854, registered at Weardale.
Emerson Forster was buried at Rookhope 19th September 1860, aged 38.
In 1861, at Rookhope, Jane Forster, widow, farmer of 4 acres, aged 34, children, Thomas Dixon, 4, and James Emerson, 2.
In 1871, at Wolfcleugh, Rookhope, Jane Forster, widow, farming 4 acres, aged 43, children Thomas Dixon, lead ore washer, aged 14, James E, ironstone breaker, aged 12, and daughter, Mary J E., aged 5.

Thomas Dixon Forster married Isabella Forster, 23rd June 1877, at Rookhope, Isabella was buried at Rookhope 16th August 1879, aged 29.
In 1881, at Wolf Cleugh, Rookhope, Jane Forster, widow, aged 56, children, Thomas D, widower, lead miner, aged 24, James E, lead smelter, aged 22, and Mary Jane 15.
Jane Forster was buried at Rookhope, 12th April 1882, aged 55.

Thomas Robinson, married Jane Philipson, 6th April 1850, at St Peter's, Allenheads.
In 1851, at Stanhope, Thomas Robinson, lead miner, aged 26, born, Edmundbyers, his wife Jane 24, born, Allendale, and daughter Elizabeth 11 months, born Allendale.
In 1861, at Boltsburn, Rookhope, Thomas Robinson, lead miner, aged 39, his wife Jane, 36, children, Matthew 8, Thompson 10, Jane E 4, and lodger Nicholas Philipson, iron miner, aged 57, born Northumberland.
In 1871, at Chapel Row, Rookhope, Thomas Robinson, Iron miner, aged 51, his wife Jane 46, children, Matthew, iron miner, aged 18, Thompson, iron mine labourer, aged 15, Martha 11, Leah 8, Thomas 5, and Caroline 2.
In 1881, at Stotsfield Burn, Rookhope, Thomas Robinson, farmer of 14 acres, aged 59, his wife Jane aged 56, children, Jane E, aged 24, son, Thomas, lead ore washer, aged 13, daughter, Caroline aged 13, and granddaughter Mary J aged 1.
Thomas Robinson was buried at Rookhope, 26th January 1883, aged 61.
Jane Robinson was living with her son Thomas and his family in 1901, at Middridge, Dhildon, Jane Robinson died, 4th quarter 1906, aged 82, at Weardale.

Thomas Dixon Forster, married Jane Elizabeth Robinson, 4th quarter 1885, at Weardale.
In 1891, at Pasture House, Westgate, Stanhope, Thomas D. Forster, lead miner, aged 34, his wife Jane E., aged 33, children Mary J 11, Edith E 4, Thomas 2, Robinson 1, and mother in law, Jane Robinson, widow, aged 66.
In 1901, at Middlehope, Thomas D Forster, lead miner, aged 45, his wife Jane E. 44, children Mary J. 21, Edith E. 14, Thomas 12, Robinson 11, Cecilia 8, Sarah E 6, and Annie L. 5 years.
Probate 1905: Thomas Dixon Forster of Middslehope Farm, Westgate, Weardale county Durham died 18th November 1904 Administration Durham 16 March to Jane Elizabeth Forster widow. Effects £60.
In 1911, at New Shildon, Jane Elizebeth Forster, widow, aged 54, children Thomas, coal miner, hewer, aged 22, Robinson, coal miner, onsetter, aged 21, and Sarah Elizebeth, domestic servant, aged 16.
Jane E Forster died 3rd quarter 1912, registered, at Auckland, Durham.

3rd December 1904 (Hexham Herald)

WEARDALE

It is the custom of the Weardale Guardians to send all the boys from the workhouse they can to the Navy, but as the cost of maintenance on the ships is 7s 6d per week, and the cost of maintenance in the workhouse is only 4s 6d it was proposed that the Local Government Board be asked to defray the additional cost. A boy was sent recently and another is now ready.

10th December 1904 (Hexham Herald)

WEARDALE

Intelligence has just reached Weardale that Mr George Morley, who left Eastgate, Weardale in the spring of this year for Canada has recently had his farm burned down by a prairie fire. Mr Thomas Stephenson who is also from Weardale had a large haystack destroyed by the same fire.

14th January 1905 (Hexham Herald)

Deaths

Garrigill Post Office, 8th inst. James son of Ann and the late James Vipond.

In 1891, at Garrigill, James Vipond, draper & grocer, aged 59, his wife Ann 50, children Minnie S. 20, Lilian 18, Clara M. 11, and Hilda E. 9. James junior was at Hesley Well Row, West Allendale, listed as an insurance superintendent, aged 26.

In 1901, at Garrigill, Ann Vipond, widow, living on own means, aged 69, children James, grocer & sub postmaster, aged 35, Isabel 27, and Clara M. 21.

St Thomas' Churchyard, Stanhope

Dryburn near Alston, 6th inst. John Vipond.

In 1901, at Cow Byre Farm, Blanchland, John Vipond, farmer, aged 58, born Dryburn, his wife Mary 59, born Rotherhope, children Thomas 28, John Jos. 26, Frances B. 24, Isaac 20, Mary A. 17, and Octavious W. 8.

21st January 1905 (Hexham Courant)

TEESDALE LEAD INDUSTRY

DISTRIBUTION OF THE PROVIDENT FUND

The closing of the London Lead mines in Teasdale necessitated the dissolution of the provident fund established in 1817 in connection with the works. The

Company on its dissolution applied to court for an order as to what should be done with the money accumulated. An order was accordingly made that each living member of the Society should receive the amount he paid in. This has now been done. In September a sum of about £23,000 was disbursed amongst the odd 4300 members. This left a sum, after taxed costs of the suit, bankers charges, medical officers fees etc. had been paid, Messrs Barclay and Co, giving every facilities for the payment in cash of a large portion at Middleton-in-Teesdale and for the payment of the balance at Barnard Castle on Friday. The Teesdale lead industry is now almost a thing of the past.

4th February 1905 (Hexham Herald)

WEARDALE

Both Weardale and Allendale are suffering from an epidemic of influenza few houses escaping. The death of Miss A. Bell of Rookhope took place very suddenly last week. Deceased who was to have been married shortly was a victim to influenza followed by pneumonia.

4th March 1905 (Hexham Herald)

WEARDALE

At the Stanhope Whinstone Quarries, the setters have all received notice on account of slack trade and large stock on hand.
Another batch of Stanhope emigrants is about to set out for Canada this spring. They sail on 4th May. An Eastgate family that of Mr John Philipson, grocer, is leaving for New Zealand also in the spring.
16 people from Stanhope and 1 from Frosterley left for Canada

25th March 1905 (Hexham Herald)

WEARDALE

A fatal accident occurred at the Rookhope Lead mines on Wednesday, 15th inst., whereby a workman named Watson Ward lost his life through a cage accident. He leaves a widow and four children. The funeral on Sunday was a very large one. The widow this week received £10 from the proprietors of the "Auckland Chronicle," he being a reader, and having his name in their assurance book.
In 1871, at Hylton Terrace, Bolts Burn, Joseph Ward, lead smelter, aged 43, his wife Mary A., aged 41, children Elizabeth 14, Watson 11, William 7, Sarah E aged 4.
In 1881, at Bolts Burn Rookhope, Joseph Ward, lead ore smelter, aged 53, his wife Mary A. 51, sons Watson, lead ore smelter, aged 21, and William, lead ore smelter, aged 17. In 1891, at Boltsburn, Joseph Ward, married, lead ore smelter, aged 63; also William Ward, lead ore smelter, aged 27, and his wife Emily 27.
Joseph Ward died 4th quarter 1899, aged 71.

In 1891, at Bolts Burn, Watson Ward, lead smelter, aged 31, his wife Annie (Bell, married 1st quarter of 1888) aged 30, and son Joseph E. 10 months.
In 1901, at Bolts Burn, Watson Ward, lead smelter, aged 41, his wife Annie aged 40, son Joseph Edward 10, daughters Ellen Annie 8, and Sarah Emma aged 5. In 1911, at Rookhope, Annie Ward, widow, aged 50, children Joseph Edward, lead ore dresser, aged 20, Ellen Annie, dairy maid, aged 18, Sarah Emma 15, and Robert William 6.

WEARDALE

There is a big demand for Spar in Weardale just now, and old mines are being opened foe what was once tipped over the rubbish heaps as useless.

22nd April 1905 (Hexham Herald)

GEOLOGICAL DISCOVERY IN NORTH WESTMORLAND

A discovery of great value to geological science has been made at Scardale mines, near Appleby by Mr William Herdman F.G.S., resident manager at the mines. The discovery consists of an entirely new fossil flora from the strata of the Palaeozoic Age, and a fossil mammal of gigantic proportions. Mr Herdman belongs to Weardale and was lead mine agent for over eight years to the London Lead Company at Middleton in Teesdale.

13th May 1905 (Hexham Herald)

WEARDALE

The Spar industry is booming in Weardale and several firms and individual persons are leasing old disused mines in quest of it to send abroad. It is creating a new industry in the dale and funding employment for many.

13th May 1905 (Hexham Courant)

ACOMB

FATALITY AT FALLOWFIELD MINES.

On Wednesday a young man, 19 years of age named George William Cowing living at Acomb whilst following his employment at the Fallowfield lead mines met with a fatal accident. It appears he went down to work at what is known as the “cross cut” about half way down the shaft. On alighting from the cage he signalled it away. Then it is supposed he was in the act of putting a tub on the lines, which had been laid off to the side in disuse, and lifting rather too strongly had overbalanced himself and fallen backwards down the shaft a distance of some seventeen fathoms. When taken up he was quite dead, his head in particular being severely bruised. The sad affair has cast quite a

gloom over the village and district, for he was well known and respected and as he was the main support of his grandmother, the sad event is made additionally painful.
The accident occurred on the 10th May, the Coroner believed after hearing the evidence that he had fallen down the shaft because the entrance to the level was not protected. "It would be a proper recommendation to the management to have the openings properly protected" and he agreed with the suggestion by H.M. Inspector of Mines Mr Atkinson that the protection should be gates not chains.
George was the son of Jane Ann Luke, he was interred at St John Lee.
In 1901, at Acomb, Mary Cowing, widow, aged 59, daughters Mary 29, Margaret, laundress, aged 19, grandson George Cowing, lead & barytes dresser, aged 15, granddaughter A Maud Cowing 7, visitor Jane Ann Luke, aged 33, John Luke 4, and Esther Luke 3.

27th May 1905 (Hexham Herald)

24th June 1905 (West Cumberland Times)

THRELKELD LEAD MINES IN THE MARKET.

Another phase in the history of the Threlkeld Lead Mines was passed on Wednesday, when the whole of the mining plant, machinery, customary land, and buildings were brought under the hammer by Messrs R. Mombeson and Son, auctioneers, Keswick. The mines have not been worked for about two years. The sale took place on the premises, in the presence of a large company. The whole property was first submitted in one lot, and was bid from £200 to £680, with competition between Mr Croasdale (Workington) and another. Eventually the property was disposed of in lots.
Lots 1 and 2, 14 acres 16 perches of land were sold at £140, to Mr W. T. Crosse, Scalebeck. Lot 3. a portion of the Threlkeld Hall big meadow, containing 3a. 2r. 36p., was purchased for £41 by Mr J. W. Pattinson Whitehaven, competition being between that gentleman and Messrs Jno. Young (Keswick) and Reed (Tynemouth). The machinery, sold piecemeal, went for good prices. The property in lots realised together considerably more than was offered tor it when submitted in its entirety. Mr H. H. McKerrell Brown, Edinburgh, was the vendor's solicitor.

MINING DEVELOPMENT IN THE WIGTON UNION.

We understand that in addition to the Brandlingill Lead Mine, on Caldbeck Fells, which was opened out some twelve months ago, and has been worked since for some of the minerals it possesses, the Driggeth Mine, in the same district, is also about to be re-opened and worked. The roads are being put into order, and machinery has been bought. Prospecting has also been going on at Red Gill, above Fellside. Driggeth Mine, which was first opened about the year 1790, is said to have at one time "produced 50 per cent. in lead and 60 ounces of silver to the ton of lead." It was again reopened in 1810, about 500 bings of ore being raised yearly. Eventually it proved a losing concern, and has been closed for over fifty years.

2nd September 1905 (Hexham Herald)

WEARDALE

Mr Wm. Lowery of Guard House, Rookhope died on the 21st ult. in his 77th year and was interred in Rookhope Churchyard on Thursday 24th. The deceased was born at Slaley, Hexhamshire and before coming to Rookhope about 30 years ago as a cartman, for Mr Matthew Simpson was for a number of years carting in Allendale to and from the Lead Smelting Mills of Mr Beaumont. He frequently spoke of the long and often very exposed journeys on the road from Rookhope to Weardale thence to Allendale Smelt Mill and back. He leaves six sons, four daughters, thirty grandchildren and two great grandchildren. His wife pre-deceased him 26 years ago.

AN ALSTON MANS DEATH AT GATESHEAD.

A correspondent writes:—The remains of the late Mr. Utrick Stout were to-day taken to Alston for interment. Deceased was a native; of Garrigill, and was educated in the village school, afterwards finding employment with the London Lead Mining Company during the prospers is times of 50 years ago. He was also intimately associated with the village reading-room; and was quite on authority on the geological strata of Alston Moor. Mr. Stout came to Gateshead about 20 years ago, and has since that time been employed by Messrs Snowball, Son and Co., Ltd., and was held in high esteem both by his employers and also by the employees of the firm. The deceased, who was 70 years of age, leaves a widow, one son, and two daughters to mourn his loss.

In 1851, at Gate, Garrigill, Wm Stout, lead miner, aged 56, his wife Mary (Todd married 24th May 1823, at Alston) aged 50, children John lead, miner, aged 26, Wm, miner, aged 18, and Utrick, miner, aged 15. In 1861, Mary is

listed as a widow (William was buried 22nd May 1859, at St. John, Garrigill), and proprietor of houses.
In 1871, at Garrigill Gate, Utrick Stout, lead miner, aged 35, his wife Hannah (Davidson, married 2nd qtr 1865, at Alston) aged 31, children, William 4, Mary A. 3, and Jane 2.
In 1881, at Garrigill Gate, Mary Stout, lead miners widow, aged 81. Also at Garrigill Gate, Utrick Stout, lead miner & grocer, aged 45, his wife Hannah aged 41, son William aged 12 and daughter Jane aged 12.
In 1891, at 71 & 73 Union Lane, Gateshead, Utrick Stout, drapers porter, aged 55, his wife Hannah 51, children, William, Joiner, aged 24, Mary Ann 23, and Jane, milliner, aged 22.
In 1901, at 2 Woodbine St., Gateshead, Utrick Stout, Drapers porter, aged 65 his wife Hannah 61, children, William, Joiners Clerk, aged 33, Mary A, Draper, aged 32, and Jane, Draper aged 31.
In 1911, at 2 Woodbine St., Gateshead, Hannah Stout, widow, aged 71, children, William, Builder, aged 43, and Jane, milliner & fancy Draper aged 41.

14th October 1905 (Wigton Advertiser)

CALDBECK MINING OPERATION.

Progress has been made by the Caldbeck Mines Company in its preliminary operations, and this week another level is being opened out. This private syndicate, of which Mr. E. F. Goodall is managing director, has acquired, on a thirty years' lease, the mineral rights of Lord Leconfield over an area of close on 50 square miles, in Caldbeck and adjoining parishes, where from time to time lead mining has been pursued for some centuries back.
The Company's operations have up to the present been mainly confined to the Driggeth Mine. The fist level opened out, we are informed, promises results beyond expectations.
Exceptionally lodes of blende ore (used in the making of zinc) have been struck .Lead ore also exists in, it is expected, paying quantities, and a little copper. Redgill Mine has also been opened out and "proved," and the workmen are now engaged on No. 13 Driggeth level. Machinery will shortly be erected.
Satisfactory progress has also been made by the Carrock Mines Company, limited (formed in July last year with a capital of £12,000, of which £9,000 was subscribed). Here wolfram (which is used for steel hardening purposes, and which only exists in this country at this place and in Cornwall) is obtained. At the Carrock Mina about one ten of wolfram is obtained from every 16 tons of quartz, and so far with the temporary machinery employed, about six tons of wolfram (which is worth about £80 per ton) has been prepared for market. Belter plant will be laid down.

14th October 1905 (Hexham Courant)

NENTHEAD VILLAGERS AND FOREIGN WORKMEN
ITALIANS CHARGED WITH RIOTING

The usually quiet village of Nenthead was the seen of a serious disturbance on Saturday night arising out of some foreign workmen employed at the mines molesting some of the villagers. A disturbance took place in 1903 between the villagers and some of the men then employed, and some received rather serious injuries. There seems to have been some little feeling existing ever since this class of men were brought to the place and matters have assumed a somewhat

serious aspect at times. A considerable number of these foreign workmen are now employed and they live in barracks in the village. The disturbance referred to took place on Saturday night between the hours of ten and eleven, and for a time took a serious turn. Anticipating further trouble police were drafted to the village on Sunday and Monday, and the men were brought to Alston where a special court was held. There were seven before the court, and were all Italians. Mr Rodewold and Mr Best, from the Mining Company office acted as interpreters. The charge was one of rioting. The men were informed of the charge, and one of the men stated he was not there at the time. The only evidence taken was that of a young man called Fairless, who stated that he was in the News Room about ten minutes past ten on Saturday night when a number of men rushed into the room some of them brandishing sticks, bottles and knives. A man Jager was there and attempted to quieten them. They all showed violence, and he himself was struck three times. Several others were injured. He saw no provocation, and everyone was frightened. There would be about 20 in all.
The Deputy Constable stated that the men had all been identified by one or more persons, and he asked for the prisoners to be remanded to Carlisle. This was granted. In the meantime the Italian Consul at Newcastle will be consulted by the men.

14th October 1905 (Hexham Herald)

RIOTS AT NENTHEAD

... Two years ago, when alien workmen were first introduced, there were similar disturbances, but matters got quietened down. However native workmen have never taken kindly to their alien competitors, and a strained situation burst last Saturday night, and has continued in a more or less riotous state since. On Saturday night some of the Italian workmen came out of a local public house, presumably under the influence of drink. Some villagers outside picked a quarrel with them, and the trouble developed into quite a riot. A proverbial reign of terror prevailed. During Sunday the Alston Constables sent for assistance, and detachments went out by motorcars from Carlisle, Penrith, and Brampton, under Chief Constable Parry, and Superintendent Graham Carlisle. ...
A batch of seven individuals, who are alleged to have taken a leading part in the fracas have been lodged in Carlisle gaol. They were arrested in the mines on Monday and conveyed to Alston, where they were formally remanded, pending the preparation of evidence against them. Excepting a few serious cuts and bruises, none of the unfortunate victims of the alarming onslaught appear to have sustained much injury.

21st October 1905 (Hexham Courant)

ITALIANS COMMITTED FOR TRIAL

As the result of the serious riot, which occurred at Nenthead, eight young Italians employed at the Nenthead mines appeared before the Magistrates at Alston on Friday morning. One of the men Guilia Jaeger was arrested just at the commencement of Police court proceedings. The others, who had been under remand since Monday, were Battitsa Gimzatte, Francis Maroni, Germano Carzana, Humberto Burgener, Andrea Ruppen, Louis Burgener, and Josef Burgener. The charge was “that they did with divers other persons to the number of three and more unlawfully and riotously assemble to disturb the

public peace, and did make a great riot and disturbance to the terror and alarm of His Majesty's subjects, there being, and against the peace of our Sovereign Lord the King".
The prisoners were defended by Mr G A Lightfoot, Carlisle and an ice-cream vendor named Motroni, from Carlisle, acted as interpreter. The Italian Consul Mr Montaldi was present.
The Deputy Chief Constable, Supt Graham, Carlisle, in opening the case for the prosecution, said that the prisoners were in the employment of a Swiss Mining Company, who had a lease of the Lead and Zinc mines at Nenthead. The disturbance arose through no fault of the natives of the district. About ten o'clock on Saturday night a dozen or more Italians were standing near the Miner's Arms Inn Nenthead apparently sober, when one or two Italians without taking notice of them, passed them and went to the reading room. The prisoners followed, and on the natives coming out of the reading room attacked them with sticks and fists. After that the Italians went to the Board and attacked the Innkeeper, a gamekeeper and an old man named Liddle, all of whom they knocked down and assaulted. Then in the village they attacked every person they thought was an Englishman, keeping up this state of things till midnight. Extra police were drafted into the village after the riot, as the local constable could do nothing at the time but obtained the aid of one of the underground managers in prevailing upon the rioters to go back to home to the barracks in which they lived. Evidence was given by several witnesses, who stated that the Italians attacked and more or less injured them with feet, sticks, fists and bottles.
The case for the prosecution closed at 4 o'clock after a hearing of six hours. Mr Lightfoot the addressed the Bench urging that the case should be dealt with as a common assault.
The Bench committed all the prisoners for trial at the Cumberland Quarter Sessions, except Ruppen and Jaeger, who were discharged.
At the Cumberland Quarter Sessions on Tuesday, the case came up of the six Italian miners charged with committing a riot at Nenthead on October 7th. Mr Montaldi, Italian vice-consul at Newcastle, acted as interpreter. The jury by direction reduced the charge of riot to one of common assault. Four of them pleaded guilty to having committed a common assault and two not guilty. These two were acquitted. One of the four named Gimzatti was fined £2, and the others were ordered to come up for judgment when called upon.

28th October 1905 (Hexham Herald)

WEARDALE

WEARDALE LEAD COMPANY

The profit for the year ending June 30th is £1,747, making with the £3,511 brought forward a disposable balance of £5,258. The directors propose a dividend of 3d per share tax free, leaving £4,034 to carry forward. During the year £429 has been expended on machinery and charged to Capital, while £2,169 has been spent on exploration and development at the various mines and charged against Revenue.

4th November 1905 (Hexham Herald)

WEARDALE

Mr Joseph Craggs and Mrs Craggs of Johannesburg who have been visiting Weardale for a few months left Stanhope this week for South Africa. Mr Craggs went there 16 years ago and under Kruger realised a fortune.

An old Upper Weardale standard has just passed away, Mr Featherstone Peart, Moss.

John Peart baptised 31st January 1789, at Stanhope, parents John and Mary Peart. John Peart married Jane Thompson 14th July 1821, at Stanhope.
In 1841, at Gold Hill, Stanhope, John Peart, lead miner, aged 50, his wife Jane 40, children, John, lead miner, aged 15, Thomas, lead miner, aged 15, Joseph, lead miner, aged 14, Mary 13, Isaac 10, Titus 8, Sarah 5, and Featherstone 2.
In 1851, at Gold Hill, Heathery Cleugh, John Peart, lead miner, aged 62, his wife Jane 50, John, lead miner, aged 28, Mary 22, Isaac, lead miner, aged 19, Titus, lead miner, aged 17, Sarah 15, Featherston, lead miner, aged 12, Robert 9, and nurse child, Ann Peart 1
John Peart died 1st quarter of 1861, at Weardale.
In 1861, at Gold Hill, Heathery Cleugh, Jane Peart, widow, aged 60, sons, Isaac, lead miner, aged 29, Titus, lead miner, aged 27, Featherstone, lead miner, aged 22, Robert, lead miner, aged 19, and boarder, Ann Peart 11.
In 1871, at Gold Hill, Heathery Cleugh, Jane Peart, widow, aged 70, sons, Isaac, lead miner, small farm, aged 39, Titus, lead miner, aged 37, and granddaughter, Ann Peart aged 21.
In 1881, at Lane Head, Heathery Cleugh, Jane Peart, widow, receiving parish relief, aged 82
Jane Peart died 1st quarter 1884, aged 82, at Weardale.
Featherston Peart married Mary Peart 3rd quarter 1861, at Weardale.
In 1871, at Moss, Stanhope, Featherstone Peart, lead miner, aged 32, his wife Mary 33, and sons, William 9, John 6, and Thomas 4.
In 1881, at Moss House, Stanhope, Featherstone Peart, lead miner, aged 42, his wife Mary 42, and sons, John, lead miner, aged 16, Thomas 14, and Henry aged 9.
In 1891, at Moss House, Stanhope, Featherstone Peart, lead miner & farmer, aged 52, his wife Mary 52, and son Henry, lead miner, aged 19.
In 1901, at Moss House, Stanhope, Featherstone Peart, lead miner, aged 62, his wife Mary 62, and granddaughters, Mary E Peart 15, and Clara Peart 12.

Probate 1905: Featherstone Peart of Moss House Cowshill Stanhope county Durham died 23rd October 1905 Administration Durham 23 November to John Peart and Henry Peart farmers and miners. Effects £298 13s 5d.
Mary Peart died 4th quarter 1905, aged 67, at Weardale.

2nd December 1905 (Hexham Herald)

WEARDALE

The death of Mr Richard Bright of St John's Chapel on Saturday morning removes one who was well known throughout the dale as he was for many years landlord of the Kings Arms Inn at St John's Chapel. Prior to that he was landlord of the Cowshill Hotel, and at one time drove the old stagecoach and mail coach between Stanhope and Cowshill. He was a native of Allendale.

23rd December 1905 (Hexham Herald)

WEARDALE

Diphtheria is still rife among the children in Stanhope, principally school children.

A workman named Joseph Adamson while following his daily avocation at Rookhope on Monday, at the Bolts Burn Lead mine suddenly fell and in a few minutes expired.

Robert MacMillan married Elizabeth Snaith, 2nd quarter 1852, registered at Hexham.
In 1861, at Shaw House, Allendale, Robert Macmillan, lead miner, aged 40, his wife Elizabeth 35, children, Hannah 10, Jane 8, John 5, and William 1.
In 1871, at Shaw House, Allendale, Robert Macmillan, lead miner, aged 57, his wife Elizabeth 45, children, Jane 18, John, lead ore washer, aged 15, William 11, Sarah 8, Hugh 5, and Elizabeth 1.
In 1871, Hannah MacMillan aged 29, was working at Hole, St John's Chapel, as a housekeeper, for George Robinson, widowed, lead miner & his family.
In 1881, at Shaw House, Allendale, Robert Macmillan, farmer of 16 acres, aged 61, his wife Elizabeth 56, children, John, lead ore miner, aged 25, Hugh, lead ore washer, aged 14, and Elizabeth 11.
In 1881, Hannah Macmillan aged 30, was working at Sparty Lee, Allendale, as a domestic servant for Thomas Sparke, farmer of 14 acres, aged 39.
In 1891, at Cupel Shaw House, Allendale, Robert Macmillan, farmer, aged 71, his wife Elizabeth 65, children, William, tailor, aged 31, Hugh, lead ore miner, aged 24, and Elizabeth 21.
Robert MacMillan, died 1st quarter 1896, aged 76.
In 1901, Cupela haw, Elizabeth Macmillan, widow, farmer, aged 75, and son William, Ag. lab, aged 41. Elizabeth MacMillan died 2nd quarter 1908, aged 82.

In 1841, at Boltsburn, Rookhope, George Adamson, Innkeeper, aged 30, his wife Mary 30, children, John 3, and Elizabeth 1.
In 1851, at Boltsburn, Rookhope, George Adamson, lead smelter roaster, aged 44, his wife Mary 37, children, John Geo 13, Elizabeth 9, and Joseph 6.
Mary Adamson died 1st quarter 1861.
In 1861, at Chapel Row, Rookhope, George Adamson, widower, lead ore roaster & Beer Retailer, aged 54, children, John G, iron miner, aged 23, Elizabeth, house keeper, aged 20, and Joseph, iron miner, aged 16.
George Adamson died 2nd quarter 1869, aged 62.
Joseph Adamson married Margaret Forster, 3rd quarter 1870, at Weardale
In 1871, at Boltsburn, Rookhope, Joseph Adamson, lead smelter, aged 26, his wife Margaret 24, and brother John G Adamson, iron mine labourer, aged 33.
In 1881, at Hilton, Terrace, Rookhope, Joseph Adamson, lead smelter, aged 36, his wife Margaret 34, children, George 6, Margaret 4, Westgarth 2, and brother, John G. Adamson, lead smelter, aged 42.
Margaret Adamson, died 3rd quarter 1887, aged 40.
Hannah Snaith McMillan married Joseph Adamson 2nd quarter 1888, art Weardale.
In 1891, at Bolts Burn, Rookhope, Joseph Adamson, lead miner, aged 46, his wife Hannah 40, children George, lead ore dresser, aged 16, Margaret F. 14, Westgarth, lead ore dresser, aged 12, John J. 9, James E. 5, Thomas W. 2, daughter in law Lucy E. Macmillan 9, and brother John G Adamson, lead smelter, aged 52.

In 1901, at Bolts Burn, Joseph Adamson, general labourer lead mines, aged 56, his wife Hannah 50, children Westgarth, lead miner, aged 22, John Joseph, lead miner, aged 19, James E., lead ore dresser, aged 15, Thomas Wm. 12, brother John Geo. Adamson, lead ore smelter, aged 63, and stepdaughter Lucy E. MacMillan, schoolmistress aged 19, born Allendale.
In 1911, at Hylton Terrace, Rookhope, Hannah Adamson, widow, aged 60, daughter, Lucy Ellen MacMillan, elementary school teacher, aged 29, and son Thomas William Adamson, labourer at lead mine, aged 22
Hannah Adamson, died 1st quarter 1924, aged 73, at Weardale.

3rd January 1906 (Teesdale Mercury)

LORD BARNARD'S GENEROSITY IN TEESDALE.

Lord Barnard has, with his usual generosity, given to each of the workmen employed by him on the Upper Teesdale estate, a piece of prime Christmas beef, which has been very much appreciated by the recipients. The number of men employed included those engaged in the lead mining trial at Lady rake Mine (15) and in land draining (25) —upwards of ninety in all, so that his Lordship is at the present moment the largest employer of labour in Upper Teesdale, and unfortunately almost the only one. The dales men have also had Christmas and New Year's Day as holiday and in addition we am informed that he has given about £15 worth of Coals to the poor of Middleton.

6th January 1906 (Hexham Herald)

WEARDALE

Diphtheria is still prevalent in Stanhope among children. All schools are closed both Sunday and Day schools. There are upwards of 30 cases now and so far, there has only been two deaths. One adult has it, a schoolteacher.
A clever surgical operation has been performed on a child at Stanhope by Dr Bannerman. It was suffering from diphtheria, and was a dangerous case, but by skilfully inserting a silver tube in the child's throat and producing artificial respiration the danger passed away and the child recovered.

11th January 1906 (Hartlepool Northern Daily Mail)

MINER'S LOST EYESIGHT.

His Honour Stevenson had important case before him at the Penrith County Court yesterday, involving a five hours' hearing. Thomas Graham, a miner employed at the Greenside Mining Company at Patterdale, Ullswater, came before the court under the Workmen's Compensation Act to see what compensation he should receive for totally losing his eyesight while following his employment. The Judge held that the miner was absolutely entitled to half his wages for the rest of his life, the Company having failed prove serious and wilful misconduct, and judgment was entered for the plaintiff for half wages.
In 1891, at Township, Patterdale, John Pattinson, widower, lead miner, aged 64, son in law, Thomas Graham, lead miner, aged 30, daughter, Jane Graham 28, grandchildren, Henry Graham 8, William Graham 6, John Graham 4, and Joe L Graham 10 months.
In 1901, at Township, Patterdale, John Pattinson, widower, lead miner, aged 74, son in law, Thomas Graham, lead miner, aged 40, daughter, Jane Graham 38, grandchildren, Henry Graham, lead miner, aged 18, William Graham, lead

ore washer, aged 16, John Graham, lead ore washer, aged 14, Joseph L Graham 10, Edwin 8, and Elizabeth 3.
In 1911, at High Rake, Glenridding, Thomas Graham aged 50, totally blind, his wife Jane 48, children, Joseph Lawrence, lead miner, aged 20, Edwin, lead ore dresser, aged 18, and Elizabeth 13.

13th January 1906 (Hexham Herald)
Deaths
Quebec, Malton House, 4th inst. aged 57, George Love, son of the late George Love of Wolsingham.

20th January 1906 (Hexham Herald)
WEARDALE
FATAL ACCIDENT
A sad blasting fatality occurred last week at Cowshill, Whinstone Quarry of Messrs Monkhouse and Peart, at Burtreeford in Upper Weardale whereby one man was killed and three others were injured. They were in the act of charging a hole for blasting the rocks, with gelatine when it prematurely exploded. Emerson Bell (aged 36) was got out among the fallen stones dead; Joshua Featherstone was found among the debris with one hand blown off and the other nearly so; Henry Peart and John George English were also injured but not seriously.
At the inquest Henry Peart said he was about 4 yards from the hole when it exploded. They usually put about 15ils to 25 lbs. in a hole. They always used a wood rammer. He could not account for the explosion.
In 1891, at The Hill, Heathery Cleugh, William Bell, farmer, aged 63, his wife Elizabeth 58, son Emerson, lead miner, aged 21, daughter Elizabeth 19, grandson Emerson Bell, lead ore washer, aged 14, and grandson Henry Peart 3 years.
In 1901, the Hill, Heathery Cleugh, Emerson Bell, Whin Stone quarryman, aged 31, his wife Mary A. (Rutherford, married 4th quarter of 1892) aged 29, and son Robert 8 years.
In 1911, at Wearhead, Mary Ann Bell, widow, aged 39, born Nenthead, sons, Robert, farmers son working on farm, aged 18, born, Nenthead, John Henry 9, born Hill, Durham, and niece, Annie Peart, domestic servant, aged 15.

In 1901, at Copt Hill, Wearhead, Joshua Featherstone, Whinstone quarryman, aged 33, his wife Mary (English, married 3rd qtr 1892, at Weardale) aged 32, and son, Lawson 1 year.
In 1911, at Copt Hill, Wearhead, Joshua Featherstone, disabled Whinstone quarryman, aged 43, his wife Mary 42, children, Lawson 11, and Beatrice 8.

17th February 1906 (Hexham Herald)
WEARDALE
The Diphtheria epidemic among children is now abating in Stanhope. There have been over 70 cases but only 3 deaths. The low death rate is attributed to the excellent medical skill Stanhope possesses and the prompt treatment by the new method of injecting a serum preventative of fungoid growth in the throat. The schools after being closed six weeks are now open again.

Deaths
Alston, Orchard House, 10th inst. aged 82, William Pattinson.
In 1901, at Town Foot, Alston, William Pattinson, widow, retired printer, aged 77, and his sister Frances Pattinson, living on own means, aged 71.

24th February 1906 (Hexham Herald)

WEARDALE

The Spar industry is in a flourishing condition in Weardale. There is a great demand for it, and large quantities are being exported from the dale to Inoia (sic), America (*could be Iowa?*), and various parts of the United Kingdom. It is used for refining steel, glazing bricks, enamelling china, and for various other purposes. The quantity in Weardale is practically unlimited. The Great Slitt vein runs right up through Weardale and contains millions of tons of this spar. It is being worked for at Bollihope, near Frosterley, and Westgate, and other places in the dale. ...
The Accident at the Whinstone Quarry, Stanhope, last week is more serious than first appeared. The poor fellow Wm. Fairless has by it lost both his hands one being blown off by the explosion of gelatine, and the other so much injured as to necessitate amputation.
A number of emigrants to Canada leave Weardale at the end of the month.

9th March 1906 (Manchester Courier and Lancashire General Advertiser)

MINES WORKED AT A LOSS
CUMBERLAND COMPANY'S APPEAL.

On Wednesday, in the King's Bench, before the Lord Chief Justice and Justices Ridley and Darling the Attorney-General moved on behalf of the Surveyor of Taxes for a rule nisi calling on the Commissioners of Income Tax in the Leath Ward Division of Cumberland to show cause why a certiorari should not issue to quash a certificate which the Commissioners had granted under section 133 of the Act of 1842 to the Vielle Montaigne Zinc Company Limited, a foreign company which had lead and zinc mines in Cumberland.
It was stated that the company had paid the assessment in 1904 and 1905 without demur or appeal, but a few months ago the company applied for the return of the money on the ground that the mines had been worked at a lose. The Commissioners had granted a certificate for the return of the money paid without going into the accounts submitted by the company. The Commissioners had taken the view that the mines should not have been assessed to income tax at all, as the products were not put on the English market.
Their Lordships granted a rule nisi.

WEARDALE

While some workmen were busy in an old mine at Westgate in Upper Weardale they had a narrow escape of being buried alive. The roof suddenly fell in covering them up. All the men were able to struggle out, but a young fellow

named Coulthard, living at Dale Head Farm was rather seriously injured and sustained a fractured leg.

28th April 1906 (Hexham Herald)

ALSTON

On Monday morning, a very sad accident occurred at Alston and Nentforce Quarry Co's works at Alston to a workman named Wm. Stokoe. He was engaged on the top of the quarry baring the soil and by some means slipped and fell over the edge to the ground below a distance of 50 feet. The ground was covered with loose stones. He received some terrible injuries and was removed top his home at Spency Cottage where he was attended to by Dr Carson.

Edward Stokoe married Elizabeth Edgar, 2nd quarter 1840, registered at Hexham

In 1841, at Welhope, Edward Stokoe, lead miner, aged 25, his wife Elizabeth 30, son Edward 1; and David Edgar 15, Utrick Edgar 13, and Ann Edgar 10.

In 1851, at Wellhope, Allendale, Edward Stokoe, lead miner, aged 34, his wife Elizabeth, aged 44, children, Edward, lead ore washer, aged 11, Isabella 9, and Mary Jane 6.

In 1861, at Welhope, Ninebanks, Allendale, Edward Stokoe, Shepherd and farmer of 18 acres, aged 44, born Haltwhistle, his wife Elizabeth, 45, born Allendale, children, Mary Jane 16, and William J 3.

Edward Stokoe died 2nd quarter of 1861 or 1862

In 1871, at New Shield, Alston, Elizabeth Stokoe, farm labourer, aged 55, and her son William, farm labourer, aged 13, born Welhope.

In 1881, at Front Street, Alston, Elizabeth Stokoe, lead miners widow, aged 65, and her son William, general labourer, aged 23.

In 1891, at Front Street, Alston, Elizabeth Stokoe, widow, aged 75, and her son William, general labourer, aged 33.

Elizabeth Stokoe, died 3rd quarter 1897, aged 82, at Alston.

Possible marriage for William James Stokoe to Annie Hounam, 4th quarter 1897, registered at Newcastle. Annie born 1863, daughter of David & Elizabeth Hounam, was living in Benwell, Newcastle in 1891, her father working as a coal miner, in 1881, they were living at Front Street Alston.

In 1901, at Spency Cottage, Garrigill, William Stokoe, limestone quarryman, aged 43, and his wife Annie aged 38, born Alston.

William Stokoe died 2nd quarter 1906, aged 48.

In 1911, at the Market Place, Alston, Annie Stokoe, widow, grocer, aged 48.

Probate 1906: William James Stokoe, of Spency Croft Cottage, Alston died 25th April 1906 Administration Carlisle 18 May to Annie Stokoe widow. Effects £41 2s 11d.

22nd May 1906)Penrith Observer)

THRELKELD LEAD MINES

Considerable activity has been noticed at the Threlkeld lead mines since the mine was cleared of water in the autumn, and the bottom levels have been driven long distances in the vein, the owners finding paying quantities of ore. The result has been the finding of long continuous lengths which are being opened into sections for stopping. The owners are laying down the latest plant for dealing with the finest ore.

WEARDALE
Weardale Lead Company. For the 3 weeks ending June being the completion of the financial year the returns are: - Ore raised 231 tons, pig lead smelted 192 tons. Average price for lead sold £16 6s 3d per ton, not including slag and fume lead.

1st August 1906 (Teesdale Mercury)
NEW LEAD-MINING VENTURE IN TEESDALE.
Facts Concerning the Recently Formed Company.
Fresh Lease Granted by Lord Barnard.
Quite naturally the inhabitants of Teesdale are gratified and even elated at the prospect of better times in the lead industry, and it is therefore of importance that the situation as it exists should be accurately placed before the public, and more especially as statements of a more or less misleading character have been made as to recent developments.
When the old London Lead Company relinquished their lenses in 1893 owing to the very low price of lead at that time, it looked as though a crisis had arisen, and that matters were going to be very bad for the dales people.
It was, indeed, ominous when such old and experienced lead-workers as the London Company absolutely declined to continue their operations, although they were given the opportunity of doing so practically on their own terms as to rent or royalty; and, when it became definitely known that they had determined to clear out of Teesdale as lead explorers and smelters, it appeared as if the whole of the mines would become derelict and dismantled.
But, at this juncture—certainly a critical epoch in the history of Teesdale, Lord Barnard stepped in, and, had it not been for his lord-ship's timely interposition, the worst fears might have been realised. Entirely for the sake of the people of the district, and with the hope solely of finding employment for the inhabitants, the Lord of Raby purchased, at considerable expense, the mining plant at Lady rake, Cold berry and Wiregill Mines,
In addition to doing that he has himself worked the Lady rake royalty since the London Lead Company relinquished it; and this, again, for the sole purpose of finding employment for the men in the upper part of Harwood, and without any profit to himself. On the contrary Lord Barnard has actually lost money.
The new company, recently formed, have been registered under the title of “The Teesdale Lead and Zinc Mines (Limited)," and the shareholders have acquired a lease from Lord Barnard of the royalties at Willey Hole, Green Hill, Ashgill Head, Dirt Pit and Coldberry, and they commenced actual operations on Monday, the 16th of July last. The registered offices of the company arc at 96, Bishopgate Street Without, London, E.C.

It is understood that the new company will conduct mining operations on a fairly large scale, and that they propose to employ a considerable number of men and boys, although, owing to the free and easy terms on which the royalties have been based, Lord Barnard does not and cannot hope to receive much pecuniary benefit from the new leases.
At the same time it must be a source of gratification to the Lord of the Manor to know that the capital which in his generosity he advanced has been the means of saving this ancient industry, and of bringing, as we all hope, new prosperity to the dale.
As far as we can gather, and our information is from undeniable authority, the old company has really nothing whatever to do with the new undertaking. Meanwhile the Wiregill Company has been working quietly and steadily, and, as the whole question of lead-mining in Teesdale stands, at present, the outlook is manifestly hopeful. …

4th August 1906 (Hexham Herald)

WEARDALE

For the four weeks ending the 28th July, the ore raised by the Weardale Lead Company weighed 223 tons, and over 60 tons of pig lead were smelted. It is officially intimated that operations were considerably retarded by many of the men being away harvesting. The smelt mill was stopped from the 1st to the 21st July for annual overhauling.

18th August 1906 (Hexham Herald)

WEARDALE

WEARDALE LEAD COMPANY ORDINARY GENERAL MEETING.

... the Chairman said that the results of the past year's working had been very satisfactory. The results had been achieved not only by the increased price per ton obtained for lead of £15 12s 1d, as against £12 17s 4d the previous year, but also by the considerably increased output from the mines. During the year they had raised 3,255 tons of ore, dressed 3,264 tons, smelted 3,192 tons, producing 2,370 tons of pig lead. This was an increased production of 1,059 tons raised, 1,074 tons dressed, 1,006 tons smelted, and 679 tons of pig lead upon the previous year. There was also an increase of £1,185 in rent and royalties. The Board recommended that a dividend of 9d per share be paid forthwith making 1s 6d per share free of income tax, or 10 per cent for the year. They also proposed paying a further dividend of 2s per share, and making calls to the same amount, which would leave a balance of £2,539 18s 11d to be carried forward to the next account.

8th September 1906 (Hexham Courant)

ALLENDALE NOTES

The annual report just issued of the Weardale Lead Company, is of more than passing interest to those who remember Allendale, not merely as a farming district or a health resort, but as an important centre of the lead mining industry. Is there hope of a revival in the lead trade, or is there rather not already a revival? Leaving this question to the experts, it is interesting to find the output of Rookhope lead mines during the last financial year was 3,255 tons of lead ore, being an increase of 1,059 tons compared with the previous years working. More striking however is the increase in price of lead during this period. Lead

which at the beginning of the year was £12 18s 4d per ton had risen to £15 12s 1d at the end, an increase of 17 percent. Owing to the increased demand, lead, in common with copper and iron, is still on the rise, and the price of English pig lead today, to use the language of the stock exchange is “round about” £17 15s per ton. At Boltsburn, the principle mine of the Weardale Lead Company, 32 workings have been going for some time, and these can still produce 50 cwts. of ore to the fathom. The nett result of the years workings of the mines was a profit of £15,641.

8th September 1906 (Wigton Advertiser)

CALDBECK MINING VENTURE:
THE SYNDICATE SUED FOR WAGES.

Eight miners who have been employed in the lead: mines in Caldbeck Fells, re-opened some time ago by the Caldbeck Mining Syndicate, sued F. Goodall, Braefell, Poplar Avenue, Birmingham, for wages due, and each also claimed £1 damages for breach of contract. The amounts of wages claimed were:—Isaac Milburn, Causeway head, Caldbeck, £1 16s 8d; John Yeomans, Upton, £2 0s 4d; Robert Newton, Midtown, £2 10s; Thomas Milburn, Causeway head, 15s 2d; Thomas Sewell, Caldbeck, £2 0s 4d; William Peel, Upton, £2; John Noddle, Upton, £3; and Joseph Jackson, Caldbeck, £3.

Mr. Jos. Hetherington was for plaintiff, and Mr. J. W. Crookes for the defence.

Mr. Hetherington applied for the names of four gentlemen who really comprised the Caldbeck Mining Syndicate to be added to the case as defendants along with Mr. Goodall.

Mr. Crookes said that particulars had just been sent from Birmingham. It appeared that the Caldbeck mines were now being worked by a syndicate, which consisted of Mr. Goodall and four other gentlemen—Mr. Frederick Bohem, London; Mr. Thomas Edward Sylvester, Birmingham; Mr. J. H. Hallwright, Birmingham, and Mr. J. H. Heap, London.

The four gentlemen named were accordingly added to the case as defendants.

Mr. Hetherington said the claim for wages was admitted, but the claim for damages for breach of contract was contested. The miners were engaged to work at a weekly wage—some at 22s and some at £1. The arrangement was that they should be paid weekly. On Easter Saturday, however, there was no money for them, but they worked for something like three weeks without getting any wages, and then they left. They were not dismissed: they were not exactly told to go about their business, but had either to go on working and live on nothing, or leave and look for some other work. They chose the latter alternative, and now claimed damages for breach of contract.

Mr. Crookes contended that Mr. Hetherington had not made out a case. If the men were not paid their wages they had a civil remedy; but, having left their work without notice, they could not now succeed in a claim for breach of contract.

Mr. Hetherington said he would put one of the miners in the box to prove that he could not live on nothing. They claimed damages on the point that, the men were forced to go away and work elsewhere.

The Clerk: I am afraid I never heard of such a case.

Mr. Hetherington: No, it is not often that masters do not pay their employees’ wages.

Mr. Crookes said the wages would have been paid had it not been for the damages claimed for breach of contract.
Mr. Hetherington: They had from Easter Saturday to July to pay before damages were claimed.
Mr. Crookes said the defendants did not contend that the miners were not entitled to the money they had worked for, but that, having left of their own accord, they were not entitled to damages for breach of contract.
The Chairman said they had decided to refer the point of law to the Clerk.
The Magistrates' Clerk said he would consider it.

22nd September 1906 (Wigton Advertiser)

THE CALDBECK MINES CASE.
INTERESTING POINT DECIDED.

The Clerk now gave his decision in the cases under the Employers and Workmen Act brought at the lest Court by eight Caldbeck miners who had been employed in the lead mines, and who sued their late employers, the Caldbeck Mining Syndicate, to recover the balance of wages due and also claimed £1 each damages for breach of contract.
Mr. Hetherington was for plaintiffs and Mr. Crookes for defendants.
The point raised at the last Court, when the cases were first brought, was whether the defendants could recover damages for breach of contract when they had voluntarily left their employment on not receiving their wages.
The Clerk now said he was of opinion that the men were only entitled to the balance of wages due and not entitled to damages; and the order of the Court would be for the balance of wages in each case and costs.
Mr. Crookes asked how the costs would be arrived at. The cases could have been taken in one joint summons.
After an argument, in which Mr. Hetherington joined, the Clerk stated that the order must stand as to the costs, the solicitor's costs being two guineas for the whole lot.
Mr. Hetherington asked for an order for payment within a week, and in default of payment distress to issue. He said he had reasons for making an application of that kind.
The Clerk: You don't object, Mr. Crookes ?
Mr. Crookes: No—I shan't be there.
The required order was made.

6th October 1906, Mine Inspectors Reports (Source: Durham Mining Museum)

THRELKELD MINE (LEAD ORE & ZINC)
FLETCHER WREN, AGED 66, MINER, KILLED BY SHOT
Fletcher Wren, aged 66, Miner, killed by shot

Deceased, who was an experienced miner, 66 years of age, having charged a hole with 2½ cartridges of gelignite, placed a short piece of lighted candle under the fuse, and turned to leave the working. He had only to travel 2 or 3 yards to get to a place of safety, but when he reached the corner of the working he looked back, and observing the place to be in darkness he said to his mate, "Its gone out" (meaning the candle had gone out), and he turned back with the object of relighting it. He had just reached the face when the shot exploded. The fuse had of course run properly and if deceased had waited a couple of minutes before

returning to the working the accident would have been avoided. The special rules in force at this mine provide that in the event of a shot missing fire no person shall enter that working place until the lapse of an hour. In this case (and I have had a similar experience in many non-fatal cases) the workmen evidently did not consider it a miss-fire. Miners as a rule interpret a miss-fire to mean a case where the fuse is known to fire but fails to detonate the explosive. This is a very limited application, and it cannot be too emphatically laid down that once an attempt has been made to light the fuse, and the men have left the working, if from any cause the shot fails to explode, it becomes a case of miss-fire and must be treated as such.

10th October 1906 (West Cumberland Times)

SAD BLASTING ACCIDENT AT THRELKELD MINES.

Just before mid-day on Saturday an alarming accident occurred at the Woodend Lead Mines, situate at Gate Ghyll, Threlkeld, and an elderly man named Fletcher Wren received most terrible injuries. With another workman named William Rea, the unfortunate man was engaged in one of the connective workings of the shaft known as a “rise," and it appears that about the time mentioned a number of charges had been prepared for blasting. After igniting fuses the men left the working in the usual way for safety. It seems, however, that one charge was supposed to have misfired, and after a short interval Wren had returned to investigate. Before discovering the danger the charge exploded in front of him, infliction shocking injuries. His right hand was terribly shattered and almost turn off above the wrist. The left arm and chest bore large wounds, and the face was lacerated so severely that the poor man was almost beyond recognition. His co-worker, Rea, and another miner named Hind had a most trying task in conveying their helpless comrade through a hazardous course to the bottom of the shaft having at times to crawl through narrow spaces and frequently lower their burden down ladders by means of a rope round his body. On the arrival at the top of the abaft, where a number of willing hands had assembled, the staff made every possible arrangement for the removal of the unfortunate man to his home The district nurse (Miss Caulfield) was promptly on the spot, and spared no effort to alleviate the man's terrible suffering pending the arrival of a doctor from Keswick. After first aid, an ambulance was formed, and Wren was removed to Guard House (1½ miles distant), where he occupied a small farm, and immediately upon his arrival there Dr Smaile was on the spot from Keswick. Later he found it necessary to have the man removed to Carlisle Infirmary by the afternoon train, a band a willing hands assisting in this course. News of the man's death, which took place on Sunday, reached Threlkeld on Monday morning, and great sympathy is felt in the locality for the sorrowing widow and relatives.

In 1851, at Seatoller, Borrowdale, Isaac Wren, farmer of 19 acres, aged 40, his wife Sarah 35, children, Susannah 12, Fletcher 10, Joseph 6, and Betsy 3.

In 1861, at Chapel, Crosthwaite, near Keswick, Daniel Jopson, farmer of 70 acres, aged 33, his wife Mary 27, daughter Elizabeth 2 months, and servant, Fletcher Wren, carter, aged 20.

Fletcher Wren married Sarah Simpson 2nd quarter 1869, registered at Penrith.

In 1871, at Stonethwaite, Borrowdale, Fletcher Wren, slate quarryman, aged 31, and his wife Sarah aged 34.

In 1881, at Stonethwaite, Borrowdale, Fletcher Wren, slate quarryman, aged 40, his wife Sarah 44, and nephew, Joseph Wren Simpson 10.
In 1891, at Mockerin, Loweswater, Fletcher Wren, farmer, aged 50, his wife Sarah 54, and nephew, Joseph W Simpson, farmers assistant, aged 20.
Sarah Wren died 20th April 1895, aged 58, and was buried at Borrowdale church.
Fletcher Wren married Mary Hodgson 3rd quarter 1896, registered at Cockermouth.
In 1901, at Stonethwaite, Borrowdale, Fletcher Wren, farmer, aged 60, and his wife Mary 42, step daughter Aime Hodgson 8, and nephew Joseph Wren Simpson, stone quarryman, aged 30.

Deaths
Stanhope Newlandside Hall, 8th inst. aged 54 Wm. Vipond, farmer.
Killed at Newlandside Quarry by falling over the quarry face whilst working as a quarryman.

Matthew Vipond son of Thomas and Sarah (daughter of Robert & Elizabeth Hetherington) Vipond, born 8th August 1816, baptised 5th September 1818, at Garrigill Wesleyan Chapel.
Matthew Vipond married Elizabeth Rain, 1st quarter of 1840.
In 1841, at Loaning Head, Garrigill, Matthew Vipond, lead miner, aged 20, his wife Elizabeth, 25, children, Hannah (Rain) 4, Winskell (Rain), 4, and Thomas 5 months.
In 1851, at Cowper Dike Heads, Garrigill, Matthew Vipond, lead miner, aged 34, his wife Elizabeth, 40, children, Hannah 14, Winskell, 14, ~~Elizabeth ,~~ Thomas 10, Ann 8, Mary 6, John 3 wks.
In 1861, at High Shield Hill, Garrigill, Matthew Vipond, lead miner, aged 44, his wife Elizabeth, 50, children, Thomas, lead miner, aged 21, Ann 18, Mary 16, John 12, William 9, and Matthew 7.
In 1871, at Loaning Head, Garrigill, Matthew Vipond, lead miner, aged 52, his wife Elizabeth 61, children, Mary 26, William, lead miner, aged 21, Matthew, lead miner, aged 17, and grandson, Joseph 2.
Matthew Vipond died 1st quarter 1875, aged 58, registered at Weardale
Elizabeth died 2nd quarter 1874, aged 64, at West Ward, Westmorland, or 1st quarter 1880, registered at Weardale

William Vipond married Fanny Walton, 1st quarter 1877, registered at Weardale.
In 1881, at Greenhead, Weardale, William Vipond, quarryman, aged 28, his wife Fanny 24, brothers Matthew, quarryman, Joseph 12, and niece Amey Forster aged 5.
In 1891, at Newlandside Hall, Stanhope, William Vipond, limestone quarryman, aged 36, born Garrigill, his wife Fanny aged 34, and son James aged 2.
In 1901, at Newlandside Hall, William Vipond, limestone quarryman, aged 48, and his wife Fanny aged 44.

EXPLOSION IN A LEAD MINE

FOUR WORKMEN INJURED

Yesterday four lead miners were badly burned about the face and head at Lipton Lead Mine, near Allenheads. The men had just entered the Level when an

explosion took place. An explosion of gas has been of rare occurrence in the lead mines of Allendale and Weardale. The names of the injured men are Phillipson, Pearson, Bright and Sanderson.

2nd February 1907 (Hexham Courant)

ALLENDALE

LEAD MINE EXPLOSION. FOUR MEN INJURED.

On Monday four miners were severely burnt about the face and head at Sipton Lead Mine near Allendale. It seems that the men had just entered the level when an explosion took place. It is surmised that there had been an accumulation of gas during the weekend. An explosion due to gas has been of rare occurrence in Allendale and Weardale lead mines. The names of the men hurt are William Phillipson, James Pearson, William Bright, and Thomas Sanderson. The men were all severely burnt. The explosion must have been severe as it lifted the wagons off the rails and threw the men partly under the wagons. The reports were heard by people a mile away. Two men at the shaft bottom were nearly lifted from their feet, the shock being so great a mile away. It is believed to be over thirty years since there was a slight explosion at the above place. It is not often that we hear of explosions in lead mines. They are a rare occurrence. It is surmised it must have been fire damp. We have read of it being in the Welsh lead mines, and also in the Cleveland ironstone mines.

9th February 1907 (Hexham Herald)

Deaths

Carrshield, 1st inst. (suddenly) aged 59, William dearly beloved husband of Elizabeth Liddell of Red Haugh, West Allendale.

In 1901, at Mount Pleasant, William Liddell, shepherd, aged 53, his wife Elizabeth 44, children Christopher, blacksmith, aged 27, William, postman, aged 18, Mary, Ellen 12, Jane Ann 10, Anthony 8, Florance 6, and Louisa 3.

23rd February 1907 (Hexham Herald)

WEARDALE

A presentation was made at Stanhope on Tuesday night by the public to Mr John Douglas a young man who is totally blind having lost his eyesight through a quarry accident. It consisted of 39 volumes of the bible in raised type, suitable to the blind. Accompanied with the bible was a purse of gold.

Deaths

Hunstanworth, 14th inst. aged 13, Joseph Stephen beloved son of John and Elizabeth Hannah Westgarth.

In 1901, at Hunstanworth Village, John Westgarth, estate mason, aged 38, his wife Elizabeth 33, children Willie, masons apprentice, aged 15, John H 12, Joseph S 7, James W 6, and Florence 3.

17th May 1907 (Durham County Advertiser)
MINING ACCIDENT. —An accident of a serious nature occurred on the 8th day of July, 1724, to four men who were working at the Western-hope Lead Mine. About ten o'clock in the morning of the above named day, the four miners broke through into some old workings, with the expectation of getting ore; but, to their dismay, a large quantity of water which had collected in the old workings broke suddenly in upon them. One of the miners was carried several yards down the drift, and up a "sump." 42 feet, and was thus saved, the other three were drowned, viz., George Whitfield, aged 50 years, the son of Jonathan Dobinson, aged 20 years; and George Bainbridge, of Westernhopeburn, aged 20 years.

18th May 1907 (Hexham Herald)
WEARDALE
A sad fatality occurred on Tuesday morning at the Fine Burn Limestone quarry, of Messrs Spencer, Frosterley, whereby a young man George Arthur Johnson (19) was blown to pieces by an explosion of gelatine. He was clerk at the quarry where it was part of his duty to daily hand out explosives to the quarryman, as required by them for blasting purposes. He was in the storeroom when the explosion took place but how it happened there is no one to tell. It is supposed he let one of the pieces fall to the floor, which would then explode as they are fired by concussion.
In 1891, at Frosterley, John Wm Johnson, limestone quarryman, aged 27, his wife Annie (Johnson, married 3rd quarter of 1887) aged 26 (died 3rd quarter of 1891, aged 27), children George Arthur 2, Esther Ann 5 months.
John Wm Johnson remarried as the 1901 census shows.
In 1901, at Frosterley, John William Johnson, limestone quarryman, aged 37 Lily (Rippon, married 1st quarter of 1898) aged 22, children John William 2, Gilbert 9 months, and niece Eliza Jane Walton 9 years.
In 1901, at Frosterley, Charles Johnson, limestone quarryman, aged 61, his wife Mary Ann 56, children Jane, dressmaker, aged 35, Ralph, limestone quarryman, aged 21, Burnip, limestone quarryman, aged 17, grandson George Arthur Johnson 12, granddaughter Esther Ann Johnson 10, and nephew William Johnson 31.

25th May 1907 (Morpeth Herald)
METALLIFEROUS MINES
There were 104 mines under the Metalliferous Mines Regulation Arts in operation in the district during 1906, employing a total of 5,736 male's below ground and 2,461 males and 2 females above ground and from these a total of 1,750,679 tons of metal were secured, 1,680,034 tons being iron ore, 36,511

tons gypsum. 11,464 tons Zinc ore, 9,250 tons barytes, 3.838 tons lead ore, 1,980 tons limestone, 1,615 tons sand. 300 tons Whinstone, 179 tons copper ore, and 18 tons wolfram. A net increase of 41,302 tons on the output of the previous year is indicated by the above total. Iron ore is chiefly responsible for the improvement as gypsum, lead ore, zinc ore, and slate show reductions. The improvement in the iron trade mentioned last year has continued, and at the end of the year 1906 has probably seen better prices ruling for iron ore than at any period since the "good times" of the early seventies. This is reflected by an increase of 558 in the number of persons employed at these mines and an output, improved to the extent of 42,186 tons. Six fatal accidents caused as many deaths. All except one occurred underground. Four of the accidents occurred at iron ore mines in Cumberland, one was the surface accident at an iron ore mine in Lancashire and the remaining case was at a lead and lead and zinc ore mine in Cumberland. The death rate from accidents per 1,000 persons employed in the metal mines during 1906 was 0.87 below and above ground.

22nd June 1907 (Hexham Herald)

WEARDALE

A sad accident occurred on Monday in the Stanhope Burn Lead mine to a man named George Maddison of Daddry Shields, Upper Weardale, by a fall of stone in the mine. He was severely injured about his shoulders and back and lies in a precarious state.

John Maddison married Elizabeth Armstrong 1st quarter 1868, at Weardale.
In 1871, at Burnfoot, St John's, Stanhope, John Maddison, Iron stone miner, aged 28, his wife Elizabeth 28, and son John 3.
In 1881, at Daddry Shield, John Maddison, iron stone miner, aged 39, his wife Elizabeth 39, children, John 13, Thomas 9, Jane Ann 7, Charles , George 4, Frances 2,
In 1891, at Daddry Shield, John Maddison, iron stone miner, aged 49, his wife Elizabeth 49, children, John, iron stone miner, aged 23, Thomas, iron stone miner, aged 19, Jane 17, Charles, lead washer, aged 16, George 14, Frances A 11, and James 9.
In 1901, at Daddry Shield, John Maddison, lead miner, aged 59, his wife Elizabeth 59, children, Charles, lead miner, aged 26, George, lead miner, aged 24, Frances A 21, and James, limestone quarryman, aged 18.

George Featherstone Maddison died 4th quarter 1908, aged 32, at Weardale.

John Maddison, died 3rd quarter 1910, aged 67.
In 1911, at Daddry Shield, Elizabeth Maddison, widow, aged 68, children, Charles William, lead miner for Weardale Lead Co, aged 36, Frances Alice 31, and James, lead miner for Weardale Lead Co, aged 28.
Elizabeth Maddison died 1st quarter 1917, aged 74.

27th July 1907 (Hexham Herald)

WEARDALE

A man named Robert Dawson was rather seriously injured about the head at the Rogerley Quarry, Frosterley on Tuesday afternoon by stone falling upon him. Another quarryman George Cave was also hurt at the same time.

3rd August 1907 (Hexham Herald)

WEARDALE

DEATH OF MR J. W. RODDAM

The death occurred at Scarborough on Tuesday of Mr John Watson Roddam, J.P. of Stanhope. The deceased gentleman, who was 55 years of age, was one of the most respected public men in the County of Durham. He was a coal owner, and managing director of three companies, East Pontop Coal Company, Ltd., West Durham and Wallsend Coal Co. Lt., and Shildon Coal Co. Ltd. He had been staying with his family for ten weeks in Scarborough, and death followed an operation for cancer. He leaves a widow two daughters and one son. Mr Roddam was born at New Town Villa, Stanhope, in 1852. His father was the late John Joseph Roddam.

In 1881, at New Town, Stanhope, John Watson Roddam, land agent, aged 29, his wife Annie (Cain, married 16th January 1875, St John's Chapel) aged 31, born Alston, son George 4, daughter Edith Cain 2, domestic servants Elizabeth Robinson 21, and Mary Bainbridge 17.

In 1891, at New Town, Stanhope, John W Roddam, land agent, and secretary of the Shildon Coal Co., and East Pontop Coal Co., aged 39, his wife Annie 41, daughters, Edith C 12, Lilian 4, and cook Jane Rutherford 35, and house maid Kirzia Elizth Hird 25.

In 1901, at New Town, Stanhope, John W. Roddam, secretary to coal co.'s and land agent, aged 49, his wife Annie 51, son George Pears, colliery cashier, aged 24, daughters, Edith Cain 22, Lilian 14, and domestic servant, Hannah Bell 30.

In 1911, at New Town, Stanhope, George Pears Roddam, managing director, colliery Companies, aged 34, his wife Lizzie (Ismay, married 4th quarter of 1909, at Weardale) aged 29, daughter Dorothy Jenney 7 months, cook Lucy Foster 56, domestic servant, Isabel Smith 36, and nurse, domestic, Jane Foster 18.

See 13th March 1867, 13th July 1872, and 23rd January 1875.

AT FROSTERLEY this week an octogenarian has passed away in the person of Mrs Waller a respected old lady who had been living with her son Mr Joseph Waller at Lea Side Quarry, manager for Messrs Pease and partners.

10th August 1907 (Hexham Herald)

WEARDALE

LEAD COMPANY DIRECTORS REPORT

... during the year ending 30th June last, 4,331 tons of ore had been raised, 4,346 tons dressed, and 4,306 tons smelted, producing 3,230 tons of pig lead, which on sale realised an average of £19 0s 9d per ton. The available profit, including £2,039 brought forward was £32,233. Deducting the interim dividends already paid, and £5,200 debentures paid off, together amounting to £10,095, there remained a credit balance of £22,137. Out of this a balance dividend, free of income tax, of 2s making 171/2 per cent for the year, will absorb £9,791. The sum of £4,800 set aside for outstanding debentures, £2,500 is reserved for equalisation of dividends, and £2,500 foe exploration. These outlays total £19,591 leaving £2,545 to be carried forward.

14th September 1907 (Hexham Herald)

The Weardale Lead Company gave all their workmen a free trip to Scarborough on Saturday last.

21st September 1907 (Hexham Herald)

Deaths

Nentsbury, Alston, 16th inst. aged 31, Robert, adopted son of the late Eleanor Thompson.

2nd October 1907 (Teesdale Mercury)

LANGDON BECK AGRICULTURAL SHOW

Mr F. E. Gibson on Small Holdings and the New Mining Ventures.

Coal Mining : "Black Jack": and Lead and Zinc Mining.

IN charming summer - like weather, amid scenery of the most romantic description, with the beetling crags of Cronkley and the distant Meldon Fell in full view, the thirteenth annual show of the Langdon Bock Agricultural Society was held on Saturday, and was in all respects a complete success.

Brighter days are in store for Teesdale in that the mineral wealth of the dale is gradually being developed. To begin with coal-mining is proceeding apace at Folly Top, Egglestone, where a new pit is being opened, and where a small land-sale colliery will be established, the steam coal being carted to Romaldkirk station. The Teesdale Lead Mining and Zinc Company are working Lady Rake and Willey Hole Mines, the former for load ore, and the latter for "black jack". Extensive shafting and machinery are being fitted up at Lady Rake. Messrs Backhouse and Company are exploring for lead at the high end of Ettersgill, and the barytes works at Cow Green are turning out a fair quantity of material, which is being carted to Middleton station. …

5th October 1907 (Hexham Courant)

ALLENDALE

It is reported that the immense heaps of fluorspar, which were accumulated at Allenheads in the old lead mining days, have been sold by Lord Allendale to Mr Blackwall, who has in recent years developed the spar industry in Weardale. A rough estimate places the quantity of fluorspar in the Allenheads district at a million tons. The work of collecting, separating and carting the spar to Wearhead station will give employment to a large number of men.

5th October 1907 (Hexham Courant)

Deaths

Alston, Hill House, 1st inst. aged 67, Caroline wife of the late Robert Stagg.

In 1851, at Fishley, Aveton Gifford, Devon, Robert Stagg, farmer of 42 acres, aged 42, born Alston, his wife Charlotte 43, son Robert 2, farm servant James Ward aged 18, house servant Ann Turdy aged 19.

In 1861, at Portland Square, Plymouth, Robert Stagg, landed proprietor, aged 52, his wife Charlotte A. 55, son Robert 13, and house servant Mary G Luckraft aged 17.

In 1871, at Hill House, Alston, Robert Stagg, widower, farmer of 400 acres, aged 62, and his son Robert farmers son, aged 22.

Robert Stagg jnr, married Caroline Bennett, 2nd qtr 1875, at Alston)

In 1881, at Hill House Robert Stagg, yeoman income from land, aged 32, his wife Caroline aged 40, children Charlotte 3, Albert Ed. 1, and domestic servant Margaret Holmes aged 19.
In 1891, Robert Stagg aged 43, was at Crichton Royal Institution Asylum For The Insane Dumfries, and his wife Caroline aged 50, was staying at a Hotel in English Street, Dumfries, Scotland, Charlotte aged 13 was at a school in Ryton, and Albert Edward 11 was at Hill House, Alston.
Robert Stagg died 21st April 1891, at Dumfies, Scotland.
In 1901, at Hill House Alston, Caroline Stagg, widow, aged 60, daughter Charlotte 23, and domestic servant Mary E Irving aged 18.
See 26th June 1875, 15th June 1878, & 29th June 1908

10th October 1907 (Northern Whig)
The immense heaps of fluorspar, estimated to weigh a million tons, which accumulated at Allenheads, Northumberland, during the old mining days, have it is reported, been sold by Lord Allendale to Mr Blackwell the head of the spar industry in Weardale. The work of removal will occupy a large number of men for three years.

12th October 1907 (Cumberland & Westmorland Herald)
THE MINING INDUSTRY OF THE LAKE DISTRICT.
Prosperity, such as has not been experienced for the last eight or ten years, is being enjoyed by the mining industry of the Lake District, and the revival of trade is responsible for several important developments either actually taking place or about to be undertaken. Thus, the Threlkeld Mining Company are making great developments in Blencathera, and the Cumberland Mines, Ltd., have started operation at Force Crag, while the same Company have undertaken the consideration of the reopening of the mines at Yewthwaite, Dalehead, and Barrow. While copper and lead remain at their present high price the mines are assured of a good, steady volume of trade, and zinc ore, which before the introduction of the process of galvanising was hardly saleable, now commands such a substantial figure and has become such an important product that the mines are not nearly so dependent upon the vagaries of the copper and lead markets.
One of the most important mines that is being reopened is the Force Crag mine near Braithwaite. Zinc ore is the most abundant product but barytes and lead ore are won as well. The mine was worked as far back as sixty years ago for its lead, which is here of high value because it contains an unusually High percentage of silver. A small Quantity of manganese and of copper is also found at the mine. The Cumberland Mines, Limited, which is working the Force Crag mine, also intend to start operations at the Yewthwaite mine in the Newlands valley. This was for many years a successful lead mine. It is the copper vein to which the Company now intend to devote their main attention. If prices continue to be satisfactory there is a probability that the Barrow lead mine, at the lower end of the Vale of Newlands, and the Dalehead copper mine, at the extreme end of the vale, will be reopened. The Barrow mine was worked in the reign of Queen Elizabeth. Another mine being reopened is the Brundholme mine, in the Glenderaterra valley, which divides the eastern end of Skiddaw front

Blencathera. It was last worked in 1852, and yields copper as well as lead. The veins here are separate but unite.
Three of the best known mines in the Lake District are the Greenside, the Thornthwaite, and the Wolfram. The Thornthwaite mine is at the head of Bassenthwaite Lake, and has been worked continuously for the last 35 years. Here, as at many other mines, the zinc ore formerly of little value, is almost as important a product as the lead. The Greenside mine, at the head of the Patterdale valley, has been probably one of the most successful mines in the whole district. It has been working for the last 150 years. Lead, such as plumbers use, is the product, and silver is found in the ore. The Wolfram mine is on the western side of Carrock Fell. What is obtained here is tungstate of iron associated with manganese. It is a very heavy mineral, dark brown or almost black in colour. It was used formerly for the production of tungstic acid, but is now employed as an alloy of steel, which it hardens very considerably. The mineral is worth shout £150 per ton. It occurs in a number of veins, which cross at right angles the little valley in which flows the Grainsgill beck, a tributary of the Caldew.
All these metals are found in fissure veins. In the early stages of the earth's history, cracks, sometimes occasioned by the contraction of the surface, or by volcanic agency, were found in the crust of the earth. These fissures tapped reservoirs or sources of thermal water charged with minerals. That thermal water commenced circulating in the veins, and the minerals which it contained were deposited on the sides of the fissure until in many cases it was quite filled.—"Carlisle Journal."

26th October 1907 (Hexham Courant)

WEARDALE MINERALS IN 1906
PRODUCTION OF LEAD ORE

The general report and statistics of mines and quarries and of minerals raised in the United Kingdom has, for the year 1906, just been issued. The Weardale produce embraces lead ore, ironstone, fluorspar, whinstone, ganister, and a large quantity of limestone. ... Durham produced in 1906 4,177 tons of dressed lead ore from which the amount of lead obtainable in smelting amounted to 2,953 tons, and the amount of silver obtainable from the lead 18,228 ounces and the value of the ore at the mines figured at £46,982.
The total quantity of lead produced in the United Kingdom in 1906 was 30,795 tons, value £341,405, against 27,649 tons in 1905 value £244,752.

26th October 1907 (Hexham Herald)

WEARDALE

A sad fatality occurred on Tuesday at the Rookhope Lead Mine, whereby a young man named James Pearson of Allendale aged 19 yrs., ore dresser, lost his life by being crushed between two waggons.

2nd November 1907 (Hexham Courant)

ALLENHEADS

On Tuesday week the inhabitants of Allenheads and Rookhope were greatly pained by the sad accident to Jas. Pearson Jnr. of Rose Hill, Allenheads, who was killed at Boltsburn, Rookhope, by being jammed between two wagons, the pin of one of which broke going up the incline. The funeral took place at St Peter's and was the largest that has been witnessed at Allenheads for a great

number of years, a large number not being able to get into the church; there were over 50 friends from Rookhope. The funeral was conducted by the Rev W Williams, vicar, and the Rev T S Berry, Wesleyan minister, Allendale.

James Pearson married Hannah Graham 1st quarter 1838, registered at Hexham

In 1841, at Hunt Well, Allendale, William Pearson, lead miner, aged 45, James Pearson, lead miner, aged 35, his wife Hannah 25, children Mary 3, John 1, Ann Pearson, independent, aged 81, and Ann Pearson, servant, aged 9.

In 1851, Hunt Well, Allendale, William Pearson, brother, lead miner, aged 55, James Pearson, lead miner, aged 47, his wife Hannah 36, children, Mary 12, John 11, Joseph 8, Ann 6, William 3, and James 1.

In 1861, at Elph Green, Allendale, William Pearson, unmarried, lead miner, aged 65, brother James, lead miner, aged 53, sister in law, Hannah 45, niece, Mary 22, Nephews, John, lead miner, aged 21, Joseph, lead miner, aged 19, niece Ann 16, nephews, William Shoemaker (apr), James 12, and Stephen 8.

In 1871, at Green Pits, Allendale, James Pearson, lead miner, aged 65, his wife Hannah 55, children, Mary 32, William, shoemaker, aged 23, James, lead miner, aged 21, Stephen, driver in the mines, aged 17, grandsons, J. William Pearson 6, and Joseph Pearson 5.

James Pearson died 4th quarter 1872, aged 70, registered at Hexham.

In 1891, at Horsley Wood, Ovingham, Ann Pearson, widow, aged 50, and mother in law, Hannah Pearson, widow, aged 75.

Hannah Pearson died 1st quarter 1897, aged 79, registered at Hexham

James Pearson married Jane Curry 3rd quarter 1880, registered at Hexham.

In 1881, at Guide Post, St Peter's, Allendale, James Pearson, lead miner, aged 31, and his wife Jane, aged 25.

In 1891, at New Houses, Allenheads, James Pearson, lead miner, aged 41, his wife Jane 35, children, Christopher 9, Mary A 7, Margaret J 4, and James 3.

In 1901, at Dudley Place, James Pearson, lead ore miner, aged 49, his wife Jane 46, children Christopher C., blacksmith, aged 19, Margaret J. aged 14, and James 13. In 1911, at Allenheads, James Pearson, lead miner, aged 61, his wife Jane 55, and daughter Margaret J, dairy work, aged 24.

Jane Pearson, died 4th quarter 1918, aged 63.

James Pearson died 4th quarter 1934, aged 84, registered at Hexham.

4th December 1907 (Teesdale Mercury)

LEAD MINING IN TEESDALE.

THE WIREGILL DEEP COMPANY IN COURT.

At a special sitting of the Barnard Castle County Court, on Friday, before Judge Templer, interesting glimpses of the customs appertaining to lead-mining in Teesdale wore disclosed in an action brought by William Hardy, a practical "groover" residing at 4, New Road, Middleton-in-Teesdale, who as plaintiff entered an action against the Wiregill Deep Lead Mining Company, Limited, 42, Spring Gardens, Manchester. Mr J. I. Dawson appeared for the plaintiff, and Mr T. M. Barron was for the defendant company. In the particulars it appeared that the plaintiff claimed from the defendants the stum of £22 damages for breach of contract of service, the defendants having dismissed him from their employment as a lead miner, without notice, in April last. — Mr Dawson explained that the Wiregill Mine was five miles above Middleton-in-Teesdale, and that Lord Barnard had the royalty let to the defendant company. Plaintiff

Hardy was one of the workmen employed, and he and others, under a verbal arrangement—there was no written contract- agreed to work the mine, and they were to be paid the sum of £5 12s. 6d. for every ton of ore raised to the surface. The Wiregill Lead Mine was an old working, and a drift was already in existence in the level for nearly a mile, and the company granted the plaintiff and the other men the privilege and right to prospect in the old mine. The plaintiff and others spent three mouths in this labour, and in time and money had expended £80 before they sent the first ore to the surface. They got very good remuneration for that, and the price of lead was a little high. Then it was that the company wanted to put two more men into the mine, and they were perfectly right in that if they had not wanted to put them into the same shift. But as the men employed were already working in a face the approach to which was only 6 feet by 4 feet, or less than an ordinary door- way, it was perfectly impossible for them to work with any more men in. There was no air, and the men had often to come to the surface for air. The drift was a mile long, and 600 feet to face. There was an air shaft about 150 feet away. These men were dismissed because they would not take other two men into the shift. They got verbal notice to quit the mine at once. — Plaintiff was called, and said the arrangement was made between Mr Anderson and himself, and Hardy admitted that in eighteen months they had been paid £318 4s. He had been a practical miner for 22 years. A month's notice was the custom in lead-mining. They blasted with dynamite. —Mr Barron: Is the lead horizontal or face at top? —Plaintiff: It is level on.—Mr Barron: Were you picking the eyes out of the mine instead of driving ahead?—Plaintiff: A wire came to Mr Anderson and he saw me there. He told me to got some more men. The ventilation was not perfectly right on the 20th of March. £22 a month was about my average. The Judge; I don't know why you should not have given this man a mouths notice? —Mr Barron: Mr Smart came to see the mine, and this man refused definitely to put more men in. If this man is to be allowed to manage the mine whore does the owner come in? — Robert Hebdon (72) for 33 years a miner, John Tinkler, 16 years a “groover,” and Joseph Allinson, all said a month's notice was the custom, and His Honour at this stage adjourned the further hearing of the case until next court.

14th December 1907 (Hexham Herald)

WEARDALE

The remains of Mrs Ellen Crawhall widow of Mr John Crawhall, widow of Mr John Crawhall, Bridge House, Stanhope, were interred at the old church on Thursday.

21st December 1907 (Hexham Herald)

WEARDALE

An Octogenarian, passed away at Stanhope last week namely, Mrs E. Walton, widow of Mr Ralph Walton at the age of 82. Her husband was one of the old Stanhope band that won third prize at the Crystal Palace in the international band contest in 1853. He was regarded as the best euphonium player present on that occasion.

In 1841, at Newfield, Stanhope, George Walton, lead miner, aged 45, his wife Mary aged 45, children, Thomas, lead miner, aged 20, Margaret 15, Elizabeth 15, Ralph 13, Mary 11, Jane 8, and Hannah 5.

In 1851, at Newfields, Mary Walton, widow, aged 57, son Ralph, iron stone miner, aged 23, daughters Jane 17, and Hannah 15.
In 1861, at Stanhope, Ralph Walton, married, lead miner, aged 33, daughter Mary aged 7, son George 5, mother Mary Walton, widow, aged 68, and house servant Jane Proud aged 25.
In 1871, at Stanhope, Ralph Walton, lead worker, aged 43, his wife Elizabeth 45, children Mary 17, George, labourer aged 15, William 8, Tom 6, and Frederick 3.
In 1881, at Stone House, Ralph Walton, engine driver at lead mills, aged 53, his wife Elizabeth 56, children Mary, dressmaker, aged 27, William, grocer, aged 18, and Frederick 13.
In 1891, at Stone House, Elizabeth Walton, widow, aged 66, daughter Mary, dressmaker, aged 37, sons William, limestone quarryman, aged 28, and Frederick Walton, coal agent aged 23.
In 1901, at Stone House, Elizabeth Walton, widow, aged 76, daughter Mary, dressmaker, aged 47, son Fred, stone weigh man, aged 34, and grandson Charles Walton 7 years.

11th January 1908 (Hexham Herald)

WEARDALE

On Wednesday afternoon, the remains of the late John Nattrass of Westgate, Weardale, were interred in the village churchyard. The deceased who was a well-known wrestler had attained the age of 71 years and was the last of the famous Weardale wrestlers. In the sixties Nattrass won most of the leading trophies. … He is survived by a grown up family consisting of three sons and two daughters.

In 1841, at Ireshopeburn, st John's Chapel, Caleb Nattrass, lead miner, aged 40, his wife Barbara (Robson, married 17th June 1830, at St John's Chapel) aged 30, children, Matthew 6, John 4, and Thomas 2.
In 1851, at East Riggs, Heathery Cleugh, Caleb Nattrass, lead ore miner, aged 50, his wife Barbara 44, children Mathew, lead ore miner, aged 16, John, lead ore miner, aged 14, Thomas 11, Ralph 8, Joseph 5, Jane 4, and Mary 1. Caleb Nattrass died 1st quarter of 1857.
In 1861, at Wearhead, Barbara Nattrass, lead miners widow, aged 54, children Mathew, lead miner, aged 26, John, excavator, aged 23, Thomas, excavator, aged 21, Ralph, lead miner, aged 19, Joseph, lead miner, aged 15, Jane 14, and Mary 11. Barbara Nattrass, died 2nd quarter of 1866.

In 1861, at West Black Dean, St John's, John Nattrass, lead miner, aged 24, his wife Margaret Ann (Walton, married 1st quarter 1860, registered at Weardale) aged 21, and son William 4 months.
In 1871, at Burn Foot, St John's Chapel, John Nattrass, lead miner, aged 34, his wife Margaret A. aged 31, children, Ralph 8, Elizabeth 6, Mary 4, and Thomas aged 1.
In 1881, at East Castle, Tanfield, Lanchester, John Nattrass, coalminer, aged 45, his wife Margaret A 41, children William, coalminer, aged 20, Ralph, coalminer, aged 18, Elizabeth 16, Mary 14, Thomas 11, and Father John Walton, widower, Millwright out of employment, aged 73.
In 1891, at Miners Arms, St John's Chapel, lead miner, aged 54, his wife Margaret aged 51, children, Ralph, iron miner, aged 28, Thomas, lead miner,

aged 22, Mary 24, married daughter, visiting, Elizabeth Richardson aged 26, granddaughters, Frances Richardson 6, and Mary Richardson, aged 1.

Margaret Ann Nattrass died 6th July 1896.

St Andrew's Churchyard, Westgate

John Nattrass married Margaret Brown 3rd quarter 1898, registered at Weardale.
In 1901, at Westgate, Stanhope, John Nattrass, retired lead miner, aged 64, and his wife Margaret aged 69.
Margaret Nattrass died 4th quarter 1904, aged 73.
See 1st March 1890

11th January 1908 (English Lakes Visitor and Keswick Guardian)
FATAL ACCIDENT AT THRELKELD MINES.

At about 8 o'clock on Monday night a man, named Joseph Robinson, 39 years of age, single, miner, residing at Threlkeld, met with death while following his employment at Threlkeld Lead Mines. It appears that the deceased was working

along with another man, named James Robinson, and that at 7 p.m. they had fired three holes in the level. After the smoke had cleared away they went back to the place. Deceased asked his companion if he thought it was safe, and James Robinson replied that he did not know. They commenced to clear away the debris, and in doing so the deceased accidentally knocked a prop out. Immediately there was a rush of stone and it extinguished their candles. James Robinson called out to the deceased, asking if be was any the worse. Receiving no reply, he made for the shaft in the dark and got the assistance of two men, named Hewer and Spence. Returning, with lights, they found the deceased was partly buried under the fall and quite dead. The body was taken from the mine and removed to the Salutation Inn. An examination revealed a large wound on the forehead extending from above the right eye to the cheek, which Dr Crawford considered was quite sufficient to cause death. An inquest was held on Wednesday by Mr Halton, deputy coroner for Eest Cumberland, when a verdict of “Accidentally killed " was returned.
The remains of the deceased, who was a native of Naddle, were interred at St. John’s-in-the-Vale Church on Thursday afternoon.

18th January 1908 (Hexham Herald)

ALSTON

Mr Henry Walton and Mrs Walton, The Raise, Alston, celebrated their diamond wedding on Saturday. Amongst those present were Messrs William Walton, Hedley Bank Coanwood; James Walton, The Riding, Allendale; Thomas Walton, Howburn, Alston; Isaac Walton, Regents Park, London; sons; Mrs Birkett and Miss Walton, The Raise; Mrs Davidson, Saltwell View, Gateshead; and Mrs Lee, Randalhome, Alston, daughters of the venerable couple. … Mr Walton is the oldest son of the Late William Walton of Clarghyll Hall, and Leazes House, Alston, and Mrs Walton is the daughter of the late Mr James Blacklock, of Wallace Hall, Dumfriesshire. They were both born in the same year 1821. They were married in January 1848. Mr Walton, farms on an extensive scale occupying one of the largest sheep runs in the kingdom.

22nd January 1908 (Teesdale Mercury)

WIREGILL DEEP IN COURT.
JUDGMENT FOR THE COMPANY, WITH HIGHER COSTS.

The adjourned hearing of the Teesdale Lead Mining case came before Judge Templer at the ordinary sitting of the Barnard Castle County Court on Monday. In this action, which was partially heard at the late special sitting of the court, a leadminer, named William Hardy, residing at Middleton-in-Teesdale, sued the Wiregill Deep Lead Mining Company (Manchester), for £22, which represented alleged damage for breach of contract of service. Mr J. I. Dawson appeared for the plaintiff, and Mr T. M. Barron was for the defence.
Mr Dawson: The witness Allison was in the box and my friend had started to cross-examine him when your Honour adjourned the case. Joseph Allison was now recalled.
Mr Dawson: When you left the mine you had four fathoms ready driven to take the top out, and to take the lead ore from the top? — Yes, sir.

Are you going to take advantage of that driving because you had to leave your work without notice when you were dismissed? — Yes.
His Honour: Was he at work at the mine as one of the other four?
Mr Dawson: They had the offer to work the month out at a reduced figure.
Witness: And we refused, and cleared out. Our average was £22 for the month.
The Judge: Why did you refuse to work with two more men?
Witness: There was not plenty of air.
The Judge: It was foul air, was it?
Mr Dawson: I understood from you that at times you could not strike a match?
Mr Barron: Do you mean he could not strike a match or it would not burn? (Laughter).
Mr Dawson: It would not burn.
Mr Barron: Do you know there are six men working there now?—Yes.
Mr Barron: Then why could not these men work when you were there?—It is along time since then.
His Honour: That does not make any difference, does it!
Mr Dawson: The area is very much bigger now.
Mr Barron: There is more to ventilate. Is that not so? —There will be more men to ventilate for.
Matthew Walton, Thomas Walton and John Stephenson Watson, were examined for the plaintiff, and Mr Barron submitted that it was absolutely a matter of evidence, and on that His Honour would have to decide. He called Louis Smart, consulting engineer, and a director of this company, who said that double shifting was resorted to in the best interests of the concern, but in an interview on the 10th of April Hardy was very much out of hand, and distinctly impudent. He refused point blank to employ more men in the mine, lead being then at a high price. It was quite clear that the man apprehended an interference with his “face,” or profit, or privilege. After the fan was put in the ventilation of the mine was about as perfect as ever he had come across. The question of reduction was raised by Hardy and not by witness. The average earnings had since gone down from £22 10s. to £11 10s. He told Hardy that the directors could not allow that bargain to continue. Hardy had spoiled the place absolutely, and it took six weeks to put it right. The company put in the fan, though it was Hardy’s duty to find everything for working the mine.
Joseph Anderson, mine foreman, and Edwin Hoal, present manager, also gave evidence, and the case lasted several hours in the hearing.

His Honour’s Judgment.

Judge Templer said this had been an interesting fight, but he did not think the plaintiff had established the fact that an explicit or definite arrangement for the contract to be observed for any length of time had been made, and certainly no notices to terminate it were named, although it was open to Hardy to have insisted upon a defined time. As it was the plaintiff had had three months in which to recoup himself after the original outlay. But the question of notice was left an open matter between the parties. Even before February the plaintiff was repeatedly told that in the interest of the company Hardy was not driving the “face” fast enough, and that the “ face should be driven quicker, while the price of finished lead was remaining high. The urgent instructions were resisted by Hardy from the first, and it was only under pressure that the fan was put in, under a distinct understanding with Mr Smart, as disclosed by his evidence, that the plaintiff would then undertake double shifts, which was not accordingly

done. Hardy was dismissed in April, and the bargain was then terminated between the parties. The plaintiff had expended a certain amount of money, but the Judge did not think that he had established a general instruction as to notices, as the only notices to which reference had been made by the witnesses was in respect to other methods of lead-working, which were quite different to this method of tonnage. It must be proved that this general giving and receiving of notices was known to everybody, and that both parties were perfectly well aware of it. Where no such custom prevailed the defendant company were perfectly justified in giving Hardy and his men to understand that the contract must be at once terminated under such circumstances as had been disclosed. Over and over again the defendants had demanded of the plaintiff to get more men, and to clear away the "deads." But to the latter request he (the Judge) did not attach as much importance as he did to the weight of the testimony in regard to the ventilation. Hardy knew very well that he was bound to put more men into the mine, but he seemed to have acted on the assumption that it was to his own interest and in the interest of his men that he should not put more men into the working, and that his profits would be considerably diminished if he did put them in. The directors had met the plea of insufficient ventilation by informing him that they would get him that ventilation, which they did, and which turned out to be perfectly satisfactory, and they now asked for two shifts. Upon that Hardy decided upon leaving his job, and breaking the contract, it was the plaintiff and not the company who broke the contract. He was not to be dictated to by Mr Smart, the engineer and director, nor the manager, and the Judge held that there was no ground for such action, and that Hardy had misconceived his duty and obligation. The plaintiff had not made out that he was entitled to a month's notice, neither had he made out to his Honour's satisfaction that there was a general custom as to a month's notice in tonnage. Moreover the defendant had been constantly reminded that he was not mining in a proper way, and that he was not putting in his fore-breasts as he should have done. The Judge therefore found a verdict for the defendant company with costs under Scale B.
The court then rose.

7th March 1908 (Hexham Herald)

WHITFIELD

An inquest held at Carrshield touching the death of Pietro Rolando, an Italian miner 53 years of age. Deceased was found at 12:30 am on Monday in a kneeling position on the highway at Carrshield, apparently overcome with cold. He was taken to Barney Craig Barracks where he died at eight o'clock the same morning. A verdict was returned that death was due to heart failure the result of exposure to cold.

14th March 1908 (Hexham Herald)

WEARDALE

The Weardale Lead Company's returns for the four weeks ended 7th March are: - ore raised 285 tons, pig lead smelted 251 tons; average price obtained for pig lead sold £13 19s 3d per ton net. Work was considerably retarded by the snowstorms.

28th March 1908 (Hexham Herald)

ALLENDALE NOTES.

The unfortunate Italian miner who died from exposure in West Allendale during the recent snowstorm had a unique funeral. Owing to the depth of snow, the road from Carrshield to Nenthead was impassable. The coffin, which had been made at Nenthead, was conveyed under ground to Carrshield, and in the same way the body and cortege were taken down the shaft at Carrshield and through the mines all the way to Nenthead, where the internment took place.

11th April 1908 (Hexham Herald)

ALLENHEADS

The death is announced in his 76th year of Mr John Ridley, of Allen Lodge, Allenheads. … Born in West Allen, he had nearly all his life been employed by the Beaumont family. He resided for the most part at Allenheads, where for many years he acted as mining engineer and agent for the Late Lord Allendale and the present Peer, whom Mr Ridley served at the time of his death. ... Mr Ridley who had been a widower for many years is survived by four sons (Harry who is a missionary in China under the Inland China Mission; George Ridley, a local mining engineer and surveyor; Lois E. Ridley, grocer, Tynemouth Road, Newcastle; and Norman Ridley an engineer) and two daughters one a widow Mrs Pickering, who resided with her late father and Mrs Charlton of Westmorland.

St Peter's Church Yard, Allenheads

18th April 1908

MINING FATALITY AT NENTHEAD

On Saturday Mr F. W. Halton, acting Coroner for East Cumberland, held an inquest at the Assembly room, Nenthead on the body of George Black, aged 59, of Dykeheads, Nenthead, whose death occurred on Thursday in consequence of an accident on March 28 in Rampgill zinc and lead mine belonging to the Vieille Montagne Mining Company, by whom the deceased was employed as woodsman. Mr Abbott, one of H M Inspectors of mines was present and several of the company's officials, who are Germans, Belgians and Italians, attended. The body was identified by the daughter of the deceased. She deposed that her father had influenza but recovered and went back to his work. On March 28th he came home complained of pain in his side and tried to sit down in a chair several times without succeeding. A doctor was then sent for. Dr Donald Bremner Waters deposed that when he examined the deceased on March 28th he found him suffering from a fractured rib on the left side and a contusion on the left shoulder. The rib penetrated one of the lungs, pneumonia and pleurisy supervened, and death resulted on April 9th. Before his death deceased told him that while he was building up something in the mine he fell four or five feet and struck his side on a plank. He did not blame anyone. In answer to Herr Rodewald, manager of the company, witness said there was little doubt that the lung had been penetrated by the rib. Wilhelm Doller produced a plan of the mine. His evidence was interpreted by Edouard Host, who, however, could not comprehend the interpretation of the English oath. Frederick Lee, labourer to the deceased, stated he heard the deceased tumble while building a rise in the wall in the mine. On reaching him he found him lying on the scaffolding. He believed Black must have tripped over a loose piece of wood. In reply to the Inspector, witness said the company allowed them plenty of wood. The deceased was an experienced man at the work. Theoder Prumbaum, underground foreman, stated that he visited the drift in the mine daily. He found the place where the accident happened quite safe. His belief was that the deceased must have slipped, and in tumbling, broken his rib. The Inspector having described the place, the jury found that the death had been due to pneumonia and pleurisy, following the injuries received, and that there had been no neglect on anyone's part.

In 1841, at Ruff Side, Robert Black, lead miner, aged 50, his wife Agnes (Dryden, married 22nd June 1811, Alston) aged 49, children George, lead miner, aged 25, Agnes 20, Robert, lead miner, aged 20, Matthew 14, Mary 14, and William 12.

In 1851, at Ruffside, Robert Black, farmer of 8 acres, aged 63, born Durham, Agness 59, children George, lead miner, aged 39, Agness 34, Martha 24, and John, lead miner, aged 18.

In 1861, at Ruffside, Robert Black, lead miner, aged 73, his wife Agnes 68, children George, lead miner, aged 49, Agnes 43, and John, lead miner, aged 28. Robert Black snr. died 1862 or 1863.

In 1851, at Wellgill, Dykeheads, Robert Black, lead miner, aged 30, his wife Ann (Rutherford, married 2nd October 1845, Alston) aged 27, sons George 2, and Robert 1. In 1861, at Dykeheads, Robert Black, lead miner, aged 40, his wife Ann 37, sons George, lead miner, aged 12, and Robert 11.

In 1871, at Dykeheads, Robert Black, lead miner, aged 50, his wife Ann 47, and son George, lead miner, aged 22.

In 1881, at Dykeheads, Robert Black, retired lead miner, aged 60, his wife Ann 57, and son George, lead miner, aged 32.
George Black married Margaret Graham, 23rd May 1882, at Alston, Margaret Black died 19th November 1888 aged 30.
In 1891, at Dykeheads, George Black, widow, lead miner, aged 42, his father Robert Black, widow (Ann died 2nd quarter of 1884 aged 60), retired lead miner, aged 70, daughter Isabella 9, and domestic housekeeper Lucy Price aged 24.
Robert Black died 29th April 1891 aged 71.
In 1901, at Dykeheads, Nenthead, George Black, widow, lead miner & woodman, aged 52, his daughter Isabel G Black 19, and granddaughter Mary A. R. Black under 2 months.
See 15th March 1879, 27th May 1882, 17th March 1883, 24th November 1888, & 9th May 1891.

23rd May 1908 (Hexham Herald)

WALL

The death of Mr John Henderson which occurred on Saturday morning after a few hours illness. … For close upon half a century Mr Henderson was in the employ of Messrs Walton and Cowper at the Fallowfield Lead mines, commencing work there when a lad of eight years.

Deaths

Benwell, Clara Street, 15th inst. (suddenly) aged 53, Mary Jane wife of James Spottiswood, late of Alston.
In 1871, at Clitheroe, Hugh Spotswood, lead miner, aged 52, his wife Ann 44, children James, lead miner, aged 23, Hugh, lead miner, aged 21, Mary A. domestic servant, aged 17, John, apprentice to carpet weaver, aged 14, Leah 11, Margaret 8, Miles 5, and Matthew 2.
In 1881, at Clitheroe, James Spottiswoode, lead miner, aged 34, his wife Mary J. (Irving, married 4th quarter of 1876, Alston) aged 25, children Hugh 3, Joseph 2, and Ethel M. 3 months.
In 1891 at Skelgill, James Spottiswood, coal miner, aged 43, his wife Mary Jane 36, children Hugh 14, Joseph 12, Ethel Maud 10, James 7, Matthew 5, John 2, and Miles 2 months.
In 1901, at Brewery Cottage, Alston, James Spottiswood, lead miner, aged 53, his wife Mary 45, children Joseph, labourer, aged 22, James, labourer, aged 17, Mathew 15, John 12, Miles 10, Frederick William 7, and Mary Ann 3.

ALSTON

FATALITY AT NENTHEAD

A shocking fatality occurred in the lead mines at Nenthead, on Wednesday, to an Italian workman, 18 years of age. It appears that he was being brought up from the lower workings in a cage drawn by a wire rope worked by compressed air, and when near to the top of the shaft, the wire broke, and cage and man were dashed to the bottom. Assistance was speedily forthcoming, but when the unfortunate man was reached he was dead.
The dead miner was Basilio Corsi aged 17 years.

27th June 1908 (Cumberland and North Westmorland Herald)

DEATH OF MR. HENRY WALTON
ALSTON

We regret to record the death af Mr. Henry Walton, The Raise, which occurred on Sunday last. Deceased had been in failing health for some weeks, but, even when his great age was taken into account, immediate fatel results were not expected. On Sunday morning, however, he became worse, and expired in the afternoon. Mr. Walton was born December, 1821, and had consequently attained his 87th year. He was the oldest son of the late Mr. William Walton, of Clarghyll Hall and Leazes House. He married in 1848 Jessie, daughter of the late Mr. James Blacklock, of Wallace Hall, Dumfriesshire.

Deceased had been engaged in the farming avocation all his life, his first holding being the farm of Blackcleugh in Kirkhaugh. He afterwards leased the farms of Howburn, Cashburn, and Crossgill, in the Alston locality. Mr. Walton's Black Faced sheep and cross-bred lambs had an exceptional reputation. They have been sold in Penrith Auction Mart for 30 years in succession …

One of the earliest offices held by him in behalf of the common weal of the locality in which he resided was that of parish constable in the days prior to the establishment of the county police force. …

Deceased has held in his time a wide range of public offices. He was a member of the Alston Board of Guardians for some 40 years. He saw added to the duties of the Guardians the additional work of highway authorities, sanitary authorities, and school attendance, and he saw the transference of most of these duties to the District Council of which for m,any years he was chairman. He sat for some five years as a member of the Cumberland County Council, and has sat for a lengthened period on the Cumberland Bench. …

7th July 1908 (Penrith Observer)

LORD ALSTON OF NENTHEAD.

The letter which Sir Angus Holden, Bert., sent on Saturday to the Alston District Council will prove of interest to all Cumbrians, whether they know Nenthead or not. Mr. Asquith's four new peers includes Sir Angus, who desires to perpetuate the connection of his grandfather with the parish by taking as his title Baron Alston of Nenthead. Naturally the Council agreed to the suggestion, properly regarding it as an honour to their parish, and they took the opportunity of congratulating the new peer on the dignity. It is a long step from a cottage on Alston Moor to a seat in the House of Lords; what a contrast little more then a century has afforded! Three generations, as we remarked last week when referring to the peerage given to Sir Angus, have provided one of the most remarkable industrial romances to be found in the annals of trade in this country. The man whom the first Lord Alston seeks to honour was Isaac Holden, who combined the occupations of small farmer and lead miner at Nenthead. At that time the whole of Alston parish was relatively very far away from all towns; there was no highway between the valleys of the Eden and the Tyne, and transit was principally done by means of galloways. But the lead industry was of great importance, as it had been for centuries before Isaac Holden laboured in mine and on his fell land Towards the end of the eighteenth century an idea became prevalent that most of the lead mines in the Alston district were exhausted. That was not strictly a fact, although there was severe distress among the people in 1795 and 1796, which became still more acute in 1800, when the Government

started an inquiry as to whether the prevalent scarcity of food was occasioned by the increase in the population or by a deficiency of agricultural produce.

Isaac Holden did not wait for Government inspectors to tell him that he was not prospering. He left his native fellside and went alone to Glasgow, where he obtained employment in a coal mine. His wife, an industrious and pious Scotswoman, whose maiden name was Forrest, was left with her four children at Nenthead, but followed the father as soon as steady employment had been secured. At the village of Hurlet, between Paisley and Glasgow, Isaac Holden the second, who was destined to become a baronet of the United Kingdom, and to revolutionise a great British industry, was born on May 7th, 1807. The elder Isaac was at that time working in the adjoining Wellington Pit, Nitahill. Husband and wife were both intellectually far above their station in life. They were among the earliest followers of John Wesley, and Isaac utilised his spare time by trying to teach and elevate those around him, establishing both a Sunday school and a night school in the village. Five yean after going to Hurlet, the family removed to Kilbarchan, nine miles away, at a time when the country was in a state of paralysis through the consequences of tbs Napoleonic wan. Young Isaac was sent to a Grammar School, but knowing his father could ill afford to keep there he found employment as a draw boy to a couple of hand- loom weavers, and thus for two years earned his living and continued his education at a night school. Times mending for the family through another removal, the lad went to a cotton mill, where he worked from six in the morning until eight at night, and afterwards attended a school—a zeal for education which would be difficult to equal in these days. The father was afterwards able to take his boy from the mill for a while and afford him regular education, but at thirteen young Isaac was again piecing in the cotton mill, and studying Latin and bookkeeping, going at fifteen as apprentice in a shawl factory at Paisley, which had to be abandoned through lack of strength. The lad's motto was always "progress"; he studied Latin, Greek, French, Italian, and German, mathemathics and physics, and at twenty-one migrated to Leeds, where he became a teacher, going afterwards to Reading, in Berkshire. There be invented lucifer matches, though as it afterwards appeared he had been anticipated in the invention by about two years by a man named Walker, of Stockton. Each had named Walker, of 8tockton. Each had made the discovery independently, and neither would take out a patent—to the great advantage of the rest of the community.

Returning to Scotland Isaac Holden became a partner in a mill, and gave his attention to improving the system of wool combing—the preparation of the wool by cleaning and otherwise making the material ready for the spinner. This was done in the homes of the workpeople, and was unsatisfactory from every point of view. Holden invented a machine to do the work, but his three partners at that time had objections to patents, and so the diecoverer of the system undoubtedly lost an immense sum of money —which he estimated at a million sterling. Later experience brought greater wisdom. Holden improved the machinery for dealing with genappe yams, and at once, as he described it many years later, "saw that this invention must revolutionise the manufacture, and that there was a fortune in it." The fortune did not come soon, through the stubbornness of his partners, the Messrs, Townsend, and so after a year he left them, Then in 1847 he and Mr. Samuel Cunliffe Lister—the lets Lord Masham—went into partnership, but were forestalled in the process, and so he lost another fortune. Still inventions followed one another, most of them profitable, while work was found for tens of

thousands more people then could have found employment in hand labour. He not only established vast mills in Yorkshire —one in Bradford being called Alston Works, doubtless out of compliment to the Cumberland origin of the owner's father—but founded works in France, and through the influence of his invention a village of five thousand French people has now become a town with a population of a quarter of a million, the great mass of them employed in the woollen industry. All was not plain sailing; most costly experiments were always being made, but on the whole they, backed by the wonderful capacity for work displayed by the owner, helped towards making the vast fortune left by Sir Isaac at his death in 1897. He served in Parliament for many years, fighting numerous stiff political battles, and at the time of his retirement was one of the oldest members of the House ot Commons. Sir Isaac believed in “the simple life” to an extent which would astonish even moat vegetarians, as he lived by the month together almost entirely on fruit. That the system had its virtues— for him—was proved by the fact that he lived beyond his ninetieth birthday.
The first Lord Alston, who has reached the age of seventy-five, has himself lived a strenuous commercial and political life. He went into his father's business immediately after leaving Wesley College, served for two decades in the Bradford Town Council, was thrice Mayor of the borough before being elected in 1881 to serve the Eastern Division in Parliament, and he was twice afterwards again Mayor. Then he went to the Buckrose Division of the East Riding, for which he sat for many years. His reward is the peerage which is to identify Alston with a very remarkable family.

HEAD CUT OFF
TERRIBLE ACCIDENT AT THRELKELD. LEAD MINE.

Details of a terrible accident which occurred the Gate Ghyll lead mine, Threlkeld, Keswick, and which resulted in the death of a man named David Irving, of Keswick, were laid before Mr. F. W. Hatton, coroner for East Cumberland, at an inquest which was held at Thelkeld last night. Mr. Robert Howell was foreman the jury.
Deceased was 23 years of age, and was a pump-man employed the Thelkeld Mining Company, and met his death by becoming entangled in the machinery. William Turner, miner, Threlkeld, said that on Thursday he was working near the pump with which deceased was drawing water from the mine. The pump was half a mile from the surface, and was driven by a motor. Witness was on one side a steel partition which divided them from the pump. His attention was drawn to a sound like a pipe bursting, and on looking round the end the partition saw deceased fast in the cogwheels. He called to his mate Alf. Simpson, and stopped the machinery. Deceased's head was cut off, and various parts the body were scattered over the place. When witness stopped the machinery deceased's head and part of his body had been drawn in. He did not see the

deceased start the pump, nor did he see him with the oil-can, but be saw the oil-can underneath him when they removed the body. The oil can was not broken or crushed. The machinery had only been put in two or three days, and was not protected.
Alfred Simpson, miner, Threlkeld, gave corroborative evidence. He added that deceased would have finished shift in half an hour. His impression was that deceased had been stooping, and was caught by his hair. He was an intelligent lad. and always anxious to learn.
This was the whole the evidence, and the Coroner said that the assumption—and it was only an assumption—was that deceased had been caught in the machinery by oiling it. It had not been thought necessary by the mining company to fence the machinery, but probably that would now be done as far as it was possible.
The jury returned a verdict of "Accidental death."
Deceased was a son of Mr David Irving, at one time licensee of the Sun Inn Bassenthwaite and still residing in that village.

12th September 1908 (Hexham Herald)

ALSTON

A BREACH OF ORE MINE RULES.

At the Alston Police Court, Mr R. Rodewald, manager of the Rampgill Lead & Zinc mine, Nenthead, was summoned on an information laid by Mr J. B. Atkinson, Mines Inspector, on a charge of having committed a breach of Rule 14, of the Metalliferous Mines Regulations Act 1872, by not having attached to the winding engine used for raising or lowering persons in the mine an indicator showing to the person working the engine the position of the load in the shaft. The mine is the property of the Vieille Montagne Company. Mr R. Sheraton Holmes, Newcastle presented for the Treasury, and Mr Lightfoot, Carlisle, appeared for the defendant and pleaded guilty on his behalf. Mr Holmes said the facts were that on May 25th, an Italian miner was being brought up the shaft in a kibble, something went wrong with the winding engine and the result was that the miner was precipitated to the bottom of the shaft and was killed. Mr Holmes did not suggest that the accident was necessarily due to the want of an indicator; but as a matter of fact, there was no indicator on the engine as required by the rule, and the engineman was unable to tell the position of the load. Mr Lightfoot urged in defence that the death was not due to the breach of rule. It had not originally been intended that men should ride in the kibble, although he admitted it was within the defendant's knowledge that this was habitually done. Defendant was fined 40s and costs.

31st October 1908 (Hexham Herald)

WEARDALE

The remains of Mr George Moses, chairman of the Stanhope and Weardale Co-operative society for 25 years were interred at Stanhope Church on Saturday. … Deceased was 74 years of age. He was an ex urban councillor of Stanhope. Formerly he worked as a lead smelter for the late London Lead Company.
A Weardale man named William English, a bandsman of some note, belonging to Wearhead has died in Canada.

28th November 1908 (Hexham Herald)
WEARDALE
Death of Mrs Crawhall of Stanhope (wife of Mr John Crawhall J.P.) took place in York on Saturday evening.

4th January 1909 (Newcastle Daily Chronicle)
CRUSHED BY FALLING STONE
THE FATAL ACCIDENT AT A WEARDALE DRIFT MINE.
At the Royal Infirmary, Newcastle, on Saturday afternoon, an adjourned inquest was held before Mr. Coroner Appleby concerning the death of John Featherstone, 46, a bachelor, who died at the institution on Christmas Day, from the result of injuries sustained on Tuesday, December 22nd, while following his employment at a spar mine in Weardale.
George E. Harrison, a spar miner, Wearhead, said on December 22nd Featherstone and he were working in the Whitehall spar mine by candle light. The spar was used in furnaces. It was a drift mine. At 2.30 they were boring a hole, deceased being in a sitting position drilling the hole while witness was striking. There was a big fall of stone from the roof about eighteen feet behind them, smashing the timber up to the face. Part of the stone fell on Featheretone's legs, and witness got out of the mine by climbing over the fall, and went for assistance. Deceased was afterwards taken to his home. The weight of the fallen stone was about thirty tons. Since the acoident witness had examined the place where the fall occurred, and found a very slippery "face."
The jury returned a verdict of "Accidental death."

9th January 1909 (Hexham Herald)
WEARDALE
Weardale is ringing with the praises of the five lead miners who at great risk to their own lives gallantly rescued their unfortunate comrade John Fletcher Featherstone who was partly buried by a fall of debris and big stones from the roof of the mine at Westgate in Christmas week. As it was both his legs were broken and he was injured internally. He died at Newcastle Infirmary. The narrow aperture or orifice of that part of the mine where the accident occurred was threatened by another fall and lumps of stone kept falling down all the time. … He was a very stout man of 17 stones weight and they had great difficulty in getting him through the narrow opening to safety. Their names should be inscribed on Weardale's Roll of Honour. They are G. Nattrass, J. H. Gowland, A. Coulthard, J. H. Morley of Westgate, and G. Harrison of Wearhead.
In 1841, at High Corn Riggs, Stanhope, John Featherston, lead miner, aged 45, Thomas, lead miner aged 20, Emerson, lead miner, aged 20, Margaret 15, Sarah 12, Jonathan 10, Frances 5, and Ann 3.
Emerson Featherston married Sarah Thompson, 2nd quarter 1849, at Weardale.
In 1851, at Corn Riggs, Heathery Cleugh, Emerson Featherston, lead miner, aged 31, and his wife Sarah 21.
In 1861, at Cowshill, Weardale, Emerson Featherston, lead miner, aged 41, his wife Sarah 31, children, John 9, Elizabeth 6, Maria 3, Sarah Ann 2, and Margaret 2 months.
Sarah Featherston, died 3rd quarter 1866, aged 36, at Weardale.

In 1871, at Sedling, Heathery Cleugh, Emerson Featherston, miller, aged 50, children, John, cartman, aged 19, Elizabeth 16, Maria 13, Sarah A 11, Margaret 9, and Joseph T 7.
In 1881, at Sedling, Emerson Featherston, widower, miller & farmer, aged 61, daughter Margaret 19, and son Joseph, farmer, aged 16.
Emerson Featherston died 2nd quarter 1885, aged 64.
John Featherston, married Frances James 3rd quarter 1877, at Weardale.
In 1881, at Wearhead, Heathery Cleugh, John Featherston, lead miner, aged 29, and his wife Frances aged 27.
On 1891, at Sedling, Heathery Cleugh, John Featherston, lead miner, aged 39, and his wife Frances 37.
In 1901, at Sedling, Heathery Cleugh, John F Featherston, millers cartman, aged 49, his wife Frances 47, and niece Ruth James, shirtmaker, aged 37.
In 1911, at Lane Hill, Ireshopeburn, Frances Featherston, widow, aged 59.
Frances Featherstone, died 1st quarter 1929, aged 77, at Weardale.

LEAD MINER'S DEATH NEAR KESWICK.

Whilst working in the 37 fathom level at Thornthwaite lead mine, near Keswick, yesterday, a miner named John Lowden between fifty and sixty years of age, fell down what is locally termed "mill," a distance of about forty feet, and fractured his skull. He was got to the surface, and was conveyed to Keswick by the ambulance brigade, but he died soon after reaching his lodgings.

27th March 1909 (Lancashire Evening Post)

KESWICK MINER'S SKULL FRACTURED.

At Keswick, yesterday, an inquest was opened by Mr. E. Attar, coroner, regarding the death John Lowdon (65) a Keswick miner.
Lowdon who was employed at the Thornthwaite lead mines, was working underground, and in descending a ladder fell down what is known as "Mill" —

an inclined shaft down which ore is tipped—on to some broken metal. He was found fellow workman named Lewthwaite lying unconscious having fallen a distance of 33ft. His skull had been fractured, and death took place shortly afterwards. The inquiry was adjourned till next Tuesday for the attendance H.M. Inspector of Mines.

3rd April 1909 (Cumberland & North Westmorland Herald)

THE FATAL ACCIDENT AT THORNTHWAITE MINES

ADJOURNED INQUEST

An adjourned inquest, before Mr. E. Attar district coroner, was held at the Police Station, Keswick. on Tuesday afternoon, into the cause of death of John Lowden, miner, 65 years of age, which took place on Wednesday week, as the result of an accident. The following were the jury Messrs. J. W. Lupton, P. S. Todd, J. F. Atkinson, H. T. Pape. J. Young, J. Whittle, J. Stuart, E Bolton. J. Hutchinson, G. T. Scott, Henry Harden aud Wm. Porteous.

Mr. Beck, inspector of mines, was present, and Mr. Anthony Wilson. managing director, represented the mining company.

Robert Sanders, miner. Park View, Keswick, said that deceased had lodged at his house for the last 9½ years, and was in good health up to the beginning of winter, when he was in bed a month from sciatica. He was attended by Dr. Findlay, and after he was able to get about he went to Barrow for electric baths. When he came back the day after Christmas Day, he said he was better. He started work about a week after, and since then he had been troubled with his breathing, and frequently complained of dizzy fits, which compelled him to get of his bicycle on coming home from work, and stand a short time, otherwise he would have fallen. Witness had seen him get off his bicycle several times and lean over it as though unwell, and it was quite apparent that he was not in good health. He did not think he should hare gone on working, but he would have paid no heed if he had told him so.

Mabel Sanders, daughter of last witness, corroborated her father's evidence.

Elisabeth Reed, wife of Joseph Reed, engine man, Victoria-street, said that in a converaation she had with deceased some seven or eight weeks ago, he said he was not getting on as well as he would like to be, and sometimes a giddiness came over him so that he was like to lose his sight, and he had to catch hold of something to prevent hin falling off.

Dr. Crawfurd gave details of deceased's condition after the accident, and said he had two scalp wounds, and fracture of the base of the skull.

Arthur Lewthwaite, miner, Ladstook, said that on the 24th inst, about a quarter to two o'clock, he was working with deceased and three or four more in the mine at Thornthwaite, and they were in the act of descending a ladder from one working to another, deceased being immediately in front of him. He first heard a strange noise, followed by the sound of a falling pick. He called to the other men, and they descended other ladders until they reached No. 37 level, where they found deceased lying at the bottom of the mill. He had fallen about 46 feet, and he could see he waa seriously injured. Deceased was fully acquainted with the place, having gone up and down the ladders for the last eight or ten weeks, and ha appeared in the best of health at the time.

In reply to Mr. Beck, witness said that that morning he and other workmen had thought the ladder had better be protected, but they never mentioned anything about fencing it to any of the officials.

Mr. Wilson, the managing director, was down the mine that morning. There was plenty of wood to guard the place if they had wished. There had been some shot firing that, morning, but the smoke had all cleared away at the time of the accident.
In reply to Mr. Wilson, witness said their was always an ample supply of timber for anything that might be required, and everything asked for was always done to secure safety.
By the Foreman—The mill was not fenced. The ladder was a new one, and in good and order.
Edward Grisdale, miner, Braithwaite, corroborated, and said tbe last three men to decoend were Arthur Lewthwaite, John Lowden, and himself. Witness reached tbe bottom first, and went into a working to take some stones out of his clog. Lewthwaite came to him and said, “Has Lowden passed? He replied that be had not. “Then,” said Lewthwaite, "he has fallen down the mill.” Witness neither saw him fall, nor heard any unusual sound. The mill is a shaft for sending metal down from the workings to the main level.
Witness, in reply to Mr. Beck, said that it had been suggested that morning that wood should be put over the mill, but deceased thought it was not necessary.
Francis Emmerson, Fern Bank, another miner, gave general corroboration.
This was all the evidence and Mr. Beck said be had inspected tbe place since the accident, and everything was quite satisfactory. The ladder was better than he found in most places. As regards the mill not being protected, there was no statutory requirement, but this had now been done.
The Coroner briefly summed up the evidence, and a verdict of accidental death was unanimously returned.

In 1851, at Braithwaite, Charles Lowdon, miner, aged 70, his wife Mary 69, son George, miner, aged 32, grandsons, Charles, miner, aged 13, and John 5.
In 1861, at Braithwaite, Mary Lowdon, widow, aged 80, grandson, John Lowdon, lead miner, aged 15, grandson, Charles Lowdon, married, lead miner, aged 23, and granddaughter, Elizabeth Lowdon, hs wife, aged 18.
In 1871, at Braithwaite, John Hall, mining Engineer, aged 40, born Alston, his wife Jane aged 48 (Lowdon, married 4th quarter 1855, registered at Cockermouth) born Crosthwaite, son in law, John Lowdon, miner, aged 24, and daughter, Mary Jane Hall 14. Jane Hall died 24th February 1874.
In 1881, at Wythburn, John Hall, mining engineer, aged 50, born Alston, his wife Jane aged 60, born, Crosthwaite, daughter, Margaret Jane, dress maker, aged 24, son in law, John Lowdon, single, lead miner, aged 35. John Hall buried 30th November 1882, aged 51.
In 1901, at 2 Park View, Keswick, Robert Sanders, lead miner, aged 58, his wife Mary Jane 50, children, Annie 27, Edmond, lead miner, aged 15, Mable 10, granddaughter Winifred Sanders 7 months and John Lowdon, single, lodger, lead miner, aged 55.

21st April 1909 (Teesdale Mercury)

DEATH OF MR CHARLES E. BAINBRIDGE.
Late of Middleton-in-Teesdale.
Formerly Manager for the London
Lead Company.

The death has taken place at Acton, at the ago of 59 years, of Mr Charles Edward Bainbridge, fourth son of the late Mr R. W. Bainbridge, of Middleton

House, and younger brother of Mr W. J. Bainbridge, Holmehurst, Galgate, Barnard Castle. The deceased gentleman, who was captain of the old volunteers at Middleton, succeeded his father in the management of the London Lead Company's extensive lead-mining operations in Teesdale. On the decline of lead mining in the dale, however, Mr Bainbridge went out to superintend some mining venture or undertaking in Spain, but returned alter a brief interval, and has resided in this country ever since. He was subsequently general manager for Messrs Walker, Parker and Company, and had charge of all their works in Loudon, and at Newcastle and Chester. He leaves a family, mostly grown up. He had been in failing health for a very long time. His remains were cremated at Golder's Hill, Woking.

9th June 1909 (Teesdale Mercury)

A MAN'S HEAD BLOWN OFF AT NENTHEAD, NEAR ALSTON.

Mr F. W. Halton, Carlisle, the district coroner, conducted an inquest on Saturday, relative to the death of a man named J. R. Armstrong, who on Thursday met with a terrible death in the lead mines at Nenthead. The deceased not having been seen at the usual closing time, and wondering what could be keeping him, the foreman, Jon. Robinson, went in search, and found the poor fellow with his head blown from his body, and five fingers missing, and otherwise shockingly mutilated. Whilst agreeing that the cause was explosives, the jury returned a verdict to the effect that how the explosives were fired there was not sufficient evidence to show.

John Robert Armstrong born 1872, married Margaret Doyle, of Nenthead, 9th February 1893.
In 1891, at Spring House, Allendale, William Armstrong, lead miner & farmer, aged 47, his wife Jane 50, children, John R, lead miner, aged 20, Thomas C, lead ore dresser, aged 18, Joseph N, farmers son, aged 15, Mary H 12, and Matthew W 9.
In 1901, at Whitehall, Nenthead, Hugh Doyle, retired lead miner, aged 63, his wife Adah 60, son Hugh, lead miner, aged 28, granddaughter, Adah M

Graham 7, son in law John R Armstrong, lead miner, aged 29, born Allendale, daughter, Margaret Armstrong 32, and grandson Robert E Armstrong 5. Margaret Armstrong died 2nd qtr 1908, aged 39.
In 1911, at Whitehall, Nenthead, Adah Doyle, widow, aged 70, son Hugh Doyle, lead miner, aged 38, and grandson, Robert Edward Armstrong, labourer on dressing floor, aged 15 years.
See 13th May 1876, 14th July 1888, & 7th August 1897

12th June 1909 (Cumberland & Westmorland Herald)

SHOCKING FATALITY AT NENTHEAD

MINER DECAPITATED

Quite a gloom was cast over Nenthead on Thursday afternoon week, when it became known that a sad fatality had occurred in the Guddam Gill Mine, Nenthead. It appears that John Robert Armstrong, who was employed at the mine, failed to put in appearance at 2 p.m., the time when the men of the morning shift are released. The agent in charge, Mr. Jonathan Robinson, immediately went back into the mine, and found the man in his working, with the head decapitated from the body and several fingers blown off both hands. He was sitting near the box containing the explosives which the man use for blasting. He had apparently been preparing the charge ready for blasting, but how the explosion exactly occurred is a mystery. because no one was near at the time. Mr. Robinson immediately called for assistance, and Dr. Waters, P.C. Bell, and the mining officials were soon on the scene. His body was brought out of the mine and conveyed to the Assembly Rooms.

THE INQUEST.

The inquest was held at the Assembly Rooms, Nenthead, on Saturday by Mr. F. W. Halton, coroner for East Cumberland, Mr. Blackburn appeared on behalf of the company, and Mr. Abbott, Inspector of Mines, was present, Mr. Jonathan Tatters was foreman of the jury.

Thomas Chester Armstrong, miner Allan Heads, brother of deceased, identified the body. He last saw him alive in September when he was in good health. Deceased's wife died in Garlands Asylum a year ago. He had a house and a house keeper. He did not know of any reason why deceased should do away with himself. In cross-examination by Mr. Blackburn, witness said he did not know of any cheques having been returned dishonoured.

Charles Hymers, miner, Hudgill, said he and deceased had their bait together at 10-20 in the mine. Deceased was in his usual health, and said nothing about having lost money.—In cross-examination by Mr. Abbott, witness said deceased was accustomed to prepare his shots.

Jonathan Robinson, the underground foreman of the Browlow Hill (sic. Brownley Hill) mine, gave evidence of chatting with deceased on Thursday morning. Deceased was not depressed, but there was some trouble about a cheque which had been returned from the Newcastle branch of the Charing Cross Bank. Deceased had been going several times to Newcastle about money. On Thursday afternoon at 2-30 deceased had not come out of the mine and witness, who had not heard of an accident, went to look for him, and found him 25 yards from the working where he prepared his charge. His head had been blown off, his wrists broken, and his clothes was scorched.— Cross-examined by Mr, Abbott, witness said the cartridges were of gelatine dynamite. Deceased had prepared two holes, and witness thought he had been fixing the

cartridge with his hands over his chest. An extra twist might explode the cartridges.—Replying to Mr. Blackburn, witness said it was not usual to nip caps on the detonator with the teeth, but he said that the mark on the cap might have beam made with the teeth.
John Emerson Elliot, who worked shift and shift about with the deceased, said that the cartridge might have exploded in deceased's hand.
Sarah Elisabeth Peart, deceased's housekeeper, said he had not appeared worried. Evidence as to the condition of the body when found was given by P.C. Bell.
The jury found a verdict that the deceased died as the result of an explosion of explosives, but that there was not sufficient evidence to prove how the explosion was caused.
The interment took place on Sunday in Nenthead Cemetery, the Rev. J. Pinchen officiating. The funeral procession was headed by the members of the Independent Order of Rechabites, of which body deceased was a member and prominent worker. An impressive address was given at the graveside by Mr. Jonathan Rutherford. The coffin was of solid oak, with nickel silver handles, and the breastplate bore the inscription "J. R. Armstrong, died June 3rd. 1909, aged 38 years."
Two beautiful wreaths were laid on the grave, one inscribed "A token of respect from the Nenthead Fanciers' Association," and the other "In loving memory of a brother deceased, from the members of the Independent Order of Rechabites, Heather Blossom Tent, Nenthead."
Deceased was a widower, and leaves an only son to mourn his loss. He was well- known and highly respected.

Government Inspectors of Mines Reports
Report of Mr Bain
7th July 1909, Carricks (Ironstone) Durham, Weardale Steel, Coal & Coke Co. Ltd.

FATAL ACCIDENT REPORT CONCERNING THE DEATH OF THOMAS WILKINSON, MINE FOREMAN, AGED 67.

Two holes had been drilled, charged and stemmed in the side of an inclined road, the intention being to shoot off some side to make room for a double way on the incline. Both of the holes were about 2 feet deep and the distance apart about 3 feet. Both were charged with gelignite – dynamite, and the firing was by means of a fuse. The man killed, a foreman at the mine, lighted the fuse of the hole furthest inbye, and then retired down the incline and round a corner, some 16 to 18 yards, to a place of safety. The shot exploded and the man said to his mate "I will now light up the other," and walked briskly up the incline. He no sooner arrived at the point where the 2nd shot was than it exploded, causing injuries from which he died on 23rd July.
In 1891, at St John's Chapel, Thomas Wilkinson, ironstone miner, aged 49, born Allendale, his wife Maria aged 45, born Stanhope, daughters Jane A. 22, Mary 19, and Harriet S. 7. In 1901, at St John's Chapel, Thomas Wilkinson, foreman in ironstone mine, aged 59, his wife Maria aged 55, and daughter Harriet S. aged 17.

23rd October 1909 (Cumberland & Westmorland Herald)

FATALITY AT NENTHEAD MINES.
KILLED BY A BROKEN WHEEL.

Quite a gloom was cast on the village on Friday morning, when it became known that a sad fatality had occurred in the Rampgill Mine, Mr. John Stephenson Archer, who was engineman, having been killed while attending to the large air-compressing plant which the company had installed in the Rampgill Mine. The compressors are propelled by means of a Pelton wheel broke, a part of it hitting pressure. The deceased was on the night shift, and it appears that on hearing that something was wrong he had rushed to the valve to stop the machinery when the Pelton wheel broke. A part of it hitting him, as the wounds on the head and other parts of the body plainly indicated.

As deceased failed to put in an appearance at the end of the shift on Friday morning search was made and he was found dead near to the valve which he had partly managed to close. The body was taken out of the mines and conveyed to the Assembly Rooms.

An inquest was held on Monday before Mr. F. W. Halton, coroner for East Cumberland. Mr. Bendall, from the office of Messrs. Saul and Lightfoot, Carlisle, was present on behalf of the Company, and Mr. J. B. Atkinson, the Chief Inspector of Mines for Northumberland and Cumberland, also attended. The evidence showed that deceased descended the mine at 6-15 on Thursday night to superintend the machinery which included a Pelton wheel driven by water. The water descended from a great height into buckets on the outside of the wheel, which drove an air compressor used for drilling purposes. On descending on Friday morning e workman named John Joseph Bainbridge, the day shifts man, could not find the deceased, and noticed that the water which drove the wheel was lying all over the place. He went back and got assistance, and having stopped the flow of water found the deceased lying close to the valve which shoots off the water, with a jagged wound on the back of his head. Archer was quite deed. Further evidence showed that the wheel had broken, and that part of it was lying three or four feet away from the deceased. There was no evidence to show how the wheel, which is 5½ feet in diameter, had been broken.

The jury returned as their verdict that deceased had been "Accidentally killed by the breaking of a Pelton wheel whilst following his employment."

The interment took place on Monday when a large number of deceased fellow workmen and friends attended to pay their last tokens to one who was highly respected and esteemed in tea locality. The Rev. H. Kenyon officiated. Much sympathy is expressed for the relatives in their sad bereavement, especially to the young widow (nee Miss Florrie Good fellow), whom he married only four months ago. Deceased was 35 years of age, and has been for many years a prominent member of the Nenthead Brass Band.

Government Inspectors of Mines Reports
Report of Mr J. B. Atkinson
15th October 1909, Nenthead (Lead & Zinc) Cumberland, Vieille Montagne Zinc Co.

FATAL ACCIDENT REPORT CONCERNING THE DEATH OF JOHN STEPHENSON ARCHER AGED 35, ENGINE MAN.

Fracture of a Pelton Wheel.

He had descended the shaft to superintend the machinery. He was found with a jagged hole in the back of his head. A Pelton wheel 5.5 feet in diameter used to power an air compressor had broken.

WEST ALLENDALE

On Easter Saturday Mr Alexander Henderson of Keenley was married to Miss Phylis Nattrass daughter of Henry Nattrass of Lightshield at the parish church. We understand Mr & Mrs Henderson leave for Alberta shortly. It is understood three or four more residents in West Allen leave for Canada before the end of May.

9th APRIL 1910 (Cumberland and North Westmorland Gazette)

PATTERDALE

A miner, Alexander Cummins, a native of Millom, was killed by a fall of rock at the Greenside lead mines, Patterdale. He was sinking a shaft with some other men when a piece of rock fell and struck him on the thigh, crushing his legs and pinning him against the wall. One of his mates, Thomas Coward, had a narrow escape when the rock grazed his shoulder. Mr. Cummins died while on the way to the level mouth.

2nd April 1910, (Lakes Visitor & Keswick Guardian)

FATAL ACCIDENT AT PATTERDALE.

On Monday, between six and seven o'clock, a sad accident happened at Greenside Lead Minas, Patterdale. Alexander Cummins, a single man, belonging tn Millom, was sinking a shaft, and was raising water preparatory to firiing a fuse. A piece of rock, which weighed 25cwts. to 30cwts., fell from the roof onto Commins, pinning him to the gronnd. He was alive when released, but died before he could be got to the level, a mile away. A curious feature of the accident was that Cummins was not working in his ordinary turn. He should have been on another shift, but a miner named Cowin baring a week-end off, Commins took his place.

On Thoreday afternoon Mr R. W. Slack held an inquiry into the circumstances of the accident.

Mr W. H. Borlase, manager of the mine, said that last Thursday he inspected the place in company with other officials, and as a result he ordered sinking to cease for the present. Attention was called to a piece of rock on the hanging side of tbe shaft. It was ordered to be taken out, being considered unsafe, and Cummins was there when witness gave the order. The men had been told about it and warned a week before. This was the only time such an accident had happened at Greenside in hie experience if 29 years.

Thomas Coward, who was working with deceased, gave evidence generally bearing out that by Mr Borlase as to the condition of the shaft. He had examined the place two hours previously very carefully, and all the four men on the shift, including Cummins, agreed that it was perfectly safe. When deceased was liberated from beneath the rock which had pinned him to the bottom of the shaft, it was found that his right thigh was smashed, and both lege were broken in three places. The men's requirements as to materials for securing their safety were always fully met by the company.

The jury returned a verdict of "Accidental death," adding as a rider: "We are of opinion that the roof of the chamber should be carefully inspected and made secure before sinking operations are commenced," and Mr Borlase said the request would be observed.

In 1901, at 61 Hope Street, Millom, Alexander Cummins, iron ore miner, aged 55, born Ireland, his wife Susanna 46, born Ireland, children, William, labourer, aged 18, John 13, Robert 10, James 8, Mary Ann 4, and father in law, John Skillen, widower, labourer, aged 65, born Ireland; the children were all born in Cumberland.

31st May 1910. (London Gazette)

In the County Court of Northumberland holden at Alston. Plaint No. 26

In the Matter of the County Courts Act, 1888, and in the Matter of the estate of MARY WALTON, Deceased.

Joseph Bond v. Joseph Bond, John Thomas Hill, Christiana Gotts, Mary Jane Worthy, John Bond and Thomas Bond.

NOTICE is hereby given, that by an Order made by His Honour Judge Steavenson, the Judge of the said Court, dated the 22nd day of February, 1910, it was ordered that the following enquiry be made, namely: —

An enquiry who are the persons entitled by virtue or according to the Statute of Distribution to the estate of the deceased (Mary Walton more particularly hereinafter named) living at the time of her death, and whether any of them are since dead, and if so, who are their legal personal representatives.

Now, therefore, all persons claiming to be the next of kin of the above named Mary Walton, late of Holmes foot, Nenthead, Alston, in the county of Cumberland, Widow, deceased, who died intestate on the second day of November 1908, and of whose estate letters of administration were granted on the 25th day of November, 1908, by the Carlisle District Registry of the

Probate Division oft His late Majesty's High Court of Justice, to Joseph Bond, of 46, Railway-terrace, Willington, in the county of Durham, Cycle Dealer, the above named plaintiff, as one of the next of kin of the said deceased, are required, on or before the 30th day of June next, to furnish to Messrs. Chater and Atkinson, of Alston, aforesaid, Solicitors, a statement of their relationship to the deceased, supported by certificate or other satisfactory evidence.

The above named Mary Walton was 81 years of age at the time of her decease, her maiden name was "Hill," the name of her husband was Robert Walton, and she was a daughter of James and Margaret Hill, of Nenthead aforesaid. Dated this 27th day of May 1910.

EDWD. BLACKBURN, Registrar of the said court.

7th June 1910 (Sunderland Daily Echo & Shipping Gazette)

THE SPEAKER AS A STOKER.

The Speaker, who has been spending the latter part of his holiday in Cumberland, had a novel experience on Friday.

Taking advantage of his visit to friends at Alston, the managers of the Vieille Montaigne Zinc Company whose works at the remote village of Nenthead on the borders of Cumberland and Durham, invited Mr Lowther to inaugurate their new boilers. These have been put down at the mines for the purpose of driving very extensive and elaborate ore dressing machinery, which, has cost over £42,000. The fires had been lighted with wood, and were awaiting the supply of coal, which the Speaker found close by the furnace ready for use.

Mr Lowther set to with a will, and having a smart way in handling the shovel, he, with a steady swing, sent the fuel exactly to the proper place. Experienced stokers admitted that "no practiced hand at stoking could possibly have performed the work in better style."

12th July 1910 (North Star, Darlington)

LEAD MINE ACCIDENT IN WEARDALE

A fall of earth took place yesterday at Burtree Pasture Lead Mine, near Cowshill, whereby a young man named Joshua Lowe Peart was hurt. Between four and

five hours elapsed before he could be released, in spite of the utmost efforts of willing workers. Dr. Wrench was in attendance. Apparently, no bones are broken, but Peart suffered severely from the shock.

Joshua Lowe Peart born 2nd qtr 1873, son of John and Mary Hannah Peart (Lowe married 1870.

Mary Hannah Peart died 1st qtr 1891, aged 41, at Weardale.

In 1891, at Wellhope, Weardale, John Peart, widower, lead miner & farmer, aged 51, children, Edward, lead miner, aged 19, Joshua L., lead miner, aged 17, John 13, Phoebe 11, Laidler 9, Jacob 7, and Hannah 4.

Joshua Lowe Peart, married Jane Golightly 1st qtr 1898, registered at Weardale

In 1901, at Copt Hill, Heathery Cleugh, Weardale, Joshua Lowe Peart, Whin stone quarryman, aged 27, and his wife Jeanie 26.

In 1911, at Heathery Cleugh, Wearhead, Joshua L. Peart, lead miner, aged 37, his wife Jeanie 36, and nephew, Leonard Madgen 8.

Joshua L. Peart died 4th qtr 1928, aged 55, registered at Weardale.

12th July 1910 (Lancashire Evening Post)

LOSS OF A SON.
MILLOM MOTHER SUES PATTERDALE MINING COMPANY.
AGREEMENT AT PENRITH COUNTY COURT.

A compensation case came before Judge Steavenson at the Penrith County Court, yesterday, when Susannah Cummings, Millom, sued the Greenside Mining Company, Patterdale, for £200 for the death of her son, Alexander Cummings, who was killed in the mines on March 28th last. Mr. Lightfoot, Carlisle, appeared for the applicant, and Mr. C. H. Allan, Penrith, represented the respondent company. Susannah Cummings, in her evidence, said she was a widow in her 60th year. Her family, in addition to grown-up sons, included a boy and girl at home. While the deceased son worked at Greenside he assisted her contributing an average 10s. a week in sums varying between 30s. and 5s. Cross-examined; Witness said her son sent money during a period he was working on the Penrith pipe-track.

Robert Cummings, a brother of deceased, said was formerly employed by the Greenside Company, and spoke to writing letters for his brother, in which he enclosed sums of money to the amount stated. — William Cummings, Cleator, gave similar evidence.

Mr. Allan, for the company, said they had no desire anything but what was fair and reasonable. The claim in the first instance was for 14s. 3d. per week, but that had since been reduced to 10s. a week. Even that sum he could not admit. There was no satisfactory evidence that 10s. week had been paid, and he could prove that it was impossible that the deceased could have sent anything like that sum home. During one period when he was working on the Penrith pipe-track his earnings worked out 15s. 2d. a week, and he was paying out of that 12s. for his board and lodgings. His earnings at Greenside at another period averaged 19s. 5d. a week.

His Honour said the evidence so far was of a very flimsy character, and at present he should only be able to give a very nominal sum. He suggested that the parties should come to an agreement. The two solicitors conferred, and Mr. Allan, behalf of the company, said they had agreed to make the mother a present of £50, and that had been accepted. His Honour said be desired say

that the offer was a very handsome one, and Mr. Lightfoot had done very wisely to accept it. He divided the money as follows:—To the mother, £31 10s., to be paid to her at the rate of 2s. 6d. a week until exhausted and to the child, Mary Ann, £18 10s., to be paid to the mother at the rate of 5s. a week.

16th July 1910 (Hexham Herald)
Deaths
At Westgate, Weardale, on the 7th inst, Mrs Bolton the beloved wife of Mr Anthony Bolton (late of Nenthead) aged 66 years.
William Bolton, born 27th August 1804, baptised at Staindrop, Durham 9th December 1804, parents Anthony and Margaret (Miller, married 6th September 1794, at Staindrop) Bolton.
William Bolton, married Hannah Dobson, 24th April 1826, at Middleton in Teesdale.
In 1841, at Red Banks, Dufton, William Bolton, lead ore, smelter, aged 35, his wife Hannah 35, children, Thomas 13, Mary 9, Ann 6, and William 1.
In 1851, at Dufton, William Bolton, lead ore smelter, aged 47, his wife Hannah 48, children, Thomas, lead ore smelter, aged 23, Mary 19, Ann 17, William 10, Anthony 6, Hannah 3, and visitor, Samuel Parkin, lead ore smelter, aged 18.
In 1861, at Dufton, William Bolton, lead ore smelter, aged 56, born Staindrop, Durham, his wife Hanah 58, born Weardale, children Mary 29, William, lead ore miner, aged 20, Anthony, lead ore miner, aged 16, and Hanah 13, all born at Dufton. In 1871, at Hilton Village, Westmorlan, William Bolton, lead ore smelter, aged 66, his wife Hannah 68, son William, smelter, aged 30, and daughter Mary 39.
William Bolton died in 1874, at West Ward, Westmorland, aged 70.
Hannah Bolton died 3rd quarter 1875, at East Ward, Westmorland, aged 72.

In 1871, at Stanhope, Anthony Bolton, foreman at lead works, aged 26, born Dufton, and his wife Rebekah aged 26, born Leeds, Yorkshire.
In 1881, at Nenthead, Anthony Bolton, manager of lead works, aged 36, his wife Rebecca, 36, sister Mary Bolton aged 49, and domestic servant Elizabeth Erwine aged 15. In 1891, at Ivy Cottage, Nenthead, Anthony Bolton, manager of lead smelting works, aged 46, his wife Rebekah 46, sister Mary Bolton, living on own means, aged 59, nephew John George Bell 12, visitor Laura Wilkinson 13, and domestic servant Jane Hopkin aged 18. In 1901, at Ivy House, Anthony Bolton, assistant manager at mine, aged 56, his wife Rebekah 56, niece Ann E Sowery aged 26, nephew John G Bell, engine fitter, aged 22, and housemaid Mary Gowland aged 16.

9th September 1910 (Shields Daily News)
FIND OF ANCIENT MINERS' TOOLS. —An interesting find of wooden hammers and shovels has been made at an old lead mine known as Crawley level, at Stanhope, now being: worked for spar, etc., by the Weardale Steel and Coal Co. They are in possession of Councillor J. Crawhall, J.P., at the offices of the company, at the Old Furnace, Stanhope. Crawley vein records indicate that it was worked for lead 900 years ago, but the discovery of wooden tools infers a much greater antiquity than that.

28th October 1910 (London Gazette)

Re JOHN WILSON WALTON WILSON, Deceased.

Pursuant to the Act of Parliament, 22nd and 23rd Vic, c. 35.

NOTICE is hereby given, that all creditors and other persons having any claims or demands against the estate of **John Wilson Walton Wilson**, late of Shotley Hall, in the county of Northumberland, Esquire, who died on the 14th day of April, 1910, and whose will was proved in the District Probate Registry at Newcastle-upon-Tyne, on the 13th day of October, 1910, by William Collings Sample, Robert O'Donelan Ross-Lewin and Anne Cecilia Elfgyva Walton Wilson (the executors therein named), are hereby required to send particulars, in writing, of their claims or demands to as, the undersigned, the Solicitors for the said executors, on or before the 1st day of December, 1910, after which date the said executors will proceed to distribute the assets of the said deceased amongst the persons entitled thereto, having regard only to the claims and demands of which they shall then have had notice; and the said executors will not be liable for the assets of the said deceased, or any part thereof, so distributed, to any person or persons of whose claims or demands they shall not then have had notice.—Dated this 28th day of October 1910.

GIBS0N. PYBUS and PYBUS, 43. Mosley-street.

Newcastle-upon-Tyne, Solicitors for the said Executors.

ALSTON

AT OLD HAGG'S MINE, NENTHEAD, a serious accident has befallen a boy named John Wright. He was caught by some machinery and sustained a fractured skull and a broken leg, whilst one hand was badly damaged, and his arm had to be amputated. After receiving medical assistance he was conveyed to the hospital, where he lies in a precarious condition.

22nd October 1910 (Hexham Herald)

WEARDALE

Grave fears are entertained respecting the safety of two Weardale emigrants in South Africa; Mr Jonathan Martindale and Mr Joseph Ralph Martindale, who have been prospecting for gold in Rhodesia these last two years. They wrote home to friends in Weardale every month, but nothing has been heard of them since June 17 of this year, four months ago. They were in the habit of taking their gold to Bulawayo every month, sometimes £300 or £400 worth and their Weardale friends entertain grave fears for their safety.

PETROL LOCOMOTIVE

An order has been received by Messrs. Ironside, Son, and Dyckerhoff from South America for five petrol driven locomotives with single cylinders of approximately 7¾ in. bore by 10½ in, stroke, giving 12 h.p. The normal speed is about 300 r.p.m. but when throttled they will run down to 110 r.p.m.
Two gears are provided giving about 2¾ and six miles an hour at normal engine speeds. Several of these engines are now at work in Great Britain. In one instance the locomotive operates underground in the Rampgill mine near Alston Cumberland, for a distance of nearly three miles in a narrow level, taking in 25 empty wagons, and bringing out the same number of full ones with a. gross tonnage of about 40 tons. Grades of as much as 1 in 66 are encountered, and there are reversed or "S" curves. The locomotive has replaced at least four horses, and their drivers. … the consumption of petrol is about six gallons in nine hours.

13th April 1912 (Hexham Herald)

WEARDALE

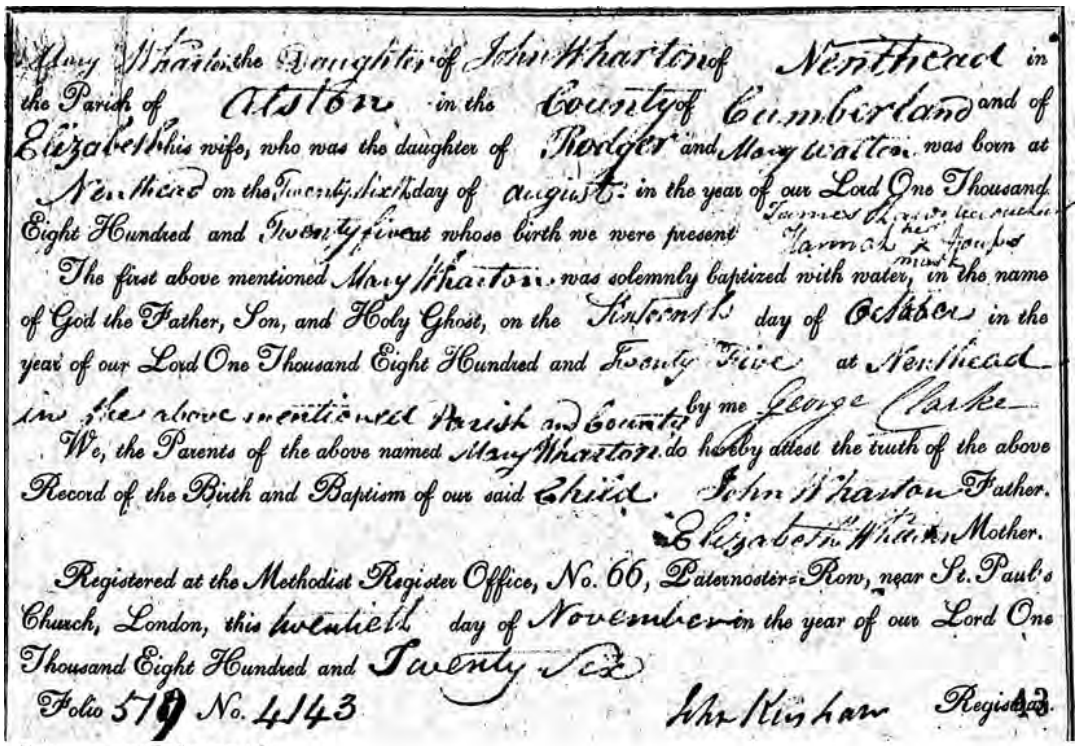
The limestone quarrymen of Weardale at Stanhope, Frosterley, and Westgate, have got to work again this week after an enforced idleness of about five weeks through the coal strike. There are about 1000 of them altogether at the three places named. There has been much suffering from privation and loss of wages, and the poor quarrymen get nothing.

17th April 1912 (Manchester Democrat, Iowa)

DEATH OF MRS. MARY EMERSON

Miss Mary Wharton was born in Nenthead, Cumberland county, England, August 26, 1825 and died at her home in this city Wednesday afternoon, April 10, 1912.
She with her parents emigrated to this country at an early day, settling at Dubuque, Iowa. On December 23, 1841 she was united in marriage to Franklin Emerson at Dubuque, Iowa, and in 1845 they moved to Clayton county, this state, and in 1852 moved to this county, locating on a farm in Richland Township. In 1877 they moved to this city which place has since been her home. Her husband died in this city in 1901.
Mrs. Emerson was a member of the Congregational church and was a consistent Christian woman and a regular attendant until her health became such that she was unable to attend. She was a kind and affectionate wife and mother and leaves a large circle of friends who join with the bereaved relatives in mourning her death.

She is survived by five sons: H. E. Emerson of Denver, Colorado; Frank W. Emerson, of Stockson, California; Henry H. Emerson of Camas Montana, and George D. Emerson of Telluride, Colorado.
The funeral services were held from the home Monday morning, Rev. Moore, of the First Congregational church assisted by Rev. Ensign, of the Presbyterian church, officiating. Interment was made in the Pleasant Valley cemetery. …



Mary Wharton the Daughter of John Wharton of Newhead in the Parish of Alston in the County of Cumberland and of Elizabeth his wife, who was the daughter of Rodger and Mary Watson was born at Newhead on the Twenty sixth day of August in the year of our Lord One Thousand Eight Hundred and Twenty five at whose birth we were present James Lowes Farmer & Grocer Farmer & Grocer

The first above mentioned Mary Wharton was solemnly baptized with water, in the name of God the Father, Son, and Holy Ghost, on the Sixteenth day of October in the year of our Lord One Thousand Eight Hundred and Forty Five at Newhead in the above mentioned Parish and County by me George Clarke

We, the Parents of the above named Mary Wharton do hereby attest the truth of the above Record of the Birth and Baptism of our said Child John Wharton Father.
Elizabeth Wharton Mother.

WEARDALE

The death of George Proud, a Frosterley man is announced from America. He at one time was well known throughout Weardale as a Primitive Methodist local preacher.

11th June 1912 (Carlisle Journal)

SWISS AND ENGLISH AT ENMITY.
POLICE COURT PROCEEDINGS.
THE MAGISTRATES' WARNING.

On Friday, at Alston Police Court, seven Swiss miners employed by the Vieille Montagne Zinc Company at Nenthead were charged at the instance of Superintendent Whiteside, Brampton with making use of violent conduct so as to cause a breach of the peace at the Waggon and Horse Inn, Nentsbury, about a mile from Nenthead, on the night of Saturday, May 4th. The names of the defendants were: — Alses and Joseph Fenetz, Joseph and Aloes Kallbearmatten, Abergam Emsam, and Moretz and Semon Zurbrugger.

Mr. J. B. Walton, Chairman of the Bench, and the other magistrates present were Mr. R. Yielder, Mr. G. W. Storey, Mr. W. Holmes, and Mr. W. Ward.

Mr. Herbert Bendle, solicitor, Carlisle appeared for the defence, and pleaded not guilty.

Bernard Kruger, foreman at the mine, was present to act as interpreter, the defendants being unable to understand or speak English.

Superintendent Whiteside in opening the case for the prosecution, said the defendants were Swiss miners residing at Nenthead and working for the Vieille Montagne Company. About 8. 30 p.m. on May 4th a number of local men were in the Waggon and Horses Inn, Nentsbury, kept by Mr Teasdale, having a bit of a sing song, and it was alleged that these Swiss miners entered the same room, and that one of the natives was knocked over. When an explanation was asked from one of the Swiss said, “You fight,” and there was a general melee in the room. Though the disturbance only lasted a short time it was fairly hot, for the lamp was broken, and the glasses and some of the furniture were smashed. When the Swiss got outside the house, glasses, parts of chairs and missiles were thrown back into the lobby. It was also alleged that bottles had been thrown, a civilian being struck on the head and rather badly cut. The police were sent for, but before their arrival at the Inn these men had gone. Inquiries were made, and these proceedings taken. The landlord of the Inn might have prosecuted these men for malicious damage, but he brought that case had been settled. This was a rather a serious matter, however, and the particulars having been submitted to the Chief Constable, these proceedings had been ordered under the County Council bye-laws.

Arthur Dixon, carter, Island Cottage, Nenthead, deposed that Saturday, May 4th, was the day following the pay day at the mine. On the evening named he was in the parlour at the Waggon and Horses Inn about 7. 30 p.m. About nine men were there. The Swiss miners came in at 8. 30 when a “little bit jollification” was going on— a gramophone, singing, and dancing. He identified all the defendants. When the Swiss came in one of the men in the Inn was dancing. The Swiss ordered refreshment and were served. After a little while witness was on the floor giving a “little bit dance.” One of the Swiss shoved him over, Emsam, coming behind him and pushing him over. Witness fell down beside the fireplace, his head hitting the fireplace. He got up and asked why it had been done. Emsam replied “Not me.” After that one of the Swiss (Emsam) said, “You fight.” That was after a man named Benson said it was Emsam that had shoved witness over. There were several said, “You fight,” and then there was a general scuffle. (Laughter) Glasses and bottles were flying. All the Swiss were on their feet. The lamp was broken, so that they were in darkness. The

Swiss were ordered out, he believed. They went out of the door eventually. Out in front he could here railings being torn down. A stanchion and part of a chair were next thrown inside the house. Superintendent Whiteside—Who were they directed at?
Witness—Anyone who was astir (Laughter.) One man came into the house with his head cut. This man had not been in the room but had left the house by the back.
Cross-examined—They were all connected with the mines.
Mr Bendle—Then it was English v. Swiss?
Witness—Yes I suppose so. Witness added that he was performing a dance for the benefit of the company there.
Mr Bendle—You're an expert at it. (Laughter.)
Witness added that he did not see Zurbrugger do anything. Only Tatters and he danced. He was told by a friend that it was Emsam who shoved him over.
Mr Bendle—Did you ask him quietly if it was him?
Witness—Yes
The Clerk (Mr D. Main)—Though you had a sore head (Laughter.)
Mr Bendle—How did the chair get outside the house?
Witness—I don't know. I did not see anyone throw the furniture out of the house. He and the others did not follow the Swiss out of the house to give them "beans." He had not known the defendants long. They had never been in company before this night.
By the Chairman—There had been no friction between these men before.
Isabella Stout, servant at the Waggon and Horse Inn, Nentsbury, deposed that she was waiting at the time on the customers. She new the defendants by sight. They came in at 8. 30 sober, and ordered drinks. Six had a glass of beer and one a "lemon dash." Four or five local men were in when the Swiss arrived. Tatters, one of the local men, started dancing. One of the defendants went to Tatters, and said something in Swiss and pushed him. Dixon next gave a dance. One of the Swiss pushed Dixon over—she did not know which it was. Dixon was pushed into the fireplace. Dixon asked who "Done it." One of the Swiss denied that it was him. Benson said it was. Benson then got a blow on the face from one of the Swiss. A Swiss seized the lamp and banged it on the floor. They commenced to throw glasses about when the room was in darkness.
Superintendent Whiteside—Did you think it was time to clear out?
Witness—I could not get out (Laughter.) Someone said it was time to send for the police and then the Swiss began to break up the railings outside. Before the disturbance no one had spoken to the Swiss.
Cross-examined—The Swiss often came to the Inn. On this night all the people—the dancers too—were quite sober. She understood that one of the Swiss protested against what Tatters was doing. She did not see Tatters jump against Zurbrugger. None but the Swiss threw any glasses about. More people came into the room when the "fun" started. The room would hold 30 people, but there were only four in when the Swiss arrived, and three came in latter.
Mr Bendle—Then they would be about evenly matched—seven to seven.
Witness added that she did not hear any of the English talk about fighting, but they were all talking together (Laughter.)
The Chairman—Did you see any chairs thrown back into the house?
Witness—No, only part of the railings.
Superintendent Whiteside—How many glasses were broken?

Witness—Twenty or thirty.
The Chairman—Let us hear now what took place outside the house.
William Benson, miner, stated that he lived at the Waggon and Horse Inn, Nentsbury. He remembered the disturbance. Glasses and the lamp were smashed. After the Swiss got outside bottles, glasses, railings and a chair were thrown into the house by the defendants, who were the only people outside at the time so far as he knew.
Cross-examined—He was in the house and did not see who was outside.
John Forster, miner, Wellgill, Nenthead, deposed that he was in the kitchen when the noise started in the parlour. He went to the backyard and then returned. The Swiss were then at the front door. A little bit later he left to go home. Three bottles were thrown at him on the road. The third bottle struck him on the eye. His head was cut. He saw the defendants and shouted, asking if they knew what they had done. It was dark. He made up to them, and one of them struck a light. He recognised four of the defendants who made off. Others were there at the same time. On the Monday one of the defendants admitted there were six of them. No Englishman was on the road at the time the bottles were thrown. He had to go to the doctor to have his wound stiched up.
Cross-examined—He could not see who pulled the railings down. It was one or two of the defendants—he could not tell which—who threw the bottles at him. No one else was on the road at the time to do it. The bottles came from the direction of the defendants. Two of the defendants could speak English quite well.
Joseph Spottiswood, miner, Garrigill, who was at the Inn, deposed that he heard the disturbance while in another room. He saw all the defendants there. While he was going through the passage half a chair came in (Laughter.)
Mr Bendle—You did not see who threw it
Witness—No, I saw men outside, that is all.
Mr Bendle—Well, they might have been the magistrates. (Loud laughter.)
This was the evidence for the prosecution.
Mr Bendle submitted that there was no case for his clients to answer in regard to what occurred outside.
The Clerk—You had better go on, I think. The bye-laws say “within hearing of the highway.”
Mr Bendle then said that the dancers bumped against the Swiss, and that caused the trouble. His clients bumped back in self-defence, and then the quarrel began. His clients were not the aggressors. There was prejudice in the district against the importation of foreign labour into the mine, and he asked the Bench to take the view that this matter arose because of that feeling of jealousy. The defendants, he was told, were strangers in a strange land; they were persecuted and annoyed by the local miners; and he hoped the Bench and the police would protect them. He asked the Bench to dismiss the case, taking into consideration the consequences that might ensue if these men were convicted.
Bernard Kruger, manager of the mine, stated that most of the defendants had been in Alston a few months. They were men of good character and necessary for the carrying on of the mines.
Abergam Emsam, one of the defendants, giving evidence in German through the interpreter, deposed that he and his companions went to the Inn together at 8. 30 p.m. on May 4th. There were 12 to 15 Englishmen there in the same room. Tatters, one of the English was dancing, and bumped against some of them,

flying right through a line of Swiss. Tatters was about half drunk, but e must have bumped them intentionally. The next dancing was across a broomstick. The bumping continued, once against witness. Someone made a remark about he and his friends being"(something) Switzermen."
The Clerk—Then he knew what that meant. (Laughter.)
Witness, continuing, said one of the English put his fist under his (witness's) nose. That was, he thought the witness Benson. Witness was struck; then there was a general mix up; and some of the English showed fight. Glasses were thrown, but it was dark, and no one could see who threw them. He and his companions left the house, but threw nothing into the house. Stones were thrown at him and his companions, but they did not throw any back. He never saw any bottles thrown at Forster.
Cross-examined by Superintendent Whiteside—They all went out of the Inn together except Moretz Zurbrugger, who stayed behind. He knew nothing about the smashing of the railings. A man spoke to them later, but it was dark and he could not see ho it was. After that they all went away as soon as possible.
Other of the defendants gave similar evidence and one admitted in cross-examination by Superintendent Whiteside that they paid for part of the damage to the railings because they thought that by doing so they would keep out of contact with the police. They did not pay for any damage done inside the house.
Mr Bendle—The Englishmen pay for that. (Laughter.)
The Bench dismissed the case against Moretz Zurbrugger, but fined the other defendants 2s. 6d. and costs each.
The Chairman said the Bench very much regretted that this incident had occurred. They were of opinion that the Englishmen had not been to blame in this matter, and that probably the inability of the foreigners to understand the English language had led them into this trouble. They were dealing with the matter as leniently as they could, but if another one of similar nature occurred they would have to take a more stringent view. The Bench wished to thank Mr Kruger for the assistance he had given, and also Mr Bendle, who had conducted the defendants' case admirably.
The fine and costs amounted to £1 1s. 9d. each.

17th August 1912 (Hexham Herald)

INQUEST AT NENTHEAD

MYSTERY OF AN UNEXPLODED CHARGE

On Monday afternoon an inquest was held at Nenthead by Mr F. W. Halton, coroner for East Cumberland, concerning the death of Joseph Whitfield, miner, 21 years of age. Mr Atkinson, chief inspector of mines for Northumberland and Cumberland was present.
Evidence of identification was given by Adam Hewitson who stated that the deceased had been in the employment of the Vieille Montagne Zinc Company since he was 13 years of age, and that he saw him on Friday night before he went to the mine.
In reply to Mr Atkinson witness said that deceased finished his shift at two o'clock on Friday morning and went back at ten o'clock at night.
Jacob Richardson deposed that at ten o'clock on Friday night he saw the deceased who was working on another level. Two men named Adamson and Emmerson came forward and found the deceased lying in the working dead, with a severe injury to his head and injured all over his body. The drill was

beside him but witness found no explosive substance near him. Witness was of opinion that deceased had been killed by an explosion.
In reply to Mr Atkinson witness said that the air pipes and water pipes working the drill were still on as in use.
Adam Anderson deposed that he was with the last witness when the deceased was found and in reply to Mr Atkinson gave information as to the firing of shots and what was done in case of misfiring.
Replying to a juror witness said that it was possible that some displaced mineral might have covered up one of the blasting holes.
J. J. Robson stated that he had met the deceased outside the mine at 10 o'clock, when deceased was going for his shift. He asked him if all the blasting in the holes had exploded, and he replied that he thought they had. The deceased had drilled the holes himself and then charged them.
Norman Emmerson deposed that he was on the same shift as deceased and went on at 10 o'clock on Friday night. He worked with the deceased and both examined the face of the working. They came to the conclusion that all the shots which had been put in by them in the previous shift had exploded, as the face was squared. Witness was of the opinion that the deceased had drilled into one of the unexploded charges.
Herr Rudewald manager of the mines, in reply to the coroner, gave the assurance that in future the foreman should go to examine any miss-shots before further work took place. He also stated that they found that no part of the drill that the deceased had been using was in any way damaged, but that a scraper used for the taking stuff out the blast holes was twisted and broken, which rather pointed to the fact that deceased had been trying to get "tamping" out.
The jury found that the deceased died as the result of an explosion accidentally caused by gelatine dynamite.
See 19th June 1869.

4th October 1912 (Millom Gazette)
LEAD MINING IN LAKELAND. The great increase in the price of lead has turned attention to the number of mines in she Lake District which are lying idle for want of capital to develop them. A German firm have sent representatives to inspect the Threlkeld lead mine at the foot of the Blencathra Range of mountains, and the water is now being pumped out of the mine. It is hoped that the mine will be purchased, and the industry re-established in the village of Threlkeld.

26th October 1912 (Hexham Herald)
Deaths
At Wellgill Villa, Nenthead, Cumberland, Fanny Hornsby, relict of the late William Lee Hornsby.
See 16th November 1864, 21st November 1874, 7th April 1877, & 6th April 1901.

7th November 1912 (Shields Daily News)

HEAD BLOWN TO PIECES.
SHOCKING DEATH THROUGH
PUTTING DETONATOR IN MOUTH.

A shocking fatality is reported from Laxey, Isle of Man. Matthias Cowley, 21, a miner working in Great Laxey silver and lead mines, was engaged in blasting operations, and for convenience, it is surmised, placed the detonator used for firing the dynamite cartridge in his mouth. The detonator exploded, blowing the unfortunate man's head to pieces. He was to have been married yesterday.
The inquest was opened yesterday by Mr J. S. Gell, coroner, and adjourned after evidence of identification had been given to allow of the attendance of the Government Inspector of Mines.

16th November 1912 (Hexham Herald)

WEARDALE

There are 26 cases of Scarlett Fever in the Weardale New Hospital at Stanhope, all of whom are children, mostly school children.
All the Stanhope schools are now closed in consequence.

25th January 1913 (Hexham Herald)

WEARDALE

Two very sudden deaths occurred at Stanhope during the week. William Pattinson, quarryman, 60 years of age was found dead in bed, supposed to be heart failure. Mrs Emma Tweddle, Market Place, Stanhope died on Tuesday morning after a few minutes illness, supposed to have been stroke, aged 50.
Jonathan Atkinson, quarryman, Stanhope, was taken to Newcastle Infirmary on Tuesday to have an eye taken out which had been injured at work.

Thomas Pattinson married Margaret Heatherington, 17th November 1810, at Stanhope.
In 1841, at Lane Side, Forest, St John's, Stanhope, Thomas Pattinson, lead miner, aged 60, his wife Margaret 50, children, William, lead miner, aged 15, Joseph 12, and Sarah 20. Thomas Pattinson died 2nd quarter of 1845.
Probable marriage of Joseph Pattinson, to Mary Emerson, 4th quarter 1848, at Weardale.
In 1851, at West Fall, Heathery Cleugh, Joseph Pattinson, lead miner, aged 22, his wife Mary aged 24, son Thomas 4 months, and mother Margaret Pattinson, widow, aged 61. Margaret Pattinson died 2nd quarter 1852.
In 1861, at Wearhead, Stanhope, Joseph Pattinson, lead miner, aged, 32, his wife Mary 34, children, Thomas 10, William 8, John 6, Mary Ann 4, and Margaret aged 2.
In 1871, at Wearhead, Stanhope, Joseph Pattinson, lead miner, aged, 42, his wife Mary 44, children, Thomas, lead miner, aged, 20, William, lead miner, aged, 18, John, lead miner, aged, 16, Mary Ann 14, Margaret 12, Sarah H 8, and Elizabeth 1.
William Pattinson married Mary Hutchinson, 4th quarter 1876, at Weardale
Mary Pattinson, died 4th quarter 1878, aged 25.
In 1881, at Bond Isle Ter, Stanhope, Joseph Pattinson, limestone quarryman, aged, 52, his wife Mary 54, children, William, widower, limestone quarryman, aged, 28, John, limestone quarryman, aged, 26, Sarah H 18, Isabella 11, and grandson, Joseph aged 3.

In 1891, at Bond Isle Ter, Stanhope, Joseph Pattinson, limestone quarryman, aged, 62, his wife Mary 64, children, John, limestone quarryman, aged, 36, Sarah Hannah 28, Isabella 21, and grandson, Joseph aged 13.
Joseph Pattinson, died 1st quarter 1899, aged 70.
Mary Pattinson, died 4th quarter 1900, aged 74.

Mary Jane Price married Joseph Winter at Hunstanworth 19th November 1870.
In 1871, at Whiteheaps, Hunstanworth, Joseph Wintewr, lead miner, aged 21, and his wife Jane aged 18.
Joseph Winter died 4th quarter 1878, aged 28, registered at Auckland.

William Pattinson, married Mary Jane Winter, 4th quarter 1881, at Weardale.
In 1891, at Crawleyside, Stanhope, William Pattinson, limestone quarryman, aged 38, his wife Mary Jane 38, stepdaughter, Mary Hannah Winter 14, step son, John Winter, 11, children, Isabella 8, Annie Elizabeth 7, William 4, Margaret 3, and Thomas Price 2 months.
In 1901, at Union Square, Stanhope, William Pattinson, limestone quarryman, aged 48, his wife Jane 48, step son John Winter, limestone quarryman, aged 20, children, William, whinstone breaker, aged 14, Margaret 13, Thomas Price 10, and Mary Evaline 8.
In 1911, at 1 Dales Street, Stanhope, William Pattinson, limestone quarryman, aged 58, his wife Mary Jane, aged 57, children, William, limestone quarryman, aged 24, Thomas Price, limestone quarryman, aged 20, and Mary Evaline 18.

1st February 1913 (Hexham Herald)

WEARDALE

At Stanhope, Octogenarian John Gowland passed away on Friday last (24th ult.) in his 81st year. He had been a lead miner most of his life and worked in the Derwent and Bollihope lead mines. He commenced work at nine years of age.
Thomas Gowland married Elizabeth Stevenson 28th May 1831, at Stanhope.
In 1841, at High Bishopley, Stanhope, Thomas Gowland, lead miner, aged 35, his wife Elizabeth 25, children, John 9, Thomas 6, Eleanor 4, Elizabeth 1, and Jane 2 months.
In 1851, at Dodd House, Newlandside, Thomas Gowland, miner, aged 48, his wife Elizabeth 39, children, John, miner, aged 19, Thomas, miner, aged 16, Eleanor 14, Elizabeth 11, Jane 9, Harrison 6, Mary 2, and Ann 1.
In 1861, at Dodd House, Newlandside, Thomas Gowland, lead miner, aged 58, his wife Elizabeth 50, son in law, Wiliam Bowman, Ag Labourer, aged 25, children, Eleanor Bowman, 24, Jane 20, Harrison, lead miner, aged 16, Mary 12, Ann 11, Sarah 6, and granddaughter, Elizabeth Gowland 3 months.
In 1871, at Stanhope, Thomas Gowland, lead miner, aged 68, his wife Elizabeth, aged 58, children, Harrison, lead miner, aged 26, Mary 22, Sarah 15, and granddaughter, Eleanor 1 month.
In 1881, at Bond Isle Terrace, Stanhope, Thomas Gowland, retired lead miner, aged 78, his wife Elizabeth 69, son in law, Thomas Robinson, limestone quarryman, aged 24, and daughter Sarah Hannah Robinson aged 25.
In 1891, at Town Foot, Prospect Place, Thomas Gowland, retired lead miner, aged 88, his wife Elizabeth 79, and also Thomas Robinson, limestone quarryman, aged 34, and his wife Sarah Hannah, aged 35.
Elizabeth Gowland, was buried at Stanhope, 22nd January 1892, aged 80.
Thomas Gowland was buried at Stanhope 25th July 1892, aged 89.

John Gowland married Mary Sanderson, 3rd December 1859, at Stanhope.
In 1861, at West Sound Burn, Newlandside, John Gowland, lead miner, aged 29, his wife Mary 25, and son Joseph 1.
In 1871, at Stanhope, John Gowland, lead miner, aged 39, his wife Mary, aged 34, sons, Joseph 11, Thomas 9, Harrison 7, John George 4, and Ralph aged 2.
In 1881, at East Lane, Stanhope, John Gowland, lead miner, aged 49, his wife Mary, aged 45, sons, Joseph, lead miner, aged 21, Thomas, waterman (Reservoir), aged 19, Harrison, limestone quarryman, aged 17, John George 14, (deaf from 7yrs old) and Ralph 12.
Thomas Gowland married Frances Freak (born Rookhope, granddaughter of Stephen & Frances Freak of Westgate) 4th quarter 1890, regeistered at Auckland, Durham. In 1891, at Benfieldside, Thomas Gowland, worker at Gas producer, steel works, aged 28, and his wife Frances aged 23. Frances Gowland died 4th quarter 1897, aged 29, registered at Newcastle.
In 1891, at East Lane, Stanhope, John Gowland, limestone quarryman, aged 59, his wife Mary, aged 55, sons, Joseph, limestone quaryman, aged 31, John George, limestone quarryman, aged 23, and boarder, Ralph Sanderson, retired waterman of reservoir, aged 71.
In 1901, at East Lane, Stanhope, John Gowland, limestone quarrier, aged 69, his wife Mary, aged 65, sons, Joseph, limestone quarrier, aged 41, Thomas, widower, general labourer, aged 39, John George, limestone quarrier, aged 35, and granddaughter, Mary Alice Gowland 9.
Mary Gowland was buried 31st July 1901, aged 66, at Stanhope.
In 1911, at Prospect Place, Stanhope, John Gowland, widower, retired limestone quarryman, aged 79, and son John George Gowland, quarryman, aged 45.
Probate 1913: John Gowland, of Prospect Place Stanhope county Durham died 24 January 1913 Probate 10 March to Harrison Gowland bank rider. Effects £192 4s 10d.

15th February 1913 (Hexham Courant)

ALLENDALE NOTES

Evidently there is still hope of seeing the Allendale lead mines in a state of greater prosperity. To facilitate the proving of the Swinhope vein the new shaft at Ellershope is being sunk - the present working is so far from the Sipton shaft. The work will go on much quicker from the Ellershope shaft which will not require to be so deep, as the vein gradually rises in the strata from Sipton to the new shaft. Lord Allendale the proprietor of the mines, some months ago guardedly hinted at a possible revival of the industry.

22nd March 1913 (Cumberland & Westmorland Herald)

NENTHEAD DOCTORS GRIEVANCE

A letter was read from a doctor at Nenthead, the Clerk briefly stating that he was employed at the Nenthead Zinc Works, and received £200 a year from the workmen. This had now ceased, owing to his getting the money from insured persons. The doctor, in his letter, pointed out that the entire population was 1040 persons, and there was no scope for increase. The result was that he was now getting very much less than before, and he would be obliged to leave the place. There was no other medical man. Mr. Clark expressed the opinion that

this was a private matter between the Zinc Company and the doctor. The Clerk pointed out that it would rest with the Committee to provide medical treatment for these 1040 people. If as the doctor said. he could not make a living out of it, he did not think any other medical man could do so. The letter was referred to the Medical Sanatorium Committee.

Government Inspectors of Mines Reports
Report of Mr J. R. R. Wilson
24th March 1913, Nenthead (Lead & Zinc) Cumberland, Vieille Montagne Zinc Co.

FATAL ACCIDENT REPORT CONCERNING THE DEATH OF MORITZ BURGINER AGED 54.

Deceased was engaged in timbering at a fall on a heading, when the timber gave way and fell on him, burying him beneath it and debris. Deceased was dead when extracted.

4th April 1913 (Newcastle Journal)

ALSTON, NENTHEAD, AND GARRIGILL, IN CUMBERLAND.
In the Estate of Mrs FANNY HORNSBY, Deceased.
IMPORTANT SALE OF RESIDENTIAL AND FARMING PROPERTIES TO CLOSE A TRUST.

MR ADAM ELLIOT will offer for SALE BY A PUBLIC AUCTION, at the TOWN HALL, ALSTON, on SATURDAY, 12th April, 1813, at 2 o'clock in the Afternoon precisely, in the following or other Lots as may be determined at the time of Sale, and subject to such conditions of Sale as will then be produced, and may previously be inspected at the Office of the undersigned Solicitor for the Vendors:—

Lot 1.—All that very desirable VILLA RESIDENCE known as WELGILL VILLA, situate at Nenthead aforesaid, and containing eight rooms, with coal cellar, wash-house, and other usual conveniences, and the surrounding garden and grounds thereto, as lately in the occupation of the deceased. And also the adjoining COTTAGE and conveniences thereto, now occupied by Mr Joseph Shield as tenant.

Lot 2.—All those FIELDS or CLOSES OF LAND, containing together 8½ Acres or thereabouts, with the MESSUAGE or DWELLING-HOUSE and other BUILDINGS thereon, situate at Foulhard, near Nenthead, as now let to Mr Watson Wallace as tenant.

Lot 3.—All that BLOCK OF COTTAGE PROPERTY, comprising Six Tenements, with the Outbuildings and Appurtenances thereto respectively belonging, situate at Hill Top, Nenthead, aforesaid, as now occupied by Mr T. Graham and others as. tenants. Lot 4.—All that FIELD OF GRASS LAND, containing 3 acres 2 roods and 10 perches or thereabouts, situate at Redwing, Garrigill aforesaid, and now in the occupation of Mr Matthew Bramwell as tenant,

Lot 5—All that Desirable FARM OF LAND, containing 33 acres, 3 roods and 7 perches or thereabouts of Meadow and Pasture Land, with the Dwelling-House and Farm and other Buildings thereto belonging, situate at Loatburn, near to Nenthead aforesaid, as now occupied by Mr William Lee as tenant.

Lot 6.—All that compact FARM and PREMISES, containing 24 acres 2 roods and 30 perches or thereabouts of Meadow, Pasture, and Plantation Land,

with the Dwelling-House and Farm and other Buildings thereto belonging, situate at and known as Scalebank, near Alston aforesaid, and now in the occupation of Mr Thomas Armstrong as tenant.
Lot 3 and part of Lot 2 are of Freehold tenure. All the other lots are of the Leasehold tenure prevalent in the district, and are held for the unexpired residue or residues of a term or terms of 1,000 years each therein, commencing on or. about the 9th day of September, 1621, and are subject to the yearly or other rents, payments or services due to the Lords of the fee in respect thereof. For inspection of the properties and further particulars apply to the Auctioneer, High Plains, Alston; to Mr EMERSON FAIRLESS, Nenthead: to Mr ROBERT ELLIOT, Bank House, Alston; or to GEO. W. HODGSON, Solicitor, Stanhope, Co. Durham.

8th April 1913 (Penrith Observer)

THE CUMBERLAND BLACK LEAD MINING COMPANY.

In the London Bankruptcy Court on Wednesday a meeting was held for settling the share list of this company, the nominal capital of £20,000 being in 4,000 shares of £5 each. The objects of the company were working, raising, and selling black lead and all other minerals in Borrowdale Mines. The company was formed in December, 1858, when 1,600 £5 shares were to be considered as paid up, 839 were taken by allotment, and 816 were taken under the memorandum of association. The debts of the company are about £2,000, and about £500 is due to the company for bills receivable and arrears of calls. It was litigation between a gentleman named Mr. Eales and the company that brought the latter to standstill.—Mr. Roxburgh appeared for the official liquidator, and Messrs. Bagley, Doria and Sargood for shareholders who disputed their liability to be placed upon the list of contributories.—The Commissioner, in accordance with former decisions, held the register to be evidence of the parties upon it being shareholders, and subject to be placed upon the list of contributories.—After further discussion adjournment was ordered.

16th August 1913 (Hexham Herald)

WEARDALE LEAD COMPANY
VALUABLE NEW DEPOSIT OPENED.

The annual meeting of the Weardale Lead Company was held in London, Mr J. C. Swan presiding. The chairman said the increase in the revenue for the past year was due to the larger production of 944 tons, and to £2 10s 3d per ton more being obtained than in the previous year. Expenditure had increased by nearly £11,000, in the previous year, the wages bill being up by £4,300 on the previous year and by no less than £6,037 compared with 1911, while coal and other stores and material had increased by £3,830. The board considered it necessary to build up a reserve fund for the purpose of equalising dividends. They wished to reach a position, which would permit them to pay a regular dividend of 10 per cent, with such occasional supplementary bonuses as funds might permit. ... A new deposit of ore was opened at Boltspar (*Boltsburn?*) mine a fortnight ago. It was a good flat working and was valued by the manager at 7 tons per fathom, an extremely good figure. ...

20th August 1913 (Shields Daily News)

LOCAL LEAD MINE ON FIRE.

Boltsburn lead mine, belonging to the Weardale Lead Company, which is situated just upon the border line of the counties of Durham and Northumberland, took fire late yesterday afternoon. The Elswick Rescue Brigade were summoned from Newcastle, and made a cross-country journey in wonderful time. Dense volumes of smoke hindered the work of putting out the fire. All the men were got out of the mine and no injuries are reported to any of the workers.

25th October 1913 (Hexham Courant)

WEARDALE

Mr & Mrs John Forest of Shittlehope Burn Farm, Stanhope, and their family have left this week for Australia. A granddaughter living with them who also was booked to go was taken to the Infectious Diseases Hospital, Stanhope on Sunday with diphtheria and she has had to remain there.

Mr & Mrs Thomas Stephenson also left Stanhope this week for Canada. They have been here for a holiday for two or three months. They left Stanhope, some nine or ten years ago for Canada where they have done well.

18th November 1913

THRELKELD LEAD MINES.
PROJECTED REOPENING & EXTENSION
PROPOSED NEW COMPANY WITH
£75,000 CAPITAL.

The announcement is made that there is every prospect of the lead mines at Threlkeld being restarted with a sufficient backing of capital to ensure their working on a larger scale than ever before. A new company is being floated to take over the property of the company which ceased operations about three years ages and this is being promoted by Mr. E. H. Wrigglesworth, A.C.I., Hull, and the capital to be raised is £75,000 in one pound ordinary shares, without debentures, preference, or deferred shares.

Since the mines ceased working the water has been allowed to rise to the main adit level, but there will be no difficulty in restarting the pumps and drawing standing water from the mine in seven weeks at an estimated cost of £500 to £700.

The directorate will have as Chairman Dr. Hutchinson, Cockermouth, the Chairman of the Threlkeld Granite Company, Ltd., and the Mexican Rosario Mining Company Ltd. The new company will take over the property and rights of the present owners, who bought the mine in 1906 for £11,000 since when £10,000 has been expended in the further development and equipment of the mine. Since the original opening of the mine in 1876 over £38,000 has been spent In development and equipment, and the new company is in the position of being able to acquire the whole of the undertaking at less than one third of that amount, vis.:— £8,000 in cash, and £4,000 in ordinary shares. The property to be acquired includes the 16½ acres of land on which the whole of the fixed plant is erected, the benefit of a lease in a “take note" of three years from 1st September, 1913, carrying with it the option of renewal from time to time, granted by Mr. H. C. Howard, in respect of “Old Levels” in the mine, and mining rights embracing nearly 2,000 acres, comprised in a “take note” for three years, carrying with it the option of a 30 years’ lease, granted by Lord Lonsdale, at a dead rent of £10 per annum merging in a sliding scale of royalties which are said to be exceedingly liberal.

Mr. W. Bawden, consulting engineer, Keswick, in a report made only last month, states that he has witnessed the working and mining of the mine from 1880 from the highest to the lowest level and he adds: “Without hesitation I state there is no diminution of the vein as depth is attained. I recommend the undertaking as one above a speculation.” Mr. W. H. Borlase in his report states that the previous owners would not have ceased operations had they been able to complete the work of establishing certain communications between the levels.

The company propose to lay down additional plant to deal with a minimum of 70 tons of mined ore per day, instead of 25 tons with the existing plant, and they estimate the profit on this output at £700 to £800 per month after payment of development charges. On the present price of metals, treating 1,800 tons of crude ore per month would yield £2,223, less working expenses of 10s. per ton on the crude ore, or £15,876 per annum—equivalent to 31.7 per cent. on the present issue of shares.

The company has also secured an option for purchase for £4,000 the Brundholme lead mine which is in the adjoining mining area and can thus be worked under the same management. This mine it is pointed out, is practically virgin, but very good deposits of silver lead ore have been opened up, as well as other undeveloped lodes of great promise showing lead, copper, iron, iron pyrites, and wolfram, besides granite and other valuable quarries.

Of the share capital of £75,000, 50,000 shares of £1 each are offered for subscription. Mr. P. M. Hope, Appleby and Penrith, has been acting for the vendors.

22nd November 1913 (Cumberland & Westmorland Herald)

ALSTON NOTES AND NEWS.

A well-known resident passed away on Monday in the person of Mr. John J. Atkinson, Overwater. For a long time he was engaged as foreman of the Rampgill washing floor under the old London Lead Company. Deceased, who

was unmarried was in his 68th year. The internment took place on Thursday in St. John's churchyard, the Rev. Dr. Westgarth officiating.

29th November 1913 Hexham Herald)

MINER KILLED AT HALTWHISTLE

On Thursday a promising and industrious young man named Thomas H. Spottiswood, lost his life whilst following his employment as a hewer at the South Tyne colliery being killed by a fall of stone. Deceased was a native of Alston district, was about 22 years of age. …

In 1871, at High Skelgill, Nicholas Spotswood, lead miner, aged 41, wife Sarah 36, children Jane 12, Joseph 9, Ann 8, James 6, and Matthew 3.
In 1881, at 2 High Skelgill, Alston, Nicholas Spottiswoode, farmer of 45 acres, aged 51, his wife Sarah 45, son Joseph, coal miner, aged 19, Jane, domestic servant, aged 18, James, farm labourer, aged 16, Matthew 13, Margaret 9, and Nicholas 7.
Joseph Spottiswood married Elizabeth Ann Smith 4th quarter 1890, registered at Brampton.
In 1891, at Bails, Alston, Joseph Spottiswood, coke drawer, aged 27, his wife Elizabeth A. aged 22, and son Thomas H. 3 months. In 1901, at Haltwhistle, Joseph Spottswood, coal miner, aged 38, his wife Elizabeth Ann 32, children Thomas Henry 10, Sarah Elizabeth 9, and Nicholas Walton 7.
In 1911, at Galligill, Nenthead, Joseph Spottiswoode, farmer, grazier, aged 49, his wife Elizabeth Ann 42, children, Lissie 19, Nicholas Walton, Masons labourer, aged 17, and Joseph 7. See 3rd January 1891

6th December 1913 (Hexham Herald)

ALSTON

NENTFORCE QUARRY CLOSED.

Several officials of the North Eastern Railway Company visited Alston on Thursday of last week and were interviewed by the officials of the Alston and Nentforce Quarry Company. The conditions of the existing contract between the two companies for the supply of stones have not proved satisfactory to the quarry owners, and it was with a view to obtaining better conditions that the interview was arranged. The negotiations fell through however, the parties not being able to come to an agreement, and on Thursday night Mr Sanderson, the quarry manager received a telegram ordering the works to be closed immediately. The closing order effects nearly 50 men, and coming at this time of the year, renders the outlook somewhat serious for Alston.

CHEMIST G. Watson Gray, F.I.C., 8, Inner Temple, Dale Street, Liverpool.
AUDITORS J. W. Best and Co., Chartered Accountant, Sheffield.
SECRETARY AND REGISTERED OFFICE—E. H. Wrigglesworth, A.C.I., Trinity House Chambers, Hull.

This Company has been formed for the purpose of acquiring and working the property known as the “THRELKELD MINES," which are situated about one mile and a-half from Threlkeld Station, on the Cockermouth, Keswick and Penrith Railway, between Keswick and Penrith, in the County of Cumberland, and abut on the County Road between Keswick and Penrith.
The mine was purchased by the late owners in 1906. The purchase price then paid for it was £11,000. Since 1906 the Books and Accounts show that over £10,000 has been expended in further development and equipment of the mine, and in machinery and plant. Since the original opening of the mine over £38,000 has been spent in development and equipment, and this Company acquires the whole of the undertaking at less than one-third of that sum, viz. £8000 in Cash and £4000 in Ordinary Shares.

The following is a short description of the property to be acquired
(a) About 16 acres 2 roods and 15 perches of land, partly freehold and partly of customary tenure, on which the whole of the fixed plant is erected.
b) The benefit of a lease in a Take Note of three years from 1st September, 1913, carrying with it the option of renewal from time to time, granted by Henry

Charles Howard, Esq., in respect of a level in the Mines known as “The Old Levels."

c) Mining Rights embracing an area of nearly 2000 acres, comprised in a Take Note for three years, carrying with it the option of a thirty-years' Lease, from date of application, granted by the Earl of Lonsdale, at a Dead Rent of £10 per annum, merging in a sliding scale of Royalties, which are exceedingly liberal, varying from 1-30th to 1-80th of the market price of the ores.

(d) Electric Power Station, 100 feet long, 20 feet wide, with two Suction Gas Plants of 110 Horse power, two 100 Horse-power Gas Engines with Electric Generator, 120 amps, 600 volts, also one ten-ton Travelling Crane, erected in 1907 at a cost of over £7000 (an up-to-date power plant' in first- rate order). Underground and at the surface there are 10 Electric Motors, 5 to 40 Horse-power each, for use in the various departments; Machinery and Electric Plant, consisting of a Pumping and Winding Engine, driven by Electric Motors. The Dressing Plant already erected is capable of treating 25 tons per day.

e) Slime Ore Dumps and Waste Gravel. There is a large tonnage of dumps at the surface, and with the proposed means of concentration these can be turned into a marketable product which should realise a substantial profit. On the property there is a good water supply for power purposes. The No. 1 Shaft is sunk from the surface to the 20 fathoms level and a cross-cut intersects the vein. The Adit or Day Level is driven into the Saddleback range of mountains about three-quarters of a mile, and from this base the upper workings have been wrought 65 fathoms in height, which produced large quantities of Lead and Blende (Zinc) Ores.

The book of Royalties shows that during the working of the mine 171,000 tons of crude ore were treated, and produced 24,600 tons of Lead and Blende Ores, the approximate value being £134,500, which proves that the mine is a productive one, and particularly so as the rich portion of the main lode is increasing in length and width and assay values as it deepens. From 1906 to 1910, 15,000 tons of crude mine ore were treated and produced 1076 tons of Lead Ore and 1328 tons of Blende Ore, which is equal to 16 per cent extraction by the present mill.

The mine may reasonably be considered in its infancy, as the deepest explorations are only some 30 fathoms below the Adit or Day Level. In addition to the lodes mentioned, other important and promising lodes of Lead, Copper, and other minerals are known to exist on the the property.

The length of ore ground in sight and sampled in the present 20-fathom and 30-fathom levels being 1200 feet north of No. 2 Shaft, 5 feet wide and 60 feet high, gives 33,332 tons of crude ore. Taking only one-half of this tonnage, viz., 16,666 tons, carrying 7.7 per cent. Lead and 15.7 per cent. Blende, the contents are 1283 tons Lead Ore, 2616 tons of Blende: —

Taking Lead Ore at £13 per ton	Value £16,679
Blende at £5 10s. per ton	Value £14,388
The total value being	£31,067

CAPITAL AND ESTIMATED PROFITS. The Capital to be provided by this issue is ample for properly developing the mine for a continuous output of about 70 tons per day, say, 1800 tons of crude ore per month, and taking 13 per cent, as the mean ore contents, the average working profit on this output should reach from £700 to £800 per month after payment of the development Charges, based on the average prices of the last twenty years Taking the present price of

metals, 1800 tons of crude ore per month would yield 117 tons of Lead Ore at £14 per ton (Pig Lead £20 per ton), 117 tons of Blende Ore at £5 per ton (Spelter £20 per ton). Total, £2223. Less working expenses, £1080 (i.e., 12s. per ton on the crude ore, although the Consulting Engineer of the Company estimates 10s. per ton as ample) leaving a profit of £1143 per month, or £13,716 per annum, which is the equivalent of over 27 per cent, on the present issue of Shares when fully subscribed and paid up.

This Company has secured an option to purchase for £4000 (to be satisfied as to £1000 in cash and the allotment of 3000 shares of £1 each, credited as fully paid up) the Brundholme Lead Mine. This Mine is practically virgin, on which a shaft is sunk 30 fathoms from the surface, and levels driven at depths of 20 and 30 fathoms each and about 50 fathoms in length, which have opened up a very good deposit of Silver Lead Ore. In a direct line and within the limits of the grant the Railway is only a mile and a-half distant. The Brundholme mining areas adjoins the Threlkeld area, and as a result both properties can be worked under the same management with advantage. The present issue of shares when fully subscribed and paid up will provide sufficient capital for the further development of the Brundholme Lead Mine. No revenue or profits from this Mine have been taken into consideration in the estimated profits given above.

The Vendor to the Company is Mr. E. H. Wrigglesworth, of Trinity House Chambers, Hull, and in consideration of the sale to the Company of the property purchased by him and for services rendered by him in the promotion of the Company, Mr. E. H. Wrigglesworth, as vendor and promoter, will receive from the Company the sum of £8000 in cash and an allotment of 4000 Ordinary Shares in the Company credited as fully paid.

Mr. W. Bawden, M.I.M.E., Consulting Mining Engineer, Keswick, in his Report upon the Threlkeld Mine, dated 2nd October, 1913, states: — “I beg to say I have witnessed the working and mining of this Mine from the highest to the lowest level, and without hesitation I state there is no diminution of the vein as depth is attained. I recommend the undertaking as one above a speculation."

Copies of the Contracts and of the Memorandum and Articles of Association can be seen at the offices of Mr. F. W. Spink, Solicitor, Trinity House Chambers, Hull, during business hours.

The Report and Plans by Messrs. J. W. Morris, M.I.M.E., W. Bawden, M.I.M.E., and W. H. Borlase, Junr., M.E., can be seen at the offices of the Company at any time during business hours.

A brokerage or commission of 3d. per share will be paid by the Company on allotment made upon application (other than applications made by or in relief of underwriters) bearing brokers' stamps.

Application will be made to the Manchester and Sheffield Stock Exchanges in due course for a Settlement and Quotation of the shares.

Applications for Shares on the terms of the full Prospectus should be made on the form accompanying the Prospectus, and forwarded with cheque for the amount payable on application to the above-mentioned Bankers, or to one of their branch banks.

Where no allotment is made the application will be returned in full, and where the number of shares allotted is less than that applied for the balance of the deposit will be applied towards the sum payable on allotment. Failure to pay instalment when due will render the previous payments liable to forfeiture.

Full Prospectuses, on the terms of which applications will alone be received, and forms of application can be obtained at the offices of the Company, or from the Bankers or Solicitors.
A Prospectus has been filed with the Registrar of Joint Stock Companies which states, inter alia, that The SUBSCRIPTION LIST is NOW OPEN, and CLOSES on SATURDAY, the 13th day of December, 1913.

24th January 1914 (Hexham Courant)

HEXHAM PETTY SESSIONS

CHARGE OF ASSAULTING A MINES FOREMAN

Robert Renwick, miner, Hunt Well, Allendale, was summoned for assaulting and beating Frederick Carl Schmidt at Carrshield, on the 5th Jan.
Mr Main, solicitor, Carlisle and Haltwhistle, appeared for the complainant, while Mr G. A. Dixon, solicitor, Hexham, defended.
Mr Main, in opening the case for the complainant, said his client was a foreman employed, in the Vieille Montaigne Zinc Company's mines at Carrshield. The defendant was one of the miners employed there. There had been some dispute as to the wages of the defendant, but that had nothing to do with this

case, as the complainant had nothing to do with paying the wages, which were made up by another person. On the 5th Jan. there was a pay in the middle of the day. Shortly after that, the complainant was in his office, which was a separate office of itself, when the defendant came into the office ostensibly to ask for stores. The defendant soon showed that he did not want stores and commenced to complain about his pay. He became very violent and threatened complainant, who then ordered him out of the office. He would not go and complainant tried to put him out, and defendant eventually went. That ended the incident. He would like to point out that the defendant had no right in that office, and that the complainant was entitled to use force to keep him out. But that was when the defendant came back the second time shortly after. The defendant on that occasion seized Schmidt and threatened to throw him through the window and actually did try to do so. When he could not do that he got him on the floor, blacked both his eyes, broke his spectacles, cut his face, probably with the glass, and generally badly used him. The defendant was at this time on top of this man who was in an exhausted condition, when another man called Renwick came in and told them to stop it. Defendant then struck at this Renwick and the other Renwick struck back. It was an important case from the point of view of the complainant and also from the point of view of his employers. This man was simply doing his duty to them. There was no doubt nationality had something to do with it, but he wished the magistrates to make it known that they would protect these men, and that the workmen employed by them must conduct themselves properly towards them.

Frederick Carl Schmidt said he was a foreman employed by the Vieille Montagne Zinc Company, stationed at Carrshield, and the defendant was one of the miners up to the day of the assault. Witness was the working foreman, he took the men's time, and he had an office of his own. He had nothing to do with the pays. The pay office was a quarter of a mile from his office. Jan. 5th was payday, and after the pay, he was in his office when Renwick came in. He asked for some rubber "weazers" for the machine. He asked him what kind he wanted and he said, "I don't know." He told him if he did not know he could do nothing with him. Renwick then pulled his pay out and said it was too little, and too if that was all the pay he was going to get he was not going to work there any longer. He told Renwick that he could not give him any more money and the defendant commenced to use very filthy language. Renwick worked in a partnership with another man, and on the 20th December ha had occasion to find fault with his partner because he was not doing sufficient work. There was also a complaint in November. He bore Renwick no ill will. Renwick's father and his friends were the best friends he had ever had in the dale. He asked Renwick three or four times to go out of the office quietly, but he would not. At last, he opened the door and then Renwick put up his hands to strike. He stepped back and then the hands came down, and he got hold of Renwick and pushed him out. Shortly afterwards Renwick came back in a very excited condition and tried to get into the office. He tried to prevent him coming in and kicked at him to keep him out. Renwick got into the office, got hold of the witness, pushed him to the window and tried to throw him out. As he could not do that he struck him in the face, broke his glasses, cut his face and blacked his eyes. His collar was torn off. He lost his feet, was forced down on his knees, and Renwick was striking him all the time. Just then Jack Renwick the blacksmith, came in and said, "Hold on, no fighting." and got hold of defendant's

ands. The defendant told Renwick he had nothing to do with it and struck at him. John Liddle then came in and wanted to fight John Renwick for taking his part. Liddle told Renwick that Schmidt was a b-------- foreigner and he should not help him. He did nothing more to the defendant than try and keep off his eyeglasses as he was afraid he would cut his eyes. He was seven miles off a police station and if he could not have protection out there he would have to leave the place. He had been there eight years past now.
Cross examined by Mr Dixon: - The defendant had lived in the neighbourhood all that time and was a perfectly respectable man. He had worked for him for eight years this spring, and there had been no trouble before. He did not suggest that the assault was committed because he was a foreigner. The dispute was about his wages. The defendant came into the office twice, not simply once. On the first occasion, there was no assault.
Mr Dixon: How s this man employed?
On contract.
Mr Dixon: How much money was he making?
On that occasion he had had 3s 8d a day.
Mr Dixon: There is no minimum at this mine?
No.
Mr Dixon: And there is no one to represent the workmen when you are measuring up, no one like a checkweighman?
They can represent themselves when the work is measured.
Mr Dixon: Did Renwick tell you that he was not going to work there for that money?
Yes.
Mr Dixon: And did he ask you to pay his lying on money?
No, he never asked for that.
Mr Dixon: And when he told you he would not work for you any longer did you not become violent?
I never lost my temper, and I can prove it.
Mr Dixon: Did you say you expected to get the same obedience from an English workman as from a German?
I never said that.
Mr Dixon: Did he not tell you that he would not allow you to use such language to him?
No.
Mr Dixon: Did he strike you before you kicked him?
No.
Mr Dixon: You kicked him first?
I kicked him to keep him out of the office.
Witness said there was no one else there at this time. He did not see Reed till after the struggle was over.
Re-examined by Mr Main, witness said he had nothing to do with the wages. He assisted in the measuring. He had nothing to do with paying this man's lying on money. He saw the man intended violence when he kicked at him. There would be about 30 men standing some distance away ready to commence work. It was at the window in his office that he timed them in, and they were waiting to go into the mine.
John Renwick said he was a blacksmith and lived at Carrshield. He was in the employment of this company. About two o'clock on the 5th Jan. his attention

was called to a crowd of workman passing round the front of the shops to Mr Schmidt's office. He followed and as he got to the office door Liddle was coming out. Schmidt was on the floor and the defendant had by the coat neck. He was bleeding from the cheek, his eyeglasses were broken and his eyes were discoloured. He told them to hold on and then the defendant threatened him. He said he would hit witness on the face if he would not stand by. He then struck at the defendant and the defendant hit him. There was nothing more done. Liddle came in again and took the defendant out. He did nothing more than rescue Mr Schmidt. Renwick was not marked.

Hans Roddewald said he was a manager at these mines and lived at Nenthead. He measured up the work and Schmidt was his assistant. He returned the measurements to the pay clerk who made up the pays.

Cross-examined by Mr Dixon, he said that Schmidt was the local manager as far as work went. Renwick should have complained to him if he had been wrongly measured up. He lived three miles away, but was often down at the mine. On the occasion, he was not there. Renwick could go to Mr Schmidt but he could not tell him much. He was certainly the person on the place.

By Mr Main: He was down at the mine twice a week.

Mr Dixon said this case had been opened as if it had an international aspect, and it was suggested that there was a feud between the English workmen and the foreign foreman. But that had been entirely exploded by the evidence. Schmidt himself admitted that he lived seven milers away from a police station and had done so for eight years and that nothing had previously happened to him. In fact, there was no feeling against Mr Schmidt because he was a German. On this particular day, this client of his went to see Mr Schmidt about his wages. The foreman at once became violent and abusive and forced him out of the office. The story his witness would tell was quite different from that of the complainant and it would be for the Bench to say what they believed. His client was working on piece. He knew by experience he had been there eight years how much he was earning and how much he ought to have had. For twenty-five shifts, he only averaged 3/8 and he made a complaint that the rate of wages was wrong. At these mines, there was no checkweightman between the masters and the men, and they had no means of checking whether the measurements were right or wrong. That was bound to lead to differences. It had been suggested that his client had the right to go to this mans office. Mr Schmidt was the manager at the place and he was the right and proper man to go to make a complaint. There was nothing of an unwarrantable intrusion about it; the man had a perfect right there. Mr Schmidt admitted that he kicked the defendant before any blows were struck. He thought that if there was an assault it was a perfectly justifiable one, but he submitted that there was no assault at all. He thought they would find that his client was not to blame for what took place, as Mr Schmidt had admitted he was the first man to use violence.

Defendant said that on the 5th January he went to Schmidt's office door to see about his pay. He knocked and Schmidt shouted, "Come in". He went in and let Schmidt see his pay and told him he was not going to work there for that money. He then asked for his clearance. Upon that, Schmidt began to curse and swear and told him he would boot him out. He told Schmidt he was not going to be sworn at and Schmidt then commenced to push him towards the door. As he was being pushed, Schmidt kicked him twice in the back and seized him by the head. He then turned round and knocked him off. Just then, Renwick

came in and struck him on the side of the head. He never attempted to throw Schmidt out of the window. He did not go into the office twice only once.
Cross-examined by Mr Main: There were other men standing at the door. He never asked for any stores. He knew Schmidt did not pay the wages, but he was the man they always went to when they had complaint. He did not say that he had been giving wrong amounts about him. Schmidt got him to the door before they got to grips. He was ordered out and the reason he did not go was that Schmidt started to curse and swear at him. He turned back on Schmidt because he was kicking him. The men came round the building because they could hear Schmidt's voice. He had no mark. He could not say whether Schmidt was bleeding. He did not threaten Renwick, nor did he say that when he had his backers with him he would take it out of him.
John Liddle, miner, living at Allenheads, said he saw Schmidt kick Renwick twice in the legs and then Renwick turned round and attended to him. He only stepped in to see fair play. Schmidt discharged him on the spot, and he was not working there now.
Cross-examined by Mr Main: He did not ask Renwick what he meant by sticking up for a b------- foreigner. He did not ask him why he was taking the part of a foreigner against an Englishman when he did not know how the quarrel began. He saw the two men struggling. Schmidt was bleeding.
John W. Reed, Middle Side, West Allendale, said he was a miner and farmer. He was working at this mine on January 5th, but he was not working there now. He was standing at the office door about two o'clock when he heard shouting inside, and he then saw Schmidt pushing the defendant to the door. Schmidt was kicking him. Then a scuffle took place. He saw John Renwick go in and strike Herbert Renwick on the temple. Liddle then stepped in and separated them.
Cross-examined by Mr Main; He was standing at the door waiting to see Mr Schmidt. He gave up work at the mine on Friday.
By Mr Dixon: His leaving had nothing to do with this case. It was for reasons of his own.
Sidney Smith, farmer and miner, Sparty Lee, also gave similar evidence.
The Bench retired and on coming into court again, the Chairman said they considered the defendant had had a certain amount of provocation and under the circumstances would dismiss the case.

9th February 1914 (Newcastle Journal)
Deaths
PEART. At Miners Arms Inn, Nenthead, on February 7th Emerson Peart. Interment at St. John's Churchyard, Nenthead, on Tuesday, the 10th inst., at 3.15. p.m.
Thomas Peart married Hannah Graham 1st quarter 1841, at Weardale.
In 1841, at Blackcleugh, Stanhope, at High Allers, Heathery Cleugh, Thomas Peart, lead miner, aged 20, his wife Hannah 20, and daughter Elizabeth 2.
In 1851, at High Allers, Heathery Cleugh, Thomas Peart, lead miner, aged 31, his wife Hannah 32, children, Joseph 9, Graham 2, Emerson 1, and daughter Elizabeth Graham 12. Hannah Peart died 1858 - 1860.
In 1861, at Bents, Heathery Cleugh, Thomas Peart, widow, lead miner, aged 41, children, Elizabeth 22, Joseph, lead miner, aged 19, Margaret 17,

Graham, lead miner, aged 12, Emerson 11, John 7, Hannah 5, and grandson, Thomas aged 1. Thomas Peart died 1st quarter, 1870, aged 49.
In 1871, at Bents, Heathery Cleugh, Joseph Peart, unmarried, lead miner, aged 29, brother, Emerson, lead miner, aged 21, brother, John, lead miner, aged 17, sister, Elizabeth 32, Nephew, Thomas 11, neice, Phyllis 9, and neice, Ann 3.
Emerson Peart married Esther Peart 4th quarter 1874, registered at Weardale.
In 1881, at Burtree, Heathery Cleugh, Emerson Peart, lead miner, aged 31, his wife Esther 30, children, Thomas 5, and Hannah 2.
In 1891, at Miners Arms, Nenthead, Emerson Peart, lead miner, innkeeper, and farmer of 23 acres, aged 41, his wife Esther 40, children, Victor 15, Hannah 12, and domestic servant Annie Peart aged 23; all born Stanhope.
In 1901, at Miners Arms, Nenthead, Emerson Peart, inn keeper, aged 51, his wife Esther 50, son Thomas V 25, daughter Hannah 22, visitors, Walter S Craster, mechanical engineer, aged 26, Sarah A Bee 14, and John Rooks, engine fitter, aged 50.
In 1911, at Nenthead, Emerson Peart, innkeeper & farmer, aged 60, his wife Esther 60, son in law, Thomas Stout, horse keeper, aged 36, daughter Hannah Stout 32, niece, Elizabeth Graham 10, born Blyth, and servant, Mary E Harrison aged 16, born Heathery Cleugh.

18th April 1914 (Hexham Herald)

NENTHEAD

The estate of Mr Emerson Peart of The Miners Arms Inn, Nenthead, Cumberland, innkeeper and farmer has been valued at £2074 18s 1d with net personality £1762 14s 9d by Mrs Esther Peart his widow and Mr Thomas Victor Peart of Woodbrae, Nenthead, farmer his son the executors.

Deaths

AT Fairhill, Nenthead on the 15th inst. Joseph Currah aged 64 years.
In 1871, at West Ashgill, Isaac Currah, lead ore miner & farmer of 8 acres, aged 55, his wife Elizabeth 53, children Isaac, lead ore miner, aged 26, Joseph, lead ore miner, aged 18, Lucy Eliza 14, nephew in law Joseph Hindmarsh aged 13.
In 1881, at Garrigill Gate, Joseph Currah, widow, lead miner, aged 28, and domestic servant Margaret Robinson, widow, aged 55.
In 1891, at Stone Cottage, Nenthead, George Raisbeck, single, retired lead miner, aged 65, his brother Robert, lead miner, aged 46, visitors Joseph Currah, foreman lead ore washer, aged 38, and his wife Mary aged 50.
In 1901, at Stone Cottage, Nenthead, Joseph Currah, lead ore washer, aged 48, his wife Mary 61, and domestic servant Mary Walton aged 21.
In 1911, at Stone Cottage, Nenthead, Joseph Currah, lead ore washer, aged 58, his wife Mary 71, and domestic servant Maud Richardson 17.
See 27th April 1855, 5th May 1877, 2nd August 1879, 11th August 1883, 26th September 1891, and 18th April 1914

DEATH OF MR THOMAS HETHERINGTON
FUNERAL AT ST JOHN LEE

The death took place of Mr T. Hetherington, at his residence, West Oakwood, on Friday last, after a long illness. Deceased who was in his 68th year was a

native of Alston, having worked as a lead miner at Fallowfield under Walton and Cowper, coming to Hexham 24 years ago to fill an appointment as a game keeper under Mr W. C. Henderson.

11th July 1914 (Hexham Herald)

EXPLOSIVES IN UNAUTHORISED PLACE.

At Alston Police Court on Friday David Smith, mine manager, was charged with keeping in an unauthorised place 40 lbs. of gunpowder at Clarghyll mine near Alston. Sergeant Stephen said he visited the mine on May 25th and found 40lb of gunpowder stored in a place about 100 yards away from the mouth of the mine. The place measured about 3 feet by 2 feet. There was no licence or registration for the premises. He charged defendant with the offence and he replied that he thought they were allowed to keep 50 lb. without a licence. He said the men were supplied with the explosives, and the cost was deducted on payday. Mr Charlesworth, Newcastle, who defended asked Sergeant Stephen if he was aware that the firm were allowed to keep 30 lb. of explosive without a licence. Supt. Whiteside said they were not allowed to store any for sale and the men were charged in this case. … Defendant said he had been manager of the mine in question for 30 years. Mr William Benson was named as the owner of the mine. The storage of explosives was commenced on April 11, in response to an order under the Coal Mines Act, which required that the men must be provided with explosives on the place. The excess of 10 lb. was quite an oversight. The chairman said that the magistrates believed that there was no intentional offence. Defendants would have to pay the costs, and they advised the firm to obtain a store licence.

18th July 1914 (Hexham Herald)

WEARDALE

Frederick Cave, a Frosterley quarryman was accidentally killed at Rogerley limestone quarry last Thursday by the falling of a high gearing over which he was running tubs of soil from the baring. At the inquest a verdict of accidental death was returned. Deceased was a south countryman, but had lived in Frosterley many years. *(Aged 69)*

12th September 1914 (Hexham Courant)

HANDED OVER TO THE MILITARY

Carl Schmidt (36) a German employed at the Carrshield mines was rearrested on Thursday morning by P.C. Tinlin, of Whitfield, on a Home Office order. Schmidt was arrested at the outbreak of the war as an alien. He was brought to Hexham and subsequently released. On his re-arrest he was conveyed to Newcastle, and handed over to the military authorities, his destination being unknown.

23rd September 1914 (Teesdale Mercury)

CLOSING OF THE BELGIAN-WORKED LEAD MINES AT NENTHEAD.

FOUR HUNDRED WORKMEN THROWN OUT OF EMPLOYMENT.

The Nenthead mines, which are owned by a Belgian company, closed down last week-end, owing to not being able to get their ore away, and being unable also to get any money from Belgium to pay the men. The closing down of the

mines will affect over four hundred men, including a good number of Italians, who were employed there. Most of the managers of the above company were Germans, of whom only one is left, and he claims to be a naturalised American.

26th September 1914 (Hexham Courant)

ALSTON

NENTHEAD MINES AND THE WAR

The Vieille Montagne Zinc Company at Nenthead have been compelled to close down a very large part of their works at Nenthead and Rotherhope owing to the war. Mr Cox, the secretary has not been able to get into communication with the head office in Belgium and no material can be shipped abroad.

6th October 1914 (Penrith Observer)

THE NENTHEAD WORKS.

A fine spirit is manifest between the Vieille Montague Zinc Company at Nenthead and their workmen. Owing to the war the company had to almost close down. Mr. Cox, the /secretary, has not been able to get into any communication whatever with his head office in Belgium, and he cannot get the material shipped or sold. The men, however, have express their willingness to work on half-pay, and trust the company for the other half, with the result that the works are now in full swing.

25th October 1914 (Hexham Herald)

WEARDALE

Three Stanhope men met accidentally on the battlefield the other day. Wearmouth son of J. Wearmouth, the famous wrestler stepped out of the trenches during a halt and found two Stanhope ambulance men carrying away the wounded.

22nd October 1914 (Whitehaven News)

CLEATOR MOOR MINER'S DEATH AT PATTERDALE

At inquest held at Patterdale, Westmorland, on Wednesday, concerning the death of Christopher Tembey (64), miner, belonging to Cleator Moor.

Thomas Black, miner, Cleator Moor, said that deceased and he left Cleator Moor on Saturday to seek work at the Greenside lead mines, Patterdale. They arrived about 8-30 on Saturday night, and stayed at the hut occupied by other miners employed at the Greenside mines. From 12-30 to 2-30 on Sunday they were in the beerhouse near the mines, and witness and another miner named Hopkins left for the beerhouse at opening time in the evening, expecting that deceased was following. He did not, however, turn up, but when they were on their way back, after staying in the beerhouse until ten p.m., they found him lying unconscious on the road, having apparently fallen over an embankment. They carried him to the hut, and Hopkins went to bed. They did not send for a doctor or any other assistance, and after sitting with deceased for some time witness also went to bed. Deceased never spoke, but was not dead. In the morning when they came downstairs deceased was dead.

The Coroner: Did you make any examination to see where he was injured?

Witness: I could not see anything. I thought he was stunned.

Did you realise he was in a very serious condition? — When you are in drink you don't think about that.

You left him alone in the kitchen at the hut? — Yes. I'll tell the truth, I left him.
What did you do the next morning? — I left the hut to go for the constable, but I got to the beerhouse again, and the constable found me there.
William Hopkins, miner, Greenside, gave similar evidence.
The Coroner: When you found the man lying senseless on the road do you not think it is your duty to go for a doctor?
Witness: It should have been my duty, but we did not know what to do.
You put him on the form and left him there until next morning? — Yes.
Dr. Lawrence said deceased had fallen on the back of his head, and had fractured the back of his skull.
P.C. Smith said he did not receive information of the death until 12-30 p.m., midday on Monday. He found Black at the beerhouse under the influence of drink. Witness's opinion was that deceased had been walking towards some steps on an embankment, and in the dark had missed his way and fallen over on to the road.
In reply to a juror, Dr. Lawrence said he would not have been able to save the man's life had he been sent for immediately, but that was no reason why medical aid should not have been obtained.
The Coroner said he was of opinion Black deserved censuring for his conduct, and Hopkins was little better. He also criticised the Greenside Mining Co. for having no one in charge of the huts. That was the second inquest he had held under similar circumstances.
The jury returned a verdict of "Accidental death," and requested the Coroner to censure Black and Hopkins, and to write to the Greenside Mining Co., pointing out the absence of supervision at the hut.
The Coroner censured Black and Hopkins in strong terms, stating that their conduct was unworthy of Englishmen. (Source: West Cumbria Mines Research Group)

31st October 1914 (Hexham Courant)

Letters to the Editor

A DISCLAIMER

Sir,—I understand that a persistent rumour is current in the district to the effect that I am responsible for the release of a German official at the Carrshield mine. Will you allow me to say that he does not live in my parish, and that I have had nothing whatever to do with the case in any way. All the Germans of Nenthead are detained at the Lancaster camp, and I have refused all applications to sign parole papers, not because I have anything against the men themselves, but simply on account of my neutral position as vicar. Yours, etc., F. W. Westgarth, D.C.L, Nenthead Vicarage Oct 26th

31st October 1914 (Hexham Herald)

ALSTON

At Alston a committee has been formed to accommodate 20 Belgian refugees, and Mr Richard Welford of Gosforth has given them the use of a house of 14 bedrooms in that town with two acres of land belonging to him and now unoccupied.

28th November 1914 (Hexham Courant)

PRIVATE ISAAC WEARMOUTH, son of Mr & Mrs Joseph Wearmouth, Stanhope, died on November 6th at the Hotel Bristol in Boulogne from wounds in the leg and chest received while at the front. Deceased who was 23 years of age joined the 1st Coldstream Battalion when 18 years of age and after serving three years with the colours he went to the Reserve. When the war broke out he volunteered his services and went to the front in August. He had been in action at Mons and on the Aisne.

In 1901, at Union Square, Stanhope, Joseph Wearmouth, limestone quarryman, aged 39, his wife Elizabeth 37, children Isaac Romas 9, and Jane Hannah 2.

16th January 1915 (Hexham Herald)

Deaths

At Stanhope on the 8th inst., Margaret widow of the late Thomas Crawhall, aged 78 years.

6th February 1915 (Hexham Herald)

WEARDALE

John George Thompson, Stanhope, has been at home a few days from Boulogne in France where he is engaged in Ambulance work.

13th February 1915 (Hexham Courant)

ALLENDALE NOTES

The German manager at Carrshield is evidently by no means unpopular. I learn from this letter (*from a Nenthead correspondent*) that after this Teuton had been laid hold of by the Military Authorities, and removed, a petition was got up locally, and as a result, he was enabled to resume his manager ship at Carrshield. It is further reported that last week there was a petition drawn up, praying for his second mittimus, but this fortunate or unfortunate, document only obtained two signatures.

20th February 1915 (Hexham Herald)

ALSTON

Mr James Emerson, formerly manager for the Nentforce Quarry Co. died very suddenly at Alston on Monday.

In 1851, at Mount Pleasant, Forest & Frith, John Emerson, lead miner, aged 33, his wife Mary 32, sons John 5, Thomas 3, and William 1.

In 1861, at Frog Hall, Forest & Frith, Joseph Horn, lead miner & farmer of 15 acres, aged 27, his wife Mary (Emerson, married 2nd quarter of 1857, Teesdale) 40, daughter Ann 2, and step sons in law, John Emerson, lead ore washer, aged 15, Thomas Emerson 13, William Emerson11, and James Emerson 9.

In 1871, at Frog Hole, Forest & Frith, Joseph Horn, lead miner & farmer, aged 37, his wife Mary 51, children Ann 12, George 9, Mary Jane 7, Joseph 5, stepsons, Thomas Emmerson, lead miner, aged 23, William Emmerson, lead miner, aged 21, and James Emmerson, lead miner, aged 19.

In 1881, at Raby Terrace, Middleton, James Emmerson, lead miner, and assisting stationary engine driver, aged 29, his wife Mary 30, sons John 7, and Edward 3.

In 1891, at Green Hurth, James Emmerson, stationary engineman, aged 39, and his wife Mary, aged 40. In 1891, at Hardship, Forest & Frith, Joseph Horn, lead miner & farmer, aged 56, his wife Mary 67, daughter Ann 33, son Joseph 25, grandson John Emmerson, cartman, aged 17, and grandson Edward Emmerson 13. In 1901, at Front Street, Alston, James Emmerson, manager of limestone quarry, aged 49, his wife Mary 50, and son Edward engine man, aged 24.

17th May 1915 (Newcastle Journal)

A meeting of the Board of Conservators of the Fishery District of the River Tyne was held on Saturday at the Moot Hall. Newcastle. Mr Thos. Taylor (chairman; presiding. …

A letter was read from the Haltwhistle Angling Association, which stated that the Warden Dam had not proved effective, and suggesting that an inexpensive pass should be erected about the centre of the dam. The letter also drew the attention of the Board to the water from the Nenthead mines.

The Board decided that they could do nothing more in regard to the pass. It was also stated that the very best filters had been installed at the Nenthead mines, and that the pollution was very small and practically harmless.

5th June 1915 (Hexham Courant)

DEPARTURE OF ITALIANS

On Wednesday morning a party of 15 Italians who had been employed at the Vieille Montagne Zinc Co.'s works at Nenthead, left Alston, having been called to the colours. They marched from the Town Head, to the station singing what appeared to be one of their national songs. They were in quite a happy mood.

15th June 1915 (Penrith Observer)

PERILS OF THE PENNINES.

FLUE FOR LEAD FUMES ACROSS THE MOOR.

The story of how a farmer fell into a lead mine flue, which runs for over two mile across the fells of West Durham, was told at an inquest at Rookhope. From the evidence given, it appeared that William Oliver went on the fell to look after his sheep. Along the fell runs a huge horizontal pipe, or flue, which carries fumes from a smelt mill, and from this flue the Weardale Lead Company extract sulphate of lead. The flue occasionally gives way in parts. Into one of these apertures Oliver stumbled and fell. His brother found his stick by the side of the hole. Coroner Proud said he could not help thinking it was a veritable death-trap for two miles One witness declared that sheep, and even a horse, had fallen into the flue and been asphyxiated. The management said they proposed to put foot bridges over the flue at certain points. The Coroner adjourned the inquiry for the presence of the Government Inspector.

26th June 1915 (Hexham Herald)

WEARDALE NOTES

The old iron furnace at Stanhope is being demolished this week. It was built in 1832 by Charles Attwood. ... The old furnace in Stanhope Dene was one of the first iron furnaces built in the North of England.

17th July 1915 (Hexham Herald)

WEARDALE NOTES

A young man named Thomas *(Frederick)* Lowes of St John's Chapel district was killed at Stanhope Lime Kilns on Wednesday morning. He was engaged by the Weardale Lead Company at their Stanhope mines tipping spar from small waggons into railway trucks. No one saw the accident but he was found in a dying condition by John Littlefair, bank rider, Crawleyside. It is supposed the rebound of the truck had caught him on the chest and killed him. *(Aged 20)*

31st July 1915 (Hexham Courant)

ACCIDENT AT HARTSIDE MINE

An accident occurred at Hartside Barytes mine on Thursday. William Hodgson, Middleton in Teesdale and William Lee, Alston, were working in a drift when the sides fell in. Hodgson was badly crushed and conveyed to Alston Cottage Hospital in an unconscious condition. Lee was able to reach home. Fortunately the manager Mr T. A. Walton, heard the men call for help, and quickly got assistance. Hartside Barytes mine has recently been acquired by the Hedworth Barium Company Ltd, Newcastle upon Tyne.

1st January 1916 (Cumberland & Westmorland Herald)

PATTERDALE

On Thursday evening Mr. W. Marshall, M.P., Patterdale Hall, gave a supper of beef, plum pudding and other necessary accompaniments, to the boys employed in the washings at the Greenside Lead Works, and also the members of the Patterdale Brass Band, which, together, numbered 85. At seven o'clock the tables looked invitingly on the youths, who had assembled with keen appetites. The company then sat down to the repast, which was partaken of by the boys with a gusto seldom witnessed. The arrangements of the Rev. W. T. Rook, Messrs. Rickleby, Sinclair, Taylor, and Grenfell were admirable. The band played numerous lively airs, and Messrs. M. Millican, T. Lancaster, and D. Brown added much to the hilarity of the evening by singing several songs, which the boys seemed thoroughly to enjoy.

Deaths

At Seathwaite, Borrowdale, near Keswick, on the 4th January, John Dixon, formerly agent of the Black Lead Mine, aged 77 years.

26th February 1916 (Lancashire Evening Post)

EXEMPTIONS FOR PATTERDALE MINE WORKERS.

At yesterday's meeting of the Tribunal for the West Ward of Westmorland, Mr. W. H. Borlase, manager of the Greenside Lead Mining Company, Patterdale, applied for exemptions for two men. He said the War Office sent, them or 40 soldiers to assist the mining, but the work was such as they were not accustomed to, and about half of them had returned. Had it not been for the Italian workmen they had and the men the Government sent, the mine would have had closed, they had lost 25 men through enlistments.—The application was granted.

18th March 1916 (Hexham Courant)

FATAL ACCIDENT IN WEST ALLENDALE

On Thursday the 2nd inst., a serious accident took place in the Barney Craig mine, in West Allendale, in which a workman named Thomas Parker Liddell, was severely injured by being struck by a falling stone. He was taken out to Nenthead, and at the surgery there received every care and attention. It was soon seen how serious was his injury, and preparations were made to remove him to Alston where he could have closer medical care and attendance than was possible at Nenthead.

Sad to say, however before these arrangements could be completed pneumonia set in and removal was impossible.

Recovery soon became hopeless and he died on the following Wednesday evening.

Many sad aspects were revealed by the case and quite a gloom was cast over the Allenheads and Sparty Lee neighbourhood where he had lived all his life, as also among the men of Nenthead where as a workman, he was well known to very many.

He was only 37 years of age, and in full strength of his vigorous manhood. He leaves a young widow and five young children for whom the utmost sympathy is felt.

More sad still is the thought that the long continuing snowstorm, made it impossible for him to be taken to his home. Between the mine and Nenthead, on the one side, and his home on the other side, lies the open moor. All communication by the moorland road was completely blocked, while it was difficult even dangerous for any but the very strongest to cross on foot. It was impossible, therefore for his wife even to get to see him, and although they knew he would receive every attention, still, her anxiety, and that of his and her relatives, can easily be imagined, especially when it was known how serious his condition had become. When news of his death was received all felt the keenest sympathy for those whom he had left.

The funeral was arranged to be held on Sunday at St Peter's churchyard, and in connection therewith, a splendid spirit of brotherhood was shown by the men of Nenthead, into which the men on the Allendale side entered and cooperated with wholehearted sympathy.

Over a high mountain road, in places about two thousand feet above sea level, under the shadow of Killhope Law, the outstanding landmark of the whole country round about, it was impossible to attempt any kind of horse conveyance. The Nenthead men at once took upon themselves the task of conveying the remains over that difficult road, and as soon as it was known that this was to be done, the Allendale men entered into the spirit of their Nenthead comrades and decided to meet them on their way.

After a short service of hymn and prayer conducted by the Wesleyan minister, the procession started from Nenthead about half past nine on Sunday morning. Nearly fifty men took part, the larger number walking in advance, in rank four abreast thus making a beaten track, the rest following and drawing the coffin on a strong sledge specially made for the purpose. As early as eight o'clock a similar number of men had started off from the Allenheads and Sparty Lea side, and the two parties met near Coalcleugh, the united body of nearly one hundred men joining forces till the highest point on the journey had been reached when the Nenthead men returned to their homes. The Allendale men expressed the

highest praise for the splendid spirit shown by their Nenthead fellows, and their splendid method and organisation in which every detail was thought out.
Many people feared that it would be impossible to accomplish the journey. The snowstorm had continued for so long, and on Sunday morning had renewed its severity, but to these men the storm had no terrors, and their determined spirit paid no heed to the enormous difficulties except to overcome them. They reached the end of their difficult journey much sooner than was expected, and that which so many had seemed impossible, had been safely accomplished.
A large number of friends gathered to the funeral service, which was to have been conducted by the Rev J Bennett, the minister of the Allendale Primitive Methodist Circuit, and the Rev D J B Lewis vicar of St Peter's.
The roads from Allendale were too much blocked by the storm, so Mr Bennett was prevented from being present.
At the interment it was realised that Andrew Bryce of Ropehaugh, Allenheads, who had been with the party from Allenheads, was missing. The weather was very rough, a blizzard blowing on the moorland. A search was organised which continued on the Monday. It was eventually learned that Bryce realising he was lost had taken shelter at night in Snodbury wood on the Weardale side of Killhope. In the early morning of the Monday he had made his way to the nearest house, which was Gold Hill Farm.

25th March 1916 (Hexham Courant)

LETTER TO THE EDITOR

TO THE INHABITANTS OF THE PARISH OF ALLENHEADS

Sir Will you permit me to ask the men who assisted in the search for me on the 12th and 13th inst., to kindly accept the thanks of my wife and myself, and also the women for the sympathy and help shown to my wife during my 22 hours of terrible experience on the fells. Also to the older men of the dale who had the will but not the power to join any of the search parties. We also thank Mr and Mrs John V Peart, Gold Hill Farm, Weardale for their kindness shown and nourishment given to me on arriving at their house and to Mr Peart for seeing me home.

Yours Sincerely
Andrew and Ruth Bryce

STANHOPE

An accident, which ended fatally occurred to Joseph Brunskill, aged 18 at Messrs Ord and Maddison's, Limestone quarry, at Frosterley near Stanhope. While engaged in quarrying a stone struck the youth upon the head rendering him unconscious. He expired an hour later.

18th July 1916 (Newcastle Journal)

WEARDALE LEAD MINE ACCIDENT

EVIDENCE AT THE INQUEST ON THE VICTIMS

Mr J. T. Proud (Coroner) held an inquest at Cowshill, Weardale, yesterday, respecting the death of two lead miners, Penrose Peart of Copthill, and John Albert Peart of Rush, who were entombed in Sedling Mine on Friday morning, when they were both dead.

The principle witness was Herbert Daeson, who said they went to work in the water level at six o'clock on Friday morning. They had put up three sticks and planks over them and Penrose Peart was preparing to put in another stick when the sides came in. Dawson had just gone for some more timber when the fall came. The two men were caught in the fall but lived up till about seven o'clock on Friday night. No one was to blame.
John Emerson, local manager, said he visited the mine on Friday morning at 6.30 a.m. He told the men to put up a covering of timber and to work out the Fluorspar from underneath. The mine looked perfectly safe. He had tapped the roof and it sounded all right. The mine was very wet.
The jury returned a verdict of "Accidental death." Mr Willis, on behalf of the Weardale Lead Company, expressed his sympathy with the relatives of the deceased and thanked all who had helped in getting the men out.
In 1871, at Bent Head, Stanhope, Emerson Peart, lead miner, aged 29, his wife Phebe aged 25 (Featherstone, married 2nd quarter 1865 registered at Weardale), sons, Jacob 4, Thomas 2, and Penrose 8 months.
In 1881, at Bents, Stanhope, Emerson Peart, lead miner, aged 39, his wife Phoebe 35, children Thomas 12, Penrose 10, Mary 9, Emerson 6, Robert H. 4, and Frances E. 2.
In 1891, at Bent Head, Emerson Peart, lead miner & farmer, aged 49, his wife Phoebe 46, children Thomas, lead miner, aged 22, Penrose, general labourer, aged 20, Mary 19, Emerson, lead ore dresser, aged 16, Robert H., farm labourer, aged 14, and Frances E 12.
In 1901, at Copt Hill, Penrose Peart, whinstone, quarry man, aged 30, his wife Elizabeth (Peart, married 3rd quarter 1896 registered at Weardale), aged 26, children Emerson 4, Mary 2, and John Thos 3 months.
In 1911, at Copt Hill, Penrose Peart, lead miner, aged 40, his wife Elizabeth, aged 36, children Emerson, lead dresser, aged 14, Mary 12, John Thomas 10, and Arthur Featherstone 6.

In 1881, at Rush, Robert Peart, lead miner, aged 26, his wife Sarah aged 22 (Milburn, married 2nd quarter 1876, registered at Weardale), children John Albert 4, William 3, and Mary Ann 1.
In 1891, at Rush, Robert Peart, lead miner, aged 36, his wife Sarah 32, children John A., lead ore dresser, aged 14, Milburn, lead ore dresser, aged 13, Mary Ann 11, Thomas H 8, and Jane A 5.
In 1901, at Rush, Robert Peart, lead miner, aged 46, his wife Sarah 43, children John A, lead miner, aged 24, Mary A 21, Thomas H., stone quarry labourer, aged 18, and Mary A 6.
In 1911, at Middle Rush, John Albert Peart, limestone quarryman, aged 34, his wife Margaret aged 29 (Liddle, married 1st quarter 1903, registered at Hexham), children Sarah 7, Thomas Allan 5, and Robert 4.

26th August 1916 (Hexham Herald)
Deaths
At Melbourne, Australia on 27th June, Hannah Maria, wife of Ernest Hood Leake (late of Haltwhistle) and eldest daughter of John & Elizabeth Dryden, Barhaugh, Alston.

30th September 1916 (Hexham Herald)

SETTLINGSTONES

LEAD MINERS EXEMPTION

Of the 60 appeals that came before Hexham Rural Tribunal on Wednesday week 47 were from lead miners in the employ of Settlingstones Mining Company. It was stated that 75 per cent of the mineral produced at these mines went to munitions. An application had been made to the Minister of Munitions to have these men badged and they were awaiting the result of the application. These cases were adjourned for a fortnight. Five men employed in the W. B. Lead mines, Allendale were granted conditional exemption.

21st October 1916 (Hexham Herald)

WEARDALE

MINING FATALITY

At Stanhope Coroner J. T. Proud held an inquiry into the circumstances connected with the death of Emerson Colling, 46, lead miner. The evidence went to show that the deceased and a man named John Brown were drilling for a shot in the Stanhope Burn lead mine when a piece of Spar fell upon Colling who received such injuries that he died.

In 1911, at Four Lane Ends, St John's Chapel, Emerson Colling, lead miner, aged 40, his wife Maria Elizth 40, children Frances Elizabeth 7, and John Frederick 6.

Deaths

Joseph Nicholas Emerson, aged 31 of Daddry Shields, St John's Chapel has been missing since Friday night. The weather has been very rough but search parties have been out every day. His cap was found on "Causeway" the mountain, which lies between Weardale and Teesdale.

Joseph N. Emersons death was registered 4th quarter 1916, at Weardale.

18th November 1916 (Hexham Courant)

ALLENDALE NOTES

As many a spare hour of my boyhood had been spent in and around Allen Mills, I made my way into the Rookhope Lead Mills, and as the manager had just come back after the Mid-day interval, I requested his permission to look around and renew my acquaintance with the inside of a lead mill. The manager not only gave me permission, but went round with me and 'cracked" about the improvements which later and better methods had brought about. The greatest improvement was seen in the slag hearth. The old slag hearth of Allen Mills, with which I had, as a boy been familiar was quite a back number: the slag from it still containing a large percentage of lead. From the modern hearth the slag is analysed two or three times a day a thing I never saw done at Allen Mills - and the quantity of lead residue is quite negligible. A qualified chemist is actually on the staff. All the ores smelted are not produced by the company, all that is obtained from outside sources is bought on the results of the analysis. The smelting hearths seemed much as I had been used to, and though evidently highly satisfactory as far as results went, yet struck one as being small, and dealing with ridiculously small amounts of ore at a time. The desilverisation of the lead, with its accompaniment of Pot Houses, is absent. The pig lead sold there from contains varying amounts of silver, which silver is extracted by the firms to which the crude product is sold.

At present, I believe there are no Allendale men working at the lead mills, but at the mines a mile or so further down quite a number. Besides these there are men from the neighbouring dales on all sides. Some travel quite amazing distances with their wallets on their backs. Boltsburn or Bowts, as the miners call "her" has been a veritable mine of wealth to the Weardale Lead Company, and if it has not made millionaires of the hardy walleters it has at least given them a livelihood, and inculcated many of the sterner virtues not to be found in factory workers of our larger towns.

30th December 1916 (Hexham Herald)

ALSTON

The death is announced at his residence, 7 Greenfield Terrace, Gosforth, of Mr Thomas Walton, a native of Alston, who was for many years the representative of Messrs Locke, Blackett & Co. Lead Manufacturers on the Newcastle Quayside. Mr Walton who was in his 91st year was buried on Thursday.

In 1871, at Gallowgate, Thomas Walton, messenger at lead works, aged 45, his wife Catherine, aged 42, and daughter Mary Emma aged 2.
In 1881, at 47a Gallowgate, Newcastle, Thomas Walton, agent lead works, aged 55, his wife Catherine 52, and daughter Mary Emma 12.
In 1891, at Gallowgate lead works, Thomas Walton, agent lead works, aged 65, his wife Catherine 62, and daughter, Mary E 22.
In 1901, at Gosforth, Northumberland, Thomas Walton, retired Clerk, aged 75, his wife Catherine aged 72, and daughter Mary E. aged 32. In 1911, at 7 Greenside Terrace, Thomas Walton, widow, retired aged 85, and daughter Mary Emma aged 42.

30th December 1916 (Cumberland & Westmorland Herald)

DEATH OF MR JONATHAN RUTHERFORD ALSTON.

The death of Mr. Jonathan Rutherford. Town Head, Alston, which occurred suddenly on Saturday morning, has removed an outstanding personality and well-known townsman. Mr. Rutherford attended to his duties up to Friday, and seemed to be in his usual health up to two o'clock on Saturday morning, when he took ill and died in a few minutes. Deceased of late years had not enjoyed robust health, and only recently had been under treatment of Dr. Carson. He was born nearly 60 years ago at Nenthead, where nearly the whole of his life was spent. A joiner and decorator by trade, he excelled in the latter, the artistic side of his business appealing to him. He rendered good service to ha native village for several years in the capacity of district councillor and school board manager, and it often fell to his lot to preside over meetings of importance in the village. A change in the industrial life of the village necessitated his seeking a fresh sphere of labour, and he received the appointment of sanitary inspector for the Alston district six months ago and removed to Alston. …

Mr Rutherford suffered a severe trial in the loss of his first wife, and he was left to face the world with five young children. An Almost equally tragic blow befell him when his eldest son, William, died in Canada from typhoid fever about six years ago. The young man had emigrated some time previously, and was carrying on the business of painter. Success crowned his efforts and he was making preparations for his father to join him in the undertaking, but fate decreed otherwise. …

Another tragic bereavement followed in the death of his daughter, Florence, who died suddenly at Carlisle about two years ago. Thus he had had a large share of domestic sorrow.
For 34 years deceased carried on the business of carpenter and pointer at Nenthead, but failing health obliged him to relinquish his business some nine months ago. His only son, who assisted him in the business, enlisted in the Royal Engineers, and is now serving in France. About six months ago he secured the position of sanitary inspector to the Alston Rural District Council. Mr. Rutherford was for many years a member of the Alston Rural District Council and Guardians, and will be much missed in the public life of the community. …

DEATH OF MR. THOMAS CARR. GARRIGILL.

By the death of Mr. Thomas Carr, which occurred on Thursday of last week, Garrigill has lost one of its oldest inhabitants and the local Wesleyan Methodist cause one of its most esteemed members and workers. Mr. Carr's whole life was spent in the village with the exception of six years in Newcastle. He was for many years foreman lead ore dresser at Green Hurth Mines, having to carry his wallet and return at week-ends. After his retirement he was a familiar figure at the village blacksmith's shop, and it was a pleasure to hear him relate interesting incidents of bygone days. In connection with the church he rendered yeoman service, holding the position of class leader up to the time of his death. Though lacking the facilities and equipment of younger men in the shape of books and other modern helps, he had a wonderful knowledge of the Bible, and had a plain, unvarnished, and straightforward way of explaining it. In him there was blended common sense and quaint spirituality, which gave him a wonderful adaptation in visiting the sick. He was 79 years of age, and leaves a widow and grown-up family. Mr. and Mrs. Carr celebrated their golden wedding two year. ago this month.

3rd February 1917 (Hexham Courant)

ALLENDALE NOTES

... At Carrshield, however, a novel mode of overcoming the winter's siege was resorted to: the tube railway, the lead mine or level connecting the West Allen mines with those of Nenthead, provided a track along which food stuffs, and other necessaries could be transported. Nenthead in communication with Alston, Carrshield was cut off from Staward. What was simpler then, than for the miner from Carrshield to make his purchases in Nenthead - a place with wonderfully good shops - ride with them to the Allendale side, and carry his bacon, etc., home to his guid wife with the minimum of difficulty.

23rd April 1917 (Lancashire Evening Post)

MINERS' PHTHISIS.
CONDITIONS AT A CUMBERLAND
LEAD MINE,

Sir Geo. Toulmin, M P., yesterday asked as to conditions under which lead mining is carried on at the Greenside Mine, Glenridding, on Ullswater, the mortality from miners' phthisis at this mine compared with other Cumberland and Westmorland lead mines, and the general rate for phthisis, and whether provision is made for men underground to wash before meals, also whether the mother rock produces silica dust and is a cause of miners' phthisis, whether this mine differs from neighbouring lead mines, whether appliances are provided to

safeguard men from the evil effects of the silica dust generated by boring and blasting in addition to those provided in neighbouring mines, and whether blasting is allowed whilst the men are still at work.
Mr. Brace replied: The Home Office recently directed special investigation into the conditions at this mine by the Mines Inspector for the division, and a Medical Inspector of factories. They came to the conclusion that the mortality at this mine from miners phthisis was considerably in excess of the death-rate from this cause for all males in the United Kingdom and also at other neighbouring lead mines and that this was due to the character of the rock and the amount of dust from machine drills which was allowed to escape into the air. At the Greenside Mine the rock in which lead bearing veins are found is quartzite, and this produces silica dust the inhalation of which is liable to cause fibroid phthisis whereas at the neighbouring lead mines the rock is either slate or limestone, and the dust is not injurious.
Following on this report special rules were drafted to deal with the danger, embodying the precautions recommended by the Royal Commission on Metalliferous Mines and Quarries. These have been adopted the owners of the mine, and are I am informed, now observed at the mine. They impose special requirements (not in force in neighbouring mines) in regard to boring and blasting, with a view to preventing as far as possible the production of dust in boring and the exposure of men to the dust after blasting. Blasting is not prohibited while men are in the mine, but is mainly done at the end of the shift. I am informed that washing facilities are not provided, and that they are not necessary for the prevention of miners' phthisis.

22nd August 1917 (Teesdale Mercury)
The death is announced of Mr D. Walton of Leadgate, Alston, at the age of 83 years. In early life he was engaged as washing master at Rotherhope Fell Mines.

24th November 1917 (Hexham Herald)
Deaths
Private Frank Norman Millican, son of Mr & Mrs John Wallace Millican, of Garrigill, Alston, reported killed in France 26th October 1917.
In 1851, at High Pasture House, Wallace Millican (son of Thomas Millican and Elizabeth Walton baptised 27th July 1806 Garrigill, died 10th January 1877), farmer of 39 acres, aged 44, his wife Sarah (Featherstonehaugh, married 14th June 1832, at Knaresdale, Northumberland) aged 41, children, Henry, lead miner aged 17, Thomas lead miner aged 16, George, lead miner, aged 13, Elizabeth 11, and Wallace aged 8.
In 1871, at Garrigill Gate, Henry Millican (born Knaresdale, Northumberland), lead miner & farmer of 95 acres, aged 37, his wife Hannah (Peart, married 1857) aged 37, children Thomas S 13, Sarah 10, John W 8, and Elizabeth E aged 4 years.
In 1881, at Garrigill Gate, Henry Millican farmer of 90 acres, aged 47, his wife Hannah 47, children Thomas A. 23, Sarah 20, John W. 18, Elizabeth E. 14, Mary H. 9, and George N. 6.
In 1891, at 107 Union Street, Byker, John W Millican, messenger, aged 28, his wife Anne (Jackson, married 1885) 28, his brother George N Millican, clothier's cash boy, aged 16.

In 1901, at Gatehead, Garrigill, John W Millican farmer & carrier 38, his wife Annie (born Kirkhaugh, Northumberland) 38, children Percy E 15 (born Garrigill), Hugh J 8 (born Garrigill, Emily R. 6 (born Gateshead, Durham), and Frank N. 4 (born Gateshead, Durham.
At Claremont House, Alston (the residence of his brother Mr Walton Holmes) aged 71 years, John Holmes late of Gisborne, New Zealand.
See 17th June 1878, 5th June 1886, 22nd April 1893, & 28th February 1920

18th December 1917 (Penrith Observer)
On Monday an accident happened in a lead mine at Nenthead, Alston, which caused the **death of a man 51 years of age, named George Hutchinson**. Deceased was stemming a hole charged with powder in the mine, when the powder exploded. He received several injuries on his head and various parts of his body, from the effects of which he died on Wednesday.

5th February 1918 (Penrith Observer)
THE ITALIANS AT PATTERDALE.
Mr. W. H. Borlase, manager of Greenside Lead Mines, Patterdale, applied for two Italian miners, Guiseppe and Constantino Pala, whose services he said were essential to enable them to provide lead for munitions. The firm was only controlled to the extent that all their products were sent to controlled firms.—Mr. Borlase: If they are taken will they join the Italian army? —Captain Lambert: No, the British army.—Mr Borlase said the men were skilled, and worked drilling machines. The reason they had not been protected was that being Italians they were formerly free, and it was only recently that they had been called up. Ha also gave particulars of his staff, and said the output was now 646 tons against 1,821 tons before the war. He added that these Italians had married English girls. There were two other younger Italians for whom he was not appealing.—The men were given to May 20th, so that it could be seen if the other two joined up in the meantime.

18th May 1918 (Hexham Herald)
Deaths
At Alston on the 8th inst. aged 47, Staff Sergeant Fred A. Millican, of the Canadian Forces, son of the late John Millican J.P. of Croft House Alston.

In 1881, at 15 Front Street, Alston, John Millican (son of James Millican), Draper, aged 59, his wife Annie 52, children John Holmes drapers assistant, aged 29, Charles Arthur, assistant mining engineer, aged 19, Florence 14, Percy Reed 13, Frederick Arnold aged 10 years.
See 30th May 1866, 17th August 1872, 11th April 1874, 2nd September 1876, 2nd June 1877, 22nd March 1879, 24th June 1882, 12th September 1885, 21st April 1888, 13th August 1892, 14th April 1894, 20th May 1899, & 23rd March 1901.

WEARDALE MINING INDUSTRY.

Great activity prevails in the mining industry in Weardale. The Lead Company are opening out the deep adit level at Stanhope Burn lead and spar mines, with a view to working the mines at a deeper random. The Weardale Steel, Coke, and Coal Company are introducing improved methods of haulage to facilitate the despatch of minerals from their Stanhope mines.

7th October 1918 (Newcastle Daily Chronicle)

WINDING Enginemen, experienced. Wanted for the W.B. Lead Mines, Allendale.—Apply to W. Bright, Sipton, Allendale.

21st December 1918 (Lancashire Evening Post)

BLASTING FATALITY STORY OF LAKELAND MINER'S TRAGIC DEATH

An inquest was held, at Keswick, yesterday, on the body of George Dixon, lead miner, Braithwaite, who died at Keswick Cottage Hospital as the result of injuries received in accident at the Force Crag Mines, Keswick, the 13th inst. He was well known as a footballer from Penrith to Workington, and was full-back in the team which won the Penrith League Cup.

John Thwaite, lead miner, Braithwaite, said that deceased, who was 43 years of age, was his half brother, and they had worked together at the Force Crag Mines for about three years. Their work was drilling and blasting. On Friday, the 13th inst., they were working in a level to which they were accustomed. Each had bored hole on opposite sides of the stope and each inserted his own cartridge and lighted the fuse. Witness retired 108 ft. and crouched behind a 3ft. wall. Deceased was following him closely, but before he could get behind the wall the shots exploded and a piece of metal struck deceased in the back below the left shoulder and knocked him down. Witness rushed to him and found him lying on his side and bleeding, but quite conscious. He was conveyed to hospital, where he died. Mr. Leek, Inspector of Mines, said that the 108 ft. was too short distance for safety, and he thought it very questionable whether a 3ft. wall would shelter two men with any safety, for there always the danger of a ricochet. The jury returned a verdict that "Deceased died of laceration the lungs being struck by a piece of metal from a lead mine shot."

30th December 1918 (Shields Daily News)

OVERCOME BY SNOW ON HELVELLYN

Information reached Penrith on Saturday of an exciting experience on Helvellyn. John Chapelhow, who is employed at the Greenside lead mines, was sent on Thursday afternoon about four o'clock to stop the water from Kepple-cove Tarn, which serves the mine reservoir. A very severe snowstorm prevailed at the time,

and it was impossible to see far ahead. As Chapelhow failed to return from his five miles journey, in the evening a search party was organised. The men spread themselves out and went towards the tarn, eventually finding Chapelhow helpless and completely exhausted; indeed, it was said that in a very short time he must have succumbed. Some years ago, a man lost his life while engaged in a similar task, as he lost his way and fell into Kepplecove.

7th February 1919 (Newcastle Daily Chronicle)

ALSTON LEAD MINES.

Damages Against a Proprietor

Mr. Justice Salter, in the King Bench Division, yesterday, granted the Hedworth Barium Company, St. Nicholas' Buildings, Newcastle, an injunction to restrain Mr. Cleveland R. Macdonald, of Alston, from entering on their lands at Alston, Cumberland, and carrying on mining work.

Plaintiffs, it was stated, were lessees of certain lands from the Admiralty for purposes of mining lead and other minerals. Some years previously, the defendant had held a lease or acquired rights to prospect in land in the same district, under the Alston Prospecting Syndicate, but that concession had gone into liquidation, and defendant had no rights to enter on plaintiffs' land. In June and July, 1917, he went prospecting over the plaintiffs land, and had made various shafts and cuts, removing some 50 tons of ore. Counsel added that these cuts and shafts had been left open, and, in addition to making it difficult for plaintiffs to work their mines, they were dangerous, because they were unfenced. This was grazing land for cattle or sheep, which might fall into these holes. Evidence was given by a clerk to the Admiralty with regard to the lease. James Turnbull, mining engineer, Alston, said it would cost £100 to fill up the shafts. There was no appearance for the defence. Mr. Justice Salter, besides granting plaintiffs an injunction and costs awarded them £130 damages.

22nd February 1919 (Lancashire Evening Post)

There is a somewhat better outlook in the lead and zinc mining industry in the Lake District. The Government has extended the time when the refunding of the award ceases to the end of March, mine owners having pointed out that the fixing of the price of lead at £40 per ton after the control was lifted could not cover the award, with the Government itself holding 63,000 tons of lead in stock and selling it at the forward price of £30 per ton. The respite now gained is very welcome, it enables owners and their men to come to terms regarding wages. Unless amicable arrangement can be arrived at the closing down of the mines is inevitable. The position respecting zinc is still obscure, the Government being desirous clearing its stocks of Australian zinc concentrates, but English Smelters' Association have refused enter into a binding agreement to take the Australian supplies. The Carrock Wolfram mine in the Caldbeck Fells has been closed down on account of high costs, the principal of which cartage.

16th August 1919 (Hexham Herald)

Deaths

At Toowoomba, Queensland June 3rd 1919, Ruth, the dearly beloved wife of Joseph Ritson.

29th August 1919 (Edinburgh Gazette)

THE WANLOCKHEAD LEAD-MINING COMPANY LIMITED.

A PETITION was on 28th August 1919 presented by the above-named Company to the Lords of Council and Session (Second Division, —Mr. Antonio, Clerk), praying their Lordships, *inter alia*, to confirm the reduction of the share capital of the Company, resolved upon by the Company under the Special Resolutions recited in the Petition, and passed on 16th July 1919, and confirmed on 6th August 1919, viz. "(1) That the Capital of the Company be reduced from £37,500 divided into 37,500 shares of £1 each (of which 25,000 have been issued and paid up in full, 11,600 issued with 10s, per share paid up, and 900 are still unissued) to £31,700 divided into 25,900 shares of £1 each, and 11,600 shares of 10s. each, and that by extinguishing the liability of 10s. remaining upon each of the 11,600 shares of the Capital upon which 10s. only has been paid up."

"(2) That on the reduction of Capital before set forth becoming effective, the said 11,600 shares of 10s. each shall be converted into 5800 shares of £1 each by consolidating every, two shares of 10s. into one new share of £ 1."

To approve of a Minute of Reduction of Capital in the terms set forth in the Petition; to direct the registration of the said confirmation and relative Minute by the Registrar of Joint Stock Companies in Scotland; to direct notice of such registration, when made, to be given by advertisement; and to fix the date until which the words "and reduced" require to be added to the name of the Company.

In the said Petition the Lord Ordinary officiating on the Bills has pronounced the following Interlocutor: —

" Edinburgh, 28th August 1919. —The Lord Ordinary officiating on the Bills appoints the Petition to be intimated on the Walls and in the Minute-Book in common form; to be advertised once in the Edinburgh Gazette and once in each of the Scotsman and Glasgow Herald newspapers; allows all persons having or claiming interest to lodge Answers within eight days after such intimations and advertisements, and meantime and during the dependence of these proceedings dispenses with the addition of the words "and reduced" to the name of the Company.CHARLES J. GUTHRIE.

Of all which intimation is hereby given.

J. W. & J. MACKENZIE, W.S., Agents for Petitioners.

16 Duke Street, Edinburgh, 28th August 1919.

12th September 1919 (Edinburgh Gazette)

THE WANLOCKHEAD LEAD MINING COMPANY LIMITED,

INTIMATION is hereby made that on 28th August 1919 a Petition was presented by the above-named Company to the Lords of Council and Session (Second Division,—Mr, Antonio, Clerk), praying their Lordships, *inter alia*, to confirm the Reduction of the Share Capital of the Company, resolved upon by the Company under the Special Resolutions recited in the Petition, and passed on 16th July 1919, and confirmed on 6th August 1919, all as set forth in said Petition.

In the said Petition the Lord Ordinary officiating on the Bills has pronounced the following Interlocutor: — "Edinburgh, 11th September 1919. —The Lord Ordinary officiating on the Bills, having considered the Petition, with evidence

produced that the same has been duly intimated and advertised as appointed by the preceding Interlocutor (no Answers having been lodged), fixes 28th August 1919 as the date with reference to which the list of Creditors of the petitioning Company within the meaning of Section 49 of the Companies Consolidation Act, 1908, shall be made up: Appoints the Company to lodge in process a list of such Creditors entitled to object to the proposed reduction of the Share Capital of the Company; fixes 25th September 1919 as the date on or before which the Creditors of the Company not entered in such list of Creditors are to claim to be entered thereon or are to be excluded from the right to object to the proposed reduction; appoints advertisement of the foregoing dates fixed to be made once in the Edinburgh Gazette and once in each of the Scotsman and Glasgow Herald newspapers; remits to Mr. F. P. Milligan, W.S., to inquire into and report upon the facts and circumstances set forth in the Petition as to the regularity of the proceedings, and as to the reasons for the proposed reduction of the Company Capital."

GEORGE L. MACFARLANE.

Of all which Intimation is hereby given.

J. W. & J. MACKENZIE, W.S., Agents for Petitioners.

16 Duke Street, Edinburgh, 12th September 1919.

13th September 1919 (Lancashire Evening Post)

NOTICES TO MEN AT LEAD AND ZINC MINES EXPIRE TO-DAY.

The inevitable result of the suspension the output bonus in the lead and zinc-mining industry in the Lake Country has been the almost complete curtailment of operations at the mines. Notice has been given to the whole the men to cease work to-day, and any men who are retained will continue their employment on three days' notice. The production of lead and blende is being suspended at Force Crag, but the company intend to concentrate their energies on barytes, of which they have a very fine deposit. At Threlkeld the fore breast on the main horse level is showing good ore—certainly two tons the fathom —which with this easily worked lode is a paying proposition. The whole development of the Caldbeck area is now in abeyance, the capitalists interested stating that they cannot touch it under the circumstances.

25th October 1919 (Newcastle Daily Chronicle)

CLOSING DOWN OF NENTHEAD WORKS.

The announcement made some few weeks ago that the lead mines at Nenthead are to be closed down calls for more than passing mention, as it practically means the death knell to a little Cumberland village which from time immemorial has been associated with the lead mining industry.

For the past 23 years the mines at Nenthead have been worked by the Vieille Montagne Zinc Co., one of the most important lead and zinc companies in the world, the owners before that being the Nenthead and Tynedale Lead and Zinc Company, of which the chairman was the late Mr. J. Cameron Swan, of Newcastle. That company took over the mines in 1882, from the London Lead Company. The history of the mining industry in the district is full of interest, and dates back probably to the Roman period. With its growth and progress has sprung up the village of Nenthead, 1,300 feet above sea level, which is now threatened in a very serious way. The village is 4½ miles from Alston, and had up to a few years ago a population of between 600 and 700, almost wholly

dependent on the mining industry. Since the latter end of 1918, the number of men employed in the mines has been gradually reduced until, in September last, when the Vieille Montagne Co. decided to dose down all the levels with the exception of one, there were only about 200 men engaged. Week by week this number has been reduced until at the present time there are not. more than about 50 men actually employed in the industry.

EXODUS OF WORKERS

Although the cutting down of the staff has been done gradually, the effect on the village has, nevertheless, been serious. The exodus from the place, however, has not been on such a large scale as it might have been but for the housing difficulties in the areas to which the men are drifting. A large proportion have found employment in the mines at Haltwhistle, while others have gone over into the Weardale Valley and found work in the mines there. In these cases the men are having to keep on their homes at Nenthead to which they return at the week-ends. the young single men have gone further afield in their search for employment, and in many instances have turned their attention to farming. A small proportion of the miners were also farmers in the Nenthead district, and they have now had to devote the whole of their attention to agriculture.

Nenthead is therefore far from being a deserted village, and one of our representatives who paid a visit this week could only find one empty house. ln the course of an interview. Mr. Gean Cox, the resident manager of the Vieille Montagne Co., explained the causes which had led up to the closing down of the mines. He pointed out that since the company took over the lease in 1896 they had spent £82,000 in prospecting, driving, sinking shafts and new levels, and equipping the mines with compressed air and rock drills, and a further £80,000 in extending existing dressing floors, and erecting new dressing floors. Altogether about £200,000 had been spent in that way, none of which had been written off.

Prior to the war they had supplied their Belgium works with the bulk of their products, and this had been done at a loss so far as the mines were concerned. During the war they had been in a better position as they had supplied the home market and had been subsidised by the Government. The withdrawal of the subsidies in March and June this year had, however, placed them in a much worse position than they were before the war, because whereas the quality of the metal had depreciated considerably, the cost of production of every ton of marketable ore had increased to two and a half times what it was in 1914. Although the withdrawal in the Government subsidy had put the finishing touch to it, the key to the situation was the diminishing quality of the ore which was being extracted from the mines. The principle sections in what is known at. the "Old Nan” a local name given to a part of the mine which has been worked in former days—are now closed and the only section which is being worked is that at Nentsbury, which will give employment to about 40 or 50 men.

FUTURE of the Mines

No statement can yet be made as to the future of the mines, but it is interesting to note that a Departmental Committee, set up by the President of the Board of Trade, is at present sitting in London, to investigate and report upon the present position and economic possibilities of non-ferrous mining in the United Kingdom, and “to make recommendations as to such Government action as may be expedited in regard thereto.

SOLDIERS' & SAILOR'S WELCOME HOME AT ALSTON.

The final welcome borne was held in the Town Hall, Alston, last week, there being a very large assemblage of ex-soldiers and friends. Mr. J. R. Walton, president of the Welcome Home Association, presided. The programme began with supper, during which the orchestral band of Mr Hadow, Carlisle, rendered a choice selection of music. After supper, a smoking concert was held, and following it, Colonel Hawthorn, D.S.O., presented Military Medals, which had been sent by the War Office to the association for presentation. The recipients were Sergt. Jacob Dickinson, Lce.-Corpl. Sproat, Bombardier J. Stephen, and Private John Pickering. A gold watch and albert were provided by the association for each bf the medalists, and these were handed to them by Alderman Yielder, on behalf of the committee. Lieut. Harold Storey, who had been awarded a Military Cross, was also presented with a gold watch and albert. The Chairman announced that Captain Edwin Little had received a decoration from the Italian Army, and Lieut. John Storey had been awarded a Military Cross; in 1817, Sergt. James Hetberington was awarded a Military Medal, and at the time was presented by the Association with a gold watch and albert. On the motion of the Vicar, the Rev. H. W. Lovett, R.N., seconded by the Rev. W. Sellers, and supported by the Rev. B. Briggs (both Military Chaplains), a vote of sympathy was passed in silence with the relatives of those who had sacrificed their lives, the large gathering reverently standing and the orchestra sweetly played the National Anthem. This was a most impressive time. The hall was afterwards cleared for the dance, which was kept up until a late hour. Mr. T. Smith was secretary, and Mr. John Tatters treasurer.

18th November 1919 (Penrith Observer)

THE LAKE COUNTRY MINING INDUSTRY.

The Lead and Zinc Mine Owners' Association are taking very active steps to present the case for their industry before the Non-Ferrous Mining Commission. It was arranged at a recent meeting that Mr. Onslow should deal with. the negotiations that have taken place between the Government and the owners during and since the war, and that Mr. Anthony Wilson, of the Thornthwaite Lead Mines, should present the case for the extension of the output to all mines until as regards (a) galena, the Government stocks are disposed of, and as regards (b) zinc concentrates, until the stocks in Australia have been disposed of or alternatively until the production from the tailings heap is disposed of. Mr. Anthony Wilson is also to concern himself with the question of the rating royalties, and income tax assessments. A member has been appointed to represent each district, and he will give an outline of mining past and present in his neighbourhood, and a reasonable price for sulphides is assured. The owners of the Threlkeld Mine, it is stated, are going to accelerate the development of a newly discovered lode. It is believed that the mine will become the principal producer of lead in the Lake District within the next five years.

ALSTON

A BUSINESS JUBILEE

Mr R. H. Millican of the firm Messrs Reed Millican, Co. Glass Merchants, Newcastle; who will shortly celebrate his business jubilee, has been a member

of the Newcastle City Council since November 1904 and is one of the three representatives of St Andrew's ward. Born at Alston he received his education at the grammar school in that Cumberland, market town and subsequently at Gosberton Hall, Lincolnshire. At the end of his school days he was for seven years with the firm of Messrs R and W Hawthorn Leslie and Company, prior to his journey his Uncle Mr Joseph Reed of the Reed Millican and Company, with whom he has ever since been associated. ….

THE MINERS' PHTHISIS AT PATTERDALE.
MEDICAL OFFICER'S SIGNIFICANT REPORT
THE MINE MANAGEMENT EXONERATED.

Recent meetings of the West Ward Rural Council have discussed the question of the alleged high mortality of men at Patterdale from miners' phthisis, and the consequent burden thrown upon the rates, for the maintenance of those left behind by the deceased miners. A few meetings ago the matter was again introduced by Mr. Winster, on resigning the sanitary inspectorship, and the discussion led to a request being made to Dr. Cockill, medical officer of health, to report on the whole matter. Dr. Cockill accordingly paid a visit to the mines and conducted an investigation, and his comprehensive report was presented to the members of tho Council at Tuesday's meeting at Penrith. The report was as follows:

In accordance with your instructions conveyed to me in a letter the 16th. ult. I have visited the Greenside Lead Mines, and present to you my report thereon. I have taken a period of ten years ending 1919, for investigation, thereby continuing the inquiry made on behalf of the Inspector of Mines in 1916. The number of cases notified has been nineteen, occurring as follows: Years 1910, 1913, 1915, 1917, 1919, nil; 1911, 1912, 1916, 1918, average 2, total 8; year 1914, 11, a total of 19. The mortality amongst these cases has been 15. The age incidence of the disease is 49 years. The age incidence of fatal cases is 52 years. The average number of years worked in mine prior to manifestation of disease (all cases) is 29 years. The average number of years worked in the mine prior to manifestation (fatal cases) is 32 years. With the exception of tin miners, costermongers, cutlers and file makers, no industry shows a higher percentage death rate from phthisis than lead mining. Phthisis as an industrial disease reaches its lowest level in agriculture. At Patterdale therefore we have side by side two industries, the one which is the least provocative and the other which is nearly the most provocative of phthisis. The comparison is naturally very pronounced. The causation of this disease amongst lead miners is due to two facts: (a) irritating dust particles; (b) temperature of mine. The latter cause does not operate at Greenside, as the mine is naturally ventilated, the temperature being practically the same as the outside air. The question of dust particles alone remains to be considered. This dust is generated in three ways: (1) By boring operations with mechanical drills; (2) By blasting; (3) By handling dry materials on loading tubs, &c.

1. Prior to 1914, dry boring was in vogue; since that date wet boring was introduced, and this, if carried out according to instructions, practically does away with all dust particles. 2. Blasting used to be done at any hour, the men returning to work at once. Now, the charges are laid, and slow fuses ignited immediately prior to knocking off work, and the blast takes place whilst the men are away from the site of operations. No return to work is made for seventeen hours; the ground around is all damped, so that all dust has settled by the,time work is resumed. 3. There must be a certain risk in handling dry material from time to time, though this cannot be very great, as there is abundance of water laid on which is available for damping purposes. I examined the contents of a large number of tubs

and found them invariably damp. The practice of men going home in their wet clothes, instead of leaving them in the drying rooms is slightly risky,' as the partioles of dust when dry are liable to contaminate the household atmosphere. Some of the men, however, still persist in this practice.

Conclusions.—I am of the opinion that provided the workers will take advantage of all facilities provided, there is little liability under existing circumstances of contracting this disease. I can offer no suggestions for further safeguarding their health beyond advocating more ventilation in the home. Of all the houses in the valley occupied by workers, I found only three where windows were opened.

I am indebted to the courtesy of the management of the mine for the facilities afforded to me for inspecting every part of the mine and the workings, and of talking with the men individually without their being present; also to Mr. Winster for much valuable statistical information; and to Dr. Lawrence, who informed me that at the present time there are very few miners who have even any suspicious symptoms, and many of these have been working in tin mines in Cornwall, the worst industry known for the production of phthisis.

The Chairman (Mr. J. O. Dent), said the Council had continually had that matter before them, and the Press had said they did nothing but talk, talk, talk about it, and never effected any remedy. He had always maintained that they as a Council had no jurisdiction over the Greenside Mines, but they had intentionally brought the matter up so that the people could know what was going on. The Chairman of the Parish Council had written to say that they (the District Council) did not do what they might do. Mr. Winster had brought the facts before them time after time, and Mr. Borlase (the manager of the mines) had also constantly brought it before them that the mortality was heavy. He did not run away from the fact at all. Consequently the relief for Patterdale was heavy. Dr. Cockiil had now reported, and Mr. Borlase gave them the same idea, that if the men would use all the facilities within their reach there need not be such heavy mortality, nor such a heavy amount of pauperism from Patterdale. Dr. Cockiil had given them a fair and unbiased report, for which they were thankful.

Mr. Moffat: From the report I take it the directors and management of Greenside have done all they could?

Dr. Cockill: I could suggest nothing more— absolutely nothing.

The Chairman said the mine was under Government inspection, and the Council had nothing to do with going down the mine.

The Rev. W. P. Morris suggested the adjournment of the discussion until there was a larger attendance of members.

Mr. J. Thompson said no useful purpose would be served by that. He thought the public had been rather misled by the Press reports, which appeared to suggest that the Council had connived at that mortality, by suggesting that they had refused to take measures which they might have taken.

Dr. Cockill said they had to bear in mind that the mortality had occurred after 29 years' working in the mine. Those men had been working when there was dry boring going on. They had got rid of those poor fellows, and had a new generation coming on under the wet boring system, and they would not get anything like the same mortality. In the course of investigation they came across a year which was phenomenal for its high mortality, but it was just the culminating year for that series of people who had been working there for a long

time under the dry boring system. It was appalling, and no wonder people took notice of it. One of the most astonishing things was the fact of people living in the valley inter-marrying. Wherever they had a stationary population, and inter-marrying went on they would get phthisis of the ordinary kind; but this, of course, was miners' phthisis, but possibly the conditions he had outlined tended to produce a constitution that was not too good. He did not think that in the future they would have the same lamentable mortality from miners' phthisis.
The Chairman: Was your visit a surprise visit?
Dr. iockill: No, I arranged for it.
Mr. Morris : That is just.it.
Dr. Ctakill: I could not go into the mine as a surprise visit. I had no right to. He added that they could not absolutely do away with the dust. When boring was beginning they could only wet a small portion of the surface, but when a hole was made the water was squirted into it, and when a drill was changed there had to be a certain dryness for a time. But there was no
more risk than there was from motor phthisis which might be got from the roads at present.
The Chairman: Mr. Borlase repeatedly said the men would not use the appliances put within their reach.
Dr. Cockill: They will now. The younger generation is more intelligent, and takes more care. Industrial disease was not troubled about twenty years ago, and nobody took the trouble to look into it.
Mr. Thompson: After all, lead mining it not a healthy occupation.
Dr. Cnckill said it ranked about fourth in the mortality list under the best conditions. The disease in the Cornish mines had been practically abolished Where there was carelessness there was risk, just as there was when a man working in a gunpowder factory carried matches in his pocket. The doctor added that at Greenside the men were provided with hot baths, and drying room, and the men had the opportunity of having hot bath and their clothes dried every time they finished work. The great thing was to keep down the dust, which, so far as he could see, was done absolutely.
On the motion of Mr. Moffat, seconded by Mr. A. Scott, the report wag adopted, and Dr. Cockill was given permission to send a copy of the report to the mine management.

22nd June 1920 (Penrith Observer)

SUDDEN DEATH AT PENRITH

Mrs. Spark, Victoria Road, Penrith, widow of Mr. J. Spark, High Galligill, Alston, died suddenly on Tuesday evening. Mr. D. Hayes, Penrith, was visiting Mrs. Spark, and was just leaving when the old lady fell forward and collapsed. Dr. Macdonald was summoned, but Mrs. Spark, who was 70 years old, died shortly after his arrival. The cause of death was apoplexy. Mrs. Spark and her husband were well known in the Alston district, where they farmed for many years, while Mr. Spark was formerly manager of the Brownley Hill Lead Mine.
In 1871, at Nentsbury, Joseph Spark, farmer, aged 61, wife Sarah 54, sons Hugh, farmers son, aged 32, Joseph, farmers son, aged 22, James, farmers son, aged 16, granddaughter Sarah Ann Glendinning, general servant, aged 11, visitor Mary Archer, widow, aged 50. See 4th April 1874.
In 1881, at Middle Galligill, Nenthead, Joseph Spark, farmer of 8 acres, age 33, and Sarah Ann Glendinning, general servant, aged 21.

Joseph Spark married Mary Bardgett, 3rd qtr 1886, registered at Penrith.
In 1891, at Nettle Hall, Galligill, Joseph Spark, contractor at lead mines, aged 43, his wife Mary (Bardgett, married 3rd qtr 1886 registered at Penrith) aged 37, and son Joseph William 2.
In 1901, at High Galligill, Nenthead, Joseph Spark, farmer & contractor, aged 52, his wife Mary 49, children, William 12, and Arnold 7.
Joseph Spark died 7th July 1901, at Galligill. See 12th July 1901
In 1911, at 5 Victoria Road, Penrith, Mary Spark, widow, aged 61, sons William, clothiers assistant, aged 22, and Arnold Bardgett, shoemaker, aged 17.

10th July 1920 (Hexham Herald)
Deaths
At the residence of her daughter, The Hill House, Alston, on the 5th July, Susannah Widow of the late Thomas Yeats Walton aged 91 years.

5th November 1920 (Shields Daily News)
LEAD MINE TO CLOSE.
The Greenside lead mine, which is situated near the head of Ullswater Lake, in a spur of the Helvellyn range, and is one of the more valuable mines in North of England, is to be closed down on the termination of the lease in 1922, the shareholders having recently passed a resolution that the company should go into voluntary liquidation. Soaring costs are as to constitute the reason for this decision.

13th December 1920 (Lancashire Evening Post)
CUMBERLAND BLENDE MINES
THORNTHWAITE THE LAST TO CLOSE DOWN
The Thornthwaite lead mines, near Keswick, are closing down owing the low prices prevailing for lead and zinc ore. It is stated that the present prices of lead and zinc preclude any possibility of working the mines without further serious loss. Although the present prices are higher the pre-war figures, the cost of production, is stated, has increased nearly three-fold. The high price and bad quality of coal, and high wages and diminished output per man are also stated to be contributing causes.
Thornthwaite is the last of the Cumberland mines to close down. The Vieille Montague Zinc closed down the Nenthead plant some months ago; and the Force Crag Mine ceased production early this year, so that no zinc is being produced in the country with the exception of a small tonnage in Durham. The Greenside Lead Mine, Patterdale, is in voluntary liquidation owing to the refusal the royalty owners to reduce their charges, and the Threlkeld Mine has suspended operations, though in the latter case the men are being retained on development work in the hope that there may be an improvement in the metal market.

22nd March 1921 (Penrith Observer)
NOTICE GIVEN TO THE MEN.
The men'employed at Threlkeld Lead Mines have received notice terminating their employment this week end. About twenty men are effected, but a few will

be kept on to keep the mine in good condition. Coming some three months after the Thornthwaite stoppage, and after a determined effort to keep the mine going in the hope of a better demand for the lead and blende, the closing of this mine emphasises the hardship caused by the Government ten years' war contract with the Australian Lead mines at war prices. Though they have not been working the lead but concentrating on opening out the mine and putting it into first class condition, the management have kept the mine open with commendable courage and optimism. The prospects, however, are unfavourable, and the cost, despite the reduction in wages which the men accepted, so heavy that the management have been forced to dispense with all but essential labour. With lead and blende averaging about £11 a ton, and costing £18 a ton to produce, even a further reduction of wages to which the men were agreeable, would not make it possible to produce at a profit. The dosing down is for an indefinite period, and one can only hope that there will be a speedy revival of trade and then the mines will be able to resume their productivity. Fortunately the Threlkeld Quarry is very busy, and has good contracts in hand. Apart from this work there is nothing in the district to absorb the discharged labour.

30th August 1921 (Penrith Observer)

LEAD MINING AT ALSTON.

On Friday the first sampling of lead ore belonging to the recently formed Holy Field Lead Mining Company took place, and, as there is a very fair prospect of success in the undertaking, the directors decided to have a meeting of the shareholders and their friends at the works in connection with the mine. The day was very fine for the occasion, except in the evening, when rain set in. A select company sat down to luncheon, provided by the directors, in a marquee, which was erected in a field adjoining, while at the same time a substantial dinner was partaken of by the men and boys employed by the company. This being over, many of the visitors, including many ladies, entered and explored the mine. In the evening sports, such as wrestling, &c., were indulged in by many of the company, until the rain coming down rather freely, dispersed them.

18th October 1921 (Penrith Observer)

THRELKELD LEAD MINES CLOSED

Threlkeld lead mines were closed last week. This is the last of the Cumberland lead; mines to cease work. When the other mines were closed down early this, year, the Threlhald mines retained a few men, to continue the extensions which were being made in the mine. An effort was made to restart this mine, but as an agreement on wages could not be reached, the mine has been closed.

24th September 1923 (Hartlepool Northern Daily Mail)

After being closed for 50 years, lead mines ar Allendale, Durham, are to be reopened by the Weardale Lead Co.

5th February 1924 (Penrith Observer)

A DERWENT MINING AGENT.

A hundred years ago the lead-mines at Hunstanworth were leased by Hall, Rutter, and Co., and their principal mining agent was John Robinson, who held the position from about 1805 to 1836. He used to reside in a house near the

church, which is either part of the present vicarage or stood upon its site. He was in his day a well-known authority upon lead-mining; and was adviser to landed proprietors all over the North of England, including the lead-mining districts of North Yorkshire. He was well respected by his workmen, who, in 1830, as a mark of their appreciation, presented him with a silver tea service made by Messrs Reid and Son, of Newcastle, from silver extracted from the lead of the Derwent mines. He died in or about 1836, and was buried in Hunstattworth Churchyard.

Some of his descendants live in Northumberland, and one of them has the above- named silver tea service in his possession, as well as an excellent oil painting portrait of John Robinson and his wife, both he and his wife were firm believers in giving their children a good education, and evidences are in existence of their earnestness in such matters. They sent their sons and daughters to the village school, the master of which was Edward Readhead who was a splendid penman an able mathematician, and a schoolmaster of more than ordinary ability for a country school. One of Mr. Robinson's grandsons has still in his possession the mathematical exercise books of John Robinson, jun., dated 1823, containing fine examples of penmanship, from which one can learn that it is evident the training in land surveying, lorgarithums, trigonometry, etc. was of a very advanced order at the school at Hunstanworth at that time. Nor was the education of the girls one whit behind, and sampler, in excellent preservation, and of an unusually large size (28 inches by 22 inches) and of splendid workmanship, testifies. It is a “South-west View of Solomon's Temple," and bears at the bottom:— “Youth is the time to serve the Lord.

The time to ensure the great reward,
And while the lamp holds out to burn
The vilest sinner may return."

“This sampler was worked by Caroline Robinson, at
Mary Readhead's School, Hunstanworth, 1827”

She was John Robinson's eldest daughter.

9th May 1924 (North Star Darlington)

Deaths

At Pry House Farm, Nenthead, on the 7th inst., aged 64 years, John Armstrong, dearly beloved husband of Margaret Cowan.

9th May 1924 ((Consett Guardian)

THE GREENSIDE MINING ACCIDENT.

NO BLAME TO ANYONE.

The inquest concerning the fatal accident to William John Turner, 40, lead miner, in the Greenside lead mines, Patterdale, as reported in last week's “Observer." was held at the mines, office on Friday afternoon by Mr. J. Harker, Kirkby Stephen, deputy coroner. Mr. Lowden, Government Inspector of Mines, Whitehaven, was present.

Henry Turner, Glenridding, deceased's brother.

Joseph Greenhow, lead miner, said on Friday week he was working in the next heading to deceased, and about ten o'clock he heard a fall of rock near to where the deceased was working with a boring machine. He ran to the place and thought he could see part of deceased’s arm under a large piece of stone. Other

workmen arrived and started to get the stone off deceased, while witness went for a prop, as it seemed more stone might fall. When he returned deceased had been freed from the stone, but was quite dead, his head being crushed. He was not that day in the place where deceased was working, and he himself was working some twenty or thirty yards away. He could not say for certain that deceased was drilling when the fall occurred.
Reuben Sleightholme, mechanic in charge of the boring machines, said he was through the head where deceased was working about 9:30. He examined and repaired deceared's machine, and left it in good order. A shot had been fired there on the previous day and he noticed a "cut" about 12 or 20 feet away from where deceased was working. They discussed the "cut" and tried it with a bar but could not stir it. They agreed that it was sate, and deceased said that Webster, the foreman, was of the same opinion. It was not an unusual occurrence. He did not see deceased test the rock between where he was working and the "cut." He had known deceased all his life and he had always worked underground.
The coroner recorded a verdict of accidental death, and stated that in his opinion no blamcl attached to anyone.

30th January 1926 (The Times)
Deaths
Crawhall: On the 22nd January, at Welwyn, Henry F. Crawhall, youngest son of the late T. W. Crawhall, of Alston, Cumberland.

1st February 1926 (Newcastle Daily Chronicle)
KILLED IN LEAD MINES.
Popular Swaledale Man's
Tragic Death.
Joseph Sunter, aged 67, farmer, of Whiteside Low Row, Swaledale, was killed whilst working in the lead mines at Low Row.
The mines known as "Old Gang" had been reopened for twelve months, and Sunter undertook the work of leading away rubbish. He was coming away with his pony and truck when the animal became startled and bolted. Sunter was on the truck and was thrown under. It passed over his body, inflicting severe injuries.
The deceased was removed to the Punch Bowl Hotel, in Low Row, but died on the journey. Sunter leaves a widow and grown-up family. He was a great favourite in Swaledale, and took an active interest in all agricultural shows.

5th October 1926 (Penrith Observer)
DEATH OF MR. JACOB WALTON, ALSTON
The death took place on Tuesday of Mr. Jacob Walton, Glenwood, Alston. Mr. Walton had an operation some months ago, and appeared to be recovering, but pneumonia developed. Mr. Walton was the son of the late Mr. Jacob Walton. His father did much to develop the mineral resources of Alston Moor, and the monument erected to his memory at Alston Town Foot testifies to the high esteem in which he was held. Mr. Jacob Walton was for some time librarian at the Alston Literary Institute. His chief interests were literature and minerology, having a splendid collection of minerals. In his younger days be took an active interest in mining at the Brownley Hill Mine, Nenthead,

Stonecroft, and other mines in Northumberland. He was a regular attender at Alston Church. For a good number of years he was a trustee of the Langhorne Charity. He was 75 years of age, and never married. The interment was on Friday at Alston Cemetery.

31st October 1927 (Newcastle Joornal)

LAKE DRAINED BY A DAM BURST
CUMBERLAND OCCURANCE
MILES OF STONE WALLS CARRIED AWAY

In the dense darkness of Saturday morning, when the tremendous storm was at its worst the dam at the foot of Kepplecove Tarn, Cumberland, gave way, and within a few minutes the whole of the dale down to Ullswater was being swept by a raging torrent.

Kepplecove, which is a large tarn 1,805 feet above sea level, and lying at the foot of Helvellyn, has long been utilized for supplying electric power to the Greenside Lead Mines, it covers an area of nearly 25 acres, is a mile in circumference, and is 2½ miles from Glenridding, the northern portion of the Parish of Patterdale.

FAMILIES IMPRISONED.

It was kept back by a concrete dam, 40 feet high across which there is now a chasm 30 feet wide.

The first intimation of the burst—for, of course, nobody was on the mountains in such a storm at that hour of the night—was received by a family named Barker, who live near Pattlebeck Bridge. Mr and Mrs Barker found the water coming into their bedroom, a large hole having been burst through the back of the house. In a few seconds they found the water up to their necks, and they had the greatest difficulty in escaping.

A little lower down the valley other families were similarly imprisoned, and though the dam is believed to have burst about one o'clock in the morning one family were marooned until 11.30.

The dam race, which carries the water to the power house, was completely washed away for a distance of a mile, and several miles of substantial stone walls were thrown down or washed away. The damage to this part of the property is estimated at not less than £10,000.

The streams which come from Red Tarn and Kepplecove Tarn converge at the foot of Birkhouse Moor, where they form the Glenridding beck, which falls very rapidly until it reaches Ulswater. By a remarkable piece of good fortune all the mine’s property is a considerable distance to the north.

The actual state of affairs at Kepplecove was not discovered until George Birkett went up in the morning to turn off the power at the dam. He was amazed to find that Kepplecove Tarn was, as he described it, “drained almost dry." and the only tangible evidence of the cause was provided by the huge gap in the dam.

Meanwhile there were exciting scenes at and near Glenriddiug, wreckage being seen on every hand. A shop counter, 10 feet long, was protruding half-way through the window of the Co-operative Stores, and the remainder of the property was surrounded by a considerable depth of water. …

29th November 1927 (Penrith Observer)

SERIOUS ACCIDENT AT GREENSIDE
NARROW ESCAPE OF FOUR WORKMEN
COLLAPSE OF SHAFT STAGING

On Saturday morning there was an accident at Greenside Lead Mines, Patterdale, which, which it had serious results, might easily have proved disastrous to four men. About half past nine F. *(Frank)* Dewis, who lives at Holton Terrace, and George Birkett, Glenridding, both timbermen, were making some repairs which were necessary to the shaft. Dewis noticed that one of the wall plates was cracked, and he at once sent for the underground foreman, W. Richards, Stybarrow Terrace, to whom he pointed out what had happened. The men were standing on the stage when without warning the stage some ten yards above them collapsed. On it Thomas Hind, engineman, Low Rake, was standing, and he was carried with the timber he was using down to the next stage, which in turn collapsed, and fell on to the third stage, 18 feet below.

H. Watson, who was working at the compresser at the top of the shaft, was the first to notice that something was wrong, and he got assistance to help the men from what was a very perilous predicament, as there seemed every probability of them being thrown to the bottom of the shaft, which is 90 fathoms (180 yards) deep. Had the third stage failed the men must have been dashed to death, as there was not another stage to the bottom. Hind had fallen 32 feet.

The officials were notified by telephone, and the injured men were carried to the office. In the absence of Dr. Byrd from home, Mrs. Byrd, who is a fully qualified lady doctor, gave the necessary attention to the men, and was assisted by Nurse Greenhow. Dewis was found to have a badly damaged shoulder, and extensive contusions. Richards was chiefly injured about the legs, and Birkett's ankles were hurt, while Hind suffered from shock and a badly lacerated hand. The latter three are being treated at home, but Dr. Byrd advised that Dewis should bo taken to the Cumberland Infirmary, whither he was conveyed yesterday morning.

10th May 1928 (Nottingham Journal)

HIDDEN LEAD MINE AT MATLOCK.
Reported as Having Good Prospects.

The Jughole lead mine at Matlock was officially reported yesterday by Mr. Hodgkiss, Bar master for the Dukes of Rutland and Devonshire, as having good prospects.

The new vein, which is what Is known as "a hidden source." was hidden by the finder years ago because lead ore was down in the English market and evidently the finder died leaving no information.

16th October 1928 (Penrith Observer)

THRELKELD LEAD MINE CLOSED,
EFFECT OF GOVERNMENT ACTION

It is announced that the Threlkeld lead mines owned by Messrs, Marple and Gillot, Ltd,, Sheffield, and managed by Mr, Anthony Wilson, Thornthwaite, closed on Saturday. it has employed 44 men and boys, and had a wage bill of about £110 a week. About 5,000 men were formerly employed in the industry. The closing of the mine will be a disaster for the village.

The decision to permanently close down the mine has only been come to through sheer necessity. Every possible economy and saving has been effected, and the men have worked whole heartedly with the employers, recognising the generosity of the firm keeping the mine working so long as possible for their sakes—ever at a loss—with a view of keeping the mine going and the blende has been stored against better times.
No blende has been sold for some months now, and the point has now been reached when the company cannot continue to lose money at the rate they are doing. It is stated that all the other blende mines were long ago driven out by the effect of the contract made by the British Government with the Australian zinc mine owners to buy out all their zinc ore up to June 30th. The Government terms had the effect of stimulating production. Last year the Government, unable to dispose of the ever increasing amount of Australian ore, entered the market, and by underselling home producers have killed the trade of about 20 mines producing zinc ore in this country.
Mr. Anthony Wilson has sent the following letter to the Employment Exchange, Workington, in reply to their letter bringing to their notice Mr. Baldwin's appeal for the employment of men and boys from the depressed areas: "We are in receipt of your letter of the 4th inst., enclosing a copy of Mr, Baldwin's letter, asking us to employ more men. In the circumstanced this appears somewhat ironical, as we have given the whole of our men notice to cease work on the ground that we cannot sell our produce of zinc ore at a price which will meet the cost of production. Mr. Baldwin's Government is buying about 26,000 tons of zinc ore a month from the Australian mines at an average price of £4 16 s. per ton at the mine but has refused to buy a single ton from Threlkeld Mine.
Whilst one appreciates. Mr. Baldwin's desire to assist the Colonies, my company cannot understand why this group of Australian mines should be granted a subsidy of about £70,000 per month from our overtaxed citizens, whilst the home mines are prevented from participation in this arrangement, and the shareholders are taxed to provide funds to consummate their own ruin. The Government is selling this zine ore in the home markets at a price far below its cost, and this makes it impossible for us to compete with the Colonial produce."

19th October 1928 (Newcastle Journal)

NENTHEAD MAN KILLED

A fatal accident befell a young man named William Stout, of Nenthead, on Wednesday night. Deceased was employed at The Haggs Mine, Nentsbury, belonging to the Vieille Montagne Zinc Company. He was leaving his work when there was a heavy fall of stone, causing instant death. Stout was 24 years of age.

18th June 1929 (Penrith Observer)

LEAD MINING IN ALSTON MOOR.

It is understood that nearly one-half of the workmen employed at Rodderup Fell Mine are under notice to leave. Rodderup Fell is the only mine in the district which up to the present has employed its normal number of hands, and now that these are reduced the outlook for the lead-miners is gloomy indeed. Besides that, the Alston Moor mines are now almost without exception poor; the unprecedentedly low price of lead renders the working even of a rich mine

problematical as to whether it will be remunerative. It is felt on all hands that the Lords of the Admiralty should make a material reduction in their royalty dues.

20th December 1929 (Durham Chronicle)

FUNERAL OF MR T. WALTON.

Mr Thomas Allanson Walton (56) who came to reside at Brandon some years ago from Harwood-in-Teesdale, passed away lost week at his residence, Double Newcastle Street, after attending the funeral of a friend at Tow Law the same day. Deceased was a well-read man, possessed of intelligences above the average, and at one time acted as manager of the Cow Green Mines at Harwood, and also of the Teesdale Lead and Zinc Company's works. He was also a keen agriculturist and a clever conversationalist, an authority upon Weardale and Teesdale nomenclature and the mineral deposits peculiar to those areas, and a few minutes talk with “Tom” Walton was a splendid tonic. A man of commanding presence, standing well over 6 feet in height, and proportionately broad. Mr Walton was afflicted with acute chest trouble, but the end eventually arrived with startling suddenness. There was a good attendance at the funeral, and the remains were interred at Meadowfield Cemetery. A widow and grown-up family are left to mourn their loss.

20th May 1930 (Penrith Observer)

PATTERDALE GRIEF
NEARLY 50 MEN STOPPED TO-DAY
LOW PRICE OF BRITISH LEAD.

Between 40 and 50 men employed by the Greenside Mining Company, at Glenridding, at the head of Ullewster, we are informed by a correspondent, have received notice to cease work at the lead mines, and they will be out of work to-morrow.

The decision of the Company, it is understood, is not due to any trouble as between employers and employed, but to the fact that the price of the products is so low that the mines are being worked at a loss. Since the disaster at Kepple Cove Tarn, when the dam burst and caused such havoc at Glenridding, the Company have spent a large sum of money in replacement, and also in bringing the property up-to-date, but notwithstanding this they have been compelled to stop nearly fifty men.

It is not known how long the men are likely to be idle, but it is stated that the Company have confined their dismissals to single men as far as possible, and that only two or three married men are involved.

It is stated that the manager, Mr. Borlase, is endeavouring to make arrangements whereby the men need not have to travel to Penrith to “sign on” for unemployment pay; but to get a clerk from the Labour Exchange to visit Glenridding at certain periods. The stoppage is greatly regretted in the dale, and it is hoped that the price of lead will soon be such as to warrant a resumption of full production.

29th October 1930 (Yorkshire Post and Leeds Intelligence)

MR. R. W. RAINE. MIDDLET0N-IN-TEESDALE.

Mr. Ralph William Raine, who died at Middleton-in-Teesdale early yesterday morning, at the age of 69 was one of the best known public men in the district Mr. Raine had been a member of the Barnard Castle Rural Council since its

formation in 1894, was a member of the Teesdale Board of Guardians for 38 years, and had been a magistrate since 1908. He was a trustee of the Lady Barnard Memorial Charity and of the Abram Hilton Charity, and a member of the Teesdale Education Committee. Two of his three sons ore in the medical profession, Dr. Arthur E. Raine being Public Assistance Medical Officer and Deputy Director of Medical Services under the Durham County Council, and Dr. R. Howard Raine bring in practice in Newcastle. One of his two daughters is a qualified pharmacist.
In business as a pharmacist. Mr. Raine was also keenly interested in lead mining, and for many years had been engaged in the development of the Coldberry mine, near Middleton-in-Teesdale.

21st January 1932 (Hexham Courant)
The Cornishman and Cornish Telegraph

BREAGE MAN HONOURED.
NOW CUMBERLAND MAGISTRATE.

His many friends in Camborne and district will be glad to hear of the distinction conferred on Mr Amos Treloar, who has been made a justice of the peace in Nenthead, Cumberland.
Mr Treloar, who is manager of the Nenthead, mines of the Vieille Montagne Zinc Company, is well known and popular in the district.
In his early days, Mr Treloar studied assaying at the evening classes run by the Penzance School of Mines at Pool and Illogan Highway, being later in charge of the tin dressing plant at East Pool. He then went to South Africa to take up a mining appointment, and was for some time in charge of a property there; on his return to England, he became instructor in tin dressing at the Royal School of Mines in London. He was manager at Wheal Kitty, in the St. Agnes district, for some years, whence he went to Polgooth, near St. Austell; he afterwards held an appointment at the Tyndrum lead mine in Scotland.
He went to Nenthead to take over the management of the Vieille Montagne mines in 1923; the mines, which are the chief industry of the area, are on Alston Moor, and, when he arrived, were in a very bad state, and, as a result, the district was in a distressed condition. He at once undertook extensive development work on most modern lines, with the result that the mines were soon put on a high productive basis, and, prior to the slump, employment was found for all men in the district. His mining achievements soon won for him the highest regard and confidence of the staff and men.
He has taken a keen interest in all phases of public and social life in Nenthead, and has done much to advance education in the district; he has arranged mining classes for the miners, and is governor of the Samuel King's School. As chairman of the Alston Cottage Hospital he has been mainly responsible for the provision there of X-ray apparatus and an operating theatre, which has recently been installed. He is a ready supporter of all deserving local functions, and his advice on many matters is considerably sought.
It is stated that his appointment will fill a long-felt want for resident magistrate in Nenthead, and the honour justly deserved.
Mr Treloar is a native of Breage, and his wife was formerly Miss Stevens, of Tremearne Farm, Breage.
Mr Percy Blight, of Roskear, son of Mr J. Blight, is also employed on the mines at Nenthead.

24th May 1932 (Hartlepool Northern Daily Mail)

THE LEAD MINE DISASTER
BODIES RECOVERED
RESCUER AMONG THE VICTIMS

After working feverishly for several hours, rescue workers at the Shining Gutter mine, Youlgreave. near Bakewell, Derbyshire, succeeded in recovering the bodies of the eight men who last night lost their lives through an explosion underground.

The mine is owned by the Mawstone Mine Co., and is a lead mine.

Five of those killed were miners, the other three being members of the rescue party.

The names of the dead are: D. Porter (under-manager of the mine) and his son, James Porter, both of Darley Dale: Geoffrey Gould, Jack Gallagher, and William Brindley. These five were working underground at, the time of the explosion.

The three members of the rescue party who lost their lives were: Mr. Kenneth Seville (the mines manager). Eric Evans, and Jack Birds.

One man, George Frost, who was working with the five other men, had a narrow escape. He was attending to a fan about 200 yards along the workings from the mine shaft and had left the others. As he was about to return to them the explosion occurred. Frost managed to get to the mine shaft and give the alarm.

At the time of the explosion the six men were working 200 feet underground.

Mr. Seville, who was 34 years of age, had four children. His wife is at present in a nursing home awaiting the birth of another child.

The inquest on the victims will be opened to-day at the mine offices.

George Frost was unable to-day to relate his terrible experiences owing to suffering from shock. His wife, however, satid that after the explosion he was knocked down three times, but managed to crawl along to ring the alarm bell. He tried to work the cage two or three times, but had not the strength to get it to the top.

His son, aged 17, and his nephew, aged 16, were off work at the time owing to the erection of the temporary fan.

The rescue workers declare that Seville died in an effort to save his men.

6th March 1934 (Penrith Observer)

ALSTON. MINERS FATAL WALK.
RUN INTO BY MOTOR CYCLIST.

THE INQUEST. A serious accident occurred on Tuesday about 9:20 p.m. to Mr. John Joseph Dixon, an aged man, residing at Hillersdon Terrace, Nenthead. He was walking down Crook Bank on his way to work at the Haggs Mine, Nentsbury, when a motor cyclist, named James Ward, also of Nenthead, collided with him. Dixon, who appeared to be badly injured about the head, was attended by Dr. Coates. Alston, and removed to the Alston Cottage Hospital, where he died of his injuries about noon on Wednesday. The inquest was held in the Reading Room, Nenthead, on Friday afternoon, before a jury. Mr. F. W. Halton was the Coroner, and Mr. F. W. Lightfoot, Carlisle, represented Ward. Frederick Dixon identified the body, and said deceased was employed at the Haggs Mine. He last saw the deceased alive that night between 7 and 8 p.m. Deceased had a bad cold, which affected his hearing. Witness advised him to stay at home, but he persisted in going to work. Deceased was sometimes so deaf that one had to shout at him, and he appeared worse than ever on that

night. In reply to Mr. Lightfoot. Witness said he did not think he was out to walk. Snow had fallen, and it was then slightly snowing. It would be about half an inch deep. Robert James Ward, joiner, Bank Foot, Nenthead, who elected to give evidence, said on that night he was riding a motor cycle in the direction of Alston, accompanied by Hilda Hewitson as a pillion passenger. He would arrive at Crook Bank about 9.20 p.m. He went down the bank is in second gear to get the benefit of the engine as a brake. It was a nasty night, and snow had fallen. The wind was against him. He saw a man in front near the right hand side of the road. He sounded his horn more than once. Deceased would be about thirty yards away when he first saw him, (deceased) was on his right, and had the full half of the road. Witness pulled into this gutter when he got near him. Deceased started to run and put his hand to his head, and went to the left side of the road. It was snowing slightly. Deceased had a cap on. He did not give witness the impression that he had heard the horn, although probably he thought. something was corning from behind. Witness applied his brakes, and made for the grass verge, and as he was coming to the left it was no good going right. He caught deceased with the offside handlebar, and threw him to the ground. He could not say where he caught him. Witness and the pillion rider were also thrown. He went to deceased and saw he was injured, and got him brought home. Witness's lights were good. When he left Nenthead his lamps were burning brightly. He informed the police right away. He was going slowly at the time of the accident. Mr. T. Wright (a juror): Have you ever passed deceased before?—Yes. Had he ever staggered in a similar way before—I could not say. Hilda Hewitson, Blue Bell Hotel, Alston, gave corroborative evidence. Susannah Fairless, Nenthead, said that on the night in question, she saw Ward's cycle when it set off from Nenthead to Alston, and the lights were good. P.C. Vipond said he went to the place at 1 a.m. on the following morning. There was a pool of blood, and marks on the grass verge, which had not been obliterated, although there was snow. It was a steep gradient, about 1 in 8, but perfectly straight. The road was good. There was a slight blizzard at the time. He examined the motor cycle, and the back brake was good but not the front one, perhaps caused by the accident. The lamps were good. He knew deceased, and it was true he was deaf, and accustomed to walk in the middle of the road. Witness had received complaints by motorists about this. In reply to Mr. Lightfoot. Witness said the pool of blood was three feet from the road. The cycle had practically stopped on contact, and fallen over. The Coroner said Ward had never seen deceased stagger, and he believed his story, and in his opinion he thought the deceased was accidentally killed. He could not see how the motor cyclist was to blame. The jury. without retiring, unanimously returned a verdict of "Accidentally killed."

13th March 1934 (Penrith Observer)

DEATH OF MISS MILLICAN

We regret to announce the death of Miss Ellen Millican, which occurred at her residence, Hundy Hall, Alston, on Wednesday night. Miss Millican, who was 80 years old, was born at Nenthead, and was the daughter of the late Mr. John Millican. The family held a very long connection with the Alston district. and were very highly respected. Miss Millican's grandfather was district agent to the old London Lead Co. in Alston Moor, and was succeeded by his son. Mr. John Millican. On the retirement of her grandfather, he was presented by the

Company's workmen with a beautifully bound edition of the New Testament in Greek. Her father was similarly honoured, with an English translation of the full Bible. An inscription on a silver plate was attached to each, and these were the proud possessions of Miss Millican, who regarded them as heirlooms. She lived in Alston all of her life, and was closely identified with the Alston Methodist (Wesleyan) Church and was for many years a Sunday school teacher. She also took a keen interest in the Alston Literary Institute. She was highly esteemed by all, and was of a very charitable disposition, always willing to help in any good cause. While she had no surviving relatives in the district, her loss, will be mourned by many who came in contact with her. The funeral was at the Alston cemetery on Saturday.

5th June 1934 (Shields Daily News)

ALSTON RURAL COUNCIL at the monthly meeting, decided to welcome the installation of electric light at Alston, Nenthead, and Garrigill. Representatives of the Mid-Cumberland Electricity Company attended the meeting. The cables in most parts of Alston will be underground, so as not to destroy the amenities of the town. The supply is being brought via Gamblesby to the south of Hartside Top and down to Alston.

21st August 1934 (Penrith Observer)

MINER KILLED AT PATTERDALE.

While working at the Greenside Lead Mines on Monday, Daniel Pattinson, 50, was killed when a rock about 8 or 9 cwts. in weight fell upon him. it took about twenty men a quarter of an hour to release the body. A verdict of accidental death was returned at the inquest on Wednesday at the Travellers Rest Inn.

4th September 1934 (Penrith Observer)

NENTSBURY MINE CLOSING DOWN.

Bad News for Nenthead.

About 130 men and boys will be affected by the closing down of the Nentsbury Mine, worked by the Vieille Montague Zinc Company. Notices have been posted on the Company' works that the works would close down on September 8th Nentsbury Mine has been very rich for lead for a number of years, but recently it has not been so good, and has been worked at a loss.

20th November 1934 (Penrith Observer)

Mr. T. A. Martindale, Blackburn Banks, Alston. who for the last 35 years has been employed by the Vieille Montagne Zinc Co., at Nenthead and Rotherhope mines, is leaving Alston to-morrow (Wednesday) to take up an appointment as under-manager for the Wrentrall Baryta Co.. Comnock, Ayrshire.

22nd October 1935 (Sunderland Daily Echo & Shipping Gazette)

LEAD MINERS RETURN

After being idle for two years, lead and zinc miners have resumed work at Nenthead while preparations are being made to reopen other lead and zinc mines at Nentbury and Rodrup, between Wearhead and Alston.

About 150 men have resumed work at Nenthead, and preparations to reopen other mines include provisions to work the two shift system, so confident is the outlook for better trade. Electrification is another consideration.

22nd October 1935 (Penrith Observer)

GOOD NEWS FOR ALSTON.

Resumption of Work at Nentsbury and Rotherhope.

It is learned from reliable information that preparations are going forward for resumption of work at both Nentsbury and Rotherhope lead and zinc mines in Alston Moor, owned by the Vieille Montagne Zinc Co. It is understood that increased production in Nentsbury, where a skeleton staff has been employed mainly on a maintenance basis since September 1934, will commence immediately, and that at Rotherhope mine which has been closed for nearly five years, preparations are in progress and it is hoped the mine and mill will be operating one shift per day by December, and two shifts in January 1936.

It seems likely that not less than 150 miners and mill men will be working by January, and if the prices of lead and zinc remain as at present more men will be required early in 1936. The good news, will be welcomed in the district. which has been listed as a distressed area for some time.

19th July 1936 (Lincoln Nebraska State Journal)

Mr. and Mrs. Thomas Stout, who have resided near Alvo for forty-nine years, celebrated their sixtieth wedding anniversary Wednesday at their home with a family dinner and open house in the afternoon and evening A granddaughter. Miss Golda Klyver. daughter of Mr. and Mrs. Arthur Klyver, of Lincoln, was married at noon to Ray Heiers of Murdock at the Stout home. Mr. and Mrs Stout were married in Gosper county. After their marriage, they went to Kewanee, Illinois. In 1887, they removed to the 160 acre farm on which they have continued to reside. They have four children Mrs. Mabel Winn, Alvo; Mrs. Elmer Klyver. Alvo; Mrs. Arthur Klyver, Lincoln: and Charles Stout, Beacon Hill, Canada, five grandchildren, and three great grandchildren Mrs. Stout, formerly Miss. Mary Pask, was born July 25, 1854, near, Arapahoe. Mr. Stout was born; August 25. 1849, at Nenthead, England, and came to America in 1870.

4th March 1937 (Lincoln Evening State Journal)

Thomas Stout, Native of England, Dies at 87.

Thomas Stout, 87, died Tuesday at his home in Alvo and will be buried there Friday afternoon. Born in Nenthead, England, he came to this country at the age of 21 and located in Illinois. He was married July 15, 1876, in Gosper county. Neb., to Mary Pask. They removed to Alvo ten years later and had farmed there ever since. Eight children were born to them, four of whom preceded their father In death.

Surviving are the widow, a son, Charles, in Saskatchewan. Can., three daughters. Mrs. Mabelle Winn at home. Mrs. Elmer Klyver of Alvo and Mrs. Arthur Klyver of Lincoln; five grandchildren and three great grandchildren. Funeral services will be held at the home at 1:30 p.m. Friday and at the Alvo Methodist church at 2 o'clock. Burial in Alvo. The pall hearers:

Jess Hardnock	*Sam Hardnock*
Earl Dreamer	*Earl Bennett*
Alfred Stromer	*Charles Ayres*

3rd March 1946 (Lincoln Sunday Journal)

MARY PASK

Mary Pask was born on July 25, 1854. In Peoria county, Illinois, and died at her home four and one-half miles northwest of Elmwood. Neb., on Jan. 6, 1946, at 11:20 p.m., at the age of 91 years, 5 months' and 12 days.

On July 15, 1876, she was united in marriage to ***Thomas Stout of Nenthead****, England. They celebrated their 60th wedding anniversary in 1937. Eight children were born to this union.*

Four children, her husband, father and mother, her sisters and brothers preceded her in death. She was the last of her family.

Surviving are three daughters, Mrs. Luella Klyver, Lincoln; Mrs. Mable Winn, Elmwood, and Mrs. Cora Klyver, Alvo; one son, Charles, of Elmwood; five grandchildren; seven great grandchildren; and several nieces and nephews.

Funeral services were held Jan. 9 at the Methodist church in Alvo, Neb., Rev. John Hemmel; and Rev. George Morey officiating. Interment was in the Alvo cemetery.

In 1861, at Welgill, Nenthead, Thomas Stout, lead miner, and Carrier, aged 43, his wife Elizabeth 43, children, Isabella 21, Joseph, lead miner, aged 18, Henry, Carter, aged 16, Elizabeth 13, Thomas, Carter, aged 12, Hannah 9, Anne 5, John 3, and William 1.

1910 USA, Federal Census, Elmwood, Nebraska, Thomas Stout, farmer, aged 60, immigration year 1871, his wife Mary 55, children, Mabel S 29, Cora M, clerk, aged 27, Luella A, telephone operator, aged 22, Elsie, telephone operator, aged20, and son Charles, farm labourer, aged 18.

See 1st May 1869, 2nd May 1874, 24th February 1877, and 29th April 1882

13th January 1937 (Teesdale Mercury)

BARYTES BOOM.

There is apparently a boom in barytes, judging by the immense quantities of the mineral recently excavated from a mine at Cow Green, near Langdon Beck, Upper Teesdale. The Wrentnall Baryte Company, whose headquarters are in

London, has proved a vein of barytes at a depth of 200 feet, and during the two years of their operations they have obtained several hundred tons of this valuable material near the scene of the extensive lead mining operations of many years ago. At present 30 men are employed, but if the demand continues that number may eventually be trebled.

27th January 1937 (Teesdale Mercury)

DEATH OF MR JAMES LOWE.

The death took place at Middleton-in-Teesdale on Saturday of Mr James Lowe, aged 84. In early life Mr Lowe worked in the Lead Mines for the London Lead Co., but he later became a coal miner at Woodland. Losing an arm in a colliery accident he returned to Middleton, and for a time was engaged in farming. He was an enthusiastic gardener and a frequent exhibitor at local horticultural shows. The funeral takes place this (Wednesday) afternoon.

9th March 1937 (Penrith Observer)

ALSTON LEAD MINES.
BRIGHTER OUTLOOK.

With lead selling at over £31 per ton, the outlook for the ALston Moor district may now be described as encouraging.

The Vieille Montagne Zinc Company, which has worked the mines for forty years has decided to install electric power in the Rotherhope Fell mine. The Mid-Cumberland Electricity Company, which has the contract to supply the power and to instal most of the plant, has surveyed the main level, and work has commenced. When completed about the end of May it is expected the output from this mine will be increased by upwards of 100 per cent. The company has been operating the Haggs Mine continuously for many years, excepting 1931, and Brownley Hill mine, which was re-opened in 1936 after having been closed since 1921. Much preparatory work has been done in this latter mine, and it is now producing some hundreds of tons of ore monthly.

The development of both of these mines is having serious attention, and the one difficulty with which the company may be faced with is a sufficient supply of suitable labour due to the long periods of unemployment having reduced the ranks of efficient miners.

6th April 1837 (Penrith Observer)

GOOD NEWS FOR THRELKELD

The lead mine at Threlkeld, which has been closed for seven years, is to reopen in view of the increased price of lead, which has risen fran £10 to £31 per ton, and zinc, which has risen from £12 to £33. It is proposed to open the mine this week and to put about eight men on exploratory and repair work in the falls, but it will at first only be possible to work in two places, as the conditions in the levels are not known,

Mr. G. Hewitson, formerly manager of this mine, is being brought back from Derbyshire, where he went after the Threlkeld mine was closed, and he will have charge of the work. It will probably be two or three months before other men can be taken on.

When fully employed the Threlkeld mine gave employment to about 60 men, but it is hoped that, if the demand continues strong and the price remains high, to work the mine on a much larger scale than hitherto, and so provide work for

more men. Quite recently a number of the Threlkeld lead miners went to work at the Greenside mine, Patterdale.

2nd June 1937 (Hartlepool Daily Mail)
COLDBERRY LEAD MINE, Middleton in Teesdale, has reopened after being idle for eight years. Several old hands have been engaged.

2nd June 1937 (Hartlepool Daily Mail)
"FLUSHAMEA" Mine, once famous lead mine, near Newbiggin in Teasdale, was reopened yesterday. It is the third Upper Teesdale mine to reopen.

3rd August 1937 (Penrith Observer)

NEWS FOR GREENSIDE
CREDITORS AND MINERS.
Syndicate to Purchase Mines.

As was suggested probable in the "Observer" some months a go, the Basinghall Mining Syndicate *(a subsidiary of British Non-Ferrous Corporation)* has given notice of their intention to exercise the option to purchase the Greenside lead mines.
It is about a year since the Syndicate began to work the mines—after they had been closed for a period on the Greenside Mining Company going into liquidation—with a two years' option to purchase.
With the decision to purchase, the hopes of continued employment are, of course, brightened. All the creditors of the old Company will be paid in full, preference shareholders will receive 10s. for each share, and ordinary shareholders 1s. for each share.

12th September 1937 (Sunday Sun Newcastle)

DARLINGTON INQUEST COMMENT
ON MINE TRAGEDY

An accident at the Coldberry Lead mines, Middleton-in-Teesdale, on September 8, as a result of which Herbert John Balsom (51), a shaft sinker, of Milne Place. Moricetown, Devonport, lost his life, was stated at the inquest at Darlington on Saturday, to be an example of familiarity having bred contempt.
The jury returned a verdict of "Accidental death," the Coroner (Mr. J. E. Brown-Humes) commenting that the affair appeared to have been a "pure accident" and there was no question of negligence on the part of the firm, the English Lead Exploration Co. Ltd. Joseph Gaffray, mine foreman, of Masterman Place, Middleton-in-Teesdale, stated that on September 8 he and Balsom were working about 15 feet down a mine shaft near Bullhouse Road. Two wooden planks were lowered into the shaft from above in the usual manner after a shout of warning had been given.
"I also told Balsom to stand back," Gaffray said, "but he seemed to delay in doing so and one of the planks slipped from the ropes, hit the side of the shaft, and then struck Balsom. I assisted him out of the shaft, but he was quite conscious and neither of us thought he had been seriously injured."
Gaffray added that if Balsom had moved to the side of the shaft he would have been quite safe.
The mine manager, Sydney P. Higgins, stated that Balsom was an experienced miner and shaft sinker. In future the wearing of steel helmets would be

compulsory at the mine. Actually the men were not supposed to remain in the shaft when timber was being lowered.
A report from Darlington Memorial Hospital revealed that death was due to a fracture of the base of the skull.

31st October 1937 (Sunday Sun Newcastle)
THE WEARDALE LEAD COMPANY, which owns lead mines and smelting works at Weardale and Allendale, has declared a final of 7 per cent making 10 per cent.
for the year—double the distribution for the, previous twelve months. The £1 shares are admittedly speculative but, if lead and fluor spar prices are maintained at to-day's levels, look cheap at 18s 6d ex-dividend to yield 10¾ per cent.

10th January 1938 (The Scotsman)
LEAD MINING IN TEESDALE
There is a prospect that lead mining will be again resumed in Teesdale now that Professor Granville Poole, Professor of Mining, King's College, Newcastle, has presented a report to the Technical Advisory Committee of the North-East Development Board. Already an old mine has been reopened at Coldberry, in Upper Teesdale, with promising results. There are four barytes mines being worked, and he has investigated five areas in which they are not yet being worked—one at Force Burn, where there is a verged vein of clean barytes, 4 feet to 5 feet thick, exposed by a waterfall to a depth of 30 feet. In Weardale he found that a company had already began to develop the fluorspar deposits, but that there was a shortage of skilled men in the area—blacksmiths, joiners. &c., which was becoming a serious problem.
Professor Poole concludes his report by stating: —"I think there are definite prospects for the mining of lead with modern machinery."

15th January 1938 (Yorkshire Post and Leeds Intelligence)
TEESDALE LEAD MINE
REOPENED
The Flushamea lead mine, near Newblggin-in-Teesdale, with a workable area of 835 acres, which was mentioned In the recent report on the mineral prospects of Teesdale by the North-East Development Board, was reopened yesterday by the company who are prospecting the Coldberry mine.
The mine, which was formerly worked by the London Lead Company, is known to have valuable deposits of sulphate of barium and fluorspar. It is the third Teesdale lead mine to be reopened in the last two years. The Wrentnall Baryta Company has opened the Cow Green mine, near Langdon Beck, and a small village is now springing up round the mine as workers' cottages are being erected. Nearly 100 men are employed already at the Cow Gill mine.

14th June 1938 (Penrith Observer)
NENTHEAD
GOLDEN WEDDING
Mr. and Mrs. John Barron, Brownley Hill, Nenthead, celebrated their golden wedding with a number of relatives and friends on Friday. They were married on June 3rd. 1888. in St. John's Church, Nenthead by the late Rev. Charles

Berry. Mr. Barron is a son of the late Mr. Smith Barron, who was killed while working in Nenthead lead mine. Mrs. Barron was formerly Miss Agnes Moffat, *(sic)* a daughter of the late Mr. and Mrs. Thomas Moffat, Pasture House, Nenthead. Mr. Barron started work in the lead mines when he was 11 years of age. He later served his apprenticeship as a blacksmith to the late Mr. A. Martindale of Alston, who worked as a blacksmith to the Old London Lead Co., at Nenthead. Mr. Martindale walked from Alston to Nenthead each day for 52 years which is a distance of approximately 4½ miles. He is a noted mines drill sharpener.

Mr and Mrs. Barron, who are welt known in the district have a family of four sons and four daughters living, 26 grand-children and six great grand-children. Among those present at the celebrations was a two-years- old grand-daughter, Jean Harrison, from the Isle of Man. Mr. and Mrs. Barron had a son — Robert William Barron—killed on the Somme on July 1st. 1916. Mr. and Mrs. Barron received a large number of congratulatory messages among which was one from a number of Mr. Barron's old work-mates at Consent, where he was once employed as a blacksmlth.

17th December 1938 (Lancashire Evening Post)

CUMBERLAND MINE TO CLOSE

The Vieille Montague Zinc Company, owners of all the lead mining activities at Alston (Cumberland), have posted notices that the Rodderup mine will close down on Christmas Eve. This will throw upwards of 100 men out of work. In recent years the only mines working have been Nentsbury and Rodderups. and as the latter produces only a low grade of ore the owners find it impossible to continue, with the price of lead below £15 per ton, compared with £23 last year.

20th December 1938 (Penrith Observer)

SAD XMAS EVE FOR ALSTON MOOR MINERS

Rotherhope Fell Mine on Alston Moor is to close and workmen's notices expire on Christmas Eve, The mine is owned by the Vieille Montagne Lead and Zinc Company, and was re-opened three years ago after being closed for several years. The price of lead has declined recently, and it is said that further working of the mine would be uneconomic. A large number of Alston Moor people depend for their livelihood on the mine.

9th January 1939 (Newcastle Evening Chronicle)

GUNPOWDER IN FIRE —
ROOF BLOWN OFF

GUNPOWDER left in a drill which was placed in the fire at the blacksmith's shop at Coldberry, Teesdale, lead mine, exploded and blew off part of the roof.

The blacksmith. Mr. Richard Grey, of High Dyke, Middleton, had just left the building when the explosion took place.

There has recently been a revival in the working of the once famous Teesdale lead mines. At Langdon Beck, production is on the largest scale ever known in the dale. A modern plant has been installed and a new village for workers is springing up

Thousands of pounds have been spent in the last two years in the hope of finding new supplies at Coldberry. Exploration is also going on at Wire Gill and Close House.

4th March 1939 (Lancashire Evening Post)

CLOSING CUMBERLAND LEAD MINE

The Haggs lead mine, Nenthead, Cumberland, in which 25 men are employed closes down from today. The only other miner, Roddering (*Rotherhope?*), which was working in this once flourishing lead mining area of Cumberland closed down at Christmas throwing 100 men out of employment.

6th March 1939 (Newcastle Evening Chronicle)

ALSTON MINES CLOSED

COUNCIL TO DISCUSS PLANS FOR HELPING UNEMPLOYED

Pointing out that local lead mines had closed down, Councillor J. F. Herdman urged at Alston Rural Council that something should be done to alleviate unemployment. It was decided to hold a special meeting to consider schemes. Residents at Prye House, Nenthead, wrote threatening to refuse payment of rates unless an adequate water supply was provided.

Councillor Wright, Nenthead, said the water now being used by the tenants was obtained from a stream.

It was decided that the surveyor prepare a report and estimate the cost of supplying water to Prye House.

7th March 1939 (Penrith Observer)

ALSTON UNEMPLOYMENT

Employees or the Vielle Montagne Zinc Company at the Haggs lead mine, Nentsbury, near Alston, received notices to cease work on Saturday. About forty men were affected. A notice posted up at the mine stated that, the manager and the company expressed regret, but owing to the low price and the poor grade of lead ore in the mine the course taken had been unavoidable. In the event of the re-opening of the mine the old employees will he re-instated. The Rotherhope lead mine closed in December last, affecting 150 men, although a few men are working there at present.

24th April 1939 (Newcastle Evening Chronicle)

WEARDALE VILLAGE

MINE CLOSES

Rookhope, village of 500 inhabitants in Weardale, lost its main and only working industry over the week-end with the closure of the Boltsburn Head mine, owned by the Weardale Lead Company.

Fifty-three miners were given a fortnight's notice. Mr. Thomas Maddison, mine manager for 37 years, said the decision to close was due to the poor price of lead and the poorer prospects of the mine.

25th April 1939 (Penrith Observer)

ULLSWATER DISCOLOURATION

THE question of the discolouration of Ullswater by the deposit of silica dust from the Glenridding lead mines which has been debated to a considerable extent in the immediate locality as well as by the Lakes Rural District Council, is brought to the fore as the result of a letter published in the daily Press last week. For some time, despite reassuring statements by the company concerned, it has been alleged that there are some grounds for saying that the deposit of the dust in the waters of the upper reaches of the lake has had an

effect on recreation so far as fishing and boating are concerned, and this is borne out in the statement made in the Press last week under the signatures of Lord Aberdare, Norman Birkett, A. M. Carr-Saunders, R. D. Denman. Alwyn Dunelm, Lord Horder, Fred B. Markham, Claude Petriburg, Austin T. Porritt, Nancy Price, Frank S. Smythe and Graham White. First pointing out that the Basinghall Mining Syndicate opened the Glenridding lead mine on a much larger scale than any of the previous lessees in the early part of last year, the letter states that great quantities of finely discharged silica dust are being discharged into Ullswater by way of the Glenridding Beck. After explaining the nature of the dust—produced by the crushing of the rock—the letter lays stress on fact that a milky appearance to the water is an eyesore on the higher portion of the lake. An important statement is made when it is pointed out that chemically the sediment is not poisonous, but at the same time, of equal importance to Lakeland lovers, there is "a grave disfigurement to a beautiful place." Fish, it is stated, refuse to rise from the milky depths and boating is spoiled. Continuing, the letter emphasises that the silting-up of the lake bed is continuous, and "since 250 tons of rock are dealt with each day at the mine the evil is cumulative." Complaint is further made of the high water mark left of the sediment of the dust on the lake shores. The last part of the letter appears of particular interest, stating as it does that:

“When conditions are aggravated, the discolouration of the water may now be seen as far up as the head of the lake; while on the north it can be seen right past the National Trust's property and foreshore at Glencoin Wood, and half-way to Aira Beck. Last Summer, it was urged on behalf of the Basinghall Mining Syndicate, that the disfigurement and public loss were only temporary. This has not been the fact. There have been changes in the mining plant and various promises have been made of improved conditions. But nothing effective has been done; for satisfactory settling tanks have not been installed. Thus at the beginning of another Summer the evil continues. We are not urging that industry in the Lake District is itself out of place, and we have no wish to hinder the very considerable employment given at these lead mines. What we do urge is that when capital migrates into places of special beauty it is under a special obligation that it cannot presume to waste or to injure the national assets of beauty and happiness; that it must use its own resources to preserve what has an irreplaceable public value, and that it must order its affairs by this principle. We invite those who know the lake to go to Glenridding, to look down from the bridge into the beck, or to walk up its course to just below the mine and see the pools of slime which are waiting for the next spate to bring them down; they will then understand what is happening in Ullswater."

12th May 1939 (Newcastle Evening Chronicle)

CONSETT DIAMOND WEDDING

13 Is Their Lucky Number

A CONSETT couple who celebrate their diamond wedding to-morrow are not superstitious. They believe, fact, that 13 is their lucky number. They are Mr, and Mrs. Robert Dixon, of Stratford Terrace, Number One, Consett, who were married on May 13, 1879. and have had 13 children, 11 of whom are still living. Both Mr. and Mrs. Dixon are aged 80, and enjoy the best of health. Mr Dixon told a “North Mail” representative last night: We were married on the 13th day of a month and were blessed with 13 children, only one of whom died in infancy.

“Our health has always been good and we have been favoured with reasonable good luck throughout our married life.”

WORKED AT 10

Five of Mr. and Mrs. Dixon’s sons and two sons-in-law served the Great War. The youngest son. Corporal Thomas H. Dixon, was killed. They were married at the Stanhope ex-Primitive Methodist Church by the Rev. J. Worsnap. Since going to Consett 48 years ago they have been regular worshippers at The Avenue Methodist (ex-Primitive) Church, Consett.

Born at Garrigill, Cumberland, Mr. Dixon started work at the age of 10 years as a washer at the Alston lead mines for sixpence a day. He worked until he was 74, spending nearly half a century as a steelworker at the Consett Iron Works.

17th May 1939 (Daily Gazette for Middlesbrough)

WEARDALE LEAD MINE

RE-OPENING

WEARDALE LEAD COMPANY, owners of Rookhope lead mines, the last of which, Boltsbum Mine, was closed a fortnight ago, throwing the 53 local miners out of work, and so bringing the total number of unemployed up to 80 per cent, in the village, is to be re-opened.

Between 17 and 20 men will be started on Monday by the company on special development work.

This welcome news was given to a “North-Eastern Gazette ” reporter by Mr. W. S. Willis, the managing director of Weardale Lead Company. No statement was made nor could be secured on the special development referred to, but it is believed that the company is making a big endeavour to bring the industry back to its former prosperity.

It is also hoped that the re-opening of the mine will absorb many more local men.

22nd May 1939 (Newcastle Evening Chronicle)

WEARDALE LEAD MINE OPENS FOR “SPECIAL DEVELOPMENTS”

Closed Only Fortnight Ago On what are described as special developments,” about 20 men began work to-day at the Boltsbum lead mine, Rookhope, Weardale, which was closed down just over a fortnight ago. When the mine closed 53 local miners were thrown out of work. To-day Mr. E. P. Deas, chairman of the Weardale Lead Co., Ltd., told the Evening Chronicle that it was too early to say whether more men would be employed in the future. It all depends on the price of lead." he said. “At the moment prices are Very low, and I can only say that the 20 men who started this morning are engaged on what we term ‘special developments.’ I cannot tell you what those developments are, but the reopening of the mine has no Government connection.” QUESTION IN COMMONS Less than a fortnight ago Mr. T. M. Sexton, M.P. for Barnard Castle, asked the Secretary for Mines in the House of Commons if he was aware that the lead mines Rookhope had been closed, thus causing 100 per cent, unemployment in the small community, and whether the Government was prepared to assist production of lead in the mines by insisting on the use of home-produced lead in Government contracts, thereby ensuring a supply of lead for armament manufacture in the event of war. In written reply, Mr. Geoffrey Lloyd stated that he had been informed that 80 per cent, of the insured population of the community Rookhope were now registered as unemployed.

He understood that the Boltsburn mine might be re-opened if the market improved. “As regards the second part of the question. I not think the suggested solution would be effective, as I am informed that the company has no difficulty in disposing of its output at current prices,” he added.

11th July 1939 (Daily Gazette for Middlesbrough)

WEARDALE MAN’S
SIXTY YEARS IN MINES

“Keep young company; stick to a pipe of baccy and a glass of beer,” is the advice to those who are getting on in life and want to feel young, of Mr. Joseph W. Dalton, who at 72, is still working in a Stanhope spar mine, and is one of the oldest working miners in the dales. It is 60 years since he first went down a Weardale lead mine.

Mr. Dalton lives with his daughter and son-in-law. Mr. and Mrs. Fred Blades, of Willard-grove, Stanhope, and, despite his 60 years of hard work in and around the Dale's mines, he is a remarkably fit man.

“Too many people,” he told a “North-Eastern Gazette” reporter yesterday, think that when they come to old-age-pension age, they have to get ready to die. That's wrong. They just want to keep young company; don’t ever grow old.”

Mr. Dalton, who belongs to Upper Weardale. has worked in almost every mine in Weardale, including Killhope, Haggs. Nenthead, High Sedling, Ellwood, Allenheads. Grove Rake, Barberry, and in several quarries.

He has never had any serious illness, but some years ago had his leg broken in three places in an accident.

5th September 1939 (Penrith Observer)

MARRIAGE MAKES HISTORY

The bells of the Church of the Holy Cross, Haltwhistle, were peeled for the first time in their history on Wednesday, for the marriage of Mr Amos Treloar, A.C.S.M., A.I.M.M., only son of Mr and Mrs A. Treloar, Nenthead House, Alston, and Miss Ethel Robson, East Crossfield, Haltwhistle. …

12th September 1939 (Penrith Observer)

ADDITIONAL PARTY FOR ALSTON

In addition to those previously evacuated from South Benwell, 38 children and five teachers from South Shields were received at Nenthead on Friday. They travelled by rail to Haltwhistle, the remainder of the journey being completed by buses. On Saturday 70 children from St. Mark's School, High Shields, and a number of mothers were taken to Nenthead, Nenthall. and Garrigill. It is reported that a number of mothers and children have returned to their homes, but the majority are settling down and making the best of things. One pleasing point is the interest shown by the elder children in the younger ones. Farm stock are source of great interest to the toddlers. Evening services have been held at Alston Parish Church Thursday and Friday conducted by the Rev. N. A. Walton.

29th November 1939 (Newcastle Evening Chronicle)

NEW LEAD VEINS FOUND
IN ALLENDALE

Indications of further lead bearing veins in Allendale area were confirmed by Investigations now being carried out by an expert of the Geological Surveyor,

the Government sponsored body for discovering mineral deposits in this country.
This was revealed by Mr. Edmund P. Deas. chairman of Weardale Lead Co., Ltd., at the annual meeting of the company in Newcastle to-day.
The new development scheme in the Boltsbum area would take about six months to carry out, he added, and would probably decide the future of that area.
At St. Peter's Mine, Allendale, production had been below average but south of this mine was a large area of unexplored ground.
A theory was held to-day that the future of lead miningin the Pennines depended on the discovery of ore bodies at considerable depths below those worked in the past but the cost would be great and it would be a long term venture.
The year had been a disappointing one, and lead prices had not risen to expectations. The accounts showed a net loss of £3,513.
Mr Deas was re-elected chairman of the board.

5th December 1939 (Penrith Observer)

SUDDEN DEATH OF MR. E. T. BORLASE, CARLISLE

Former Glenridding Mines Manager

A former manager of the Greenside lead mines at Glenridding passed away unexpectedly at Carlisle on Tuesday evening after taking his children to the cinema. He was Mr. Edward Thomas Borlase manager of the barytes mines at Potts Ghyll, Caldbeck. He was 56 years of age and is survived his wife and three children. Mr. Borlase was a son of the late Mr. William Henry Borlase. Greenside Lodge. Glenridding, who for many years was manager of the Greenside lead mines,and a brother of Mrs. J. C. Kidd. Penrith. He was for several years manager at the mines after the death of his father. Educated at St. Bees School and the Camburn Mining School. where he obtained his degree as a mining engineer. He had mining experience in Spain, Portugal, Wales and Yorkshire, and was lecturer on mining at Birmingham University. He was working in Spain when the Great War broke out and returned to England to serve, with a commission, in the Royal Garrison Artillery. He returned to Spain after the war. His surveys of the Caldbeck Fells satisfied him that there was a rich seam of barytes at a much lower level than the old barytes mines, which were worked out during the Great War, and in 1837, under his personal supervision and management, the new drift which had been abandoned some years previously was recommenced by the Caldbeck Mines. Ltd. It was a matter of great satisfaction to Mr. Borlase when, only a few months ago, the new mine, the only one of the volcanic series being worked in Britain, was brought into production. Under his management the mines, particularly valuable in wartime, have been steadily developing and are now in full production.

14th December 1939 (Whitehaven News)

LEAD MINE FATALITY

INCORRECT SIGNAL

CAUSED WORKINGTON MAN'S DEATH

That an error in a signal was the cause of an accident in which a Workington young man met his death at Greenside Lead Mine, Ullswater, was revealed at

the resumed inquest at Patterdale, on Samuel Sowerby, single, aged 25, whose home was at Workington.
Raymond Rudd said he and Sowerby gave two rings on the bell-push as a signal to the winchman to lower the cage. As the cage did not move, Sowerby reached out as if he was going to signal again, and while he was doing so the cage set off. Sowerby seemed to catch his head between the landing and the binding bar at the top of the cage. The cage was then lowered to the 175 fathoms level and witness obtained help. When Sowerby was taken to the surface he was dead.
Witness said there was a notice to the effect that three rings must be given to the winchman before entering the cage, and that deceased never gave that signal, but only two rings. If he had given three rings the winchman would have signalled back in a similar way. At the time the safety gates were not on the cage.
Harry Birkett, the winchman, said he first lowered the cage to 135 fathoms. Sowerby went with it. He subsequently received three rings showing that Sowerby wished to enter the cage, and witness replied to it. Then he got two rings to lower the cage to the 150 fathoms, and he did so. Next, about five minutes later, he got two rings — a signal that the cage was to be lowered empty — but it was not preceded by the three rings signal. The cage gates were kept at the top for the convenience of deceased in unloading.
Witness said had he got the three rings before the two he would have waited longer before lowering the cage. Sowerby had not been in the habit of giving incorrect signals.
The jury returned a verdict of "Accidental death owing to an incorrect signal having been given by Sowerby." (Source: West Cumbria Mines Research Group)

A LAKE REVIVED
Recent years have brought many threats to the beauty of the Lake District, and it is satisfactory to know that one of these threats, which concerned Ullswater, has now been removed. Lovers of the Lake District will remember that Ullswater's beauty was in danger of being spoilt by the discharge polluted water from lead mine on the banks of the lake. Many protests, indeed, were made when this danger was first realised, and it is fortunate that the owners of the mine appreciated the harm that might be done to Ullswater. Now, it appears, special methods of infiltration are being used, and it is guaranteed that, in normal weather conditions, nothing but absolutely clear water will pass from the mine to the lake. Here, in fact, is an excellent example of the good results that may be achieved by friendly co-operation between industrial firms and local societies for the preservation of amenities, such as the Friends of the Lake

District. The revival of Ullswater should be a hopeful indication of how other threats to the Lake District may be countered.

29th January 1940 (Newcastle Journal)
PRICE RISE STIMULUS TO LEAD TRADE
By Our Quayside Correspondent The generous advance made in lead prices about a month ago has had a stimulating effect on the British lead producing industry and on Weardale lead mining, and will mean opportunity for increased output in this area. This country produces only a small proportion of its lead requirements, and imports the bulk of these from Empire sources. Hence the price of lead on the English market governed by that of the imported product. In the last few years prices have fluctuated over a wide range, and made home production a hazardous venture so far as financial, returns are concerned. Last year the average price of pig lead was £15 3s 10d a ton; for 1938, £15 12s 1d: 1937, £24 10s 7d; 1936, £16 11s 5d; 1935, £12 9s 8d.
COSTS PROBLEM
Of that period only 1937 was a definitely profitable year, but 1936 led to some recovery. Last year was a difficult one for English producers. When hostilities commenced, the price of lead was stabilised at £16 12s. 6d. a ton. At this figure producers had difficulty in carrying on in face of rising labour and operating costs. Their remedy, however, lay in an improvement in imported lead prices. Revision of the price to the present level of £25 to £26 10s. a ton came as something of a surprise as an increase beyond £21 was not expected. At existing values, prospects for the Weardale lead mining industry have much improved. Demand for lead is good, but it is not one of those metals of which consumption reaches vastly increased proportions during war-time.

30th January 1940 (Newcastle Journal)

GOLD IN LEAD

With the increase in the price of lead from £16 12s 6d per ton at the outbreak of hostilities to the present level of from £25 to £26 10s, new hope is afforded one of the oldest industries of the North, that of lead mining. It may not mean the opening of new mines, but it will encourage increased production at the Weardale mines.

The appeal of the British Red Cross and St. John Ambulance Brigade met with a splendid response from Alston, Nenthead and Garrigill. The total sum realised was £17 15s 9d. Collectors were:—Alston. Misses M. Swales, F. Swales. C. Watson. V. McMillan. B. Richardson and A. Armstrong; Nenthead. Misses L. Maxwell and A. Armstrong; Leadgate, Miss G. Thompson; Nenthall. Miss Edith Elliot; Garrigill. Misses M. Ridley and N. Currah; Kirkhaugh and Ayle, Miss K. Richardson.

27th June 1940 (Newcastle Journal)
ALSTON TO TAKE MORE EVACUEES
At the monthly meeting of Alston Rural Council, members discussed the question of the district as reception area for more evacuated school children, and although a warning was voiced by the Medical Officer, it was agreed to take the number of evacuees allocated 200. Dr. Dalgetty, the Medical Officer, said that after due consideration he strongly recommended to the Ministry of Health that Alston was full up. The district was now full of aged persons and invalids. They couldn't put evacuees into houses without taking others out. Mr.

Thompson said Alston Moor used to hold 8000 people instead of 3000 at the present day. The district was capable of sheltering more people there were no rules in war. Mr. Martindale. the Billeting Officer, said he did not wish to take compulsory powers. The Chairman (Mr. Robinson): It would be a disgrace if we evaded our responsibility.

23rd July 1940 (Newcastle Evening Chronicle)

ALSTON EVACUEE PROBLEMS
OPPOSITION TO MORE CHILDREN

OPPOSITION to the further evacuation of children to Alston was voiced by Dr. Dalgetty at the meeting of Alston Rural District Council. He said he desired to prevent another 300 children coming into the district. Mr. Martindale, the billeting officer, mentioned that under the scheme the district was allocated another 600. Dr. Dalgetty said that as far he was concerned they were not coming. He was quite definite about that. If they did come neither Mr. Martindale nor himself were going to have anything to do with them. Mr. Herdman said that in the event of an invasion they would have to take them. Mr. Robson: Can we refuse to take evacuee children?—It would seem a sin to do so. The Clerk (Mr. T. Dryden) said there were already 400 unofficial evacuees in the district, and more were arriving. If there was a rush compulsory billeting would be necessary.

29th August 1940 (Newcastle Evening Chronicle)

WEDDED AT ALSTON

The wedding took place at Alston Parish Church, to-day, of Miss Evelyne Margaret Sproat, elder daughter of Mr. and Mrs. Isaac Sproat, of Lawn House, Alston, and Mr. George Dawson Reed, eldest son of Mr. and Mrs. D. Reed, Sunset View, Alston. The bridegroom is in the Royal Corps of Signals. The Rev. N. A. Walton officiated and Miss Dorothy Sproat, sister of the bride, was bridesmaid, and Mr. Roland Reed, brother of the bridegroom, was best man.

Deaths

At Whitehall, Nenthead, on December 4th, aged 58 years, Joseph, beloved husband of Mary Jane Cousin (late of Cotterill).

14th December 1940 (Newcastle Chronicle)

WEARDALE LEAD MINERS TO MOVE

Mining having been suspended in Boltsburn lead mine in Weardale, after 40 years' working, the owners, the Weardale Lead Company Ltd., have decided to transfer most of the employees, who live in the village of Rookhope, to the Stotsfieldburn mine. This was announced Mr. Edmund P. Deas, chairman of the company, at the ordinary general meeting of the shareholders, held on Wednesday in Newcastle. Mr. Deas said that the results of the year did not justify the payment of dividend. The financial position of the company was quite sound. In the Allendale mines, they were hoping that the south cross-cut towards Allenheads, which had been driven about 1,500 feet into virgin ground, would bring success. Mr. Anthony Wilson, the retiring director, was re-elected.

IMPORTANT SALE OF MINING PLANT.
MACHINERY AND BUILDINGS AT
THRELKELD LEAD MINES
adjoining the main road. 4 miles from Keswick and 14 miles Penrith.
WEDNESDAY. 13th AUGUST.
PENRITH FARMERS' and KIDD'S AUCTION CO.. LTD . have received instructions Sell by Auction, the following
VALUABLE MACHINERY
EQUIPMENT & BUILDINGS.
Viz.: —STONE-BREAKER, 18in. x 9in.: ROBEY STONE-BREAKER. 10in x 8in. with conveyer; LUHRIG CRUSHING ROLLS. 2ft. 6in. dia. 10in. face. Trummel 5ft. 6in. x 2ft.; CHAT MILL ROLLS, 18in. dia, 10in. face; Range 4 Classifying Screens. 5ft. 6in x 2ft. 61n.; TANGYE 45 h.p. GAS ENGINE; FAIRBANKS and MORSE 6 h.p. PETROL ENGINE; TRUMMEL, 6ft. 6in x 2ft. 6in., and Conveyer belt. WORM GEAR POWER WINCH: SIX 4-COMPARTMENT JIGS with Iron bodies. 7½ in.; ENGINEER'S LATHE with change wheels. 6ft. bed; Drilling Machine; 15 TUBS. 21in. gauge; Cast Iron Turntable. 2ft gauge; “Roots” Acme Blower, by Samuelson and Co; 8 h.p. VERITYS MOTOR. 110 D.C.: 5 h.p. Electric Motor. 110 D.C: Rise and Fall Iron Saw Bench. 5ft. 4in. x 3ft. 2in. Saw Gap 30in.; Wood Turning Lathe; Grinder, 2 Joiner's Benches. 12ft. with Grip and Iron Vices; Shafting and Jig Frames: new 8in Sluice Valve; Sundry Valves and Cocks; 4-ton screw Jack. 12in screw; YARDS RAIL, 14lb. to 20lb; 58 STEEL PLATES. 12in. x 3/8: 262 ft. STEEL SHAFTING. 1½in to 3½in. and Pulleys Belting: 250 ft. CAST-IRON PIPING. 4in.; 560 ft. WATER PIPING, 1in. to 3in. Parkinson 10in. Iron Vice; 2 Sets Chain Blocks; Rope Blocks. Chains; 4 Belt Tighteners; Pipe Grips; Coil Balata Belting. 11in.; Punch Copper Sieving. 3mm; Iron Safe. 2ft. 6in. 2ft x 1ft. 10in; Iron Windows. 18in. x 36in.; Weighing Machine; Oil Strainer; 20 TONS LOCAL SLATE; Ridging; 400 ft. BLACKSMITH'S IRON and DRILL STEEL; Porcelain Washhand Basins; 2 Enamelled Baths. 3 Galvanised Water Tanks. 4 Cylinders. 5ft x 20in. A LARGE QUANTITY SCRAP METAL.
TIMBER BUILDINGS. Including Table Shed. 24ft x 45ft.; Shed. 18ft x 40ft; Weighing Shed with corrugated zinc roofing; Lathe Shed. 20ft .x 30ft., and several Brick Buildings.
The above CAN BE VIEWED on TUESDAY, 12th AUGUST, and MORNING OF SALE. Sale 1 pm. Terms Cash
The Auctioneers, Lake Rd., Keswick

8th November 1941 (Liverpool Daily Post)
TO INVESTORS
SALE BY AUCTION OF
THRELKELD LEAD MINES.
The above property, which is situated on the main road, 4 miles from Keswick, in the heart of the LAKE DISTRICT, comprises: —

A DESIRABLE FREEHOLD BUNGALOW, occupying a unique position and comprising living-room, 2 bedrooms, bathroom, h. and c., and w.c., kitchenette, garage. The bungalow is built of timber with stone foundation. Vacant possession.

14 WORKMEN'S TIMBER-BUILT
BUNGALOWS,
all let on weekly tenancies at
GROSS ANNUAL RENTAL OF £200. and 15 Acres of Land. Including grazing land and mine dumps.

THE DEATH OCCURRED AT EASTERN HOUSE, NENTHEAD, OF MR ISAAC WALTON SWINDLE, at the age of 64. For 20 years he was a member of Alston Council, a member of the committee of Nenthead Agricultural Society, and for a number of years acted as treasurer. He was a manager of Nenthead Council School, a special constable, and for a period acted as local fuel overseer.
Peter Swindal (baptised 15th June 1774, Whitfield, son of Peter & Susannah (nee Nicholson) Swindal) married Sarah Lee, 3rd December 1803, at St Cuthbert's, Allendale.
Children of Peter and Sarah Swindal:
Peter baptised 23rd September 1804, at Ninebanks, buried 14th January 1805, at Ninebanks
Jane baptised 14th July 1807, at St John's, Garrigill, married George Wilkinson 17th December 1835, at St Augustine's, Alston. George Wilkinson died 5th August 1870. See 20th August 1870.
Thomas baptised 26th February 1810, at St John's, Garrigill, See 7th December 1872.
Susannah baptised 7th January 1815, at Alston, married Robert Douglas 26th December 1839, at St Augustine's, Alston. See 21st June 1879
John born 24th November 1818, baptised 1st March 1819, Wesleyan, Alston, Peter Swindale of Natrass, was buried at St John's, Garrigill, 29th February 1820, aged 46
In 1841, at Hillersdon Terrace, Nenthead, Sarah Swindle aged 60, and son John, smelter of lead ore, aged 20.
John Swindle married Jane Greenwell (father William, blacksmith) 8th September 1842. See 17th September 1842
Jane Swindle of Nenthead, was buried at St John's, Garrigill 29th September 1844, aged 23
John Swindle married Elizabeth Smith 17th November 1849, at St John's, Nenthead.

Elizabeth (Betsy) Swindle was buried at Nenthead, 4th September 1851.
In 1851, at Hillersdon Terrace, Sarah Swindell pauper lead smelters widow, aged 72, son John, lead smelter, aged 33, daughter in law, Elizabeth aged 42, granddaughter Jane 6, grandson Peter 4 months, and visitor Thomas Walton, merchants son, aged 14.
In 1861, at Low Dyke Heads, Sarah Swindle, widow, aged 81, son John Swindle, widow, lead smelter, aged 42, granddaughter Jane Swindle 16, and Peter Swindle 10.
Jane Swindle, married Robert Bell, 22nd May 1869, at Nenthead. See 29th May 1869.
Peter Swindle married Eleanor Walton, 1st April 1871, at the Primitive Methodist Chapel. See 8th April 1871.
In 1871, at Low Dyke Head, Peter Swindle, lead smelter, aged 20, and his wife Ellen aged 20.
In 1871, at Clog Hall, Nenthead, Jane Wilkinson, widow, grocer, aged 63, and Boarder, John Swindle, widower, separator at Smelt Mill, aged 53.
In 1881, at Bridge End Cottage, Nenthead, John Swindle, widower, lead ore smelter, aged 62, Peter Swindle, lead ore smelter & farmer of 13 acres, his wife Eleanor aged 30, sons, John 9, and Isaac W 4.
In 1891, at Kings Head, Nenthead, Peter Swindle, cartman, aged 40, his wife Ellen 40, children Johnnie, waggon driver, aged 19, Isaac Walton, waggon driver, aged 14, father John Swindle, widow, labourer, aged 72, and domestic servant Mary Jane Shield 20.
John Swindle was buried at Nenthead, 16th July 1898, aged 79.
In 1901, at Kings Head, Nenthead, Isaac Swindle, carter, aged 24, John Swindle, carter aged 29, and John's wife Annie aged 22.
Isaac Walton Swindle married Minnie Angus 1st quarter 1908, at Alston.
Eleanor Swindle died 1st quarter 1910, registered at Alston
In 1911, at Kings Head Farm, Nenthead, Isaac Walton Swindle, farmer and carting contractor, carting zinc ore, aged 34, his wife Minnie aged 28, and daughter Mabel aged 2.
Probate 1842: Isaac Walton Swindle of Eastern House, Nenthead, Alston, Cumberland, died 4 September 1942 Administration Carlisle 14 November to Minnie Swindle widow. Effects £846 13s 4d.

DRILL TRANSFIXED LEAD MINER'S HEAD
Penrith inquest failed to clear up the death of Fred Howe (47), Round Thorn, Penrith, who was killed in the Greenside lead mine, Glenridding, at the head of

Ullswater. Witnesses said the mine is set out in levels and that drillers on the sub-levels dropped their blunted steel drills down a 90-feet-long two-inch chute, which carried them to the 200 -fathom level to be sharpened. Howe had sent down several drills and went down to the lower level to collect them. Shortly afterwards he was found with his head transfixed by a drill, which had gone through his steel mining helmet. A workman said he had never known drill stick in the pipe. The Coroner recorded a verdict Accidental death and said there did not appear to have been negligence.

… The Clerk reports that Non-Ferrous Minerals Development Ltd. had announced the closing of their mill at Nenthead on November 30.

16th January 1946 (Newcastle Journal)

THE WEARDALE LEAD COMPANY annual report presented at yesterday's meeting declared that the company's operations dictated by war needs continued to be directed towards the production of Fluorspar.

No active mining done at the Allendale Lead Mines although it was necessary to continue maintenance work there. The profit for the year including income from investments etc., was £310 9s 6d. This sum has been applied to the reduction of the amount of standing to the debit of Profit and Loss which is now £2,301 16s. 2d.

19th November 1948 (Morpeth Herald)

Mr. I. ARMSTRONG,

Morpeth

"By the passing from our midst of Mr. Isaac Armstrong, has passed one of the noble men of our community, if not of our generation," remarked the Rector of Morpeth (Canon F. Baker) when conducting the funeral service in St. Mary's Parish Church on Tuesday afternoon for the late Mr. Isaac Armstrong, twice Mayor of Morpeth and an alderman of the Town Council for a number of years. "Without the benefits of noble birth to sustain him, his own conduct, industry, personality and integrity had enabled him to rise to the honoured position of being the Mayor of the town of Morpeth upon two occasions," continued the Rector." I well remember when the Morpeth War Memorial was unveiled and the names of John N. Armstrong and Edwin Armstrong were read. It was a very

trying time. Then, later, when Mr. Armstrong lost his third and youngest son, Charles, those dark days revealed a quality and character in our friend, which won our respect.
“That same quality had been recognised by others, as His Majesty had made him a Justice of the Peace, an office he discharged with the utmost credit to himself. They who are left should thank God that this England of ours could produce such men as Isaac Armstrong.”
Born at Nenthead, near Alston, just over the Cumberland border, 85 years ago, Mr. Isaac Armstrong came to the district in December 1881 with other members of his family. As a young man he entered the employment of the L.N.E. Railway Company and joined the staff at Morpeth station.
Always interested in municipal questions, he was elected to Morpeth Town Council in 1911 and remained a member of that body for some ten years. After a short absence from the council he was re-elected in 1923 and made Mayor the following year, 1924.
During the war years of 1914 -18 he tendered yeoman service to the community as a member of the local Military Tribunal, Food Control Committee, Coal Control and, later, as a member of the War Pensions.
He also became closely identified with the Morpeth War Savings, and during the years, which followed, right up to the outbreak of the Second World War, watched with interest the activities of the local War Savings Committee. For many years he was identified with the Morpeth Trustee Savings Bank, as a manager before being elected a trustee, and, though asked to take over the position of chairman, was happy in being vice-chairman right up to the time of his retirement in 1946.
In the council chamber he was elevated to the aldermanic chair and asked to take office as Mayor for the second time in 1931, and for a number of years was the council's representative upon the Board of Governors of Morpeth Grammar School.
He was also a prominent member of the Co-operative movement and succeeded the late J. D. Smith as the Morpeth representative on the district committee of the Ashington and District Co-operative Society, a post he held until 1941. …

26th February 1949 (Cumberland & Westmorland Herald)

LEAD MINING ON ALSTON MOOR
STORY OF VIEILLE MONTAGNE COMPANY
HOW WARTIME PROBLEMS WERE SOLVED

Last week we recorded the transfer of the Vieille Montagne Zinc Company, Nenthead, to the Imperial Smelting Corporation, Ltd., through its subsidiary Company, Anglo-Austral Mines, Ltd. We now give the story of the Belgian Company's connection with Nenthead dating back to 1886. (sic)

La Societe des Mines et Fonderies de Zinc de la Vieille Montagne of Angleur, Belgium, established its Nenthead agency at what was to prove the dawn of almost a new age, in which hitherto unquestioned standards of accomplishment, and of industrial relations were to be swept aside before the progress of science and the gathering strength and organisation of labour. From laborious hand drilling to the devastation of the atom bomb, from strings of horses and carts wending their way twice a day to Alston Station, each bearing

a few hundredweights of ore over pot-holed roads to the modem petrol and diesel motor wagons carrying six and ten ton loads to Liverpool and Glasgow on smooth tar-macadam, are some of the transitions of this period.

WARTIME RESTRICTIONS

Through all this the Vieille Montagne Company survived, but, emerging for the second time from the carnage of war, it found its powers weakened. Currency and export restrictions imposed by a crippled Britain severed the life-lines between Nenthead and Angleur. Capital required to rehabilitate the mines in Alston Moor, exhausted of almost all reserves of ore by the demands of war, could not be received from Belgium, and even if this had been permitted and further ore reserves made available, no lead ore or zinc ore could have been sent from Nenthead to feed the huge smelters of the Vieille Montagne at Baalen and Chenec.

Thus, without an early relaxation of the restrictions, the position was rapidly approaching a stage when, reluctantly, the Company must consider liquidating its interests in Alston Moor.

The Company had, during its years in Alston Moor, expended capital amounting to hundreds of thousands of pounds, in addition to vast sums paid out for wages and services, goods and supplies, rates, taxes and royalties to maintain and operate their mines and mills.

HEAVY EXPENDITURE

Shortly after purchasing the holdings of the old Nenthead and Tynedale Company in 1896 very heavy expenditure was incurred in installing plant and machinery to provide compressed air to operate pneumatic drills in the mines, with which the previous system of hand-drilling was replaced - a course to which the miners took exception (as recorded in "Looking Backward" in the "Herald" on 12th February) on the grounds that it would render many men superfluous.

In 1908-9 the huge building in the centre of the village known as Rampgill Mill was built and equipped at very heavy expense, to become the largest and most efficient plant in the country at that time. During the first world war is was decided to acquire Nentsbury Mines, the Company having, up to then, the working only of the mines in Nenthead and Rodderup under the Admiralty leases, and of Carrshield area under lease from Lord Allendale.

RICH ORE

Nentsbury Mine was then owned by the brothers James and Joseph Thompson. It was a wise investment, and in 1924-5, as a result of a vigorous program of development instituted by Mr. Amos Treloar, who had been appointed manager in 1925, and of further modernisation of the plant and equipment on his recommendation, the mine commenced to yield unprecedented tonnages of rich ore. Solid galena (lead sulphide) was blasted in sizes too large for the mine tubs, or for two men to carry, so that it had to be broken down further. At to-day's price of £123 per ton of lead, each of these pieces would have been worth from £50 to £80, and at that time ore was being shipped to Belgium at the rate of 400-500 tons per Month.

The phenomenal richness of Nentsbury Mine lasted until the Middle 30's, but before this, the effect of the "economic blizzard" of 1930 had been felt, the prices of lead and zinc having fallen from £35 to £25 per ton, and finally to little more than £10 per ton, with the result that, except for maintenance, the mine closed in December 1930.

PROGRAM CURTAILED

This meant the serious curtailment of an ambitious development program for the mine, and meanwhile further capital expenditure had been made on re-equipping and modernising Rampgill Mill, which had been out of commission since shortly after the first war, building a new engine house and installing two 200 h.p. fuel oil engines, electrical generating and transmission plant, new compressors and erecting a power line and aerial ropeway between Nenthead and Wellhope Shaft, which was sunk on the exposed Wellhope Moor in 1927, and equipped with a headgear, 500 ton ore bin, double cage-way and electric motors in 1929.

Much of this colossal expenditure had to be discounted, because the prices of lead and zinc remained low, despite a slight fillip when the country deserted the gold standard in the autumn of 1931.

In February, 1932, in the interests of providing employment in the district, which was by then classified as a "distressed area", and in the not very strong hope that the prices of base metals would recover, it was decided to re-open Nentsbury Mine and operate it on a small scale, using the little mill there for dressing the ore.

DENUDED ORE RESERVES

With slight variations, conditions continued substantially the same for the next six years, and, while employment was provided for a number of men, the Company not only lost money but were also unable to afford to develop the mine and thus replenish the ore reserves which were becoming denuded by the continued drain.

To reduce the loss to a minimum it was essential to mine only the richest ore, and each year this naturally fell in value and quantity, so that by the end of 1938 the ore reserves consisted mainly of a mixed Witherite - zinc - lead ore. It was possible in the dressing mill to recover the lead content, but the specific gravity of Witherite being approximately the same as that of blende (zinc sulphide) created technical difficulties.

SUCCESSFUL EXPERIMENT

Following an experiment by a chemical firm at Stockton-on-Tees in December 1938, several thousand tons of mixed ore was treated at Nentsbury Mill in the spring of 1939 for the extraction of the lead content and the elimination of impurities. The middlings of mixed zinc and Witherite were sent to Stockton-on-Tees and the Witherite value extracted chemically, the zinc residue being sent to the Vieille Montague works in Belgium. The chemical firm had only a pilot experimental plant, and before the full value of the trial could be assessed by both parties, the second war intervened. However, the value was not entirely lost, because the national demand for zinc induced the Ministry of Supply later to have the material treated and the zinc residues smelted at Seaton Carew in the works which were, and are, the property of the new owners of the Nenthead Mines.

MINE RE-OPENED

Meanwhile, Rodderup mine, which had closed in October, 1930, had been re-opened in 1935, and with the opening of new flatts of good average lead content the decision was taken to install electric power inside the mine. This involved the use of some 1,300 yards of tough electric cable from the mine mouth to the chamber inside the mine to drive two new compressors by means of two electric

motors of 100 and 150 h.p. The Installation was completed in the summer of 1937 and the flatts gave a good yield of greatly needed high grade lead concentrates during the war years, but with the price of lead fixed at £25 per ton in December, 1939, and never raised until after the cessation of hostilities, despite the general increase in the costs of labour and materials, there was no margin to provide for developing of the mines, and, in any case, the limited number of miners left after meeting the demands of the Forces were all required to produce ore in the national interest.

VALUABLE CONTRIBUTION TO WAR EFFORT

Other welcome contributions to the war effort by the Vieille Montague Company included several thousand tons of clear washed limestone chippings and broken stones, which were used for the surfacing of new aerodromes built in the Carlisle - Longtown area, and, at the request of the Fluor Spar Control, some hundreds of tons fluorspar, urgently required to relieve a shortage of this material experienced by the foundries during 1941-2. In addition the dumps of tailings at Nenthead, estimated at a gross tonnage of 600,000 and preserved because they were known to contain percentages of lead and particularly zinc values, were also to serve the nation in its hour of need, A separate Company, Non-Ferrous Minerals Development, Ltd., was formed by the Ministry of Supply, the Rampgill Mill building requisitioned, and new plant installed to treat the material from the dumps, which were also requisitioned. From this source alone the nation and the Allies received about 20,000 tons of high-grade zinc concentrates from July, 1943, to November, 1945, particularly valuable at a time when zinc was a disappearing commodity in the world market.

COMMUNICATIONS CUT

The second war soon brought a grave responsibility be bear upon Mr. Treloar, the manager at Nenthead. With the fall of France in June, 1940, all communications with his head office were severed and he was left, not only to direct the operations of the Nenthead concern in the interests of the V.M. Company, but also to meet in every way the incessant demand for greater production of lead ore concentrates and other minerals for the Ministry of Supply, with a continually decreasing number of miners as a result of calls to the Forces. This position, sufficiently difficult without being able to consult his directors, was further complicated by the fact that, after the occupation of Belgium by the Germans, that country was technically regarded as an "enemy country". The Nenthead agency was only permitted to operate by a licence from the Board of Trade Trading-with-the-Enemy Branch, and the accountancy side of the operations was subject to the scrutiny and approval of the "Custodian of Enemy Property", an office designed by a kindly Government to carefully guard the property in this country of any members of other nations with whom we were waging total war.

REUNION

It was, therefore, a relief when, in the late summer of 1944, the news of the liberation of Belgium became known and slowly a trickle of correspondence began as military operations allowed. Notes of a personal nature at first, good news and bad intermingling. Mons. G. Dupont Biar, a retired director of the Company, who spent many years at Nenthead, was still alive and well, but Mons. Jean Cox, also well known in Nenthead, and whose interest he represented personally at head office, was no longer alive. Mons. Eduard Buste,

another who retained happy memories of Nenthead, was still alive, but one of his daughters, actually born at Nenthead, had died in the horrors of a concentration camp. As for the works in Belgium, they had happily suffered little damage, the rapidity of both the invasion and the liberation having left them unscathed.

RODDERUP MISFORTUNE

From the comparatively small liquid cash reserves which Mr. Treloar built up from nothing during the war years sums were set aside for limited prospecting in the Nentsbury and Rodderup mines. The results obtained in the first mine were disappointing, although their range was severely restricted because of the small capital available, but promise was shown in a section of the Rodderup mine until a most unfortunate and substantial collapse of the ground in the mine in August, 1947, isolated the region where the work was being prosecuted.

During 1948 Imperial Smelting Corporation, Ltd., became interested in the agency, and in July at a meeting attended by Mr. Treloar and representatives of the head office of the Company and representatives of the directorate of I.S.C. provisional agreement was reached to dispose of all the V.M. interests in Alston Moor to the I.S.C. or Anglo-Austral Mines, Ltd. To give legal effect to this decision has required many months of ceaseless negotiation and considerable research, as well as the consent of other parties. The legal representatives of the V.M. have been Messrs. Blackburn and Main, Carlisle, and the I.S.C.'s own solicitor, Mr. G.A. Delafield, has conducted legal proceedings on their behalf.

2nd June 1949 (West Briton and Cornwall Advertiser)

Cornish Mining Engineer Mr. and Mrs A Treloar 2 Penwinnick-villas St Agnes, have sustained a bereavement in the death of Mr Treloar's elder brother Mr Amos Treloar A.I.S.E., M.I.M.M., of Alston Cumberland in a Cheltenham nursing home last Wednesday. He had been on his way to Cornwall. A native of Breage and a member an old and well-known Breage family Mr Treloar trained as a mining engineer and many years ago he was for some time on staff of Wheal Kitty Mine St Agnes and then at Blackwater. He also followed his profession in Africa, London, and Scotland, and he had remained for the past 26 years at Nenthead, Alston, with the firm of Messrs Vieille Montagne Zinc Co Ltd of Liege Belgium. He was county magistrate for Cumberland. His only sister is Mrs S. J. Williams of Porthleven late of Vicarage-road St Agnes.

The funeral service in Bethesda Methodist Church on Friday conducted by the Rev M. H. Gelbert was followed by interment Cheltenham Cemetery, Mourners present were the widow and Mr. and Mrs. R. W. Todd, Miss M. J. Treloar, Mr. and Mrs. J. S. Berry, Mr. and Mrs. R. M. Small, and Mrs. D. Wash (daughters and sons-in-law) Mr. A. L. Treloar (brother) and Mrs. S. J. Williams (sister), Mr. W. B. Paterson (Wylam Northumberland) and Mr. B. T. Hallett representing all members of the firm of Messrs Vielle Montagne Zinc Co Ltd.

Probate 1949

Amos Treloar of Nenthead House, Nenthead, Alston, Cumberland, died 25 May 1949 at The Imperial Nursing Home, Montpellier Grove, Cheltenham, Probate Carlisle 2nd August to Amos Treloar timber merchant and contractor, Margaret Jane Treloar, spinster, and Doreen Stanley Walsh (wife of Douglas Hendrick Walsh. Effects £4100 4s.

20th August 1849 (Newcastle Journal)

OLD LEAD MINE MAY REOPEN

An effort is being made by two Haltwhistle men, County Councillor George R. Wardle and Mr George Ridley, to revive the old-time mining industry in the Allendale district.

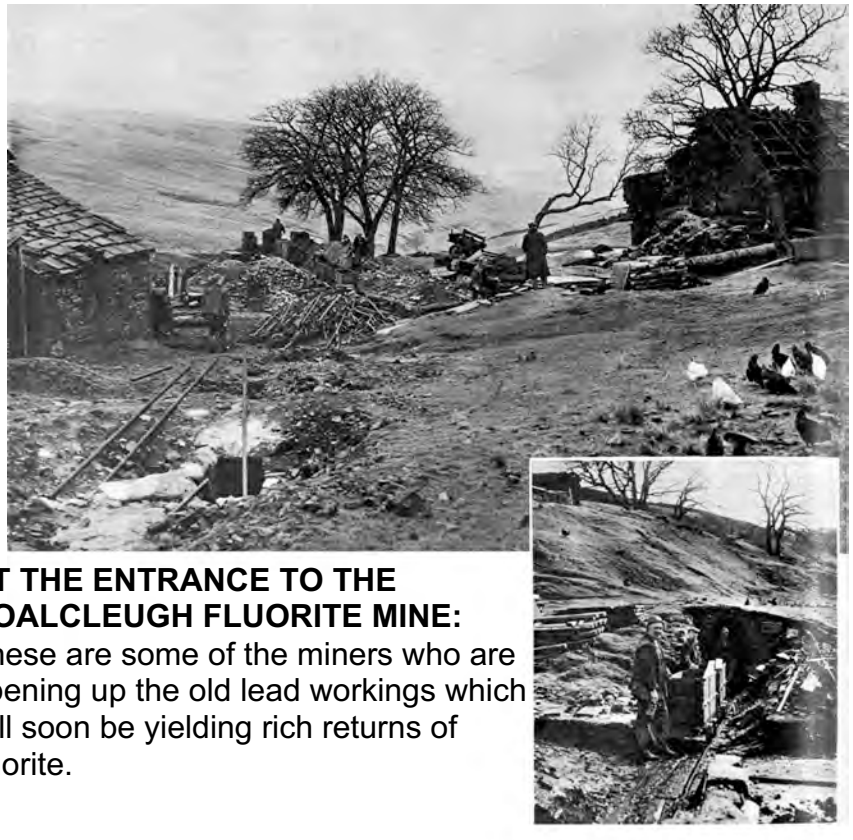
They have formed the Allendale Metalliferous Mining Company, and at the Hamlet of Coalcleugh on the Allendale moors work has begun reopening a lead mine which was closed more than 50 years ago.

Four Nenthead miners are working half a mile underground preparing the way for a project which may eventually mean work for hundreds of men. Their search is for valuable deposits of fluorspar, which are known to exist.

29th April 1950 (The Sphere)

WHERE THE LEAD MINING INDUSTRY DIED A CENTURY AGO THE FLUORITE MINING INDUSTRY NOW SPRINGS UP:

The old Coalcleugh workings in Allendale, Northumberland, which are once again being brought into production because of the value of fluorite in the still existing lead deposits. Fluorite—the natural form of calcium fluoride (CaF_2)—plays a part in atomic research and also has an importance as flux in the making of steel, in the manufacture of opalescent glass and enamels, and in the preparation of hydrofluoric acid. The dark-blue variety, which comes from Derbyshire, is known as “bluejohn” and is used for ornaments. The Allendale workings are particularly rich in fluorite, a common accessory mineral found with ores of lead, silver and zinc, and miners from many surrounding districts are coming there for work. It will be another twelve months, however, before they can be taken on in large numbers, as the ten men already there are sufficient to carry through the preliminary work.



AT THE ENTRANCE TO THE COALCLEUGH FLUORITE MINE:
These are some of the miners who are opening up the old lead workings which will soon be yielding rich returns of fluorite.

24th May 1950 (The Times)

IMPERIAL SMELTING CORPORATION LIMITED

The new anhydrous hydrofluoric acid plant, which commenced operation in 1948, made an important contribution to our expanding range of fluorine chemicals. Many of these materials are still largely in the development stage and it is believed that there will be a greatly increased demand for them in the future. The essential raw material for these products is fluorspar and in order to ensure a supply of fluorspar of the requisite high quality, a mine was developed during 1949 in County Durham and a bene-ficiation plant installed at Nenthead. Progress has been made in modernizing our barytes mines.

12th December 1950 (Sheffield Daily Telegraph)

FIREMEN ON SHAFT LADDER SAVE MINERS

MORE than 400 feet below ground, firemen last night used ropes to rescue two men trapped in the Magpie lead mine at Sheldon, near Bakewell. The men, Arthur Hurst, aged 34 of Curbar, and Harry Heaton, aged 36, of The Dale, Stoney Middleton, were working at a depth of 450 feet on a narrow staging 40 feet below the last rung of a steel ladder running up the side of the shaft.

To reach the ladder, the men used a winch-operated bucket, but, after they had sent up the bucket filled with lead ore, the winch jammed.

Three members of the Derbyshire Fire Service — Assistant Divisional Officer E. Gaskarth and Fireman G. Thomas, off Chesterfield, and Sub-Officer W. Alexander, of Bakewell clambered down the ladder and lowered ropes to the trapped men below.

Rung Was Pulley

Using a rung of the ladder as a pulley, they hauled them on to the two-yard-square scaffolding on which they were standing.

Unhurt, the miners then climbed the ladder. They had been trapped for more than two hours.

Mr. Gaskarth told the “Sheffield Telegraph”: “The two men had little room to stand, and a false step would have sent them 200 feet to the bottom of the shaft which is full of water.”

The mine, which is about 700 feet deep, is worked by five men — two underground and three, one of whom operates the winch, on the surface.

7th August 1951 (Newcastle Journal)

FIRE in ROOKHOPE LEAD MINE

The Coliery Rescue Brigade from Crook and Houghton-le-Spring, were called to an underground fire at a lead mine at Rookhope, belonging to the Weardale Lead Company, last night.

it is understood that no workmen were in the mine at the time. Firemen tackled the outbreak wearing oxygen apparatus because of the danger of fire damp and gas.

26th June 1952 (The Times)

IMPERIAL SMELTING CORPORATION LIMITED

Considerable progress has taken place at the U.K. mines and additional ore reserves have been revealed. The fluorspar mill at Nenthead continued to work successfully and provided acid-grade fluorspar for the fluorine chemical processes.

8th July 1952 (Yorkshire Post and Leeds Intelligencer)

FOUR MEN TRAPPED BY GAS IN LEAD MINE
RESCUE TEAMS FORCED TO WITHDRAW AFTER 9 HOURS

From our special correspondent

Up to the early hours of this morning rescue teams equipped with oxygen breathing apparatus had been unable to reach four men trapped by gas 1,050 feet below the surface at Greenside lead mine on the slopes of the fells at Glenridding, Westmorland, near the head of Ullswater. The rescue teams were work in the mine from noon until after 9 o'clock last night, when they were forced to suspend operations for several hours owing heavy concentrations of gas. There is only a faint hope that the four men may have found a pocket of air in the gas-filled mine. At midnight, they had been underground for 15½ hours. More than 30 others affected by the gas were rescued during the day and are recovering.

The trapped men are two members of the morning shift, Leo Mulryan, aged about 40, and Richard Mallinson (35), both married men. of Glenridding, and two men who entered the mine to try to rescue them, John Miller (33), electrician, and George Gibson (27), crusher operator, both of Glenridding. The men are at the lowest level of the mine. The gas is believed to be carbon-monoxide caused by a fire after a fault in the electrical wiring.

Staggered back

The morning shift 35 miners went into the level at 8 a.m. and the alarm was raised about half hour later when some of them were seen staggering back. Surface workers immediately went into the mine and began bring out men who had been overcome. By 10 a.m. all except the four in the lowest level had been brought out and were recovering. Mr. C. Connor, the mine manager, who led one of the early rescue attempts, was also affected by the gas. He said: "The men are on the lowest level which is reached by walking along a mile-long gallery and descending two shafts in electric hoists. I got to the head of the second shaft, which only about 150 yards from where the men are thought to be, but found that the hoist operator had collapsed and I dare not operate the cage because I feared that some of the men might be lying half out of the cage Along with other men affected by gas I had to move to a higher level."

Hoist accident

Rescue teams sent from West Cumberland coal mines arrived about noon bringing breathing apparatus. The Greenside mine not equipped with breathing apparatus because gas has never before been encountered in the history of the mine. The rescue teams are working groups six. During the rescue attempts a 20-year-old miner. Douglas Hodgson, Glenridding. who returned to work the mine only last week after serving the Army, lost both feet in accident one of the hoists. He had collapsed from the effects of the gas, and his companions, who were also affected, were trying to bring him out when his feet were trapped in the cage and both legs were severed at the ankles. He is In the Westmorland County Hospital at Kendal.

Air supply failed

Edward Poole (22), of Glenridding. one of the survivors, was recovering in bed last night. He said that with Gibson and Millar, two of the trapped men, volunteered to go down the mine with a rescue party.

“We had no special breathing equipment," he continued, "and as we approached the top of the shaft were met with a sickly-sweet pineapple smell. We carried on, however, and it was decided that I should work the air pump down the face shaft while Gibson and Miller went down try to locate the missing men. After a little while the air supply was cut off and I felt myself being overcome with the fumes. The last thing I remember was seeing the manager coming towards me, and when I recovered consciousness I found myself the open air together with a couple of dozen other men who were also recovering."

9th July 1952 (Teesdale Mercury)

UNEMPLOYMENT IN TEESDALE

After having provided extensive employment for a large number of workmen drawn from Middleton-in-Teesdale and the whole of Upper Teesdale for a good number of years, the barytes industry in the district shows ominous signs of declining.

It was announced by the Anglo-Austral Mining Company, who operate one of the largest mines in the district at Cow Green, that they are compiled to reduce their staff by 50 per cent.

This reduction will mean that over fifty men will become unemployed. Those found to be redundant have been informed and they are expected to cease work on Friday.

The position has arisen because of competitive working costs and a decrease in the demand for the mineral. A similar fall in demand has temporarily restricted output at the Lunehead barytes mines of Athole G. Allen and Co. to a very low tonnage.

24th February 1953 (Penrith Observer)

HEIGHTS MINE PRODUCTION EARNED DINNER

MINERS from Alston and Nenthead on Wednesday joined their colleagues from Heights Mine, Weardale, at a dinner and social evening which they earned last year by producing 4000 tons of fluorspar in six months.

Up to the middle of last year, Anglo-Austral Mines, Ltd., had spent about four years restoring the mine. The production started and the company's director of operations, Dr W. G. Hiscock, promised: "Get me a 4000 tons by the end of the year, and I’ll provide you with a dinner." The director kept to his promise after the 4000 tons were produced, and dinner was held at the Queen's Head Hotel, Tirril *(near Penrith)*. The Mines Superintendent, Mr J. Connor, Penrith, presided, and apologised for the unavoidable absence of the company's general manager. Mr G. R. Daniels. …

14th October 1953 (Lancashire Evening Post)

GREENSIDE APPEAL

YOUR readers may remember that an appeal was launched after an accident at Greenside Lead Mine, in July, 1952, in which four men lost their lives. The response was most generous and a total of £4,761 has been collected. A trust has now been formed to administer the money. The trustees are: The Rector of Patterdale. the mine accountant Greenside Mine, the manager of Martins Bank, Penrith, the County Councillor for the Patterdale Division, and one other, person to be co-opted by the original trustees. The trust fund is to be distributed by the trustees for the benefit of the dependants according to their need, with the intent

that the fund shall be completely distributed during the lifetime of the dependants. The committee wish to express their thanks to all who have given money and help to the fund, and to the Press which has given generous publicity. JOHN C. ROGERS (chairman). KENNETH DOBELL (secretary), Patterdale.

17th November 1953 (Penrith Observer)

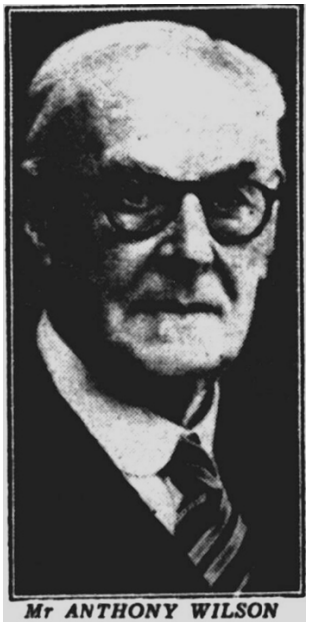
DEATH OF ALDERMAN

MR. ANTHONY WILSON, a county alderman ot Thornthwalte Grange, near Keswick, died suddenly shortly after returning home on Tuesday afternoon from a meeting of the Keswick School governors, of which he was a county member. He was in his 83rd year.

Mr Wilson was a member of a Kendal Quaker family, and qualified as a member of the Institute of Mining Enginers. and of the Institute of Mining Metallurgy. He was managing-director of the Thornthwaite Lead Mines, the Carrick Fell Tungsten mine, and later Threlkeld Lead Mine, all now derelict. After the first World War Mr Wilson was appointed chairman of the Lead and Zinc Mining Association, and was a member of the Government Advisory Mines Committee. Up to his death he was an active director of the Weardale Lead Co., Durham.

PUBLIC CAREER

For some years Mr Wilson was a member of the Parish Council of Above Derwent and from 1910 to 1919 he was the local county councillor. He returned to the Cumberland County Council 12 years ago and was made an alderman last year. He was chairman of the County Education Finance Committee, chairman of the County Education Schools Meals Committee. chairman of the Governors of Lairthwaite Secondary Modern School Keswick; a Governor of Keswick School; chairman of the Income Tax Commissioners, and a member of the North Cumberland River Board.



Mr ANTHONY WILSON

For 37 years he was an active Keswick magistrate and chairman of that bench for some years. He was a Liberal.

Mr and Mrs Wilson celebrated their golden wedding just over two years ago, but Mrs Wilson died last year. He is survived by three sons and three daughters.

THE FUNERAL

The funeral took place at St. Mary's Church, Thornthwaite. on Friday afternoon and was conducted by the Vicar of Thomthwaite cum-Braithwaite, the Rev. H. Crossland. The chief mourners were Mr and Mrs Comar Wilson and Mr Comar Wilson. |un., London (son and daughter-in-law and grandson); Mrs Joan Nahum. Thornthwaite Grange (daughter), and Mrs Penelope Peel, London (daughter).

In 1901, at Middle Ridding, Braitheaite, Keswick, Anthony Wilson, mining engineer, aged 39, his wife Jessie Macgregor 37, children, Joan 8, Anthony Comar 7, Peter 4, Annie 4 months, mother in law, Sarah Cameron Robertson, widow, aged 62, and 3 servants.

1939 England and Wales Register, at Thornthwaite Grange, Anthony Wilson, borb 25th May 1871, mining engineer, lead mines, and Jessie M. Wilson born 25th November 1873.

21st September 1854 (Penrith Observer)

KILLED IN BARYTES MINE A MEMBER of a Threlkeld family, and until four years ago a leading member of Threlkeld sporting and social activities. Mr John Frederick Stuart (53), was killed by a fall of roof rock on Wednesday morning in the Brigsford barytes mines. near Christow, Devon, of which he was manager. Mr Stuart was the second son of Mr Fred Stuart and the late Mrs Stuart, 2 Taylor's Cottages, Threlkeld, and was home attending his mother's funeral a fortnight ago. MINING CAREER He started in the Threlkeld lead mines and when they closed down he went to Threlkeld Quarry, and later to Greenside Mines. Patterdale. On the Force Crag, Braithwaite, barytes mines being re-opened during the War he went to work there and became manager. When Force Crag mine was closed down in 1950 the firm appointed him manager of their Brigsford mine in Devon. He is survived by his wife, who was Miss Agnes May Greenup, Threlkeld, and their son and two daughters.

6th September 1955 (Penrith Observer)

BIG MINE PLAN FOR ALSTON

A major mining development is foreshadowed for Swinhope, Northumberland, roughly 4½ miles from Nenthead. on the Allenheads road. It has been officially announced that the New Consolidated Gold Fields. Ltd.. of 49 Moorgate. London. E.C.2 have acquired an option on the mining lease held by Allendale Metalliferous Mining Company, and are to carry out a programme of drilling and prospecting. Mr A. Treloar. A.C.S.M., of Garrigill. has been appointed mines manager, and Mr F. T Thom. Allendale Town, mines, secretary.

It is understood that shaft sinking is to start immediately at Swinhope and drilling operations are starting this week by the Cementation Company, of Doncaster. A tunnel, at least a mile in length and dead straight with face dimensions of 7ft. square. will be driven in a South Easterly direction towards Middlehope Moor, between Killhope Law and the village of Allenheads.

VIRGIN GROUND

This region is a virgin mining ground (one of the few such remaining in accepted non-ferrous mining districts in the British Isles) and it is hoped that rich deposits of minerals will be found, mainly in lead and zinc, which are being chiefly sought. The New Consolidated Company had previously carried out a geo-chemical survey of the area and this announced project. which is in the nature of a preliminary programme and expected to last two years. is the biggest, of its type for many years in the Northern Pennines. The offices of the company are to be opened at Allendale Town, and it is understood that the recruitment of labour for all classes of work, surface and underground, is now in progress.

24th January 1958 (Hartlepool Northern Daily Mail)

SAW SON KILLED

Raymond Swindle, a 21-year old miner of Boltsbum Crescent, Rookhope, was killed by fall while working Grove Rake mine, Rookhope, yesterday. His father was also working in the mine and saw his son killed.

19th August 1958 (Penrith Observer)

LEAD MINE'S FATE IS IN THE BALANCE

Future of supply at Glenridding ENOUGH PAYABLE ORE FOR 18 MONTHS WORKING THE future of the 200-year-old Greenside lead mine at the head of Ullswater hangs in the balance, because of lack of ore and the falling price of lead. At the present time, there is sufficient high grade ore to keep the mine working for about 18 months, and so far searches for more have failed. The closure of the mine could be a serious blow to Patterdale and district, for it employs almost exclusively local labour and provides work for 50 men. In May, the Greenside Mining Company, who operate the mine, announced that men would lose their jobs because the falling of lead in the world market had made it necessary to continue mining ore with a reduced labour force.

At that time the Company stated that exploratory work was to be carried out in the hope that new payable ore would be discovered and it would be possible to increase the labour force.

"Lap of gods"

Yesterday, however, the mine manager, Mr Cyril Connor, told the "Observer" that exploration had been carried out without any success.

"We are in the lap of the Gods," he said and explained that at present there was sufficient high grade ore left to enable the mine to continue working for about 18 months. After that, it seemed that if no ore was found the mine might have to close down.

Mr Connor said the only other factor which would enable work to be continued longer would be an increase in the price of lead.

Three year future?

"If the price of metal rises to an economical level." he said, "we may be able to carry on for three years by using some of the low grade ore which at present we have had to leave because it is not economical to work."

He added that there was, on the other hand, the possibility that prices might fall even lower, necessitating a close down earlier than expected.

However, the mine would not close down suddenly in a matter of months. An undertaking of that nature would take some time to close down and employees might have to be given notice in periods of two months or the like.

At present, the mine produces about 2000 tons of ore from which only about 120 of lead concentrates are extracted to be sent to Newcastle to be smelted.

Mine's colourful history

Greenside was not worked extensively until about 1825. Previous to this the workings were near the summit of Helvellyn

and most of the ore was carried over the mountains through the Vale of St. John and Keswick to the smelting mill at Stoney Croft Gill. During the 1820's the metal was carted to Penrith where a string of horses was waiting to take it to Alston where the ore was smelted.

The principal ore at Greenside is galena which produces 80 per cent. of lead and six ounces of silver per ton.

From this sliver was made the Communion plate now in use which was presented to Patterdale Church by the mining company in 1856. From 1835 to 1902. when desilvering was stopped, the Bank of England was supplied with over a million ounces of silver. Between 1826 and 1876 the production of galena and silver was worth £95,000 and Greenside was regarded as one of the richest mines in the North of England. A new company was formed in 1923 and carried

on the mine for some seven years. Not until the end of 1936 were the workings then re-commenced when the Basinghall Syndicate took over.

26th November 1959 (The Times)

BIGGER TESTS TO DETECT ATOMIC EXPLOSIONS
DEEP FIRINGS IN NORTHERN MINE

Tests with bigger and deeper explosions than those recently announced to take place in a Cornish mine are to be held in a few weeks time at Greenside lead mine, Glenridding, Westmorland, the Atomic Energy Authority announced yesterday.

The tests are with conventional explosives. They will be part of a series to obtain information on the detectability of small underground nuclear explosions.

Precautions will be taken to ensure that there is no surface disturbance or damage. The Cornish mine, at Kit Hill, is unsuitable for these bigger explosions.

The authority said they located the Westmorland mine, which was about to be closed, in consultation with the Atomic Energy division of the Geological Survey.

"The owners are co-operating in the arrangements and have agreed to carry out the civil engineering work involved in preparing the underground chambers. The potential productive capacity of the mine will not be impaired by the tests."

It is planned to register the results on seismic instruments at various distances from the mine. Local authorities and other interests concerned are being consulted, and planning permission is being sought."

19th December 1959 (The Times)

TEST EXPLOSION IN MINE START TO-NIGHT EXPECTED
FROM OUR CORRESPONDENT

Ambleside, Dec. 18. The first test explosions by the United Kingdom Atomic Energy Authority at the Greenside lead mines, Glenridding, on the shores of Ullswater, are expected to take place to-morrow night — probably between 10 p.m. and 11 p.m.

The explosions are designed to assess the detectability of underground nuclear explosions, although conventional explosives are to be used.

Two explosions will probably be arranged, each using about one ton of explosive fired electrically from the entrance to the mine. It is not expected that later tests, when up to five tons of explosive are to be used, will take place until after Christmas, probably in the New Year. In the meantime, the results of the first tests are to be analysed.

The explosions, to be detonated more than 1,000ft. down the mine, will not take place in the main shaft but in cells some distance away. Listening posts have been set up both in the immediate neighbourhood of the mine and at some distance away, and scientists with seismograph instruments will record the sound waves from the explosions.

17th June 1960 (Coventry Evening Telegraph)

RESEARCH GRANT TO SINK BOREHOLE

A special research grant of £36,050 has been awarded by the Department of Scientific and Industrial Research to Durham University to sink a borehole at Rookhope, County Durham, to investigate the deep structure of the Pennines. The investigation will be led by Professor K. C. Dunham, head of the Department of Geology.

21st December 1960 (The Times)

TEST EXPLOSION
'SATISFACTORY'
SCIENTISTS RECORD SOUND WAVES

FROM OUR CORRESPONDENT

AMBLESIDE, DEC. 20

A successful first test explosion was made by the United Kingdom Atomic Energy Authority at the Greenside lead mine, Glenridding, on the shores of Ullswater, last night. "Satisfactory signals were received at the five listening posts where seismographic instruments recorded the underground sound waves, it was stated.

The explosion was one of a series planned to give information on the detectability of small underground nuclear explosions. The results are to be analysed and the conclusions forwarded to the three-Power conference at Geneva.

There was to have been a second explosion last night, but a fault was detected somewhere between the firing point and the explosives. The tests were adjourned until early next month.

On the surface the explosion sounded no more than a slight "plop." The 50 scientists and technicians of the authority who were engaged seemed reasonably happy with this start to the series. About one ton of conventional explosive of the T.N.T. type was used. This had been placed at the end of a tunnel some distance from the main shaft and more than 1,000ft. below the entrance to the mine.

FIRED ELECTRICALLY

Scientists and technicians had been working on the project for about a fortnight and it was finally decided to have the first explosion at 10.30 p.m. and the second exactly half an hour later. The reason given for the late hour was that there is less natural noise and vibration at night.

The charge was fired electrically by the pressing of a button in a wooden shed—packed with instruments, scientists, and technicians—just outside the bleak entrance to the mine. Strict anonymity was insisted upon and neither the name of the firer nor of the bearded young scientist in charge of the operations was disclosed.

The last pip of the B.B.C. time signal at 10.30 p.m. had been chosen as the exact moment for the explosion. The five listening posts, the nearest of them a few hundred feet above the mine in a disused house at the foot of the fells and the most remote one about 40 miles away, were all interconnected by radio and telephone.

After the reported success of the first explosion preparations were made for the second one at 11 p.m. but just before this time it was announced that the check back had not been entirely satisfactory. It was decided to cancel further tests. There is no B.B.C, time signal at 11.30 p.m. and midnight was too late, as it had been earlier decided not to work on the Sunday.

16th January 1960 (The Times)

TWO DIE IN TEST MINE FUMES
EXPLOSION POSTPONED

FROM OUR CORRESPONDENT
AMBLESIDE, JAN. 15

Less than 24 hours before the time fixed for a second test explosion by the United Kingdom Atomic Energy Authority at Greenside lead mine, Glenridding, on the shores of Ullswater, two local men were killed more than 1,000ft. down the mine last night by fumes. The men were employed by Greenside Mines, Ltd., the authority's contractors.

A series of explosions had been planned by the Authority to assist in assessing the detectability of underground nuclear blasts by the use of conventional explosives. After the accident it was decided to postpone to-night's explosion.

The two men, Mr. Alexander Joseph Santamera, aged 47, married, and Mr. William Foster Sinkinson, aged 23, married a few months ago, both of Glenridding, were members of a team of about a dozen who were in the mine preparing for to-night's test. They had been on sandbagging work, and were missed from the main body.

When a search was made they were found in a stope — a working in the pit side. The men were finally brought out by a rescue party wearing respirators. Artificial respiration was tried without success.

ANXIETY OVER MILL PLANS

Alston with Garrigill Rural Council are concerned about the proposed closing of a mill at Nenthead, run by Anglo- Austral Mines . When the mill closes in September 40 people will be out of work. The council's Development Committee have discussed ways of attracting new industry to the area. The

committee will recommend on Monday that the council should ask another firm in the town to take over the Mill. …

27th April 1961 (Newcastle Evening Chronicle)

DISUSED LEAD MINE GETS NEW LIFE

By ANTHONY BRADLEY

ON a desolate stretch of the Durham moors, where the wind sometimes howls like a million agonised cats, eight men dig for a sort of industrial glue. They dig 300 feet down in the earth in what was a lead mine, before the lead ran out, for a substance called fluorspar. This is used in the steel industry as a flux. They are supported by another ten men on the surface who unload the rocks and gravel from which the fluorspar is extracted before it sent to a washing plant for processing. Mr. Eric Godfrey, manager of the mine, which is two miles from Blanchland, said "I've been here since 1947 but I'm not a native. You have to be here three generations before you are a native"

Cigarette

From the mine, he said, the fluorspar is taken for use in the Glasgow steel firm which owns the workings. Burly, Mr. Edward underground foreman at the mine lit a cigarette before stepping into the cage to go below. "Gas." No gas here." he said puffing away contentedly. "There used to be lead but that's all worked out now. We get about one per cent. lead in our production. And he said the ironical thing at the mine — called "Whiteheaps" no one is sure why—is that the old time lead miners threw away the fluorspar for which the men are now digging. They didn't think it was any good, but it just goes to show that you can always get something useful out of the earth.

Workmen ready to go down the narrow shaft at Whiteheaps lead mine.

Tipping ore from a tub at the mine is Mr. Joshua Jameson.

25th February 1964 (Newcastle Evening Chronicle)

A 20 -YEAR-OLD labourer, Mr. William Roland Bell, was found dead in a large store bin today at a mill where he worked. Fellow workmen had to use cutting equipment for over an hour to free him and later tried artificial respiration.

But It was in vain. Earlier his boot had been seen moving on a conveyor belt from the bin at Rampgill Mill, Nenthead, Cumberland where lead and zinc are extracted from ore. Mr Bell, who was unmarried lived at The Firs, Alston, Cumberland. An Inquest was opened by the Coroner for East Cumberland, Mr Peter Pickles it was adjourned until March 4.

10th February 1969 (Newcastle Evening Chronicle)

REMOTE

… North of Eastgate in a remote valley near Rookhope. ICI have their Redbum mine, a former lead mine, now producing fluorspar, used to produce flux for the steel industry. With a ten foot seam, Redburn is the second largest of four British mines producing bulk fluorspar. There may be no imminent mineral boom in this part of the Pennines. But certainly there seems plenty for Mr. Stanley Bowle and his geo-chemical colleagues to get their analytical teeth into. And if anyone is to get his hands on the hidden wealth of “them thar Hills" who better than an Aberdonian?

30th June 1970 (Newcastle Journal)

At ALLENHEADS, the British Steel Corporation is to re-open former lead mines in search of fluorspar a steel making mineral. They have applied for planning permission. Jobs for up to 100 men will be provided.

12th August 1970 (Newcastle Journal)

OUT OF THE-FIRE-INTO THE FRYING PAN Story: KEN SMITH.

NON-STICK frying pans could be the lifesavers of several small County Durham villages condemned to death by the planners. To make the frying pans non-stick they are specially treated. And one of the substances used in the treatment is fluorspar—mined in nearby Weardale. The "spar” boom demand is expected to double in the next four or five years, has created a jobs bonanza in the dale. But because most of the villages near the lead mines are tagged with a category-D label, which means that housing development is prohibited. labour is at a premium.

One company, the Weardale Lead Mining Company, is spending hundreds of pounds every year on a special bus which travels about 2,500 miles a week taking man to and from work. And this is long before the mine will reach peak production, says the manager, Mr . Harry Green. But now, Durham planning committee has decided it will allow the rural council to build six houses for miners at Rookhope, home of the Weardale Lead Mining Company. …

27th October 1970 (Newcastle Evening Chronicle)

MINE SURVEYOR required for mine in North-West Durham—experience in metalliferous mines desirable. Housing available. Please write giving details of age, experience etc, to: The Manager, The WEARDALE LEAD CO. LTD., Rookhope, Bishop Auckland, Co. Durham.

14th April 1984 (Cumberland and Westmorland Herald)

WALKER'S DEATH FALL HIGHLIGHTS DANGER OF OPEN MINE SHAFT

THE open mine shaft on Cross Fell down which Andrew Ramsbotham tumbled to his death on Tuesday was probably reported as dangerous two years ago.

Fell walker Ron Brotherton reported a dangerous mine shaft near Fallow Hill more than two years ago after he had been out walking on the Pennines.

And only a few weeks ago Mr. Brotherton, of Fell Lane, Penrith, saw the same open mine shaft again. This time it was accentuated by snow, and the broken-down fence, which had been around it previously, had - gone. He took a picture which appeared in the "Herald" on 24th March.

The shaft where the accident happened is about twenty feet from a fence which guides a short cut on the Pennine Way in a North-Easterly direction.

This week Eden District Council, which has already "capped" half the 400 open shafts they have located on Alston Moor, erected a fence around the hole as a temporary measure until it can be "capped" after the snow has melted.

An eight-hour rescue operation, involving members of Penrith Mountain Rescue Team and the Cave Rescue Organization from Settle, was mounted after 20 year-old student Mr. Ramsbotham, of Thorpe Willoughby, North Yorkshire, fell down the 120ft. Shaft.

WALKING OVER FELL

He and another student, 18-year-old Alistair Hall, from Cambridge, had set off walking from Garrigill for Dufton Youth Hostel across Dufton Fell.

Police said that in knee-deep snow and mist they lost their way and Mr. Ramsbotham fell down the mind shaft near Fallow Hill.

Mr. Hall managed to make his way back to Garrigill to raise the alarm, having marked the way back to the accident spot.

Penrith Mountain Rescue Team spokesman Mr. Mike Graham said the search and recovery of the body would have taken much longer but for help from local people who provided a tracked Snowcat vehicle to take the teams and their equipment to within two miles of the incident.

Poor weather conditions and large amounts of snow meant that both organisations had to be vigilant for the welfare of their own members over such a length of time.

HAZARDS

Mr. Graham said the incident highlighted the potential hazards of walking in the area where there are uncapped mine shafts, especially when they were covered with deep drifts of snow.

Mr. Ramsbotham body was eventually recovered by the cave rescue team who used ropes and ladders to get to the bottom of the shaft.

Mr. Brotherton said he reported the shaft he discovered in the area about two years ago to Eden Council. "I reported it to the Mansion House. They have done nothing about it," said Mr. Brotherton.

Eden only started capping the mines a year ago. Last year warnings were issued by the Council about the dangers of open mine shafts through brochures distributed to all the youth hostels, schools and tourist information centres.

Signs were also put up in the area warning of the dangers of the uncapped shafts.

Mr. Bruce Payne, organizer of the "capping" operation, said: "We thought that it would probably increase the risk because if people saw a sign they are more likely to go over to it than if we simply left it alone." The Council, which accepts

no responsibility for the mines, has surveyed about three quarters of Alston Moor and found 400 uncapped shafts, most of which were ventilation shafts for the lead mines.

Concrete sleepers or a steel cage manufactured by Alston firm Cumbrian Engineers are used in the "capping" process.

Workers under the Man-poser Services Commission have currently "capped" half the located shafts and Eden recently received a further £37,500 from the Department of the Environment to carry on with the "capping" and to put gates across the entrance to drift mines in the area.

Mine shafts have been "capped", area by area to save on time and the nearest have been tackled first. Ventilation shafts are about five feet in diameter and can vary from 12ft. deep to 350ft.

Mr. Payne said the particular shaft was right on top of the fells and was probably the most remote.

REMAINS OF HISTORIC INDUSTRY BEING HARNESSED TO AID TOURISM.

Lead mining in the North Pennines left a legacy to be harnessed and an element of danger. Environment Editor TONY HENDERSON reports.

THE 18th and 19th Century lead and zinc miners of the North Pennines experienced the highs and lows of life in a rugged area. They grafted not only underground but were often small-time farmers working fields at up to 2,000 ft above sea level. What they left behind has helped shape a distinctive landscape legacy which the county councils of Northumberland, Durham and Cumbria, together with bodies like the North Pennines Heritage Trust, are working towards capturing for the new growth industry of tourism. Killhope Lead Mining Centre, with a hat trick of recent awards, is a leading light but work is now starting on restoring the most complete lead mine site in the North Pennines. Cumbria County Council has just acquired the Rampgill lead mine and buildings at Nenthead. In co-operation with the heritage trust, the aim is to develop the site as an exhibition area with the target of an Easter 1994 opening. Tomorrow volunteers will pitch into restoration and clearing work at the assay house, where lead ore was tested, miners' barrack block and blacksmith's shop. …

22nd August 1998 (**Cumberland & Westmorland Herald**)

WORK STARTS ON £3.2 MILLION SCHEME TO STABILISE NENTHEAD SPOIL HEAPS

ENGLISH Partnerships are to invest £1 million to help stabilise three lead spoil heaps and prevent pollution of the River Nent in the former mining area around Alston.

Work has just started on the £3.2 million scheme, which will stop the erosion of the spoil heaps/tailings dams and improve 14 hectares of unstable and unsightly land close to the village of Nenthead.

This is the first project to be brought forward as part of the £8 million Alston Moor strategy, recently endorsed by English Partnerships and is currently awaiting planning permission for its initial stage.

Two further projects in the area are planned during the next three years, as part of the strategy, which is being pioneered by Cumbria County Council in

conjunction with the Environment Agency, Eden Council and Alston Moor Parish Council.

John Carr, senior development manager for English Partnerships, said: “In its current condition the site is an eyesore in an Area of Outstanding Natural Beauty and is a disincentive to investment in the area.

“The scheme will provide a permanent solution to the problem and will contribute to the regeneration of the local economy. It also ties in with the current sustainable tourism strategy at Alston Moor to attract more visitors to the area”.

Mining at Nenthead can be dated back to the Roman times and was central to the largest lead mining industry in Europe during the Victorian era. The three large spoil heaps/tailings dams are a legacy of a process used during World War Two to extract lead and zinc from the waste left over from mining.

A full environment investigation and study into the River Nent and the adjacent land, including the tailings dams, has been completed on behalf of the county council by County Durham-based Scott Doherty Associates, with £120,000 from English Partnerships.

The problem at Nenthead arose due to the erosion of the dams by the river, making them unstable and giving the potential for contamination. The scheme will involve works to slow the speed of the river, removing its erosive power, using a system of natural stone weirs to reduce the gradient of the water course. The dams themselves will be covered by a synthetic clay liner, granular drainage layer, filter membrane and vegetation and soil layer, which will prevent water from entering them and allow them to dry out naturally.

Michael Baker, from Cumbria County Council, said: “The Nenthead environmental improvements will provide a permanent solution to the long term problems associated with the site. In particular, the area will be protected against serious pollution that would occur should the contents of one of the dams discharge into the river.”

Work on site is expected to be completed by November, with the second contract to start in 1999.

Appendix 1
Emigration information from the Durham Advertiser.
13th April 1832
Durham Advertiser
Emigration

The Commissioners appointed to inquire into the subject of emigration to the British Colonies in North America have issued a notice, dated from the Colonial Office, in which they give some useful information to persons desirous to emigrate.

They commence by stating the nature of the assistance, which will be afforded by Government to emigrants, and proceed to remark upon the various other subjects connected with our North American possessions. Government, they state will not grant any pecuniary aid to emigrants, nor will they, after their arrival be provided with grants of land, gifts of tools, or a supply of provisions. The land which is for sale will be open to public competition, and therefore the price must depend upon the offers made; generally speaking, it will hardly fetch less than from 4s to 5s per acre; indeed in good situations, it has lately realised 7s, 8s, 10s and even 15s. Government, however, though declining to afford pecuniary assistance, have been at some pains to afford facilities to emigrants on their arrival, and with this view agents are to be maintained at the principle colonial ports, who will gratuitously give every requisite information to persons upon their first landing, protect them against imposition, and point out to them the most advantageous line of conduct to be pursued according to circumstances. In cases, also where a private engagement cannot immediately be obtained, these agents will procure employment in some of the public works in progress in the colonies. In order to provide against frauds, and also to prevent an improper expenditure at the first moment of arrival, it has been arranged that money may be made payable there, instead of giving it into the hands of emigrants in this country. Money may be paid into the hands of Messrs Smith, Payne, and Smith, who will give letters of credit, so as to enable the emigrant to receive the amount in the Canadas. They will not, however, take a less sum than £20 on account of any one individual. The best months for leaving England are stated to be March and April, as those who emigrate later do not find employment so abundant, and have of course less time before the approach of winter. The Commissioners suggest that persons proceeding to Canada should also be provided with the means of paying for the journey which they may have to make after their arrival at Quebec. The cost of conveyance will of course depend upon the distance, but the average appears to be at the rate of 180 mile for 7s. Passengers from London to Quebec, or New Brunswick, may be engaged either inclusive or exclusive of provisions. In the former case, the price is about £6; in the latter £3. But from Liverpool, Greenock, and the principle ports in Ireland, it is a good deal lower. In fact, in March and April, the Commissioners say it may probably be obtained from Dublin for 35s or 39s, but the prices increase as the season advances. The colonies to which emigrants to North America can proceed with the most advantage are stated to be Lower Canada, Upper Canada, and New Brunswick. The following is the correct list of the prices of grain and wages in Lower Canada: - Wheat per bushel, 4s 6d, Rye about 3s, Maize 2s 6d, and Oats 1s 3d. Wages of labourers 2s 0d per day, shipbuilders, carpenters, joiners, coopers, masons, and tailors, 5s per day. From a calculation made with respect to Upper Canada, that the yearly wages of labourers there, hired by the year

are from £27 to £30; monthly wages from £2 10s to £3 10s; daily wages from 2s to 3s 9d. In all the above rates of wages, board and lodgings are found by the employer; without board, the daily wages vary from 3s 6d, out of harvest, to 5s in harvest time. The wages given to mechanics may be stated to be from 5s to 7s 6d per day. In New Brunswick, the expense of living and the rate of wages are somewhat the same as Lower Canada; but it may be remarked that when labourers have become better acquainted with the work of a particular colony they may be able to get an increase of wages. The mechanics most in demand are those connected with house building. Shoemakers, tailors, and shipbuilders, also find plenty of employment. The following are the prices of a few articles of necessity in New Brunswick: - Bread, the 4lb loaf, 10d; Beef, per stone, 3s 3d; Mutton, 2s 6d; Pork, 2s 01/2d; Veal, 2s 4d; Salt Pork, £4 15s per barrel.

11 May 1832
Durham Advertiser
Coal Mines Strike
Several lead miners have passed through this city on their way to Hetton and other collieries where they are engaged to work in the coalmines.

25 May 1832
Durham Advertiser
The misguided pitmen still adhere to their determination to continue their “union”, and the colliery owners are equally determined to employ no union men. In this state of things vast numbers of the lead miners from Weardale and Teesdale, and even from Cumberland are arriving daily at the collieries, where they obtain immediate employment, to the permanent exclusion of an equal number of pitmen, who ere long, must have their eyes opened to the folly of their conduct, and the designs of their delegates and leaders. (*Pitmen received wages of around 20s per week*)

Appendix 2

Notice of Personal Injury at the WB Mines 1876-1900
(NRO 712/C/36)

26 January 1876
Thomas Emerson aged 20
Killhope Mine
Lead Miner
Gunpowder explosion resulting in burns.

26 January 1876
Joseph Stephenson
Hope Level (Groverake mine)
Plumber and Painter
Hurt while assisting to take down Air Piping.

24 May 1876
Cornelius Nattrass aged 39
Greenlaws
Lead Miner
A roof fall broke his leg and bruised his foot.

27 September 1876
George Nattrass and Cuthbert Nattrass
Hope Level (Groverake mine)
Lead Miners
Fired a bottle of gunpowder with a candle resulting in burns.

20 November 1876
Thomas Hodgson aged 20
Killhope
Lead Miner
Gunpowder fired in a hole resulting in burns.

19 March 1877
John Spark aged 42
Allenheads
Lead Miner
While firing a match at the end of a paper squib it exploded he was burnt about the face.

5 June 1877
John Race aged 40
Greenlaws Mine
Lead Miner
A piece of mineral came away from the side of the working, grazing his hip and thigh.

19 November 1877
John Elliot aged 26
Craig's Level (Langdon mines)
Lead Miner
Fall of mineral broke his thighbone.

26 March 1878
John Ridley aged 26
Burtree pasture mine
Lead Miner
Charged a hole, which missed firing, while in the act of boring it out it exploded. Slightly burnt.

1 May 1878
Thomas Dalton aged 19
Burtree Pasture Mine
Lead Miner
A mineral fall from the side of the working. Injuries uncertain but expected to recover.

19 February 1880
Richard Wearmouth aged 49
Greenlaws Mine
Lead Miner
A fall of mineral hit him on the side of the head. Cut needed two stitches.

6 January 1881
William Elliot aged 15
Groverake Mine
Washer boy
Fell while attempting to jump onto a wagon, the wagon ran over his arm and broke it.

1 November 1881
Thomas Kidd aged 48
Stanhope Burn
Lead ore dresser or washer
Fell while climbing a small ladder, which was partly covered with ice, at the crushing mill. Fell and cut his head.

9 November 1881
Thomas Wearmouth aged 56
Burtree Pasture Mine
Banksman and Deputy Woodman
While repairing, a climbing way in Engine Shaft a piece of timber fell on his shoulder and dislocated it.

1 March 1882
Jonathan Kidd aged 32
Groverake Mine
Lead Miner
Fired a match set to blast and instead of going to proper shelter he went below some timber, the blast crushed a portion of the timber work down on him, broke his leg.

9 June 1882
John Emerson aged 42
Greenlaws Mine
Lead Miner
Mineral fell on his back, - not much injured.

7 May 1883
John Bell aged 48
Groverake Mine
Lead Miner
A wall gave way, some fell on him, he is very little worse.

3 January 1888
Pattinson Heslop aged 52
Allenheads Lead Miner
Put his foot on damp timber fell over and broke his left arm.

30 October 1888
Joseph Sanderson aged 50
Allenheads
Foreman, Mechanical engineer
While adjusting the elevators at the crushing mill, he accidentally slipped his right foot down against the nearly horizontal worm screw, which was in motion and has got his big and second toes badly lacerated

8 January 1891
John Bright aged 55
Blackett Level, Sipton Shaft
Engine man
Wound on the left side of the head caused by a weight suspended to the capper at the shaft top, falling down upon him.

3 February 1892
Joseph Vickers aged 36
Allenheads, Durham Tract
Lead Miner
While wagoning deads along the Hazel level to the High Shaft a projecting piece of rock lying on the top of the wagon caught the side or roof of the level and drove it over the end of the wagon and cut his face on the forehead.

19 March 1896
John Tom Nixon aged 27
Allenheads Durham Tract
Lead Miner
Side of the working gave way covering him up, complains of stiffness in his hands face and limbs.

28 September 1900
William Philipson aged 46
Blackett Level, Sipton Shaft
Lead Miner
Assisting engineers to erect an air compressing engine and Pelton wheel, strained his left side.

Appendix 3

Record of Fatal Accidents at WB Mines 1876-1883
(NRO 712/C/37)

20 November 1876
John Hodgson aged 53
Killhope Mine
Lead Miner
Had bored a hole into a small cavity and while putting in a large quantity of gunpowder fired it with his candle it blew a quantity of stuff against him, he was crushed and died about an hour afterwards.

15 March 1878 about 6pm
Thomas Harrison aged 19
Killhope Mine
Lead Miner
Had bored a hole and charged it and while in the act of firing the blast exploded he lived about an hour afterwards. A strong current of good air is passing through this part of the mine.

18 September 1879
Thomas Heslop aged 54
The Old Gin Water Level, Allenheads Mine
Engine Keeper
Killed while engaged attending to his duty in oiling and looking after the water wheels and pumping.

25 January 1881
Christopher Walton aged 32
Barney Craig or West Allen Mine
Lead Miner
While engaged putting gunpowder into an unsound blast hole it exploded and he was killed.

21 November 1881
Joseph Robinson aged 38
Greenlaws Mine
Lead Miner
While climbing a rise on his way to work, he came to foul air and was warned by his partner not to go further but persisted in going and lost his life in the foul air.

3 November 1882
John Joseph Roddam aged 17
Groverake
Lead ore washer
While engaged putting the elevators of the Chat Crushing Mill on to the guides, which had got off, his foot got into the wheels and crushed his leg he died six hours after the accident.

25 January 1883
William Parker aged 20
Holmes Linn, Blackett Level
Mason and Quarry man
While on his way to work at the quarry which is situated on a steep hill side and in a wood where some trees had been felled some of which lying across the road to the quarry he along with his partner disturbed one in crossing over it which rolled down the hill taking William Parker along with it crushing him causing his death.

20 March 1883
John Phillipson aged 42
Level in Whitings Vein, Blackett Level
Lead Miner
While engaged in filling a wagon with rubbish, which had been worked from the Whiting vein level forehead, a fall of roof came down upon him and killed him instantly.

Daily Alta California, Volume 3, 10 December 1852
At Grace Church, December 9th, by the Rev. Dr. Ver Mehr Francis James Lippett, of this city, to Elizabeth Stobart, only daughter of the late James L. Clarkson, Esq., of Wickham, in the county of Durham, England.

Daily Alta California, Volume 4, Number 138, 19 May 1853
On the17th inst., by the Rev. Albeit Williams, at the First Presbyterian Church. Stockton Street, Capt. Wm. Scutter to Miss Alice Hart daughter of the late Mr. Patrick Hart of South Shields. County of Durham, England

Sacramento Daily Union, Volume 9, 28 April 1855
In San Francisco, April 25th, Capt. John Hart, a native of South Shields, county of Durham, England, aged 50 years.

Sacramento Daily Union, Volume 21, Number 3130, 9 April 1861
At the Hoboken House, El Dorado county, March 14th, of putrid sore throat, Alice, aged 5 years and 7 months; also, on April 5th, John, aged 8 years and 11 months, children of Cuthbert and Jane Nattrass, of Durham, England.

Daily Alta California, Volume XV, Number 4755, 2 March 1863
The loss of the schooner Beeswing, on the bar of San Francisco, on the 18th of February, has thrown a great gloom over the city of Monterey, to which port she was a regular trader. Her unfortunate owners were Thos. McRea and Robert Young, both of San Francisco. Mr. Robert Young was a native of Hilton County, Durham, England. He was much respected by all who knew him and leaves many warm friends to lament his death. He was 53 years and 16 days old.

Sacramento Daily Union, Volume 27, 26 May 1864
In San Francisco, May 14th, by Rt. Rev. Bishop Kip, Oswald Broder, of Mormon Island, to Francis Bainbridge, late of Durham, England.

Daily Alta California, Volume 18, Number 5873, 9 April 1866
In Alameda county April 7th George Dixon, a native of Durham. England aged 77 years.
Friends and acquaintances are respectfully invited to attend the funeral this day, (Monday), at 101/2 o'clock A. M.

Daily Alta California, Volume 18, Number 5982, 28 July 1866
UTAH ITEMS.
At Gardnerville, Utah County, on the 11th inst., Charles Wilson, while taking his gun out of a wagon, shot himself. The ball after passing through an inch plank, entered his left side, and passing near his heart, came out on the opposite side, killing him instantly. Mr. Wilson was about forty years of age, has been a member of the church seventeen years, and emigrated from Durham, England, he leaves a wife and five children to mourn his loss.

Sacramento Daily Union, Volume 33, Number 5046, 30 May 1867
The Shooting Affray at Port Townsend.
The Port Townsend Message gives the following particulars of the recent shooting affair, which took place May 14th, at Port Townsend, to which reference was made by telegraph:
About two months ago some of the men of the ship Southern Chief who had shipped for the round voyage via Acapulco to Puget Sound and back, left her at Port Gamble and came to this place. Here they enlaced the services of J. W. Tripp *(He was also the Republican candidate for District Attorney of Washington Territory)* as an attorney to collect what pay was coming to them, for which service they agreed to give him half, besides paying the expenses he might incur the business. Tripp collected $190 from the master of the Southern Chief as a balance coming to the men and sent to them $75 as their share. These men had been boarding at the Franklin House and drinking at the Antelope bar, and owed the proprietor of the two houses more than the sum they received for their wages, the money having fallen into the hands of the proprietor of the boarding house, and not being enough to cover the bill the men bad already incurred, he of course kept the money find told them they must go somewhere else to board. Tis the men did not like, and they had made up their minds to make Tripp pay to them more money. When the New World arrived at tie wharf on Monday afternoon, Tripp came ashore, and as he was coming up the wharf, accompanied by his wife, four of the men pitched on him, tearing his clothes and at last drove him on board the New World. One of the men told Mrs. Trlpp, in a very insulting manner, as she was walking ashore from the New World, whither She had been driven with her husband by the sailors, that unless Tripp paid them $50 he would never leave the wharf alive, and drove her back on board the steamer. Tripp requested the Captain of the steamer to land him at Point Wilson, which the Captain at first promised to do, but Tripp was afterward persuaded to proceed to Victoria, and fortunate indeed was it for him, for we are informed that seven of the men suspected that he would land at Point Wilson, and proceeded thither to receive him. Whilst at Victoria, Tripp purchased a shotgun with which to protect himself. At nine o'clock on Thursday morning, on the arrival of the New World, Tripp came ashore, and his brother-in-law, whom he met at the boat, proceeded up the wharf, gun in hand. Half way up the wharf, four of the sailors were in wait for him, and as he advanced, assumed a threatening attitude. Tripp, with his gun at half shoulder told them to keep off or they would hurt; whereupon the men commenced spreading out so as to surround Tripp. One, an Englishman, drew a knife, and as he did so was immediately shot by Tripp and killed on the spot. In the same, moment Tripp shot another of the assaulters, killing him also. As soon as both barrels of the gun were discharged, Tripp clubbed his gun to defend himself against the third

man Tripp's brother in law then drew a revolver and fired twice at the man who was assaulting Tripp, only one of the shots taking effect, however. Upon this, Tripp and his brother in law were arrested by the authorities. On Wednesday night, the sailors who had assaulted Tripp swore that they will kill him on sight, if they were hanged for it the next moment, and were advised by some of the towns folk to let the matter drop; but they would not, and have suffered the consequences. Tripp and his brother-in-law were both in charge of the Sheriff when the New World left Townsend. Since writing, the above we have learned that the man whom Tripp's brother-in-law shot has died.
The Victoria Morning News says: "The above account is not altogether correct. There were only two men killed — Tripp shot one, and his brother in-law the other. A third man was badly injured by Tripp striking him on the head with the butt of his gun. Tripp and his brother-law have had an examination before a magistrate, and have been committed for trial for murder in the first degree." There were from 50 to 75 persons on the wharf at the time, and its only wonder that no outsider should have been killed. The names of the deceased were Alexander Clark, a native of Belfast, Ireland, aged 27, and James Partridge, a native of Tynemouth, England, aged about 30. The wounded man's name is Buckley, Tripp and Keys were arrested on the spot, and upon examination before the Magistrate were fully committed on the charge of murder. “W" a passenger by the New World blames the officials of the place for not being on board to protect Tripp, when they knew it was the Intention of the sailors to assault him. *(J. W. Tripp continued as an attorney working in San Francisco)*

Sacramento Daily Union, Volume 7, Number 237, 27 November 1878
Sacramento, November 26— J. A. Johnson, a native of Durham, England, 51 years, 9 months and 20 days.

Sacramento Daily Union, Volume 2, Number 187, 28 September 1876

BOLTON— In this city, April 9 1891, Dr. William Bolton, a native of Newcastle on Tyne, England, aged 7l years. Remains at the undertaking parlours of N. Gray & Co., 641 Sacramento Street, until 12 o'clock am. Saturday, April 11th. Funeral services THIS DAY (Saturday), at 2 o'clock pm., at St. John's Episcopal Church, Eighth and Grove streets, Oakland. Friends are respectfully invited to attend.

San Francisco Call, Volume 74, Number 12, 12 June 1893
The Rev. Ralph Swinburn. who lives near Charleston. W. Va. is the oldest railroad man living in this country. He was born near Newcastle-on-Tyne, in the county of Durham, England, August 4, 1805, and began to work on railroads in the year 1818.

San Francisco Call, Volume 79, Number 54, 23 January 1896
JACKSON— In this city, January 22, 1896, Fred H., beloved husband of Maggie E. Jackson, a native of Durham, England, aged 47 years 6 months and 18 days. The funeral will take place THIS DAY (Thursday), at, 2 o'clock p.m., from his late residence, 348 Seventh Street. Interment Laurel Hill Cemetery.

San Francisco Call, Volume 83, Number 61, 30 January 1898
CRAWHALL— In this city, January 28. 1898. John, beloved husband of Margaret Crawhall, a native of Durham, England, aged 64 years 8 months and 3 days. (English papers: please copy.)
Friends and acquaintances are respectfully invited to attend the funeral this day (Sunday), at 2 o'clock, from Laurel Hall, Shiels building, 32 O'Farrell Street. Funeral under the auspices of Yerba Buena Lodge No. 14. A. O. U. W. Interment Cypress Lawn Cemetery.

San Francisco Call, Volume 84, Number 153, 31 October 1898
BEE— In this city, October 30, 1898, Joseph, beloved husband of Louise Bee, stepfather of Mrs. F. H. Mills, and brother of William and Sarah Bee, a native of Weardale, Dunham County, England, aged 53 years 5 months and 27 days. Friends and acquaintances are respectfully invited to attend the funeral to-morrow (Tuesday), at 1 o'clock, from his late residence, 1706 Broadway. Interment I. O. O. F. Cemetery.

San Francisco Call, Volume 85, Number 128, 7 April 1899
REV. ANNA HOWARD SHAW-B. F. B., San Jose. Cal. The Rev. Anna Howard Shaw was born at Newcastle-on- Tyne, England, February 14, 1847, and was brought to America when four years of age. Her parents located In Massachusetts, and then in Michigan. In 1873, Miss Shaw was granted a license as a local preacher; in 1875, she entered a college in Michigan, and then she entered the theological department of the Boston University and graduated with honours in 1878. During the last year of her theological course, she was the pastor of the Methodist Episcopal Church of Hingham. Mass. Her second pastorate was at East Dennis on Cape Cod. She made application to the New England Methodist Episcopal ' Conference for ordination, and though she passed the best examination she was refused ordination on account of her sex. She appealed to the General Conference in 1880 and the refusal was

confirmed. She then applied to the Methodist Protestant Church for ordination, and received it on the 12th October 1880, being the first woman ordained in that denomination.

San Francisco Call, Volume 95, Number 45, 14 January 1904
HEAVISIDE— In this city, January 12 1904, Robert, beloved husband of Mary Heaviside, and father of William and Marjorie Heaviside, a native of Durham. England aged 57 years 2 months and 21 days.
Friends and acquaintances are respectfully invited to attend the funeral to-day Thursday at 2 o'clock, from St. Luke's Episcopal Church, Van Ness Avenue and Clay Street. Interment I. O. O. F. Cemetery.

San Francisco Call, Volume 97, Number 6, 6 December 1904
BUCKLEY— In this city, December 5 1904, Cornelius T., beloved son of Elizabeth Buckley, and brother of Mrs. McGorry Mrs. Malaghan, Mrs. Aklund. Mrs. Durfee and John Buckley, a native of Newcastle-on- Tyne. England aged 34 years.

San Francisco Call, Volume 97, Number 16, 16 December 1904
OLDEST PIONEER GOES ACROSS GREAT DIVIDE
James Payne Smith, who reached the age of Ninety-Four, Dies in Alameda.
ALAMEDA, Dec. 15. — James Payne Smith, who was found yesterday in a helpless condition on the porch of his cottage at 1616 Railroad avenue, passed away last night from oedema of the lungs and shock sustained by a fall in which his scalp was lacerated. Smith was 94 years of age and the oldest member of the California Society of Pioneers. His physical and mental energy were remarkable for one of his years, and his last words to his attending physician were, "Whatever you do, doctor, don't say after I am gone that I died of old age. I have always cared for myself, but there is something on my lungs that is strangling me now." Smith was a widower; his wife having died two years ago. He was a native of Durham, England, and came to California in 1848. He was engaged in mining for many years and was at one time Postmaster at Elko, Nev. He is survived by a son, J. B. Smith of this city.

San Francisco Call, Volume 102, Number 116, 24 September 1907
KNOWLTON— In this city, September 23, 1907, Catherine, beloved wife of the late Frederick Knowlton, mother of Edward Roy Knowlton, daughter of Mrs Mary McKeever, sister of. James, Edward. New-York tribune. (New York [N.Y.]) August 26, 1905,
A new figure in the religious work of the city is Colonel William Peart the successor of Colonel Edward Higgins is the chief secretary ship of the Salvation Army in this country. He has already had his welcome meetings, which were filled with enthusiasm and good feeling. Colonel Peart is well qualified for the place, which he occupies, which practically places him as second in command of the army work here. He filled a similar post for many years in Australia.
Colonel Peart was born in Alston, England. He went to Australia at the early age of seven. In January 1885 Cadet Peart entered the old training home at South Melbourne. In the few weeks at Coventry-st. he earnestly applied himself to the important work he had taken up. Before the close of February, he received his first commission to assist Staff Officer Hendy at the Adelaide divisional office.
In the four years, he remained in Adelaide Cadet Peart received promotion to the rank of lieutenant, afterward advancing to that of captain and still further to staff officership and staff captain. In 1888, he was transferred to the Gouldburn divisional office, under staff captains (now colonel) Jeffries and Hoskin, respectively. On the occasion of his farewell at Adelaide his marriage with Captain Hettie Butcher was celebrated. …

Jacob Peart married Hannah Bell, 9th January 1823, at St Augustine's, Alston.
In 1841, at Middle Craig, Alston, Jacob Peart, lead miner, aged 45, his wife Hannah 40, children, John 15, Robert 12, Thomas 10, Hannah 8, George 6, Nancy 4, and William 4 months.
Jacob Peart of leadgate was buried 19th July 1850, aged 50, at St John, Garrigill.
In 1851, at Leadgate, Alston, Hannah Peart, widow, aged 50, children, John, lead miner, aged 26, Robert, lead miner, aged 23, Thomas, lead miner, aged 20, Hannah 18, George, lead miner, aged 16, Nancy 14, Tamar 12, William 10, and Joseph 4.
Hannah Peart peart of Leadgate was buried 7th August 1853, aged 52, at St John, Garrigill.
John Peart married Tamar Coates, 2nd quarter 1854, registered at Alston.

Tamar born 1832, daughter of William and Nancy Coates
In 1861, at Gill House, Alston, John Peart, lead miner, aged 36, his wife Tamar 29, daughter, Ann 4, and William 1.
John Peart and his family emigrated to Melbourne, Australia on the "Great Britain" 25th May 1864.

Victoria, Australia, Assisted and Unassisted Passenger Lists, 1839-1923 (Ancestry.co.uk)

John Peart was born 21st November 1824, at Garrigill, and baptised 28th April 1825, Wesleyan, Alston.

John Peart, miner, died at Beaconsfield, Tasmania 12th May 1890, of disease of the heart, aged 66. Probate 7th July 1890, to Tamar Peart, Benjamin Rough & John Robinson; £150.
Tamar Peart died 6th December 1894, at Beaconsfield, Tasmania, of Cerebral Apoplexy, aged 63.

15th December 1894 (The Tasmanian)

Another old resident passed away on Thursday night last in the person of Mrs Peart at the age of 63. The deceased lady was much respected and leaves a grown up family to mourn their loss. A son (Brigadier Peart) is the head of the Salvation Army in Victoria. The remains were conveyed to the public cemetery on Saturday, followed by members of the Salvation Army, of which the deceased lady was a member.

William Peart married Amanda Henrietta Butcher on 24th October 1888, T Hooker Buildings, Adelaide.

In 1905 the family emigrated from Melbourne, Australia to New York in 1905.

In 1910, at Mount Vernon Ward 5, Westchester, New York, William Peart, officer Salvation Army, aged 50, his wife Henrietta aged 57, children, Florence 20, and Herbert 16.
Amanda Henrietta Peart died 6th April 1914, aged 55, at Westchester, New York
In 1915, at Mount Vernon Ward 5, Westchester, New York, William Peart, Chief Secretary, Salvation Army, aged 54, children, children, Florence, kindergarden teacher, aged 25, born, Australia, and Herbert,, at College, aged 21, born, Australia.

8th January 1919 (San Fransisco Chronicle)
Father Told How His Hero Son Died.

Mount Vernon (N.Y.). January 7. —Details of the heroic death of Lieutenant Herbert William Peart are given in letters from brother officers to his father, Colonel William Peart of the Salvation- Army, who lives at 217 Egmont avenue, this place, Lieutenant Peart was killed in action north of Verdun on November 10. He was 24 years old. According to the letters, Peart led a platoon of his men, members of Company A, 103d Infantry, against a German trench. The Officer found himself and a sergeant cut off from his men by a German counter-barrage. They jumped into the trench, which was held by sixteen Germans, seized two machine, guns and turned the weapons on the enemy, driving them out of the trench and holding the position until reinforcements arrived after the barrage had lifted.

Lieutenant Peart was killed just before his men came up. He was born in Australia and completed his education at the Brooklyn Polytecnic Institute. He enlisted at the beginning of the war and went to France in October. 1917. He was commissioned First Lieutenant last summer.

Deseret News 5 November 1856 (Salt Lake City)
Los Vegas Br Jacob Peart writes from near the Vegas Oct 13 that the Indians supply of mesquite beans and pine nuts has been measurably cut off by the drought which has shortened their customary supply of food and tempted them to steal a few animals from the settlers. Ice made its appearance at that place on the 9th and 10th of October

Deseret News 25 July 1860 (Salt Lake City)
In this city on the 20th instant by Daniel Spencer Jacob Peart jnr., and miss Margaret Grey

Deseret News 1 July 1868 (Salt Lake City)
This Morning, in the 14th Ward in this city, Phebe, wife of Jacob Peart. She was baptised in the fall of 1837, crossed the ocean in the spring of 1841 with those of the twelve apostles who returned from Europe at that time, left Nauvoo in the spring of 1846, and crossed the plains in 1848 in President Young's company

Deseret News 22 April 1874 (Salt Lake City)
In this city, April 20th 1874 of chronic Asthma Jacob Peart in the 73rd year of his age.
Funeral at 14th Ward assembly Rooms, Wednesday, at 11a.m. Friends are invited.

Emery County Progress 14 July 1906
Exodus From Nauvoo John R Young
… At this date our camps had reached Grand river. President Young called a halt and set all hands at work fencing a field and planting crops for the benefit

of the poor who would follow. First an ample guard was selected to look after the stock. That left three hundred fifty-nine labouring men; of these, one hundred were selected to make rails under the direction of C. C. Rich; ten under James Allred to put up fence; forty-nine under Father John Smith, uncle of the Prophet Joseph, to build houses; twelve under Jacob Peart to dig wells; ten under A. P. Rockwood to build the bridges, and one hundred eighty under Daniel Spencer to clear land, plough, and plant. …

In Mormonism, a Quorum of the Seventy is one of a group of up to seventy "traveling ministers" charged with the mission of preaching to the entire world, under the direction of the Quorum of the Twelve Apostles. The office is based on the Seventy mentioned in the Gospel of Luke. Members of the Seventy are commonly referred to as seventies.

Sixth Quorum of the Seventy: The Sixth Quorum members live and serve in North America Central, North America East, North America Northeast, North America Southeast, and North America Southwest Areas.

Comments
In 1870 Peter had a household of eight, a real wealth of $4,000, and personal wealth of $3,300. Peter was a member of the Nauvoo 3rd Ward. Peter came to Utah September 17, 1850, with the William Wall company. Peter served as presiding bishop. He was a probate judge, quartermaster of 1st brigade of military district, Cache county, and representative to territorial legislature from Cache and Rich counties. He was also a farmer.
Peter was presiding Bishop and president in Cache valley from 1859 to 1872. He was the fourth son of William and Martha Maughan. In 1829 he married Miss Ruth Harrison, who died in 1841, leaving him six small children. He emigrated with his children to America in 1841, crossing the ocean in the ship "Rochester,"

together with President Brigham Young and others of the Apostles who were returning home. He remained a short time in Kirtland, Ohio, and then removed to Nauvoo where he married Mary Ann Weston Davis, a native of England, where he then lived until the spring of 1844, assisting in building the Temple and the city. In 1846, together with the rest of the Saints, he became an exile for the sake of his religion and went into the wilderness. He arrived in Salt Lake City September 17 1850 and was shortly afterwards sent to Tooele valley to help establish settlements there. When Tooele county was organized in April 1851, he was appointed county clerk and assessor, which offices he held till 1853. He was also chosen one of the selectmen of the county, and appointed city recorder for Tooele city. Having assisted in forming the settlement of E. T. City he was appointed presiding Elder at that place in October, 1854. In the fall of 1856 he was called to establish settlements in Cache valley, which he did most successfully, and he presided over the same as president and presiding Bishop until his death.

TOOELE.

DEATH OF MRS. THOS. ATKIN.

Noble and Esteemed Woman Closes
Brilliant Career at 69.

Tooele, Tooele Co., Feb. 11. —In the death of Mrs. Mary Ann Atkin, wife of Bishop Thomas Atkin, which occurred here on Thursday, Feb. 6, Tooale loses another of its very earliest pioneers, and a most notable woman. Her death resulted from heart trouble and general debility.

Mrs. Atkin was born at Alston Moor, Cumberland, England, January 16, 1839. She was the daughter of the late Bishop Peter Maughan and his first wife. Ruth Harrison. who together embraced the gospel in 1838. Peter Mnughan with his family sailed from England on the ship Rochester in April, 1840. On the same ship were six of the apostles returning from mission. The family resided in Nauvoo for several years, the mother dying there shortly after their arrival. The deceased with her father and the rest of the family viewed the remains of the martyred Prophet and Patriarch, Joseph and Hyrum Smith. Peter Mnughn and his family crossed the plains in 1851 and come to Tooele, where in the year 1856 his daughter Mary Ann became the wife of Thomas Atkin, and she has resided here continuously up to the time of her death. She has held many positions of trust in this ward and stake. She was a gifted and talented public speaker, and was a teacher in the first Sunday school organised here, was also the firstt secretary of the Relief society. In February, 1896, she was elected president of the Relief society of this ward which position she faithfully and very

acceptably filled until failing health obliged her to resign. She was also a counselor to the stake president of the Primary association. She was a true and energetic worker in all of these positions. Mrs. Atkin is the mother of eight children. Thomas M. Atkin, residing in Idaho, Edward Atkin. Willard O. Atkin, Mrs. John B. Gordon, Mrs. Howard Lougy, Mrs. Edith Clegg, wife of State Senator Clegg, and Peter Atkin, the last two preceded their mother to the Great Beyond, all of the rest are living here, together with her aged husband and numerous grandchildren and a number of great-grandchildren, who mourn the loss of as true and loving a wife and devoted a mother as ever lived. …

Agnes Harrison Maughan Teasdale

James Teasdale married Hannah Pearson 16th June 1815, at St Augustine's, Alston.
Children:
Betty baptised 4th July 1816
Hannah baptised 7th November 1819
Jonathan Teasdale, son of James (Miner) and Hannah Teasdale, of Middle Houses, was baptised at St Johns, Garrigill, 20th August 1820.
Nancy baptised 14th July 1822
Esther baptised 20th March 1825
James born 1st November 1826, baptised 15th July 1827, at Redwing Chapel
John born 2nd October 1828, baptised 1st February 1829, at Redwing Chapel
Phebe born 14th September 1831, baptised 1st January 1832, at Redwing Chapel

In 1841, at Middle Houses, Garrigill, James Teasdale, lead miner, aged 50, his wife Hannah 45, children, Jonathan, lead miner, aged 20, Nancy 15, James 14, John 12, and Phebe 9.
In 1851, at Middle Houses, Garrigill, James Teasdale, formerly lead miner, aged 62, his wife Hannah 58, son James, lead miner, aged 24, and daughter Pheby 19.
James Teasdale of Middle Houses was buried at St John, Garrigill, 19th July 1857, aged 68.
Hannah Teasdale of Middle Houses, was buried at St John, Garrigill, 23rd February 1858, aged 64.

In 1850, at Benton, Lafayette, Wisconsin, Jonathan Tisdale, miner, aged 24, his wife Agnes 18, and son James 7 months.
In 1860, at Granby, Newton, Missouri, Jonathan Tisdell, miner, aged 38, his wife Agnes, 28, children, James 10, Mary 8, Agnes 6, Frances 4, and Phoebe aged 1.
Jonathan Teasdale died 28th October 1870, at Stanton, Franklin, Missouri.

Children, James Harrison Teasdale, Mary Emma Teasdale, Agnes Ann Teasdale, Frances Ruth Teasdale, Phoebe Jane Teasdale, Lucy Teasdale, Esther H Teasdale and Edith Evelyn Teasdale

In 1910, at La Grange, Laramie, Wyoming, Ed Stemler, Ranchman, aged 56, his wife Esther H. 46, children, Minnie A, teacher, aged 23, Hugh R, farm labourer, aged 21, Edith M 19, Clarance E, farm labourer, 12, Clara E 10, and mother in law, Agnes M Teasdale, widow, aged 79.

Findagrave.com gives the following:

Agnes was barely nine years old when her mother died When the family emigrated to America they went to Kirkland Ohio where her father met a widow Mary Ann Weston. They then moved to Nauvoo, Illinois where they lived for two years. Then they traveled to New Diggins, Wisconsin in the summer of 1846. At the age of 17 she married Jonathon Teasdale on November 9 1848. Later the young couple moved to Coon Branch where their first child was born. When her father left for Utah Agnes stayed in Coon Branch. In 1851 she and her family moved to Dubuque County, Iowa and later to Stanton Missouri. When Jonathon died in 1870 the 38 year old widow was left with six young children whom she raised. In 1888 she visited her sister Mary Ann Maughan Atkin, whom she had not seen in nearly forty years, in Tooele Utah. Her later years were spent at the home of her daughter Mrs Ester Stamler of Cheyenne, Wyoming.

Agnes Harrison Teasdale died 31st March 1911, at Laramie, Wyoming

William H. Maughan

Deseret evening news. (Great Salt Lake City [Utah]) December 21, 1901, Utah-Colorado Edition

The newly elected mayors of the cities of Utah chosen in the month of November 1901,

William H Maughan Snr who was elected mayor of Wellsville in November was born May 7 1834 at Alston Cumberland England. He was elected as a Democrat to a membership in the State Constitutional convention and in and served fourteen years as county selectman prior to 1882. He served continuously as mayor of Wellsville from 1866 to 1875 and again from 1877 to 1882.He was again elected in 1896 and again in November last. He is independent in politics and was elected on a Citizens ticket.

2nd September 1905 (Logan Republican)

Death of Wm. H. Maughan
Pioneer of Wellsville and Cache County
Passes to Great Beyond
Biographical Sketch of the Well
Known and Respected Man

Blshop Wm. H. Maughan, of Wellsville died Tuesday night at 12 o'clock, he had been failing for months and for weeks prior It was known that death must come soon. Although he was afflicted in various ways, the cause of his death is given as hypertrophy of the liver.

Of his life and works. THE REPUBLICAN can offer nothing better than the following from Dr. Geo. L. Phillips, who says-

Bishop Maughan is dead!

"He had not passed on life's highway the stone that marks the highest point: but being weary for a moment, he lay down by the wayside, and, using his burden for a pillow, fell into that dreamless sleep that kisses his eyelids still. While yet in love with life and raptured with the world, he passed to silence and pathetic dust."

The sturdy pioneer, the loyal and faithful friend, the beloved husband, the fond father, the match less counsellor, the zealous churchman, all these was William H. Maughan. It seems but yesterday that his familiar form graced our thoroughfares, that his cherry salutations greeted us as we saw him passing up and down the street, for he was a virile pedestrian and fain would walk when younger men must e'en use a vehicle. And now he lies mute and cold with "the rigid, silent, upturned face." A generation produces but a few men like him. His son-in-law, Congressman Howell, gazing with grief at the noble profile of the dead, exclaimed, "He was, truly, the noblest Roman of them all!" Nor was this a perfunctory exclamation. For true, innate nobility was the keystone topping the arch of many great characteristics of the deceased. He possessed, in a remarkable degree that rarest of ail mental attributes, common sense, the inseparable concomitant of the cardinal virtues. And when to these are added truth, justice, magnanimity and courage we can perhaps discern the remarkable

nature of the really great man who for over half-a century has been our “guide, counselor and friend.”

A Biography,

“He was born in Alston, Cumberlandshire, England, in May 7th, 1834 and passed in that village the first six years of his life, At the end of that period, with his father and the rest or his family, he crossed the sea in the sailing vessel “Rochester” leaving Liverpool on April 21, 1841, arriving in New York over two months latter. From that port he proceeded to Kirtland, Ohio, remaining in the famous temple city for seven weeks, when he journeyed to Nauvou. Here he sojourned till the spring of 1843. Whilst in that ill-fated city, he had the inestimable privilege and blessing of gazing on the countenance of the great Prophet of God, Joseph Smith Jr., and of listening to his inspired utterances. To quote the language of the deceased Bishop at a recent family gathering, in referring m this experience, he said: ‘‘The impression left on my youthful mind no lapse of lime can ever efface.

I have heard his voice. I have seen his face literally shine, illumined from within by the influence of the Holy Spirit, and I testify to you that he was in very deed a prophet of the true and living God.” Peter Maughan, his father being called by the prophet to go to Rock Island to explore for coal with which to supply the city of Nauvoo, William accompanied him. They remained at Rock Island for over a year, and, returning to Nauvoo, finally left that city for New Diggings, Wisconsin, arriving there on April 15, Hlii, and remaining till April 17, 1850. During this period, his father with his elder brother John and him self were, through the blessing of God, successful in accumulating enough means to purchase an outfit with which to travel to Salt Lake city, at which place they eventually arrived on Sept. 17, 1850. They were, shortly afterwards, sent by President Brigham Young, to locate in Tooele Fort (now Tooele city) and were among the first pioneers of that place. On Christmas day, 1853, William was there married to Barbara Morgan, daughter of Morgan Morgan and his wife Cecilia, the ceremony being performed by Bishop John Rowberry. In 1854 he removed to E. T. City.

Comes to Cache.

In July 1856 under Instructions from President Young, in company with his father, Morgan Morgan, George W, Bryan, John Tate and Zial Riggs, he proceeded to Cache Valley for the purpose of exploring it. and investigating its adaptability to agilcultural puposes. After doing this and reporting favorably, they returned to Tooele, and, winding up business affairs there, came with their families to Cache Valley, arriving on the site of Wellsvllle, which they named Maughan's Fort, on Sept. 15, 1856, this being the first colony to settle in Cache Valley for agricultural purposes. Here, for the next few years,

William had to undergo all those adventures and privations incident to pioneer life in the vicinage of hostile Indians, and here on numberless occasions he exercised that ‘suaviter in modo, fortiter in re,’ which later In life established him as one of the ablest of out local diplomats.

Was Deeply Religious.

Bishop Maughun was of a deeply religions turn of mind and a profound and abiding knowledge of the Gospel was a part of his very being. He was Intensely fervid, yet never fanatical.

A close student of Mormon Doctrine, history and philosophy, he was allways ready at a moment's notice to enlarge on those principles which were so dear to his heart and so clear to his intellect. He had a natural power of oratory and seldom failed to make the most puissant appeals to the hearts and minds and spirits of his auditors. He was never known to tire an audience and his discourses were always didactic with never the slightest suggestion of pedantry. In any other form of Ecclesiasticism a man so endowed would have climbed to the very summit of Parnassus. In the Mormon system, however, ability and valiant service coupled to an almost fanatical fealty to churchly overlords, are not the things most taken into consideration, and so for forty faithful years and five months, Wm. H. Maughan was Bishop of Wellsvllle. He was ordained a High Priest and set apart as bishop on November 12, 1859 under the hands of Apostles Orson Hyde, and Ezara T, Benson and was honorably released in April 1900. Prior to this he had been ordained a Deacon in 1851 by Bishop John Rowberry and an Elder in June 1854 by Dr, Sprague. Recognltlon of his long and faithful services, and of his self-sacrificing loyalty, noble integrity and unswerving fidelity, came to him but two mouths ago, when seated by his death-bed Apostle F. M. Lyman assisted by Presidents W. U. Parkinson and C, W, Nibley, ordained him to the office of a Patriarch, Apostle Lyman making a special visit to Wellsvllle, for this purpose.

Missionary Experience.

In May, 1875, Bishop Maughan responded to a call to perform a mission to Great Britain where he labored successfully In the Sheffield and Birmingham conferences, being called by President Jos. F. Smith to preside; over the latter conference, which position he filled till July, 1876 when he was honorably released to return home. 1884 he was called to act as a director of the Logan Temple, a position he filled acceptably till his death.

From January 3rd till October 15th, 1889 a period of nine months and twelve days, he was imprisoned in the state Penitentiary as a result of having yielded obedience to the Divine doctrine of the new and everlasting covenant. He had been sentenced to two and a half years' imprisonment but was subsequently pardoned by President Benjamin Harrison

Was a Good Soldier.

During the trying periods of community settlements in where brave hearts and ready hands were needed to deal with ubiquitous red raider, no one responded more promptly nor with higher courage nor more dexterous skill than Col. Wm. H. Maughan. In 1862 he served as a volunteer under General Ferguson rendering valiant aid in subduing the Goshute Indians.

In 1857 he was elected captain of company "F" of Colonel Frank Cummings' command, Nauvoo Legion. In 1862 he was elected Major under General West's command, and when the Cache county military district was organized, he was

elected colonel of the 2nd infantry, under General Ezra T, Benson, holding the legal commission therefore from Governor Doty.
In civic affairs Bishop Maughan always took an interesting and leading part. Thus In 1859 when Wellsvllle was then the county seat he was elected county treasurer, In 1869 he was elected selectman of the county and was re-elected in 1872, 1875 and 1878. He served as a member of three constitutional conventions. When in 1866 Wellsvllie was incorporated as a city he was elected the first mayor and was re-elected every two years till 1875, he was again chosen in 1878,1880 and 1882; and again in 1897 and 1901.

The Family Life.
As before stated, Bishop Maughan yielded obedience to the principal of plural marriage and married successively six noble women, five of whom surrounded his bedside at the moment of dissolution, the other, who was his first wife, Barbara, referred to in the foregoing died in September, 1888.
She bore him 9 children, 5 sons, and 4 daughters.
In 1860 he married Sister Lizzie Hill who bore him 10 children, 5 sons and 5 daughters.
In 1863 he married Sister Margaret Nibley, who bore him 9 children, 3 sons and 6 daughters.
In 1868 he married Slater Mary Lloyd who bore him 9 children, 3 sons and 6 daughters.
In 1872 he married Sister Rachel Woodward who bore him 8 children, 5 sons and 3 daughters.
In 1880 he married Sister Euphemia Nibley, who bore him 7 children, 2 sons and 5 daughters.
Thus these noble women have borne him in all 53 children, 40 of whom, 21 sons and 19 daughters survive him. All of these are members of the church in good standing and faithful workers in the great Latter-day work. In addition to this number the bishop is survived by 136 grandchildren and 10 greatgrandchildren, in all 186 living descendants.
Honored his Wives.
In an address to his family on the occasion of his 70th birthday, the late Bishop, referring to his plural wives said: “I wish to express from the depths of my heart, my gratitude to my Heavenly Father for these noble women, who, for so many years have shared in my burdens, my sorrows and my trials, as well as participated in my joys. They have not only been true, good, faithful, loyal wives to me, but, what is of equally infinite importance, they have been, in very truth, sisters to one another in all which that name truly implies.
Finis.
Bishop Maughan was a man of God. Firm for the right, loyal to the truth and to his church. Intensely devoted to his "file leaders.” Charitable to the weak and erring and full of gracious love for all mankind A born leader in his sphere of action and fit to act in any sphere. Of keen discernment. Human himself and so ever conscious of human limitations. We, who have lost him, do but dully realize it, so bereft are we in the demise of one we had learned to love so well. May the Comforter rest with the afflicted relations in this; their sad and severe hour of irreparable loss

John Slack & Family

John Slack born 18th May 1798, 2nd son of John Slack, Tailor, of Alston, by his wife Mary daughter of Thomas and Mary Pattinson, native of Derwent

Elizabeth Shield, baptised 29th March 1819, at St Augustine's, Alston, daughter of John and Mary Shield.

John Slack married Elizabeth Shields 21 Nov 1838, at Gretna Green.
In 1851, at Thirlwell Lane, Alston, John Slack, tailor, aged 50, his wife Elizabeth aged 33, daughters, Mary A 11, Jane 7, and Hannah 1.
In 1861, at Harthwaite Toll Bar, Nichol Forest, Cumberland, John Slack, tailor aged 50, (sic) his wife Elizabeth 42, children, Mary Ann 21, Jane 16, Hannah 10, Isabella 5, and Elizabeth 6 months.

Robert Blain, born 27th August 1843, at Carlisle died 30th July 1926, at Utah

Hannah Slack married George Blain, 22nd January 1874, at Salt Lake City, Utah; she died 24th November 1920, aged 70, buried at Monroe City Cemetery.

Isabella Slack married Andrew Mark Wardrobe, she died 13th November 1931, at Spokane, Spokane County, Washington, buried at Genesee City Cemetery, Latah County, Idaho.

17th March 1922 (Cottonwood Chronical, Idaho)
A. M. Wardrobe, father of Mrs. Frank Blackburn of this city, who died at his home near Genesee last week was an old time pioneer of that city. Relative to his death the Genesee News contained the following article:
A. M. Wardrotie, one of Genesee's most highly respected pioneer citizens, passed away Sunday evening, March 6. at his home in Genesee, at the ripe old age of 84 years, five months and two days. Flu complications were the direct cause of his death, but he had been in declining health for a year or more.
Andrew Mark Wardrobe was of hardy Scotch ancestry, having been born in Glasgow, Scotland, on August 8. 1837. He emigrated with his parents to America in 1844, at the age of seven years, and they settled at St, Louis. From there the family removed to Utah in 1848 and went to California in 1863, when; they joined the gold seekers.
Upon leaving California some time later he was for a time located at Carson City, Nevada, where he was connected with a pony express.
From Utah he came with his family to Walla Walla in 1877. During his residence there he was a volunteer during the Indian trouble. He came to Genesee in 1878 and took up a homestead eight miles east of town, which farm he still owned at the time of his death. He retired from active farm life 18 years ago and has since maintained his residence here.
Mr. Wardrobe is survived by his widow, who will deeply mourn the loss of her companion for more than 47 years. To them were born 13 children, all of whom, except his son, John, who passed away September 24, 1921 at Spokane, survive him.

19th September 1907 (Lehi Banner)
Funeral Service of Mary Wanlass Hutchings
Sunday afternoon services were held over the remains of Mary Wanlass Hutchings from the Lehi Tabernacle. After the close of the sacrament service, Bishop Henry Lewis took charge of the services and read the following sketch of her life.
Sketch
Mary Wanlass Hutchings was the daughter of Jackson Wanlass and Sarah Bell; was born in the town of Alston, county of Cumberland, England, May 20th 1848, emigrated to America, arriving at Richmond, Ray County, Mo., in the fall of 1856; left Mo., in the spring of 1863, crossing the plains with one yoke of oxen, and one yoke of cows which consisted their team, having charge of the younger children of the family; with no assistance, the mother of the family having died just prior to their leaving Missouri, and the father being sick the greater part of the way across the Pains, arriving at Lehi, Utah in the fall of 1863; was married to Wm. L. Hutchings in the early spring of 1864. Was the mother of ten children, 7 of whom survive her. She assisted Brother Hutchings in all his undertakings and has been a very devoted wife and mother. She departed this life September 13th 1907, in full faith of the Gospel. …
A large number of friends attended the services. Mrs Leroy Fox, a daughter of Mrs Hutchings was unable to attend the service, having just a few days previous given birth to a child. Ed. Hutchings a son is now in the Southern States on a mission. The flowers were beautiful. The sympathy of the community goes out to Brother Hutchings and family in the loss of mother and wife.

Sarah Wanlass Atwood

Sarah Wanlass born 10th May 1856, at Foreshield, Alston, daughter of Jackson Wanlass and Jane Bell, married. Millen Dan Atwood, 8th October 1877, at Salt Lake City, Sarah died 16th February 1933 at Pleasant Grove, Utah County, Utah, and was buried at Pleasant Grove City Cemetery
Millen Dan Atwood died 23rd November 1909, at Manila, Utah.
Children:
Francis Dan Atwood
William Atwood
Sarah Delilah Beck
John Leslie Atwood
Ardena Jane Atwood
Lawrence Miner Atwood

24th February 1933 (Pleasant Grove Review)

Life Sketch of Sarah Wanlass Atwood.

Sarah Wanlass Atwood, the fourth child of Jackson Sr. and Jane Bell Wanlass, was born in Alston, Cumberland, Co., England, May 10, 1856.

At the age of three months she sailed with her parents for America. After a very tedious voyage they landed in America, and later moved to Richmond, Missouri, where she resided until she was five years old. At this age her mother died just as they were preparing to come to Utah.

As it was the ambition of the mother to come to Zion she made the father promise that he would take the children to Utah. Sarah crossed the plains with her father and endured all the hardships that! were encountered by those who crossed the plains with ox teams. This being doubly hard on account of not having the care of a mother and not being with a company of Saints.

She landed with her father in Salt Lake in the fall of 1863 and the family moved to Lehi very soon after. Her father died the next fall leaving her an orphan when she was seven years of age. From this time on she was forced to care for herself. At first she went to live with the family of Dr. Harvey C. Hullinger on Cottonwood, where she did errands and housework for her board and schooling. She remained here for about seven years, later returning to Lehi, where she remained with relatives and friends for a few years.

She went from here to Salt Lake City where she was employed in the home of Francis Armstrong, mayor of Salt Lake. It was here that she met Millen Dan Atwood, also an employee of Mr. Armstrong, and was married to him on October 8, 1877, in the Salt Lake Endowment House by Elder Daniel H. Wells.

The following children were born to them: Millen William, Francis Dan, Lawrence Miner, John Leslie, Sarah Deliliah, and Ardena Jane, all of whom survive her. Her husband and all her brothers and sisters having preceded her into the Great Beyond.

On the 26th of October, 1887, with J her husband and children, she moved to Pleasant Grove in what was then the Third ward, now Manila ward. They purchased the farm of Benjamin Holly. In those days Manila ward was very sparsely settled and unimproved and they did their part in helping to break up the sage brush and build up the ward.

Sarah Wanlass Atwood has' always taken an active part in her religion. When a girl she was chosen as second counselor to Orinder Davis in the first Retrenchment Association that was organized in Lehi and later in life has worked in Relief Society as president and also as counselor to the president of Relief Societies both in the Manila ward and Pleasant Grove Third ward.

She has always enjoyed her work in the church and was very happy when helping someone or offering an encouraging word, always admonishing everyone to do right and serve God.

She passed peacefully away at her home on the evening of February 16, 1933, at 10 p.m., surrounded by her entire family. She died in full faith of the Gospel as she had lived it during her entire life.

She was loved and respected by all who knew her.

10th December 1941 (Provo Daily Herald)
Postmaster of Pleasant Grove Dies at Hospital

PLEASANT GROVE—Funeral services will be held Thursday at 1 p.m. In the LDS Timpanogos stake tabernacle for Frank D. Atwood, 59, local postmaster, who died at 1:50 a.m., Tuesday, in a Salt Lake City hospital following a three weeks' illness. Services will be conducted by Bishop Joseph S. Walker.

Mr. Atwood was born June 12, 1882 at Salt Lake City, the son of Millen D. and Sarah Wanlass Atwood. He was educated in schools at Pleasant Grove, later attending the University of Utah and the LDS Business college.

His marriage to Margaret Smith was solemnized Feb. 14, 1918 in the Salt Lake temple.

At the time of his death he was active in the stake high council in which he was manager of the welfare program. In addition to being bishop of the Third ward from 1929-39. he was active in the Sunday school and served on the MIA stake board.

Mr. Atwood was employed, upon finishing school, as a bookkeeper for the Utah Banking company and the Utah-Idaho Sugar company. He worked in a local grocery and butcher establishment and as manager of the Pleasant Grove Fruit and Vegetable Growers association. Later he received appointments in the state auditor's office and with the state tax commission. For the past six years he has been postmaster here.

Surviving him are his wife, three sons and four daughters: Fred S., national guardsman at San Luis Obispo; Dale F., Margaret, Maxine, Lynn. Anna Beth, Mary, also three brothers and two sisters: William, Salt Lake City, John L., Malad. Idaho; Lawrence M., Mrs. Sadie Beck and Miss Ardena Atwood. Pleasant Grove.

Friends may call Wednesday evening at the home and Thursday until time for the funeral.

Ralph Thompson & Family

Ralph Thompson died 8th February 1872, at Salt Lake City
9th February 1872 (Salt Lake Herald)
Died
Thompson. In this city, at 5:30 a.m., 8th inst., Ralph Thompson of inflammation of the lungs.
Funeral today at 1 p.m., from the 6th Ward school house. Friends of the family are respectfully invited to attend.

15th November 1915 (Salt Lake Tribune)
Married For Sixty Years
Big Celebration Arranged
Mr and Mrs Frederick A. Mitchell formerly of Salt Lake, now of Logan, who will observe their sixtieth wedding Aniversary today.

Number of Relatives From
This City Will Attend
the Function.

JUDGE and Mrs. Alexander McMaster will go to Logan this morning to be present at the celebration of the sixtieth wedding anniversary of Mrs. McMaster's parents, Mr. and Mrs. Frederick A. Mitchell. Accompanying them will be Mrs. L. G. Burton, Mrs. H. M. Blackhurst and1 Mrs. Margaret A. Caine, all daughters of Mr. and Mrs. Mitchell. Mr. Burton and Mr. Blackhurst. will accompany their wives. Frank Athol McMaster and Miss Margaret Burton, grandchildren, will also be in the party.

Others who will attend from Salt Lake are Milton R. and Ralph T. Mitchell and their families. They will be joined at Logan by H. Frank Mitchell of Cache Junction, Edgar B. Mitchell of Blue Creek, Idaho, and A. H. Mitchell of Lewiston, Idaho, and their families.

Mr. and Mrs. Frederick A. Mitchell, who were united in marriage in this city sixty years ago today by President Brigham Young, are among the most widely-known pioneers in the state and are former residents of Salt Lake.

Entertainment Planned.

The relatives who will go from here and other points will entertain the happy old couple at a big dinner this evening, to be served at Murdock ’s, a Logan catering establishment. There will .be music and dancing after the dinner, and roses will be used in profusion to decorate. Everything will be done to make the anniversary the happiest day of their lives, excepting, perhaps, the day that they were married in Salt Lake so long ago by the late President Brigham Young.

Frederick A. Mitchell was born on July 14, 1835, in Sheffield, Yorkshire, England, and came to the United States in January, 1850. He lived at St. Louis for four years, coming to Salt Lake in 1854.

Mrs. Margaret Thompson Mitchell was born in Alston, Cumberland, England, on January 31, 1840. She was brought to the United States by her parents when only a few months of age, and the family settled at Nauvoo, Illinois. They lived there until September, 1846, when they came to Salt Lake.

Pioneer Business Man.

Mr. Mitchell was prominent in the business life of Utah for many years. In the early days of his residence in Salt Lake he formed a partnership with W. S. Godbe, under the firm name of Godbe & Mitchell. For two years Mr. Mitchell made semi-annual trips across the plains for merchandise, which was sold in the Godbe-Mitchell store, at the corner of First South and Main streets. The building in which the business was conducted, known as the Godbe-Pitts building, still stands. Mr. Godbe managed the drug end of the business, while Mr. Mitchell handled the merchandise department.

After the advent of the railroad Mr. Mitchell became interested in coal mining. It was he who shipped the first two cars of coal by railroad into Salt Lake. He was secretary and manager of the Home Coal company for fifteen years and was one-fifth owner of the Wasatch coal mine at Coalville.

In 1889 Mr. Mitchell went to Cache valley, where he became one of the pioneers in dry farming. He removed his family there from Salt Lake two years later and operated a dry farm successfully near Cache Junction. Two; years later he moved to Logan.

Prominent in Public Life.

Mr. Mitchell has served three missions tor the Mormon church, two in Hawaii and one in England. He was state commissioner to select university lands for six years and was a director for many years of the Deseret Agriculture &

Manufactures association, he is one of the oldest living members of that famous society. For fourteen years he acted as deputy United States mineral surveyor. Last summer Mr. and Mrs. Mitchell, he in his eighty-first and she in her seventy-sixth year, were Utah delegates to the convention of the Genealogical society in San Francisco and took keen I delight in viewing the wonders of the exposition.
President Brigham Young of the Mormon church married the couple in Salt Lake City on November 15, 1855. They have ten living children, thirty-two grandchildren and seven great grand-children, many of whom will attend the anniversary celebration today.

Margaret Thompson Mitchell, died 6th April 1924, aged 8, at Logan, Cache, Utah, buried at Salt Lake City Cemetery.
Frederick Augustus H Mitchell born 14th July 1835, at Sheffield, Yorkshire, died 26th July 1823, aged 88, at Logan, Cache, Utah, buried at Salt Lake City Cemetery.

Mary Thompson, born 21st October 1827, married Willard Richards 27th January 1846, at Nauvoom Hancock, Illinois, they had two children, Phoebe Amelia and Jennetta. Willard Richards died 11th March 1854, at Salt Lake City.

www.findagrave.com**, gives the following:**
Mormon Church Religious Leader. Apostle of The Church of Jesus Christ of Latter-day Saints. Cousin and 2nd Counsellor to Brigham Young. As a member of the Twelve, he and John Taylor accompanied Joseph and Hyrum Smith while imprisoned in Carthage Jail, and were there at the time when they were killed. Hyrum was killed first, John Taylor was then shot from the front and back, then Joseph was sent out the window. Willard Richards remained unharmed, and Taylor was near to death. He dragged Taylor to the jail room across the hall and laid him under a mattress figuring the mob would return to finish them off. However, they dispersed and fled leaving them to take care for themselves. He's the only Apostle ordained outside the United States, while serving a mission in England with other Apostles. He passed away at the age of only 49.

Mary Thompson married Franklin Dewey Richards, 6th March 1857, at Salt Lake City, they had four children, Myron John, Wealthy, Mary Alice, and Wilford Woodruff.

Mary Thompson Richards, died 10th September 1905, at Riverside Box Elder, Utah, buried at Farmington City Cemetery, Farmington, Davis, Utah.

Farmington City Cemetery

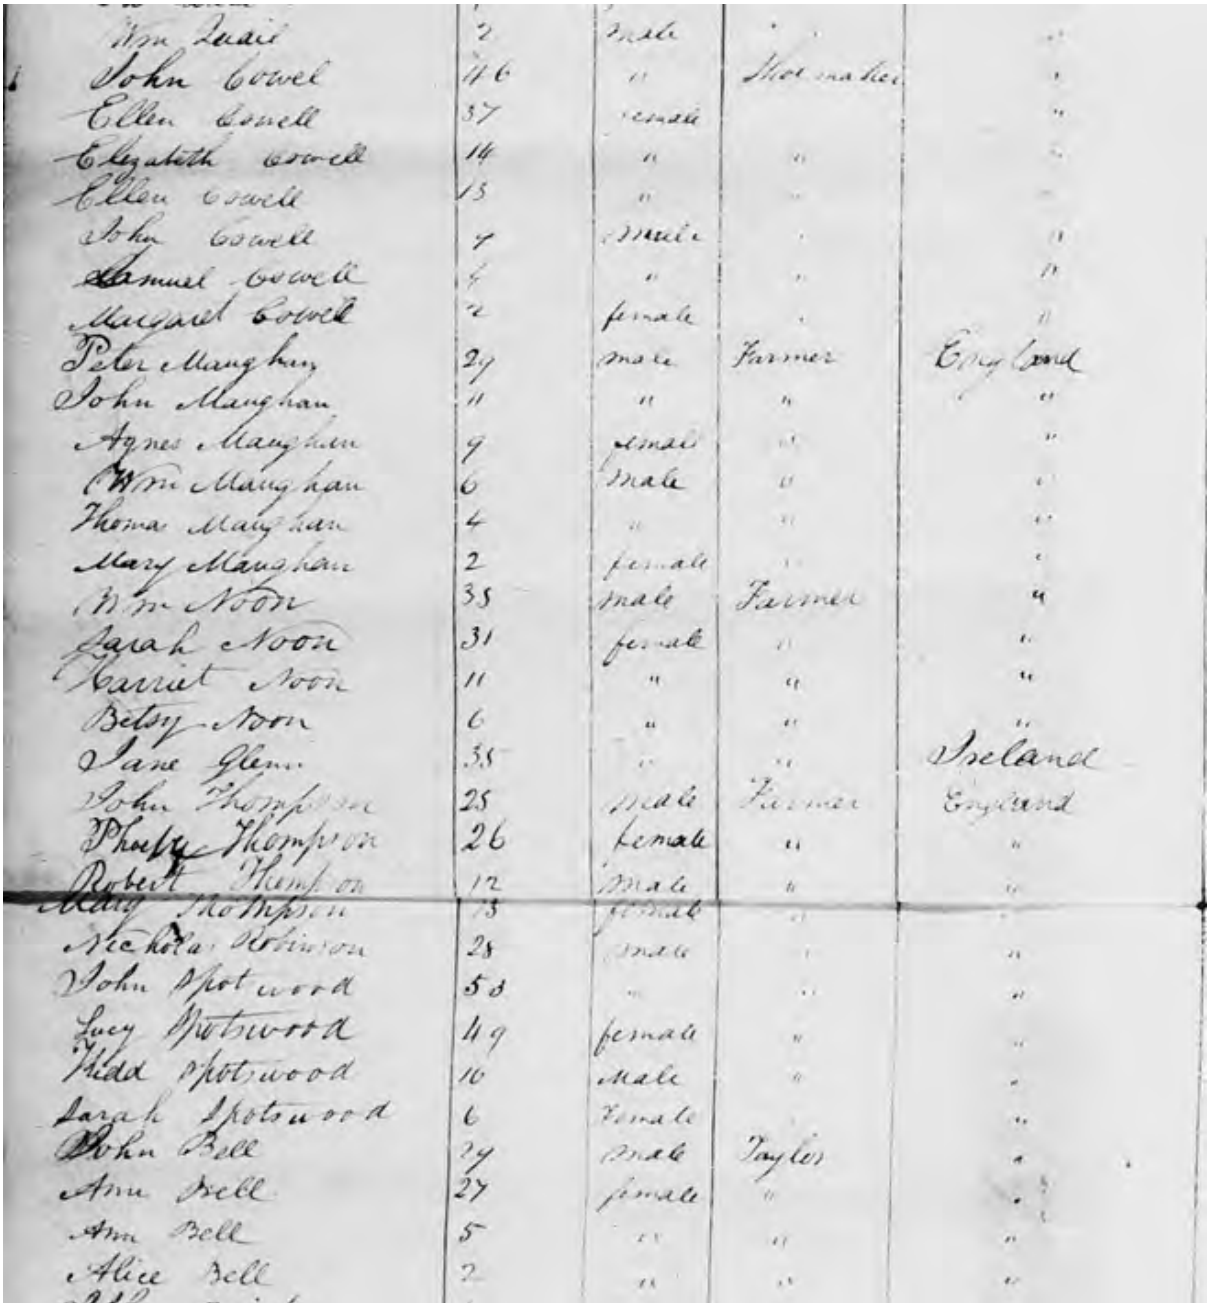
Elizabeth Spotswood, milliner, 20
Matthew Spotswood, miner, 17
William Spotswood, 13

The Contributor Vol. XII October 1891. Published Salt Lake City, Utah
Church Emigration
"FOURTH COMPANY. Sheffield, 235 souls. The following is culled from the History of Joseph Smith:
Saturday, February 6th, 1841, a council meeting was held at Brother Richard Harrison's, seventy-two Burlington Street, Liverpool, for the purpose of organizing a company of Saints going to New Orleans on the ship Sheffield. Captain Porter, Apostles Brigham Young, John Taylor and Willard Richards and other officers were present. Elder Hiram Clark was chosen president, and Thomas Walmsley, Miles Romney, Edward Martin,
John Taylor, Francis Clark and John Riley, counsellors to President Clark. Edward Martin was appointed clerk and historian of the company. President Clark and his counsellors were blessed and set apart for their mission.
The Sheffield sailed from Liverpool, bound for New Orleans, with two hundred and thirty-five Saints on board, on Sunday the 7th…
… After a passage of fifty-one days the company landed in New Orleans; three deaths and two births having occurred on the voyage. On arriving at New Orleans, Elder Clark made a contract with a steamer to carry the company to St. Louis for two dollars and fifty cents each, including baggage. From St. Louis to Nauvoo they secured a passage on the Goddess of Liberty for one dollar each. About thirty of the emigrants who had become disaffected through false reports, tarried at St. Louis. The bulk of the company landed in Nauvoo, April

18th, 1841, about eleven o'clock in the evening. Notwithstanding the late hour, quite a number of the brethren stood on the shore to welcome these new arrivals from the old world."

John Spotswood senior, his wife and youngest children, travelled from Liverpool, 21st April 1841, on the Rochester, arriving at New York 20th May 1841.
Passenger List:
John Spotswood 53, Farmer
Lucy Spotswood 49
Kidd Spotswood 10
Sarah Spotswood 6



Passenger List of the Rochester

The Contributor Vol. XII October 1891. Published Salt Lake City, Utah
Church Emigration
"EIGHTH COMPANY. -- Rochester, 130 souls. Tuesday April 20th, 1841, Apostles Brigham Young, Heber C. Kimball, Orson Pratt, Wilford Woodruff, John Taylor, George A. Smith and Willard Richards and family went on board the ship Rochester, Captain Woodhouse, at Liverpool, bound for New York, with a company of one hundred and thirty saints. Captain Woodhouse delayed his sailing two days, to accommodate the Elders.
The Rochester sailed on the twenty-first and arrived at the quarantine ground at New York May 19th, after a toilsome passage. At one time she was beset with head winds and a tedious storm, when the Apostles united in prayer, in answer to which the storm abated, the sea became calm, and the voyage was continued with rejoicing. On the twenty-eighth of April the ship encountered a tempest, shipped a heavy sea in which Apostle Woodruff got thoroughly drenched, while Willard Richards escaped under the bulwarks.
The Rochester arrived at the dock in New York about four o'clock p.m., on Thursday, May 20th, but the passengers were prevented from landing by the carters and rowdies until late in the evening. Such was the confusion in New York at that time at the arrival of a ship, steamboat or coach, that strangers were led to suppose that the city was without mayor, marshal, police or any other officer to keep the peace.
The company remained in New York until the fourth of June, when the journey was continued, under the direction of Brigham Young, Heber C. Kimball and John Taylor, via Philadelphia to Pittsburgh by railway and canal transportation. They travelled on what was then called the swift line, for which they paid fourteen dollars for each adult; the slow line carried passengers for nine dollars. After staying four days at Pittsburgh, they set sail on the steamboat Cicero, June 12th, and after having proceeded about fifteen miles the boat ran on a sand bank, where it was detained three days; in fact, the boat ran aground several times, the water being very low, and the passengers were three weeks on board before they arrived in Nauvoo. The weather was also extremely warm. Apostle Kimball, in a communication to the Millennial Star, advised future emigrants to come by way of New Orleans, on which route the accommodations would be better and the fare less, and he also recommended that British Saints should sail in the cool part of the season.
The company finally arrived in Nauvoo, July 1st, 1841, and was met on the river bank by about three hundred Saints who had come down to meet the new comers. A greater manifestation of love and gladness had perhaps never been witnessed among brethren in this dispensation than that which was exhibited on this occasion when the Prophet Joseph met his brethren of the Twelve, whom he loved so dearly. Joseph was the first person on board the steamer which brought the company in and gave the immigrating Saints a warm and hearty greeting."

Nelson Examiner and New Zealand Chronicle, Volume XI, 4 September 1852,
The Carlisle Journal states that upwards of two hundred and fifty men, women, and children, left Penrith per rail for Liverpool on Monday last. The men, who are mostly natives of Alston and neighbourhood, are engaged by Mr. Thompson of Hexham, formerly mine agent of Greenside, for workmen in the Government gold mines of Bathurst, in Australia. Married men had the privilege of having voyage expenses defrayed for themselves, their wives, and two children each. When landed, the men would receive a monthly wage of £6. The Alston band accompanied the emigrants from Alston to Penrith.

Rutherford-White. – May 11, at St. Mary's by the Rev. Father Garin, Ralph, second son of John Rutherford, Weardale, County Durham, to Mary, third daughter of James White, Castle Ray, County Roscommon, Ireland.

Taranaki Herald, Volume XXIV, Issue 2430, 22 July 1876,
THE LATE DR. FEATHERSTON.
Died June, 1876
Dr. Isaac Earl Featherston, whose death was recorded the other day, was the fourth son of Mr. Thomas Featherston, of Blackdean, Weardale, and Cotfield house, in the County of Durham, was born on the 21st March, 1813, and therefore was sixty-three years of age at the time of his decease. He received his early education at the private school at Tamworth and subsequently in Italy. He afterwards studied at the Edinburgh University, where he graduated M.D. in 1830. In 1839, he married the daughter of Mr. A. Scott, of Edinburgh; and in the following year, on account of ill health, he emigrated to New Zealand. He settled at Wellington, and immediately took a leading part in the politics of the country, especially in advocating the immediate introduction of representative government. On the inauguration, in 1853, of the New Zealand Constitution Act, he was elected first Superintendent of the Province of Wellington, and he held that office continuously for eighteen years, having been elected six times during that period. He was elected member of the House of Representatives for the district of Wanganui on the first meeting of Parliament in 1853; subsequently represented the city of Wellington, and held a seat in the House up to the time of his departure from the Colony in 1871. He has been a member of two Ministries, in one of which he held office, for a short period, as Colonial Secretary: and he has been especially employed by the Government of the country on various important missions. In 1809 he proceeded to Australia at the

request of the Government and Parliament of New Zealand for the purpose of urging General Sir Trevor Chute, then commanding H.M. Forces in Melbourne, to take upon himself the responsibility of retaining the troops in New Zealand pending further reference to the Imperial Government—a responsibility which the General, much to his credit, readily undertook. Immediately on his return to the Colony he was appointed special commissioner, with Sir Francis Dillon Bell as his colleague, to proceed to England for the purpose of urging on the Imperial Government the retention of the troops in New Zealand, in which object the commissioners failed, although they succeeded in inducing H.M. Ministers to guarantee a loan of a million for opening up inland communication within the Colony, and thereby giving employment to the native tribes and rendering the removal of the troops less hazardous. Upon returning, on the day of his arrival in New Zealand he was offered the appointment of Agent-General for New Zealand, which he retained up to the time of his death

PYEMONT-HARLE. —Oh the 9th May, at Maxwell town, by the Rev P. L. Cameron, Aubrey Beauchamp Pyemont, second youngest son of the late Rev. Samuel Pyemont, D.D., Vicar of Whitwick, Leicestershire, to Elizabeth Taylor, second youngest daughter of Mr Jonathan Harle, of Maxwell town, late of Allendale, Northumberland. [Home Church Guardian please copy.]

Star, Issue 4634, 3 May 1893
OBITUARY.
The Rev; Matthew Baxter died on Monday at the ripe age of eighty-one. The reverend gentleman arrived in the Colony in the ship Gainsborough on May 2,1869, he at once entered upon active duty as General Superintendent of the United Methodist Free Church in New Zealand, which office he held for over ten years, and was the leading preacher to that congregation at the St Asaph street, Addington and Richmond Churches. Owing to failing health coming with declining years, he retired from active ministry in 1876, and went to live at Fendalton, since which time till quite recently he has given his services voluntarily wherever it was possible for him to do so; but as he has been living at Oxford latterly, these opportunities have not been many except in that particular district. He was the author of three volumes— "Land of the Blessed," "Memorials of Free Methodism," and " Sketches of Ministers of the United Methodist Free Churches." Mr Baxter was editor of the United Methodist Free Churches' Magazine for nine years. He also held all the prominent positions in the Conference, and was a member of the Connexional Committee for many years previous to his leaving England, where he rendered valuable service. In his will, he leaves one hundred and fifty acres of land to the St Asaph street church. He also gave to the Oxford Circuit, previous to his death, his library, which contains some five hundred volumes of the Edinburgh and Quarterly

Reviews, besides a large number of theological, metaphysical and other books. Mr Baxter leaves one son, resident in Christchurch, and two daughters resident in England, both of whom are married to clergymen of the same denomination. He was born at Alston, in Cumberland, and served for over forty-five years in the ministry of the church. A memorial service will be conducted in the St Asaph street church on Sunday.

Johnson. — On the 3rd June, at the residence of his son-in-law (Robert Lee, Lintzgarth, Anderson's Bay), William James Johnson (late of Allendale, Northumberland, England); in his eighty-fourth year.

Otago Witness, Issue 2879, 19 May 1909,
The Wyndham Farmer reports that on the 15th there was celebrated at Wyndham the golden wedding of Mr and Mrs Robert Robson. The couple, being then each 20 years of age, were married at Hexham, Northumberland, on May 13, 1859. They arrived in New Zealand in 1879, resided three years at Inch Clutha, '24 years at Mimihau, and for the last three years at Wyndham. Despite their three score and ten years they enjoy good health, and are intimately known to, and much respected by, a large number of the residents of the district.

Christchurch Board of Health
Three cases of scarlet fever have been lately reported to the Board from the Hospital. If the Hospital has not a rule against the admission of diphtheria and scarlet fever patients into its wards, I would suggest that this Board would urge upon the Hospital Board the necessity of making a rule to that effect, as the admission of such patients into a general hospital is fraught with the greatest danger. I find that one of the patients, R. G. Peart, who recently died at the Hospital from a throat affection, came from one of those houses in Kilmore street, belonging to the Church Property Trustees, with reference to ' which a strong complaint has been made to this Board that the closet pans had been overflowing, because they had been left unemptied, through a dispute between the Trustees and the City Council.

WEDDING BELLS.
A correspondent writes: — A pleasant gathering took place in the Baptist Chapel, Richmond, on the 13th January, to witness the union of Mr Francis James Jeffreys, of Nelson (who is well-known both in Nelson and surrounding district), with Miss Margaret Eugenic Smith, of Richmond, a member of the Chapel and organist for many years, and who has also taken an active part in the local " Endeavour Society" as its Secretary. The Chapel was beautifully decorated in honour of the occasion, and the building was filled with friends of the bride and bridegroom, who all joined heartily in singing the "Bridal Hymn." The Rev R. S. Gray performed the marriage ceremony. The bride, who was tastefully dressed in figured fawn silk, was given away by her brother-in-law, Mr

F. B. Peart. Miss Amy Haycock and Miss Muriel Peart (niece of the bride) were the bridesmaids, and Mr Walter Blick acted as best man. After the ceremony, the bridal party drove to Wakefield, where they were joined by other friends, all of whom were entertained at afternoon tea by Mrs. F. F. B. Peart, the bride's sister. Later on, Mr and Mrs Jeffreys left for Nelson. They both had received many presents from their friends and well-wishers.

Otago Witness, Issue 2428, 26 September 1900,
LIGGETT— PEART. — On the 20th _ September, at the residence of the bride's sister, Ellesmere Park, Edendale, by the Rev. J. T. Burrows, Otautau, James Liggett, farmer, of Wairio and Mokoreta, to Amelia Jessie, second daughter of Mrs M. Peart, Stuart street, Dunedin.

Nelson Evening Mail, Volume XXXVIII, Issue 175, 21 September 1904
DEATH.
Peart. —On September 19th, at Pohingina, Palmerston North, Florence, daughter of Alfred and Selina Peart, aged 61/2years.

The Argus (Melbourne)
Thursday 14 February 1861
Dr. Candler held an inquest yesterday on the body of Edward Norman Hadaway, a child about three years of age, who died on the previous day from congestion of the brain, in East Collingwood. The mother of the deceased stated that up to the 9th inst., he was quite well, but on that day he became feverish, and on the 10th was drowsy, and she thought he had a cold. On the 11th a rash came out and he was hotter he was restless during the evening, and about? In the morning, he seemed still better. She left the room for about 10 minutes, and on her return found him dead. No medical man had seen the child, as she did not think him dangerously ill. The jury returned a verdict in accordance, with the evidence.

Saturday 1 July 1916
HAMILTON. - On the 29th June, at his late residence, 225 Johnstone street, Abbotsford, Joseph, husband of the late Mary, and dearly beloved father of E. H., M. I. H., B. H., J. W. H., and A. R., late of Hexham, Northumberland, England, aged 80 years. (Interred privately Heidelberg Cemetery, 30th June, 1910.)

The Argus (Melbourne)
Saturday 23 December 1916
TULLY. - A tribute in loving memory of Corp. Richard S. Tully killed in action In France November 14, 1916, formerly of North Shields, England. (Inserted by his fellow-employees of Buckley and Nunn Ltd., Melbourne.)

The Argus (Melbourne)
Wednesday 10 January 1917
DOUGLAS. — On the 21st December, at Matamata, New Zealand, Edward Douglas, formerly of Anwick, Northumberland, England; uncle to James, William, and Grace Landells and Mrs. Angus McNaughton, of Melbourne, aged 79 years.

The Argus (Melbourne)
Monday 25 February 1918
RENNISON. - On the 22nd February, at E. St. Kilda, Mary A. Rennison, widow of the late William H. Rennison, of North Shields, England, loved mother of W. H. Rennison (Clifton Hill), Jessie, (Mrs Thompson, South Africa), and Mrs Alice Slater (290 Dandenong Road, E. St. Kilda), aged 78 years. Private interment, Melbourne General cemetery.

The Argus (Melbourne)
Saturday 27 April 1918
ARTHUR- Killed in action in France, February 1918, Robert (Lieutenant, Northumberland Fusiliers, Newcastle-on Tyne, England), nephew of Mr and Mrs R. Fairweather, Dromana,

The Advertiser (Adelaide)
Thursday 17 October 1918
DIERICX. - To the memory of Corporal Albert (Kit) Diericx, A.I.F. (late of Gosforth, Northumberland, England), killed in France, October 17, 1917. - Inserted by his friends, Mrs. J. Hearn and family.
DIERICX. - In affectionate memory of oar dear pal, No. 60, Corporal Albert D Diericx. 1st Australian Signal Company, who was killed in action, October 17, 1917. Steadfast in life, valiant in death. -Inserted by his pals, J. Canham (abroad), and A. Arthur (returned).

The Advertiser (Adelaide)
Thursday 7 November 1918
WALD. - Age 23, killed accidentally on 11th August while on night-flying duty, Lieutenant Alexander Wald, M.C, Royal Air Force, beloved son of Alexander and Esther Wald, Largs. Interred at St. Andrew's Cemetery, Newcastle-on Tyne, England. Four years' service.

The Argus (Melbourne)
Saturday 25 October 1919
PEART. – On the 18th October (suddenly) John Joseph, late of Albert street, Sebastopol, eldest surviving son of the late Joseph Peart, The Rush, Weardale, England: beloved husband of Margaret; loving father of Myra fond brother of J. A., K. H. (Perth, W.A.), and R. W. Peart; aged 61 years.

The Argus (Melbourne)
Saturday 22 May 1920
PYE. - On the 21st May, 1021) at private hospital, Carlton, Frances Alma, relict of the late John James Pye, of Newcastle-on-Tyne, England, loving mother of John and Elizabeth (Mrs. Dobson, Newcastle-on-Tyne, England), aged 65 years. (English papers please copy.)

The Argus (Melbourne)
Saturday 4 December 1920
SALMON - Passed peacefully away, November 27, Eleanor, relict of the late Benjamin Salmon, of South Shields, England, aged 96. The dearly loved mother of the late P. M. Salmon, M.L.A; Launcelot of the Royal Navy; Mrs. R. Taylor, Mrs. G. B. Bennett, Mrs. S. H. Cumpston, and Mrs. J. Thorpe, "Thorpeleigh", Oban street, Hawksburn. A colonist of 61 years. Private interment, Coburg, November 30.

Appendix 9

Abstract of The Metalliferous Mines Regulation Acts, 1872 and 1875
Source: NEIMME Tracts Volume 73, pages 411-430

Application of Acts.

1. The Metalliferous Mines Regulation Act, 1872, herein-after referred to as the principal Act, and the Metalliferous Mines Regulation Act, 1875, herein-after referred to as the amending Act, apply to every mine of whatever description, except—

    1. Coal mines,
    2. Mines of stratified ironstone,
    3. Mines of shale,
    4. Mines of fireclay

    which are subject to the Coal Mines Regulation Act, of 1872

The Acts extend to the Isle of Man.

2. **Definition Of Mine:** – The term "mine" means a mine to which the Metalliferous Mines Regulation Acts, 1872 and 1875, apply, and includes every shaft in course of being sunk, and every level and inclined plane in the course of being driven, for commencing or opening any new mine, or for searching or proving minerals, and all the shafts, levels, planes, works, machinery, tramways, and sidings, both below ground and above ground, in and adjacent to a mine and any such shaft, level, and inclined plane, and belonging to the mine, The term " shaft includes pit,

3. The commencement of the principal Act is 1st January 1873, and of the amending Act is 2nd August 1875.

Inspectors.

4. Inspectors of mines may be appointed by a Secretary of State, and a district may be assigned

5. An inspector may not himself be or practice, or be the partner of one who is or who practise, as land agent or mining engineer, or as a manager, viewer, agent, or valuer of mines or as arbitrator in mining cases, and may not be otherwise employed in or about any mine, whether such mine is one to which the Acts apply or not.

6. In order to ascertain whether the provisions of the Acts are observed both above ground and below ground, the inspector is authorised to examine any mine by day or night, so however, as not to impede the working there of; and owners and agents, and all employed in or about the mine are bound to render him every assistance in conducting such examination.

7. Each inspector is to make to the Secretary of State an annual report of his proceedings to be laid before Parliament, and when directed is to make a special report as to any mine accident attended with loss of life or personal injury. Such special report will be made public in the mode and at the time directed by a Secretary of State.

Restrictions as to Employment underground.

8. Women and Girls of any age may not be employed at all.

9. Boys under 12 may not be employed at all.

10. Boys of 12 and under 13, and Male Young Person of 13 and under 16, may be employed not more than 54 hours a week, or more than 10 hours a day, and

are to be allowed an interval of 12 hours for rests between each two consecutive periods of employment, except that an interval of 8 hours will suffice: -

a. between Friday and Saturday;
b. between any two consecutive periods of employment in the case of a boy or male young person who does not during the interval return to his ordinary place of residence; provided that he is not employed more than 40 hours in the week.

11. A week begins at 12 p.m. Saturday, and ends at 12 p.m. the Saturday following

12. A period of a person's employment begins at the time of his leaving the surface and ends at the time of his returning to the surface.

13. The immediate employer of any boy of 12 and under 13, and of any male young person of 13, and of any male person of 13 and under 16, is not to take him below ground until he has reported his intention so to do to the owner or agent, or to some person appointed by the owner or agent.

Who may be employed about an Engine.

14. The person who is in charge of any engine, windlass, or gin, howsoever worked, which is used for the purpose of taking persons up or down or along any shaft, inclined plane or level (being either an entrance to a mine or a communication from one part of a mine to another) or who is in charge of any part of the tackle of such engine, windlass, or gin, must be a male of at least 18 years of age.

If the engine, windlass, or gin is worked by an animal, then not the driver but the person under whose directions the driver acts is to be deemed the person in charge; but in that case the driver must not be under 12 years of age.

Penalty for Misrepresentation of Age

15. Any parent or guardian misrepresenting the age of any person with a view to procuring him employment in contravention of the principal Act will be liable to punishment.

Wages.

16. Not to be paid in Public Houses &c. – Wages are not to be paid on any premises used for the sale of intoxicating liquor, or in any place contiguous to such premises.

Fencing abandoned Mines

17. **Rule:** —Subject to the exception presently mentioned, where any mine is abandoned or the working thereof discontinued (at whatever time such abandonment or discontinuance occurred), the top of the shaft and any side entrance from the surface must be kept securely fenced by the owner of the mine or the persons interested in the minerals thereof.

Exceptions: – This rule does not apply in the case of a mine abandoned or discontinued before 10th August 1872, except to a shaft or side entrance situated within 50 yards of a highway, road, footpath, or place of public resort, or in open or unenclosed land, or except to a shaft or side entrance which is specifically required by the inspector of mines for the district to be fenced.

General Rules

18. The principal Act prescribes General Rules (set forth at length hereunder, paragraph 44) which are to be observed, so far as is reasonably practicable, in every mine.

Special Rules.

19. In addition to the General Rules, but not at variance with them, each mine may have its own set of Special Rules, framed to meet the special circumstances of the mine.

20. **Object:** —The object of special rules is—

1. To prevent dangerous accidents.
2. To provide for the proper discipline of those employed in the mine.

21. **Force:** –Special rules have the same force as if they were contained in the principal Act.

22. **How Made:** – Special rules are prepared in the first instance on behalf of the owner, and are together with a notice, to be posted up during a fortnight on the premises; such notice to be printed and to be to the effect that at the end of the fortnight, the rules will be submitted to the inspector of mines for the district, and that, in the meantime any person employed in the mine is entitled to forward any objection to the inspector at his address, as stated in the notice. On the expiration of the fortnight the owner or agent may transmit the proposed special rules to the inspector, together with a certificate that such rules and notices had been posted up as aforesaid. Such certificate must be signed by the person transmitting the same.

23. A Secretary of State may, within 40 days, object to the special rules if they are insufficient or unreasonable, and require them to be modified. These requisitions must be complied with, or else referred to arbitration.

24. After 40 days special rules, if not objected to, become established, and are to be signed by the inspector of the district.

25. **Amendment:** —At any time special rules may be amended in like manner at the instance of the owner or agent.

Also, a Secretary of State may at any time propose special rules where none exist, or amendments to existing special rules and such proposals must be complied with, or referred to arbitration.

26. **Publication:** –A copy at full length of this abstract, and of the special rules (if any') when made, together with the name and address of the inspector of the district, and the name and address of the owner or agent of the mine must be kept posted up on the premises, and a copy thereof supplied gratis on application.

27. Any person who pulls down the documents so posted up is liable to punishment.

As to dangerous practices not expressly prohibited.

28. If in any respect a mine is carried on in a manner which though not expressly forbidden by the terms of the principal Act or by special rules, is nevertheless dangerous, the inspector may require the matter to be remedied, and the owner or agent is bound to comply with the requisition, or else submit to a reference to arbitration.

Penalties

29. Breach of a general rule by any person, or of a special rule by any person bound to observe the same, is an offence against the principal Act.
And in the event of such an offence being proved to have been committed, the owner and agent will also each of them be guilty will also each of them be guilty of an offence "against the principal Act, unless he proves that he had taken all reasonable means to prevent the offence by publishing and to the best of his knowledge enforcing the rules.
A like liability arises with respect to other provisions of the Acts, the breach of which is declared an offence against the principal Act.
30. The penalty for an offence which by either of the Acts is declared to be an offence against the principal Act (except when another penalty is expressly specified) is—

(a.) If the offence he committed by a person employed in or about the mine Not exceeding £2

(b.) If committed by the owner or agent Not exceeding £20,
and a further penalty not exceeding £1 per day for every day that such offence continues to be committed after a written notice from the inspector,

31, Where, however, the court is of opinion that the offence is one which is reasonably calculated to endanger the safety of those employed in or about the mine, or to cause serious personal injury or dangerous accident, and was committed wilfully by the personal act, personal default, or personal negligence of the accused, and that a pecuniary penalty will not meet the circumstances of the case, the punishment may be imprisonment, with or without hard labour, for three months.
32. An appeal lies in case of imprisonment or half the maximum penalty has been adjudged.
33. An offence can only be summarily prosecuted within three months after the date when it was committed.
34. An offence by an owner or agent cannot be summarily prosecuted except either by an inspector of mines or with the consent of a Secretary of State.
35. The owner or agent may, if he think it fit, be sworn and examined as an ordinary witness, if charged in respect of any contravention or non-compliance by another person.
36. Penalties for neglect to send notice of accident or for any offence against the principal Act which has occasioned loss of life or personal injury may be directed by the Secretary of State to be paid to the sufferers or to the relatives of deceased sufferers, but not to any person who has contributed to neglect or offence.

Register.

37. The owner or agent must keep a register containing the particulars prescribed by section 6 as to –

(a.) Boys of 12 and under 13
(b.) Male young persons of 13 and under 16
(c.) Women above 18
Employed below ground
(d.) Male young persons of 13 and under 18

(e.) Female young persons of 13 and under 18
(f.) Boys of 8 and under 13
(g.) Girls of 8 and under 13
Employed above ground

This register must be kept either in the office at the mine, or in the principal office of the mines belonging to the same owner in the same district.

The register is to be produced to the inspector' who may inspect and copy it.

38. Subject to the exception presently mentioned, the owner or agent of each mine is, on or before the 1st of February in each year, to send to the inspector of the district a return, in form to be prescribed by a Secretary of State, specifying, as to the persons employed in or about the mine and the mineral produced from the mine, the particulars mentioned in sec. 1 of the amending Act.

Exception: —In any mine where not more than 12 persons are employed underground, the returns specifying the quantity of mineral produced from such a mine shall be made by the barmaster officer, if any, employed to collect the dues or royalty; and where there is any barmaster or other officer, the owner or agent is not required to send any return specifying the number of persons employed in or about the mine.

Plans

39. Except in the case of a mine where not more than 12 persons are ordinarily employed below ground, the owner or agent is to keep an accurate plan and section or a tracing thereof of the mine, showing the workings up to at least six months previously, except workings last discontinued before 1st January 1872. This plan is to be kept either in the office of the mine, or in the principal office of the mines belonging to the same owner in the same district, and is to be produced to the inspector of mines for him to examine, but not to copy. If required, the owner or agent is to mark on the plan the workings up to the time of production.

40. **Plans of Abandonment:** —Within three months of the abandonment of a mine, (except in the case of a mine where not more than 12 persons have ordinarily been employed below ground,) a plan and section or tracing thereof, showing the boundaries of the workings, are to be sent by the owner to a Secretary of State as a mining record, not, however, to be seen until after the lapse of 10 years, except by an inspector or under a licence from a Secretary of State.

Notices.

41. Notices of accidents in or about a mine must be sent by the owner or agent of the mine to the inspector of mines for the district as follow:

1. Of any accident causing loss of life or serious personal injury within 24 hours after such accident.
2. Of any accident from explosion of gas, powder, or steam boiler, causing any personal injury, within 24 hours after such accident.
3. Of any death resulting from personal injury caused by an accident previously reported within 24 hours after the death comes to the knowledge of the owner or agent.

42. Also, unless in the case of a mine where not more than 12 persons are ordinarily employed ground, notices must be sent by the owner or agent to the inspector of mines for the district within 2 months after the event;

1. Of the commencement of any working for the opening of a new shaft.
2. Of the abandonment of a shaft.
3. Of the re-commencement of the working of a shaft after an abandonment for more than two months.
4. Of any change in name of the mine, or in the name of the owner or agent except that in the case of a partnership working a mine within the Stannaries of Devon and Cornwall, notice of every change in the purser of the partnership may be given, instead of notice of every change in the membership of the partnership.
5. Of any change in the officers of any incorporated company owning a mine.

Coroners Inquests.

43. In the case of an inquest being held concerning a death caused by a mine accident unless the inspector or some other person on behalf of a Secretary of State is present, the coroner is to adjourn the inquest, and to send to the inspector four day's notice of the time and place of the adjourned inquest.

If, however, only one life has been lost by the accident, and 48 hour's notice of the time and place of holding the inquest has been sent to the inspector, the inquest need not be adjourned if the majority of the jury think it unnecessary.

At the inquest, the inspectors may examine any witness subject to the order of the coroner.

If the inspector is not present and evidence is given of any neglect having caused or contributed to the accident or of any defect in or about the mine appearing to acquire a remedy, the coroner is to send to the inspector notice thereof in writing.

In the event of a fatal accident occurring in a mine and an inquest being held, no person who is employed in that mine or is concerned in its management or has a personal interest in that mine is qualified to serve on the jury.

General Rules.

44. **The following are the general rules:** –

(1.) An adequate amount of ventilation shall be constantly produced in every mine to such an extent that the shafts, winzes, sumps, levels, underground stables, and working places of such mine and the travelling roads to and from such working places, shall be in a fit state for working and passing therein.

(2.) Gunpowder or other explosive or inflammable substance shall only be used underground in the mine as-follows:

- (a.) It shall not be stored in the mine.
- (b.) It shall not be taken into the mine, except in a case or canister containing not more than four pounds
- (c.) A workman shall not have in use at one time in any one place more than one such case of explosives.
- (d.) In charging holes for blasting, except in mines excepted from the operation of this section by the Secretary of

State, an iron or steel pricker shall not be used, and a person shall not have in his possession in the mine underground any iron or steel pricker, and an iron or steel tamping rod or stemmer shall not be used for ramming either the wadding or the first part of the tamping or stemming powder.

(e.) A charge of powder which has missed fire shall not be un-rammed.

(3.) **Every underground:** plane on which persons travel, which is self-acting or worked by an engine windlass, or gin, shall be provided (if exceeding 30 yards in length) with some proper means of signalling between the stopping places and the ends of the plane, and shall be provided in every case, at intervals of not more than 20 yards, with sufficient manholes for places of refuge.

(4.) Every road on which persons travel underground, where the produce of the mine in transit excels ten tons in any one hour over any part thereof, and where the load is drawn by a horse or other animal be provided, at intervals of not more than 100 yards, with sufficient spaces for places of refuge, each of which spaces shall be of sufficient length, and of at least 3 feet in width between the waggons running on the tram road and the side of the road; and the Secretary of State may, if he see fit, require the inspector to certify whether the produce of the mine in transit on the road aforesaid does or does not ordinarily exceed the weight as aforesaid.

(5.) Every man-hole and space for a place of refuge: shall be constantly Kept clear, and no person shall place anything in a man-hole or such space so as to prevent access thereto.

(6.) The top of every shaft which was opened before the commencement of the actual working for the time being of the mine, and has not been used during such actual working shall, if so required in writing by the inspector of the district, be securely fenced, and the top of every other shaft which for the time being is out of use, or used only us an air shaft, shall be securely fenced

(7.) The top and all entrances between the top and bottom of every working or pumping shaft shall be properly fenced, but this shall not be taken to forbid the temporary removal of the fence for the purpose of repairs or other operations, if proper precautions are used.

(8.) Where the natural strata are not safe, every working or pumping shaft shall be securely cased, lined or otherwise made secure.

(9.) Where one portion of a shaft is used for the assent and descent of persons by ladders or a man-engine, and another portion of the same shaft is used for raising the material gotten in the mine the first mentioned portion shall be cased or otherwise securely fenced off from the last-mentioned

(10.) Every working shaft in which persons are raised shall, if exceeding fifty yards in depth and not exempted in writing by the inspector of the district, be provided with guides and some proper

means of communicating distinct and definite signals from the bottom of the shaft and from every entrance for the time being in work between the surface and the bottom of the shaft to the surface and from the surface to

the bottom of the shaft and to every entrance for the time being in work between the surface and the bottom of the shaft.
(11.) A sufficient cover overhead shall be used when lowering or raising persons in every working shaft, except where it is worked by a windlass, or where the person is employed about the pump or some work of repair in the shaft, or where a written exemption is given by the inspector of the district.
(12.) A single linked chain shall not be used for lowering, or raising persons in any working shaft or plane except for the short coupling chain attached to the cage or load.
(13.) There shall be on the drum of every machine used for lowering or raising persons such flanges or horns, and also if the drum is conical, such other appliances as may be sufficient to prevent the rope from slipping.
(14.) There shall be attached to every machine worked by steam, water, or mechanical power, and used for lowering or raising persons, an adequate break, and also a proper indicator (in addition to any mark on the rope) which shows to the person who works the machine the position of the cage or load in the shaft.
(15.) A ladder permanently used for the ascent or descent of persons in the mine shall not be fixed in a vertical or overhanging position, and shall be inclined at the most convenient angle which the space in which the ladder is fixed allows, and every such ladder shall have substantial platforms at intervals of not more than 20 yards.
(16.) If more than 12 persons are ordinarily employed in the mine below ground, sufficient accommodation shall be provided above ground near the principal entrance of the mine, and not in the engine-house or boiler-house, for enabling the persons employed in the mine to conveniently dry and change their, dresses.
(17.) Every fly-wheel and all exposed and dangerous parts of the machinery used in or about the mine shall-be and be kept securely fenced.
(18.) Every steam boiler shall be provided with a proper steam gauge and water gauge, to show respectively the pressure of steam and the height of water in the boiler, and with a proper safety valve.
(19.) No person shall wilfully damage, or without proper authority, remove or render useless, any fencing, casing, lining, guide, means of signalling, signal, cover, chain, flange, horn, break, indicator, ladder, platform, steam gauge, water gauge, safety valve, or other appliance or thing provided in any mine in compliance with the Metalliferous Mines Regulation Act, 1872.

Appendix 11

Poetry of the Lead Miners

Introduction

The following poems were either written by men who worked in the lead mines of the North Pennines, or were written about lead mining. The poems of Featherstone Martindale were obtained from the Hexham Herald, and those by Richard Watson from a book of verse, "Poetical Works of Richard Watson" published by him in 1884.

The Authors

Featherstone Martindale was the son of Jonathan Martindale a lead miner, and Rebecca Gill, who were married on 18 June 1831. He had a brother Joseph and two sisters, Elizabeth and Mary. According to the 1881 census Featherstone Martindale was also a lead miner and had married Elizabeth, were living at Shallow Ford, Stanhope, he was aged 45 years and Elizabeth 43 years. He had worked for the Beaumont lead mining company at Slitt mine, Weardale. His death was reported in the Hexham Herald of 15 November 1890.

> "There died at Shallow Ford in Weardale, on Saturday last, a well-known Weardale poet Mr Featherstone Martindale in the 55th year of his age. His remains were interred at Westgate on Tuesday in the presence of a large gathering. Deceased who had been ailing in health for some time was the recognised bard of the valley. Several pamphlets in verse survive the author who was a respected member of the Wesleyan Society, to which his last lyric was dedicated. His verses possessed merit, being full of poetry and lofty thought, and rhymed pleasantly as well."

Census information:

In 1841, at Wood Meadows, Jonathan Martindale, lead miner, aged 35, wife Rebecca (Gill, married 18th June 1831) aged 30, children Esther 8, Featherstone 5, Elizabeth 3, and Mary 2 months.
In 1851, at Shallow Ford, Jonathan Martindale, lead miner, aged 46, wife Rebecca 43 (born Allendale), children Featherstone, lead miner, aged 15, Elizabeth 12, Joseph 7, and Mary 3.
In 1861, at Shallow Ford, Featherstone Martindale, lead miner, aged 25, his wife Elizabeth aged 23, children Jonathan 2, and Sarah 1 month.
In 1871, at Shallow Ford, Featherstone Martindale, lead miner, aged 36, his wife Elizabeth aged 33, son Jonathan 12, and daughter Sarah 10.
In 1881, at Shallow Ford, Featherstone Martindale, lead miner, aged 45, and his wife Elizabeth 43.
In 1891, at Shallow Ford, Elizabeth Martindale, widow, aged 53. In 1901, at Albury Park Road, Tynemouth, Thomas M Burnside, provisions merchant, aged 45, his wife Sarah 39, children Wilfred M. shopkeepers clerk, aged 18, Stanley M. grocers assistant, aged 17, mother in law Elizabeth Martindale, widow, aged 63, and visitor Lily Walton aged 27.

Richard Watson was born on 16 March 1833, the son of William (a lead miner) and Rebecca (Walton) Watson, who had married in June 1824. He had one brother, William, and four sisters, Elizabeth, Ann, Mary, and Martha; they lived at Middleton in Teesdale, in Stotley Lane before moving to a larger house at High Dyke. When Masterman Place in Middleton was completed by the London Lead Company, the family moved into one of these new cottages. His father worked at Lodge Syke lead mine.
Richard and his brother and sisters were educated at the Company school at Middleton, the school master at that time being John Hyslop. Richard was seen as a clever child and was given extra lessons by John Henry Brown the Rector of Middleton. His father William died in July 1846. It was usual for a boy to remain at school until the age of twelve years, and girls until fourteen; but following his fathers death Richard was allowed to leave school early (10 years old) by the Company, in order that he could work as a Washer boy, to earn money for the family. He married Nancy Brumwell (aged 20 years) from Ettersgill Upper Teesdale, at Barnard Castle registry office on 24 September 1857, at this time he was working at Coldberry mine. They moved to Scotland, Leadhiils, around 1865, they moved back to Middleton in 1875, and lived at Cross House at Holwick, before moving to Newbiggin, at Hill Top cottages; in order that they would be nearer Richards place of work. Richard was working at Little Eggleshope. When production was cut back at Little Eggleshope Richard became unemployed, so the family moved to Coply Lane to be nearer the colliery (Woodland colliery) in which he had found work.[1]
His work was published in the Teesdale Mercury, and his book of "Poetical Works" was first published in 1862. He died after an illness on 2nd October 1891, aged 58 years.[2]

Census information

In 1841, at Middleton in Teesdale, William Watson, miner, aged 40, his wife Rebecka, aged 40, children Mary 10, Richard 8, Martha 5, and William 2 years.
In 1851, at Middleton, Rebeca Watson, widow, aged 51, son Richard, lead miner, aged 18, and daughter Martha 14.
In 1861, at High Dyke, Middleton, Richard Watson, lead ore dresser, aged 28, his wife Ann 24, and children Rebecca 3, and Elizabeth A. 1.
In 1871, at Leadhills, Lanarkshire, Richard Watson, lead miner, aged 38, his wife Ann 32, daughters Rebecca 13, Lilly 11, and Margaret 6.
In 1881, at Holwick, Teesdale, Richard Watson, lead miner, aged 48, his wife Ann 43, children Elizabeth Ann, domestic servant, aged 21, born Middleton, Margaret, domestic servant, unemployed, aged 16, born Frizington, Cumberland, Mary 9, born Leadhills, Martha 6, born Leadhills and Rebecca 3, born Holwick.
In 1891, at California Road, Middleton, Richard Watson, general labourer, aged 58, his wife Ann 53, children Martha 15, Rebecca 12, and grandson Richard 4.
In 1901, at Hude, Middleton, Ann Watson, widow, aged 65, and grandson Richard Watson, Whinstone quarryman, aged 14

M. Wilson Unfortunately I have been unable to find a great deal about this person other than he was a local Hexham poet.

S.M. I have no information at all about this poet.

Miners Farewell[3]
To Allenheads, in May 1849.

Farewell thou dear and lovely place,
We'll never see thee no more
Nor there attend the means of grace,
As we oft did before.

The natives were in friendship bound
And harmony did reign;
The pleasure we in thee have found.
We never shall find again.

Tho' far from rich we were content
With our sufficient store, [sent,
And prayed the Power our blessings
Might send them evermore.

We toiled for our daily bread,
And drew the metal forth;
Contentment in the vale to spread,
And to enrich the earth.

At public days to Allen town,
We often did repair;
Oft took a glass as we will own,
To drive away du l care.

If some left town before us, we
Desired them to wait;
If not we'll follow presently,
Bie you reach Sinderhope Gate.

Or if you call at Sparty Lea,
Got to the Blacksmiths shop
And there you will find company,
And for us you must stop.

While Crawhall was at Allenheads,
Its wealth did much increase:
Elate the miners raised their heads,
The land was blest with peace.

Till Sopwith came the Upas Tree,
To poison all the Dale,
And drive us from our country,
And make us weep and wail.

At doing mischief he is apt
It seems to give him joy;
He the firm bond of friendship snapt,
Delighting to anoy.

His ignorance with pride allied,
Has fearful havoc made;
The sneaking agents with him side
Then ask. Who is afraid?

The men who should have kept him
Did hound him sorest on, (back
Joined with this Jehn in a crack,
And confidence is gone.

“Self rules the roost & claps his wing,
Cries Cock a doodle doo;
While we were there we saw such
As would astonish you. [things,

Now we on other sights must look,
In a far distant land,
While those we leave behind must
The tyrants stern command. (brook

Willing to work but not to he
Sopwiths devoted slaves,
In a far distant country,
We go to make our graves.

We can’t forget the ties that bind
Us to our long lov’d home;
Our kindred dear - our neighbours
Or what may be to come.

But come what will, we will not stay,
In our devoted land,
Nor e’er become a tyrant’s prey,
Or yield to his demand.

In number we are fifty eight,
To Illinois we go,
Far from the spot of our delight,
Either for weal or woe.

Upon the twenty first we sail,
And leave our friends behind,
Tho’ far away we will not fail
To keep them still in mind.

We'll face the blowing of the wind,
The stormy raging sea,
Poor, yet to crouch no - ways inclined,
We swear we will be free,

We'll seek our bread in foreign clime's
And we'll depend on God;
Far from the despot and his crimes,
We are going off abroad.

He may enquire, Why go away,
Why not submit to me?
We answer hateful tyrant nay,
We value liberty.

We will not bear thy hated yoke,
But we will go to those
Who the' bonds of oppressors broke
For freedoms sacred cause.

We leave our country with a sigh,
We leave thee in disdain,
Remember Sopwith thou must die,
We tell the so again.

The evil thou hast done of late
Thou never can undo;
Pity the Key of Allen's fate
Was ever left to you.

To Allendale and Allenheads
We fondly say Farewell,
Of the proud tyrant and his deeds,
In other lands we'll tell.

By M. Wilson, Hexham

The Lead Co. and Nenthead Pays.[4]

We live in a time of improvement,
Science and art have full swing;
And scarcely a day passes over,
without bringing out a new thing.

Nenthead is a place of renown,
For its riches of silver and lead,
With one thousand five hundred inhabitants,
Which by it are earning their bread.

For many long years we've been getting
our money once a year, which we made,
Excepting a little bit lenning,
Every month the Company paid.

The Company has wisely considered
To knock these big pays on the head,
And pay every man his own quarterly,
The money he has honestly made.

May the Company go on and still prosper,
'Tis the wish of the workmen, I say
May they cut a good mine in the brewery
And may they make money like hay.

S. M.

Winter, War, and Want.[5]

Cold winter appears in wild terror to reign,
O'er mountain and meadow, o'er city and plain;
The ice fettered streamlets have now ceased to flow,
And beautiful landscapes lie buried in snow.
The flowers are all dead which bloomed at our feet,
And muffled in snow is the sound of the street,
Wild wintery winds whistle in madness and mirth,
And lone poverty shivers on the fireless hearth;
And pale orphanage dreams on a supperless bed
Of palaces of plenty where children are fed.
The brave honest workman sits sad in his chair,
And virtue lies smitten on the verge of despair.
Wise Whigs and wild Tories make up aloud clamour,
But the needs of the nation's the sound of the hammer.
Cold, cold as the snow-wreaths that cover the hills
Are the artful orations of old Parliament swells.
Sad, sad is the news from the sullen Afghan.
What-what is thy policy, mysterious man?
Is the dire cannon and sword, in the lust of thy power,
Are these the best gifts to the famishing poor?
The deep wail of the mass is for cotton to spin,
And limestone, and iron, and lead ore to win.
And peace and prosperity to millions will bring.
Then hush the wild war-cry of ambition and clamour,
The glory of Old England's the stroke of her hammer.
O God of the poor, the fatherless and friendless,
From the horrors of bloodshed vouchsafe to defend us,
And may the brave sons of Britain find peaceful employment
And our castles and cottages alike ring with enjoyment.
Then silence the wild war-cry of tumult and clamour,
The life of Old England's the ring of the hammer.

F. Matindale
Westgate.

The Lead Miner's Plaint[6]

In garments of grandeur the meadows are clad,
And rich blossoms adorn the trees of the wood;
But the hearts of our dalesmen are drooping and sad,
For their homes are devoid of cash fuel, and food.

Lonely they oft wander on the banks of the Wear,
And watch the wild waters roll murmuring past;
The voice of the surges - like the words of their prayer -
Grow sadder and deeper the longer they last.

The old lead mines are closed, the source of our bread,
Hewn out by the hands of our brawny ancestors,
Poor, hard toiling miners, it is well they are dead,
And freed from the ills which daily sweep o'er us.

Beneath the church spire in the quiet green hollow,
We laid them to rest on death's dreamless pillow.
There sunbeams oft linger on the white daisied sod.
Where sleepeth our kindred, whose sons are with God.

Such memories must bind us to our dear native hills,
Though foreigners should reap the rich of the sills.
Work - work is our wealth, and this seems denied us,
And new forms of anguish threaten to o'erwhelm us.

Cold rusty, and dormant are picks, hammers, and drills,
And locked in dead silence are the huge crushing mills,
And bloodless brow'd children have forgotten their play,
And hang like blanched roses around the bare tray.

We revile not our master, we chide not the state,
But bear faultless and firmly our indigent fate,
In our travail of grief through the starless night,
Love's high priests will lead us, and heaven be our light.
Behind the crude curtain Jehova is working,
And "Lo I am with you" is his law everlasting.

Blessed balm of the soul to sufferers given,
Sweet dewdrops of comfort descending from heaven.
Then hush thy sad murmurs, pious miner and friend,
For in heaven thy taper shall shine without end.

F. Martindale
Westgate, 25th June 1879.

Autumn[7]

The air is pensive, cold and gloomy,
Dense sluggish mists hang on the distant hills;
The hoarse - voiced warring wintry winds
Drown the soft music of the rippling rills.

What sudden changes mark the rolling year!
Sweet spring adorns the fields in living green;
Bright summer brings her golden fruits and flowers -
Then winter reigns, and o how changed the scene.

Around me withered leaves are falling fast,
Upon earth's bare and chilling pulseless breast;
O when life's year of changeful scenes are past
Calm as a falling leaf may I sink to rest.

F. Matindale
Westgate.

The Wear Valley[8]

Cold winter in wild terror reigns
In the valley of the Wear;
In the lanes, the fields, the woodlands,
His icy hand is everywhere.

There are barred and empty dwellings
In the Valley of the Wear;
And hollow winds, through broken roofs,
Whistle degrees of despair.

Crushed with sorrow are the miners
In the Valley of the Wear;
There are words of woeful meaning
In the pious father's prayer.

There is strange and heartless dealing
In the Valley of the Wear;
Direful acts that whisper sadly
That a despot ruleth there.

There are mineral stores of wealth
In the Valley of the Wear;
Then why should honest miners not
Of its rich bounties share?

But a brighter day is dawning
In the Valley of the Wear;
When secret wrongs and open curses
Shall not mingle in the air.

F. Matindale
Westgate, 15 January 1882.

The Dark side of Things[9]

Who tramples on his fellowman
That he may thus succeed
In lording self, and hoarding wealth
Is a hollow wretch indeed.

With idle tongues and artful wrongs
Men torture one another;
Ten times a day some will betray
An unsuspecting brother.

When morning dawns the gossip runs
To some kind neighbour's door,
And plant a thorn of envy born,
Which grieves them evermore.

Were social lies transformed to flies
To sting the offending race;
No lady fair, though veiled with care,
Could keep them off her face.

To grasp a groat what numbers float
And press each other down;
And striplings caught in a leaky boat
Oft flounder, sink, and drown.

With frenzied brain fools risk the game,
And bet their last bright shilling;
Then seize the knife in horrid strife,
The nether regions filling.

The rest is known to God alone-
We need not travel farther,
Enough to say the world to-day
Is full of moral disorder.

F. Matindale
Westgate, 15 May 1882.

Weardale "Blacklegs."[10]

Deaf to pity's tender pleadings,
Destitute of generous feelings,
Starving hosts by double dealings -
Scheming blacklegs.

Patriots freely give their gold
To feed and cloth miners old,
Whilst your hearts are basely cold -
Selfish blacklegs.
Sunk ye are in deeds of shame,
Cause of famine grief, and pain,
Dalesmen loath your very name -
Sneaking blacklegs.

Wrecking churches, mines and homes,
Filling earth with sighs and groans,
Crushing womens hearts like stones -
Ruthless blacklegs.

Bound not of your vain resources,
Damning gold is in your purses,
Stained with bribes, and blood, and curses -
Woeful blacklegs.

May God the humble poor release,
And ghostly, hungry ruin cease,
And miners reap and honoured peace,
And brotherhood.

F. Matindale
Westgate 23rd March 1883

The Bitters Bitten.

A True Story

Gib Tom and Robin Allinson,
In Teesdale were known well;
They carriers were and neighbours too;
And did at Skears dwell.
And each a stud of ponies kept,
Brought from the Highland hills,
To take the lead ore from the mines,
Unto the smelting mills.

Stout hardy, well-built men were they,
Fit to stand any weather;
And as their business was the same,
They often went together.
But they were vain and quarrelsome,
And very ill-tongued too;
At fairs and at elections were
The cause of many a row.

And often they were heard to say,
No two men of the place,
In an encounter with the fist,
They were afraid to face.
But ‘tis a saying true that those
Who love to fight and fratch,
Have never far to go before
They fall in with their match.

As they passed Stotley Carse one day,
A tinker they espied,
Stretch’d fast asleep upon the grass
That grew by the roadside.
Said Tom to Rob, “We’ll have some fun,
We have no fear of blows;
We’ll steal up to him while he sleeps,
And we will pull his nose.”

The plan pleased Robin, who would not
At silly actions stick;
“We’ll prove the tinker’s pluck,” said he,
“Twill be a clever trick.”
For certainly so large a nose
They’d never seen before;
And like a trumpet’s martial blast,
Loud did the tinker snore.

They softly went up to the man,
Unwitting of his foes;
Tom laid his hand upon his face,
And sized him by the nose.
When the rude grasp the tinker felt,
He sprang up with a bound;
And by a well directed blow,
Fell'd Gib Tom to the ground.

And quick as lightning turning round,
He did Gib's partner meet;
And Rob, with all his boasting soon
Lay breathless at his feet.
Tom soon recovered, and arose
The conflict to maintain;
'Twas to receive another blow
Which sent him down again.

And also, Robin in his turn
Had the same fate to share;
That they had caught a Tartar fierce
Too late they were aware.
The tinker o'er his fallen foes,
Stood calm with watchful eyes;
To strike them to the ground whene'er
They did attempt to rise.

Batter'd and bruis'd and vanquish'd by
His crushing heavy fist;
With shame they had to own their fault,
And beg him to desist.
"You've had enough," said he," and learned
With tinkers not to fight;
You played a foolish joke on me,
And I have served you right.

"Go on your way, and be more wise,
And this advice give I;
Whene'er you see a sleeping dog,
Pass on and let it lie."

Richard Watson.

The Long man of Bollihope Fell

O’er Westerhope, far in the west,
The sun was sinking to his rest
In glorious splendour to behold,
Tingling the clouds with burnished gold,
Which o’er the azure sky above
In wild romantic forms did move.
The shrill-toned plover loud did cry,
And becking grouse went whirring by.
Far to the south, o’erspread with trees,
Appear’d the distant vale of Tees;
And Shackleborough’s rugged height,
In hoary mist, nigh hid from sight;
And, northward, Wear’s beauteous dale,
With Bollihope’s sweet rural vale;
And, in the background, Rookhope Gill,
With Stanhope Burn and Warden Hill.

Such were the scenes of closing day,
As two men slowly took their way,
Where Bollihope’s limpid waters glide,
And climbed the dark-brown mountain side,
Among the moss and waving ling,
’Twixt Polo Pike and Shaftwell Spring.
One was a tall, dark-visaged wight,
Approaching to a giant’s height;
His curling locks, of raven hue,
O’erspreading his dark and massive brow,
His robust frame, and piercing eyes,
Seem’d fitted for some bold emprise.
The other traveller was but young,
Yet active, vigorous and strong;
His flaxen hair, and ruddy face,
Betoken’d him of Saxon race;
While flashing from his dark-blue eye,
Was purpose bold, and courage high.
As up the mount he did advance,
He often cast a sidelong glance
At his companion, – in the way
As lion fiercely views his prey.

They reached the rugged mountain height,
Where Tees’ valley meets the sight;
To rest, they sat down on the bent,
Fatigued by the steep ascent.
Then spoke the dark gigantic man,
And to his comrade thus began:-
“Let us not linger on this height,
Bright Phoebus seeks the shades of night,
The prowling hawk begins to wake,

The timid dear hath sought the brake,
The dusky veil of evening chill
Now spreads around, o’er dale and hill;
Then let us here no longer stay,
But hasten onward on our way.”

“Stay!” said the youth, “before we go
I have a secret thou shalt know;-
Before we leave this barren fell,
A tragic story I will tell.”
Then, pointing backward, down the vale,
He thus commenced his mournful tale:-

“Down yonder dale, beside that wood,
A humble thatched cottage stood;
There, in that calm sequestered place,
An aged couple passed their days;
Far from all bustle, noise, and strife,
They led a sweet, contented life,
And felt that happy peace of mind
Which higher circles seldom find.
Two children had that honest pair,
A blooming son and daughter fair;
Ellen was their daughter named,
For loveliness and virtue famed.
Her brother Arthur oft would leave
His home and hunt the deer till eve,
For in the chase well was he known,
From Killhope Fell to Stanhope town.

“One night, when fiercely blew the blast,
And rain descended thick and fast,
A stranger to their cottage came;
Hubert, he told them, was his name.
He said he’d travelled far that day,
And on the moor had lost his way,
And strayed o’er deep morasses wide,
Until their cottage he espied.
The old man bade him stay all night,
And journey in the morning light,
And kindly pressed him still to share
With them their homely rustic fare;
Meanwhile, fresh garments they supplied,
And o’er the fire his drench’d clothes dried.
Mirthfully the evening pass’d –
They were delighted with their guest,
And all invited him to stay,
Whene’er again he came that way.
After that, he ne’er forgot
To pay a visit to the cot.

“Ellen’s heart had little rest,
Love’s tender flame had touched her breast;
For what had cheered her mind before
Pleased and delighted her no more.
Oft ’neath the elm tree was she known
To sit and meditate alone,
And linger at the twilight hour,
And look for Hubert o’er the moor.
Poor girl! the world she had not prov’d,
She little knew the man she lov’d;
His wickedness to her unknown,
She framed his feelings as her own.
Nor were her parents e’er aware
They entertained a villain there,
Who, like a wolf, rav’nous and bold,
Was scheming how to rob their fold.
Oh! who can paint the dire despair
That did their aged bosoms tear,
When one bright morn they rose from bed
And found their guest and daughter fled.
And thought they sought the country round
The fugitives could not be found!
They did not long survive the blow,
Cold death soon eased them of their woe;
And now their earthly toils are past,
Their souls the blessed Virgin rest!

“Arthur, of home and friends bereft,
His native valley straightway left;
To him it could no pleasure yield, –
He went and sought the battle-field,
In his king and country’s cause,
The haughty foreigner to oppose.
Long time he could no tidings hear
Of Hubert and his sister dear;
At length he heard the tidings sad,
His sister Ellen, she was dead!
Had he been able e’er to trace
Her vile seducer, mean and base,
He would have stabb’d him where he stood, –
Wash’d out their woes in his heart’s blood!

“Seven long years,” he cried, “are past,
The hour I’ve sought has come at last;
I’m young Arthur, thou must know,
And thou, base villain, art my foe;
Here we meet, in mortal strife, –
Draw thy sword, – defend they life!”

The fiercely gleam'd dark Hubert's eye,
As to the youth he did reply, –
"Hast thou come with me on this fell,
Thus an old woman's tale to tell,
And vilely challenge me to fight,
Though I ne'er saw thee till this night?
Thy parents, sister, and their cot,
I tell thee, now, I knew them not!
Then keep thy taunts within thy mouth;
Remember thou art but a youth,
And but for that, I would have soon
With my broad falchion hewn thee down!"

"Base liar! –" said the fair-haired youth;
"Thou stranger to remorse or truth;
Dost thou then think I know thee not,
That thy cursed form could be forgot?
No, wretch! thy face I could have found
Had there been thousands standing round.
Wert thou as tall as yon pine trees
That rustle in the northern breeze,
Yet I would not have been afraid
To combat with thee, blade to blade;
And I will satisfaction have,
Before this mountain-top I leave!"

"Then, by the powers of earth and heaven,
That satisfaction shall be given;
Thou shalt not wait;" thus Hubert spoke,
And at young Arthur dealt a stroke;
But Arthur had the movement spied,
And nimbly dash'd the blade aside;
Then, hand to hand, they both engaged,
And long and fierce the combat raged.
Hubert's wilder passions rose,
And faster still he showered his blows;
And as he on young Arthur pressed,
To end at once the fierce contest,
He in his breast received a wound,
Which struck him, dying, to the ground!

"Arthur! thou art avenged at last,
I feel lif's tide is ebbing fast;
Too long from duty's path I've swerved,
My fate is what I have deserved;
In wickedness my life has past,
And like a wretch I die at last!"

Upon the turf he dropped his head,
And his immortal spirit fled.

Early on the ensuing day,
Some travellers chanced to pass that way,
And Hubert's stiffened body found,
And laid it on the mossy ground;
And, now, a grey stone marks the place,
And letters on it you may trace;
And shepherds still the legend tell
Of the "Long Man of Bollihope Fell!"

Richard Watson.

The Fells.

I dearly love the mountain, for 'tis there
Dame nature in her wildest form appears;
The purple waving heath, the brooklet's sheen,
The mossy swamps, and hoary cliffs adorned
With bilberry shrubs and graceful ferns,-
All have their pleasing charms for me. Oft have I
At the mine shop door, at early morn,
Stood, as the rising orb of day
Was peering o'er the eastern horizon,
Tinging with gold the mountain tops,
Watching the becking grouse, as they each other chas'd
In sportive play; and merry, soaring lark,
As from its dewy bed it mounted high,
Carolling sweetly as it rose, till like
A speck it seem'd amid the downy clouds,
Blending its lively song with the shrill notes
Of plover and curlew, and the hoars croak
Of the dark raven sailing in the air,
And scanning with anxious eyes the ground
For the dead carcass of some sheep to ease
The pressing cravings of a hungry crop.
Thus have I spell bound stood, until my mind
To darker bygone days has wandered back,
When stranger sounds rose on the mountain breeze,-
Sounds of fierce men in deadly combat met,
Like tigers thirsting for each other's blood;-
When Douglas and Randolph the border cross'd
With brave and hardy followers mounted well
On nimble steeds, well train'd to pace the moss,
And burning to avenge the many wrongs
Their country suffer'd from our hands, over
The peaty swamps they rode and like a flood
They swept the vales below, and left behind
A blacken'd scene of woe to mark their track.
How thankful should we be that such fierce broils
No more disgrace our isle, and that in peace
Both nations were united in a bond
Of brotherhood, and bound together with
A Gordian knot, - a happy junction,
Which by the sword could never have been wrought.
Since then, how swiftly has our isle progress'd
In knowledge, power, and in enterprise!
I still can trace the ancient path, with bent
And stunted ling o'ergrown, which formerly
Was the chief way across the mountains bleak
From Teesdale high unto the river Wear,
Where from Newcastle merchandise was brought,
Pack'd up in sacks, strapp'd on to ponies' backs;

The drivers drest in thick, warm, home spun coats,
Arm'd always to the teeth; for well they knew
That danger in their path did often lurk.
Fierce banditti did the mountains sore infest,
And from their hiding places they rush'd forth,
And stopp'd the travellers journeying past;
Vilely stripp'd them, and left them almost nak'd
Their journey to pursue. But times have chang'd;-
No more those bloody villains pace the moss;
Justice, once tardy in her steps, moves now
With stride more rapid in the path of crime.
Pack horses now no longer bring our goods,-
They now are swiftly whirl'd on iron rails
From place to place, by steam's strong agency;
And news from distant parts is borne on wires,
Swift as the lightening passes through the sky,
So that we now can conversation hold
With all the nation round about. Could I
Look forward but two hundred years, what strange
Things should I see! Perhaps as great a change
Will have been wrought as has been since this moor
Was one vast forest, where stately oak trees
Flourish'd and spread wide their giant limbs,
Whose trunks now lie embedded in the moss.
Perhaps tall trees again may rear their heads,
And fields of yellow grain wave in the breeze,
Instead of rushes, bent, and ling. Though wild
The scenery be, - and wilder still when
Winter resumes his regal sway, and keenly
The bitter, frosty wind doth pierce the frame,
And thick and fast descends the fleecy snow,
No flower or blade of grass to meet the eye,-
Yet to a Briton's heart 'tis dearer far
Than all the spicy, fragrant orange groves,
Where beauteous flowers perfume the air,
Which Spain and sunny Italy can boast.
Though bleak our native hills, yet they are free!
For Britain is by Britons only ruled;
And may it still continue so! May the
Supreme, who holds the nations in His hand,
Still watch o'er and protect our native isle.
May noble, virtuous hearts be rear'd still,
To guard our shores 'gainst the invading foe,-
Men who revere their country and their GOD.

Richard Watson.

My Journey to Work

’Tis Monday morning and Apollo bright
Gilds the far eastern hills with golden light;
To hail the rising orb of day, I hear
The cheerful rousing voice of chanticleer;
From the whin cliffs the wild rock pigeons fly,
And starlings there keep up a chattering cry.
All animated things seem blythe and gay,
Pleased with the prospect of a pleasant day.
With my week’s wallet o’er my shoulder flung,
Down the green sloping meads I jog along
A well known path from Holwick to Bowlees,
Where Winch Bridge spans the verdant banks of Tees.
When to the roaring river drawing near,
Its rumbling sound strikes loudly on the ear,-
Foaming and dashing in its rapid course,
O’er the rough grey whin rock named Little Force,
Then flowing gently doth its way pursue,
Till by the Staple Crag ’tis hid from view.
The sun, with no dark cloud to intervene,
Shines brightly on a varied lovely scene;
The tall fir trees that on the north bank grow,
Their shadows long across the river throw,
Forming a picture strange of light and shade,
Where interesting objects are displayed,
To meditate on these I must not stay,
So o’er the creaking chain-bridge take my way,
And through a dense plantation move along,
The ears regaled with many a pleasant song
Of happy birds that flit from tree to tree,
And seem, unlike our race from sadness free.
But, soon emerging from the shady trees,
And, leaving the small village of Bowlees
On my left hand, the dewy footpath leads
Down by Bank Farm and through the flowery meads,
Where cowslip, primrose, clover and heartsease,
With fragrance sweet perfume the morning breeze.
Crossing a brook upon a rough hewn plank,
And going up a short, steep, stony bank,
Newbiggin ‘s reached, where miners often stop
To light their pipes at Willie Gibson’s shop.
A blacksmith Willie is, of well tried skill,
Whom we find hard at work call when we will;
Though toiling hard, he does no strong drink use,
Give him the proffer he’ll at once refuse.
He means a staunch teetotaller to remain-
Never to taste the tempting draught again,
Because he’s felt its power and therefore tries
To watch, with care, the point where danger lies.

Whene’er we meet he greets me with a smile,
Enquiries the news, and bids me rest awhile,
Which I oft do, loving his chat to hear,
Because ’tis from all coarse expressions clear.
Though in our views we sometimes disagree,
It matters not, good humoured still is he.
But here too long the time must not be spent,
Before lies, a rough, steep, and long ascent:
Bidding good-bye, and shouldering my load,
I, like a cadger, take again the road,
And through long strips of fenced allotment pass,
Where sheep and cattle crop the tender grass.
When past the grounds of Stable Edge, I find
The verdant trees and fields are left behind;
The ground does here a sterile aspect show,
Where bent, coarse grass and stunted heather grow;
From which the merry lark rejoicing springs,
And in the clouds his song of rapture sings.
In circles round me noisy lapwings fly,
While uttering their peculiar cry.
The rugged up hill walk, and sun’s hot rays,
Cause the warm sweat to trickle down the face,
Yet pushing on, the path an ascent still,
Till on the top of bleak hardberry Hill,
Where sitting down, my wearied limbs to ease,
I, look back, survey the Vale of Tees.
What a majestic scene can be discern’d
When to the far off west the eye is turn’d;
Grim mountain peaks in Alpine grandeur rise,
Which in the distance seem to kiss the skies.
First in the range, from hoary mist not clear;
The outlines dim of high Cross Fell appear,
With Dun Fell, Little Fell, and Meldon too,
And nearer Mickle Fell’s broad rocky brow.
A bright scene meets the eye down the vale, where
Neat whitewash’d cots stand scatter’d here and there,
Each with its farm, reclaimed from the wild moor,
Affording comforts to the labouring poor.
No healthier dwellings in our isle are found,
Than those upon the Duke of Cleveland’s ground;
Plainly are seen the rugged Cronkley rocks,
Frequented by the prowling, cunning fox.
Because its numerous length caverns yield
Places for shelter, and from foes a shield.
Well may be mark’d the river’s winding course,
Through Cauldron Snout and, near High Force;
And other interesting objects too,
Behind the hill hidden from the view.
Seen are the cliffs in front of Holwick Fell,
Also the deep ravine named Fairy Dell;

And Unthank bank, where once a village stood:
The craggy steeps beyond, and Park End wood.
Like a huge serpent, down the dale is seen
The Tees, all glistening like silver sheen,
Oft curving round some hill, ‘tis hidden quite,
Anon appearing in the broad sunlight.
And such is life, our brightest vision fade,
Sometimes ’tis bright, anon we’re in the shade;
At times we smoothly glide, at others grope
Our gloomy way, with nothing left but hope.
At yon vale foot, where Hudeshope’s waters run,
Stands the small market town of Middleton,
Supported by the mines producing lead,
Where many a dalesman labours for his bread;
While others, with employment are supplied
In the whin quarries on the Yorkshire side.
Southward appears that broad and mighty swell
Of brown moor pasture land, named Arthur Fell,
And Kirk Cairn’s little round plantation green,
Which almost from the ocean may be seen;
And further down, more interesting still,
The little ancient church upon the hill.
Next Mickleton appears, distinct to sight,
Beyond where moss-tinged Lune and Tees unite,
With its long street extending east and west,
And fertile fields, in verdant beauty drest.
My face from Yorkshire for a while I’ll turn,
And view that lovely scene past Egglesburn;
A vapour dense ascends on yonder hill
From the large smelting works at Blackton mill;
Long may it rise in curling wreaths on high,
And ore be raised, each furnace to supply,
To give employment to the neighbouring poor,
And keep the wolf named Want far from their door.
Below, where Neimer’s thick set forest wide,
Eastward extends along yon mountain side,
Lies Eggleston, a village neat and clean,
Though from this mountain indistinctly seen.
The mansion where the worthy squire resides,
Yon intervening hill completely hides.
Straight opposite across the rolling Tees,
Old Romaldkirk lies nestling ’mong the trees.
Its grey church steeple like a giant tall,
With its square form appears above them all.
Although the village snug meets not my gaze,
Yet well am I acquainted with the place;
Many a happy eve I’ve in it spent,
In youthful days, when I a-courting went!
’Twas pleasant in the summer time to stray,
And nature’s scenes by Lowgarth Farm survey,

Or the green path by Wooden Croft pursue,
And, by the stream, the Fairy Cupboards view.
But here my muse her backward flight must stay,
Lest from my text she draw my mind away
On bygone days to meditate and dream,
When present things must be my only theme.
Now, further down the woody vale I look,
Where Tees is fed by Balder's rippling brook.
Southward, across from Shiply's shaggy wood,
Where gallant Fitzhugh's ancient castle stood,
Lies pretty Cotherstone, a healthful place,
Frequented much in the warm summer days
By gentry from our smoky towns, to share
The bracing influence of country air.
The vision now grows cloudy and unclear;
By Lartington more dense the trees appear;
That charming village under Witham's care,
With its neat cots and flower gardens rare.
Though distance dims the view, yet further down
Is seen the smoke of Barnard Castle town;
"Old Barny," - Teesdale's pride and strength of yore,
Which no small share in feudal conflicts bore.
Set 'mid a landscape beautiful and grand,
Adorned by glowing nature's lavish hand.
But not for charming scenery alone
Is this metropolis of Teesdale known.
When England's flag of war has been unfurled,
No matter in what quarter of the world,
Men of this loyal town were never slow
In going forth to battle with the foe.
With gallant Moore, and Wellington in Spain,
On Waterloo's famed sanguinary plain,
Where British pluck was to the utmost tried,
They nobly fought their way, or nobly died.
Those who returned served only to inspire
The rest with the same patriotic fire.
It too, has had its literary men
Of no mean order, wielding well the pen,
And not a few has still, whom I know well,
Though unpretentious, yet do they excel.
In vein I look among yon misty stream
To view that structure grand the Bowes Museum,
Where works of art from distant lands are brought,
By the most famed and skilful artist wrought,
A building which, when finished, cannot fail
To form the chief attraction of our dale.
O lovely native vale with fond regard
I look on thee; though dreary, rough, and hard
My way has been, yet no amount of ill
Can loose the ties that bind me to thee still.

* * * * *

Again I take the wallet on my back,
And northward follow on the miner's track;
Unto the sight soon Hudeshope Vale appears,
With the rough broken ground around Skears,
Broken by hushes, strong in days of yore,
To bare the veins, and to discover ore.
Between those ravines deep are pastures green,
Beyond the summit of Monks is seen;
While fir plantation patches beautify
Places where heaps of ancient rubbish lie.
Across the mountain ridge my way I wend,
And with brisk step into the vale descend.
On my left hand, Coldberry Mine appears;
The din of mills and jiggers strike the ears;
This sound does from the washing floor proceed,
Where from the dross the mineral is freed.
Those interested in the dressing line
Should pay a visit to this busy mine;
Three chief points gained a skilled observer sees,
These are despatch, economy and ease.
At Elfatory Foot flows the small brook,
Which, having crossed, my face is turned to look
Upon the muddy waters as they glide
Down past the place where poor old Bottom's died;
Of his lone dwelling there is little trace,
Strong floods have almost swept away the place.
Poor Tom! No more will we hear his hunting horn
Awake the slumbering echoes of the morn;
Time will not linger;
leaving the brown burn,
Unto Lodge Syke old mine my face I turn.
By far the richest mine in Teesdale seen,
In fact, few in our isle have richer been;
Like ancient Carthage, it has had its run,
'Tis now wrought out, its mineral wealth is done,
Large rubbish heaps along the hill side show
The vast extent of hollow ground below.
Here toiled my father for his bairn's support,
Till poverty and toil his days cut short;
While I was but a boy of tender years,
Unconscious of his cares, his griefs, and fears,
Which like a galling burden he'd to bear,
A legacy of which I've been his heir.
Now silence reigns where clamour reign'd before,
The rattling of machinery is o'er,
The anvil's ringing sound, also the noise
Of labouring men and busy washer boy's;
One man alone remains extracting ore

From refuse heaps, of little worth before.
The lodging shops, where miners nightly stayed,
Are into airy cottage dwellings made,
Each with its garden plot, the peaty soil
Repaying well the cotter for his toil.
Now past the verdant patch from rubbish freed,
Where MacNomara's goat and donkey feed;
More wild and dreary grows the aspect round,
Bent and brown heather clothe the mossy ground,
Which give to nature's face a darker hue,
Home of the grouse, the plover, and curlew.
Reaching the summit of the barren hill,
'Tis a rough long descent to Manorgill;
From here is seen, far as sight can extend,
A desert vast, of which there seems no end,
One place alone, like an oasis bright,
Adds variation to the gloomy sight;
It is the well known farm of Middle End,
Near where two muddy brooks their waters blend.
Crossing the stream, and climbing up steep hill,
Keeping the path to west of Wiregill,
Where a rich prosperous mine is, which employs
A number large of men and washer boys.
The hill top gained, pleased I look round,
Knowing I've done with all the climbing ground.
Before bleak Shaftwell's dark brown hills appear,
Which form the boundary line 'twixt Tees and Wear,
And the squire's shooting box upon the hill,
Which fort-like frowns on Thornberry Gill;
And on a line extending o'er yon ridge,
The long abandoned works of old Flake Bridge.
Passing two reservoirs, built to supply
The works with water when the weather's dry,
And going down an easy gentle slope,
I reach the Rake of Little Eggleshope.
And to the shop beside the mill proceed,
Where from their load my shoulders soon are freed.
After a meal and a short rest, I find
Myself refreshed, and more work inclined;
Then down the stony burn my footsteps wend,
And reach my cabin at my journey's end.
And now, my muse, begone, go take thy rest,
The inspiration suits my leisure best;
I must not by thy vain fancies led,
'Tis here, and not by thee, I win my bread.

Richard Watson.

Will Toward and the Bailiff.
A True Story.

Will Toward was a miner strong;
No better could be found
To swing a pick, or drive a wedge,
Or turn a jumper round.

He was, as all his neighbours say,
A strange, eccentric wight;
Next to good ale, mischief and fun
Were always his delight.

But though he plagu'd his neighbours sore,
He did not idle stand;
When they had hay to win, or peats,
He lent a helping hand.

Next door to his a poor man lived,
With many children small,
And nothing but his daily toil
For to maintain them all.

And being much involv'd in debt,
Which often is the case,
His creditors, quite angry, sent
A Bailiff to the place.

So to his neighbour, Will, he came,
A mournful tale he told,
How everything about the house
was going to be sold.

"Come, neighbour, cheer up!" said Will,
"And do not be distrest;
Trust me, I'll very soon find means
To rid you of your guest."

Then Will began to dress himself
In a most curious plight,
A blue frock-coat he button'd up
Around his body tight.

He had a felt-hat on his head,
Which was without a crown;
His trousers cut off by the knees,
His stockings hanging down.
He let his long, dark, matted hair
Hang down before his eyes;
And with a gully in his belt,
Complete was his disguise.

And thus equipped, he straightaway to
His neighbour's house did go
Bellowing loudly, as he went in,
Like a wild buffalo.

The family, as had been plann'd,
In seeming haste ran out,
While, like a maniac, he began
To roar and jump about.

He of the Bailiff, who sat still,
No notice seemed to take,
But howl'd, and bark'd, and yell'd, and did
A dreadful uproar make.

Sometimes he rolled upon the floor,
Then hopp'd round like a frog.
Then tore his hat between his teeth,
Like some ferocious dog.

The Bailiff, of such actions wild
No good opinion had;
He was convinced, beyond a doubt,
The man was raving mad!

At length, Will drew his gully forth,
And fiercely turned about;
The Bailiff bounded from his seat,
And quickly bolted out.

And down the dale he swiftly ran -
A frighten'd man was he -
He thought if he o'ertaken was,
That he would murdered'd be.

And shrieking like an Indian,
Will swiftly did pursue -
He had no thought of catching him,
But keeping him in view!

O'er sikes and brakes away they sped!
But, pitiful to tell,
Up to the middle in a pool
The poor Bailiff fell.

But there he did not dally long,
Out, soon he had to hop;
Will, with his gully, was nigh hand,-
There was no time to stop!

Splashing, dashing, on he went,
As he had done before;
His trousers wet clung to his legs,
Which did annoy him sore.

Puffing, blowing, like to burst,
With running nearly spent,
His trembling limbs began to ache,
Yet onward still he went!

At length he to a farmhouse came,
And open'd quick the door;
But being tired out and faint,
He fell down on the floor.

The farmer quickly raised him up,
And garments fresh supplied,
While his torn, wet, bespatter'd suit,
Before the fire dried.

"Come tell me now," the farmer said,
"Whate'er has taken place?
And why you've sprung into my house,
In such a wretched case?"

"I've just escaped from death," said he;
"A madman, with his knife,
Has chased me, with the full intent
To take away my life!"

The farmer shrewdly guess'd the joke,
But he was not inclin'd
To tell the man it was a hoax,
By waggish Will design'd.

The Bailiff, next day, took his leave,
And his course homeward steer'd;
And he in Harwood from that day,
Has never more appear'd.

Appendix 12

Provincial Medical and Surgical Journal v.10(46) 18th November 1846

The Nature, Causes, and Means of Prevention of the Diseases incident to Lead-Miners.
By WILLIAM EWART, Surgeon, Carlisle. 1846. 8vo. pp. 31.

The subject of this pamphlet may to some seem to be of local interest only; but a very little consideration will suffice to show that what is specific in its application to the workers in lead-mines, is also equally applicable to the workers in lead generally, —to painters, plumbers and glaziers, to type-founders, china-potters, and other classes of operatives who are engaged in the preparation of lead for the various purposes to which that metal and its compounds are applied; while the more general deleterious causes which operate in addition to the specific action of the lead,—such for instance as breathing a confined atmosphere loaded with dust, and contaminated with divers impurities, are common to miners in general, and consequently to mining districts. Thus, the lead-miner is subject to bronchial and pulmonary irritation, which not only complicates the action of the metallic poison, but materially tend to impair the general health, and increase the mortality of his class.

The chief peculiarity of this pulmonary affection, as we gather from the pamphlet before us, is the expectoration of a quantity of blue-coloured matter, the colour being probably derived from the metallic particles, which in part, at least, have given rise to the irritation of the bronchial membrane, and with which the sputa must be more or less loaded. The effect of this cause on the mortality among lead-miners is, that about four-sevenths of their number die of disease of the lungs, the Character of which is chiefly pulmonary consumption, while the general average of the deaths from the same cause throughout the entire country is about one-fifth of the mortality.

Among the predisposing causes of pulmonary disease to which miners in particular are subject, must be reckoned the impermeable coating of perspiration and dust which the skin is apt to acquire from labouring in an atmosphere charged with dust, unless due means are used, by frequent ablutions, to remove it. The necessary consequence is, as Mr. Ewart well observes, an increase of duty thrown upon the compensating organ, the lungs, already in an impaired state of efficiency from respiring a loaded atmosphere, and thus at the same time irritated from without, and congested from within. Whether the high rate of mortality among lead-miners is in part owing to any paralysing influence resulting from the peculiar action of the poison does not appear.

As a preventive measure to relieve the lungs from the accumulation of dust and irritating matters to which the bronchial tubes and cells are exposed, Mr. Ewart proposes for the lead-miner, a plan of treatment which we do not remember to have seen suggested before, and which may be in like manner applicable to workers in mines generally, and indeed to all who are exposed to the inhalation of air charged with finely divided particles of dust. The method proposed consists in the frequent use of emetics.

"With regard," observes the author, "to occasionally ejecting from the air passages, the irritating particles that continue in the course of mining to be

precipitated within them, it seems possible enough to adopt means that would be attended with the highest advantage. This is some form of emetic, that when given at certain stated intervals, would have no injurious influence on the stomach, but on the contrary, would have an j) indirect bracing effect upon it, at the same time unloading the lungs of all extraneous matters, —promoting a freedom of the blood's circulation through them, 2— determining to the skin, — and, in fact, giving a healthy impulse generally to the various functions of life. To effect the above purposes, the emetic that would seem best adapted is a combination, in equal parts, of the sulphate of zinc and the powdered root of ipecacuanha. Six, eight, or ten grains of each of these, according to the strength and constitution of individuals, if taken occasionally in a cupful of tepid water, and their emetic operation assisted by copious draughts of the same liquid, would be every way likely to afford no trifling protective influence in the case of lead-miners."

Mr. Ewart has not had any personal experience of the effects of the mode of treatment, which he proposes, but he refers to the benefit experienced or said to be experienced in the early stages of tubercular consumption from the use of emetics. It might certainly be worthy of a trial in conjunction with the use of the warm bath, or some other mode of thorough cleansing of the skin; but it is very questionable whether the proposed remedy would be submitted to at a time when it is likely to prove beneficial, or with sufficient frequency to ensure its effects as a prophylactic. Of the specific effects of lead on the system, we find little mention made in the pamphlet, and it is to be inferred, therefore, that the more general deleterious action of mining operations, arising out of the blasting and breaking up of the strata, are chiefly concerned in the production of disease in the Alston Lead-Mines, to which Mr. Ewart's observations more particularly refer.

Appendix 13

William Bickford and ‘The Miners’ Safety Fuze’

Bickford Safety Fuse:
The specification was as follows :—

"To all to whom these presents shall come, &c, &c.—Now know ye, the instrument invented by me for igniting gunpowder when used in the operation of blasting of rocks and in mining, which I call 'The Miners’ Safety Fuze,' I manufacture by the aid of machinery, and otherwise, of flax, hemp, or cotton, or any other suitable material, spun, twisted, and countered, and otherwise treated in the manner of twine spinning and cord making, and by the several operations hereinafter, and in and by the drawings hereunto annexed, mentioned, and described. By means whereof I embrace in the centre of my fuze, in a continuous line throughout its whole length, a small portion or compressed cylinder or rod of gunpowder, or other proper combustible matter prepared in the usual pyrotechnical manner of firework for the discharging of ordnance, and which fuze, so prepared, I afterwards more effectually secure and defend by covering of strong twine made of similar material, and wound thereon at nearly right angles to the former twist by the operation which I call countering, hereinafter described; and I then immerse them in a bath of heated varnish, and add to them afterwards a coat of whiting, bran, or other suitable powdery substance, to prevent them from sticking together, or to the fingers of those who handle them. And I hereby also defend them from wet or moisture, or other deterioration, and I cut off the same fuze in such lengths as occasion may require for use. Each of these lengths constituting, when so cut off, a fuze for blasting rocks and mining, and I use them either under water or on land in quarries of stones and mines, for detaching portions of rocks or stone or mine, as occasions require, in the manner long practised by and well known to miners and blasters of rocks. Having thus particularly described and ascertained the nature of my said invention, I now proceed to show in what manner and by what apparatus the same is to be performed.—(The specification then proceeds to describe the mechanical apparatus and process.)—In witness whereof, &c.

“ WILLIAM BICKFORD.”

Source: ‘Law Reports of Patent Cases’ by William Carpmael Esq. Vol 2, published 1851; page 449.

Blasting Rocks and Mines.—To W. Bickford, of Tucking Mill, in the county of Cornwall, Leather Seller, “for an instrument for igniting gunpowder when used for blasting rocks, which he denominates the ‘Miner’s Safety Fuse’,” a patent was granted on the 6th of September, 1831, and the specification was lodged in the Enrolment Office on the 28th of February, 1832.

This instrument, denominated by the inventor the “Miner's Safety Fuse,” is a minute cylinder of gunpowder, or other suitable explosive mixture, inclosed within a hempen cord, which is first twisted, then countered or overlaid to strengthen it, afterwards varnished to preserve the combustible matter from. the effects of moisture, and finally coated with whitening, or other light pulverulent matter, to prevent the varnish from sticking to the fingers, &c.

The patentee verbally describes, with great attention to exactness, the most minute and unimportant parts of his very simple apparatus, which are moreover fully explained by elaborate and correct, though coarsely-executed, drawings; and so liberal has Mr, Bickford been to the public, in return for the exclusive privilege of the patent, that he indulges them not only with the representation of his mechanism, but every door, window, wall, board, joist, rafter, roof, and almost every nail of his extensive manufactory is placed before them in every point of view for examination; thus fulfilling the law not merely in the spirit, but beyond the letter thereof.

At one end of the twisting room, 65 feet in length, is a closet, where for greater security the operation of filling with the explosive mixture is conducted, which we will describe with reference to Pl. V. fig. 5, where *a a* represent a frame of wood, which is attached to a shelf in the filling closet about five feet above the floor, and supporting a funnel *b* containing the powder; 12 threads *c c*, of loosely spun yarn, proceeding from 12 balls *d d* of that material deposited in the lower part of the closet, are carried upwards and passed over a hoop of cane *e e*, from whence they converge towards and pass through a conical boss *f f*, which has a series of equidistant apertures around it for that purpose. These apertures are so inclined to the axis of the cone, that at their points of emergence the 12 threads come nearly in contact, and being immediately beneath passed together through a hole, the twisting of them is easily effected; during this operation the powder is permitted to flow from the reservoir *b* in a regulated thin stream in the centre of the threads, which continually present by their convolution a central funnel-formed cavity adapted to receive it; and by the continued action of twisting, the powder is pretty evenly laid in the centre of the cord.

The apparatus for twisting, we believe, varies but in a trifling degree from that in general use. This consists of a bench about 60 feet in length, and less than a foot in breadth; having on one side a raised tooth rack, and on the other a plain ledge for guiding a “monkey" in travelling along it. A portion of this apparatus we have sketched at fig. 6, Pl. V. *a* represents the toothed rack, *b* the external ledge, *c* the monkey formed of a flat board mounted upon little wheels, underneath; *d* a toothed wheel taking into the rack, and giving motion to an inclined double wheel *ef*, through the medium of the lesser circle *e*; the larger one, *f,* actuating a little conical pinion *g*; on the axis of this pinion is fixed the “crook" (or hook) *h*, that holds the cord *ii*, which is thus twisted round with great

velocity, the motion being produced by the monkey being drawn along the bench. The fusee cord, first shown in fig. 5, as descending vertically and then changed into the horizontal direction by the pulley *k* being drawn out and twisted in lengths of about 60 feet, are cut off, and the ends being carefully secured by tying, are ready for the second operation of countering.

In this operation each length of cord is stretched out its whole extent, one end is secured to a swivel crook, and the other is fastened to a crook fixed on a small mandril, which is put in rapid motion by a cord passing round the rim of a large wheel turned by hand. The threads used for countering are six in number; they are laid on at right angles to the former twist, by what is technically termed a *jack;* this instrument has a hinge joint, dividing it into two equal and similarly formed portions, as shewn at *n,* fig. *7,* Pl. 5 ; it has also two semicircular grooves, *o o,* across its breadth, which accurately meet together when the instrument is shut up, and thus form a circular hole of the size of the intended fusee cord after it has been countered. Each of the semicircular grooves are also closely indented with small diagonal lines to correspond with the threads of the countering; and there are six small holes in the *jack* at *p*, through which the threads are passed from balls or reels carried in the apron of the *counterer,* who after attaching the threads to one extremity *o*. the cord, doubles up the jack over it, and holding the instrument **steadily** in the right inclination, advances gradually to the great wheel, which through the medium of the mandril before mentioned, rapidly turns round the cord, and draws the countering threads through the jack evenly upon its surface.

The next process of varnishing and coating the countered fusee cord, is to place them upon separate reels ranged over a furnace and caldron containing the melted varnish, which is to be a composition of tar and rosin, in proportions varying with the climate, temperature, and other circumstances. The caldron used by the patentee, is an open oblong vessel, having a partition in the middle of less altitude by two or three inches than the sides; the fire-place underneath extends to only one half the length of the melting vessel above, so that should the fluid boil over, it would be thrown into that compartment of the vessel which is remotest from the fire, kept empty for the purpose. A morticed bar or case of wood is fixed vertically above the fluid varnish, having a smaller bar which slides longitudinally out of it as from a socket, fixable by a screw at any desired extension; and to the lowest extremity of the small bar is a semi-cylindrical block, having on its curved under-side a number of grooves corresponding in size and number to the fuse cords operated upon at once; this semi-cylindrical block is plunged under the surface of the varnish, and the cords descending from the several reels passing under it, are plunged thereby into the varnish, and thus circumstanced the whole lengths on the reels are drawn through it, passing first over an inclined draining plate on to a long wooden bench, which is strewed or powdered with chalk, or other suitable matter, that readily attaches itself to the varnish, and prevents the fusees from sticking together.

It cannot be doubted that fusees so accurately prepared, of every required length, will be found of essential utility in facilitating mining operations.

MINERS' PATENT SAFETY FUSE. —This is one of the most important and useful inventions connected with mining. We shall endeavour briefly to describe its properties, and thus enable those who are embarked in mining pursuits to judge of the value to be attached to the use of the "fuse" while its safely is in itself one of the strongest recommendations. The “Patent Safety Fuse" is devised for safety, and certainly conveying fire to the charge in blasting rocks and in mining. It is in appearance like a firm varnished cord, just the size of a largo goose quill, and has in its centre a continuous column of best gunpowder—for convenient carrying and packing, it is manufactured in lengths, of twenty-four feet, coiled up like rope, the smallest coils being about three, and the largest about fifteen inches in external diameter, so that the different size coils fall into each other and pack closely into small kegs or casks. It is so hard and firm in its texture as to resist the action of lamping, is impervious to water, can be easily cut with a knife, to any length, burns regularly in a measured time, conveying the fire at the rate of half a minute to a foot, and will act as certainly in a close rock firmly lamped up or under twenty fathoms of water as on dry ground and in the open atmosphere. The great advantages resulting from the use of this instrument have been acknowledged wherever it has been used.

It offers protection to the workmen engaged in this hazardous employment, in large mining districts, where mutilation and death were frequent from premature explosions accidents now very seldom occur. Its use occasions no trouble, but in comparison with every other mode greatly facilitates its operation. It is not only cheaper and more effectual than every other thing used for the purpose of certainty and slowly conveying fire to the charge, but is absolutely cheaper than blasting with the needle and straw, by saving a great proportion of the powder necessary for the charge. The Safety Fuse has consequently been long used in all the Cornish mines; has been strongly recommended by John Taylor Esq., F.R.S., &c., Col. Burgoyne, chairman of the Board of Public Works in Ireland, Mr. Purdy, secretary of the Mining Association of Ireland, and, many distinguished scientific and practical gentlemen, connected with mining operations. —*Mining Journal*

Western Times 3rd August 1839

IMPORTANT TRIAL.

MONDAY. —The Court opened at nine. The first case was BICKFORD and OTHERS. v. SKEWES, the younger—a question of infringement of patent, which was brought from the sister county of Cornwall. There were for the plaintiff Mr. MONTAGUS SMITH, Mr. CROWDER, and Mr, ERLE. For the defendant, Mr, SERJEANT BONITAS und Mr, BUTT.

All the witnesses were ordered out of Court. The case was in effect an issue out of the Court of Chancery, Plaintiff got an injunction in that Court to distrain defendant from pirating his patent safety fuse. Defendant subsequently moved the Court to discharge the injunction—when the Chancellor directed the injunction to be continued, but directed the plaintiff to bring an action to try the question-—and in pursuance of that order this action was brought.

Mr. M. SMITH opened the pleadings. The declaration stated that W. Bickford obtained by letters patent the sole right and authority to make, use, exercise, and vend his safety fuse within England & Wales and the Colonies of this Empire, for the term of 14 years—provided that he should specify the patent within six months. The declaration then stated that Bickford did duly state the specification. It then stated that an assignment was made by Bickford of one quarter of the patent right to Thomas Davey, and three-fourths to the other plaintiffs. The declaration then alleged that the defendant made and sold divers of the said fuses in imitation of the said patent fuse—to which he had pleaded, first, that he was not guilty; second, that Wm, Bickford was not the inventor; third, that it had before been publicly used and exercised before Bickford took out the patent; and the fourth, stated that the specification was not clearly set forth.

Mr. ERLE now addressed the Jury, Gentlemen of the jury: — I appear before you on behalf of the plaintiffs in this case, Messrs. Bickford, Smith, and Davey, who are now proprietors of a patent taken out in 1831, by Mr. Wm. Bickford, who with the inventor of a very important instrument used for the purposes of mining. He took Davey as his partner in his life time, and the other plaintiffs were his legatees. For the purpose of understanding the value of this patent, I will draw your attention to the uses to which it was applied, and the instruments that had been in use before. The instrument is that which I hold in my hand [a small coil of rope]. It is called the “Miner's patent safety fuse." It is a rope: in the centre of this there runs a small stream of gunpowder, which goes through the whole length. You cut off a piece, and lighting the top of it the fire is conveyed any length that you may require. The instrument is used for blasting rocks, and probably many of you may have seen it performed. The miner is required to work in the rock a chamber, in which a sufficient quantity of powder it placed, and the hole leading to the chamber is then filled up with a substance rammed in very tightly, without which the powder would fail to effect the object required. This operation is called “tamping” and the substance is driven in with an instrument called a “tamping iron.” If the hole were entirely filled up there would be no means of conveying the fire to the chamber. For a long time the process adopted to get the fire down to the chamber was by leaving a small bar of iron or copper in the hole, which rested on the powder at the bottom, and was drawn out when the process of tamping was finished, and a small passage was left into which a rush was placed which being set fire to burned down to the chamber, and the explosion took place. Now there was very great danger and

uncertainty about this process, for it often happened that the metal needle being left in whilst the process of tamping was going on, become very hot, and an explosion would frequently take place attended with fatal consequences, mutilations of limb or death. The inconvenience great, and the operation uncertain, for if the continuity of the stream of powder was broken the fire would not run into the chamber, and the explosion would not take place, and the miner had to go through the whole process again. In addition to this the miner had to work in wet weather when the powder would frequently become damp through the wet getting into the hole, and the whole process had in this instance also to be performed over again. Attention was paid to these facts for the purpose of making some improvements in the process of mining, for civil and military purposes—for blasting rocks in roads, or for the purposes of quarrying and many attempts were made to improve the instrument, which should convey fire to the chamber in the rock. One step had been gained by the introduction of quills into the process of tamping, instead of leaving a metal needle in the hole. The quills having the ends cut off, and inserted into one into another, formed a continuous tube, which being filled with powder, was an improvement so far in effecting the explosion and averted the danger of a sudden explosion. This instrument was liable to objection. If it became bent it would destroy the train, and further improvement was sought. Attempts had been made to form a tube with paper rolled up, but in the course of tamping this also would often get out of the straight line and become broken, or it would go out, and the fire would not then be communicated with the powder in the chamber. Mr. William Bickford had turned his attention to the matter, and in the year 1831 he completed the invention which is now before you, and for which he took out a patent. The coil which I hold in my hand is called the miner's patent safety fuse, and the mode of making it is shown by the model on the table, [The, learned Counsel than explained the manufacture of the coil—which was effected by the twisting of twelve threads, in the centre of which, supplied by a funnel, a stream of gunpowder was very ingeniously inclosed along the whole length of the coil. It was very like the ordinary process of rope-making, but a stream of powder was kept up through the centre or the rope. Alter this twisting, the fuze had to go through one or two operations to make it. fit for the purpose of the miner. It had to be fastened, to prevent its unravelling and the
powder coming out, and this operation was called "countering." It had next to be made perfectly waterproof, which was done with tar or resin and then it was passed through a powder of some kind, to make it perfectly dry on the surface, so that it might be rolled up like a common rope.] This was the invention of Mr. Bickford, and I am told by those acquainted with mining either in civil or military matters, that it is an instrument of very great service indeed—that there had been many persons attempting to remedy the inconvenience for many years, and from the time of its invention, it had been constantly used amongst miners, and has superseded all the methods that were before in use, having been most highly approved of, and generally adopted. From 1831 to 1837, no one disputed Mr. Bickford's patent right, nobody questioned that he was the inventor—no one said that it had been in public use before. It answered all the purposes required, for it could not be broken by deviating from the right line, as it contained a stream of powder all the way down, it burned gradually and there was no fear of a sudden explosion—the miner might cut off any quantity he pleased, and adapt it to the length of a hole that he had bored. It was used by his partner and his

children three years after his death, without being questioned at all. The manufactory of it was in Camborne, in Cornwall; defendant is a cabinet maker of the same village—he had no pretence to be connected with mining in any respect; but as this was a very profitable invention, Mr. Skewes wished to have a share of it, and if the law would allow him to do so, there could be no objection. But the person who had a patent invention, was protected by the law in the exclusive use of it for 14 years, but there was a great desire generally displayed to share the profits, by persons who coveted a portion of the benefits, which were generally supposed to belong to patent rights. Patentees were constantly compelled to guard against the invasion of their rights; about the middle of 1837, defendant prevailed upon one of the workwomen in the employment of the plaintiff to communicate to him the mode by which the safety fuze was manufactured and he then commenced making a fuze of the same materials and the same construction as Mr Bickford made. Bickford having heard of it caused a person to buy one of the fuses of the defendant, and brought this action against him, and the jury are now summoned in the adjoining county of Devon, to say whether the plaintiff was entitled to the patent. The first plea was, that defendant had not infringed this right—I do not think that you will be detained much on that. For the other pleas, I believe he means to deny that his instrument is the same as Mr Bickford's. In all cases when the right of the patentee is disputed the party opposing him endeavour to prove that he has not complied with the specification—the purpose of which was to give a man the right use of it for 14 years. He was bound to give a specification so that when the 14 years were elapsed any working man of common skill would be able to make the instrument. The object of this was to perpetuate valuable inventions. Now the first objection the defendant makes is, that you have taken out your patent for a miner's patent safety fuze. He says, in reading your specification, I do not know whether you mean to claim your patent for a fuze, r the instrument by which it is made. The Learned Counsel then went through the objections to the specifications, and stated that he understood that the originality of the invention would be attacked by a statement that an unknown Irishman had gone into that neighbourhood with a similar fuse, and that he had sold the secret to defendant, and also that it was in use 30 years before. He should show that there was no pretence for these statements, and that the plaintiff were entitled to the protection of the law.

William Vyvyan examined by Mr CROWDER—I have been a civil engineer many years—I know the safety fuse, and have seen and examined the drawings and model, and the specifications.

Mr. Serjeant BOMPAS objected to the production of the drawings till they had been proved.

Mr Henry Shepherd Moule produced an examined copy of the specification and drawings—I examined them very carefully—they were made by a person employed purposely for this case.

Mr Vyvyan—I have seen the specification, and looked at the model, it represents the machine by which the patent safety fuze is to be made. There is no difficulty in making the machine by which the fuse could be made—according to these drawings. He then described the machine by the specification. I should have no doubt about the material—anything that could twist.

Cross-examined—I was called upon to examine the specification and the drawings, to see whether workmen could make the machinery therefrom—but I

have never worked at this manufacture. —I have seen the machinery at work many times during the last four years—I do not that the machine is precisely the same as that of the model, but I cannot tell you the precise nature of the alteration. The character of the machine is precisely the same but there is a difference in the position of the threads—instead of being under the box they are over it—a matter of no consequence I should think. I do not mean to say that in every substantial thing they work in the same manner, but I mean to say I think that hair would do for other materials—I have seen hair rope—I have never seen other material tried or given a thought—I have never known cotton or wool tried, glass will spin.

The Learned Judge interfered with cross-examination of the Learned Serjeant, who was "spinning" out and "twisting" up the witness rather too lightly for the ends of justice. His Lordship said that he was a mechanic and not an engineer. The assignment was put in.

Mary Davey—I am in the employ of plaintiffs, at Tucking Mill, in Camborne We have store houses, steam engines, and powder magazines, and about 32 persons all employed about this manufacture. When I first came into the factory the fuses were made by a machine similar to this. Within the last two years an alteration has been made in the reels of thread, which are now put on the top instead of under. Alice Hocking was in the manufactory with me, and was employed in making these. She was able to see how the whole of them were made. She left in 1837—I cannot tell that she is the wife of the defendant, I was told that she lived with him. [Mr. Serjeant Bompas admitted the fact that the infringement was made in 1837.] I never knew of any infringement before Alice Hocking left. I never saw any fuses manufactured by Skewes before she left. I have seen her coming from the factory—a great many months after left my master.

Richard Lego—was called to prove the purchase of the coil in 1837, but the fact being admitted, he was not examined.

Charles Thomas—I have been a mine agent for 31 years, and have been acquainted with the mode of blasting rocks. In the old method of blasting rocks, we bored a hole down to the place where we wanted to put the powder. It was then necessary to ram down a hard substance with a "tamping iron" and we used to leave an iron needle in the hole, and drove the tamping materials hard up against the needle. Then we pulled out the needle and put down a "rush" of gunpowder in the hole left by the needle—then we put fire to a "snop" made of touch paper, and the men retired whilst it burned to the rush. It frequently happened that the powder took fire whilst driving in the tamping iron. Sometimes the needle would get bent and being drawn out with difficulty the powder would take fire, and serious accidents would take place. Afterwards it was customary to introduce a series of quills which were liable to be open one from the other—there was a degree of uncertainty connected with the quills, and a barrel of quills occupied some time in making and filling with powder. The mode also was expensive, and the quill was sometimes injured in tamping. I first saw the patent safety fuse at Dolcoath mine. I have seen it used in a number of instances —it was very much less liable to be injured in the course of "tamping;" it was scarcely liable to be injured at all by tamping, and conveyed the fire to the charge more perfectly. You could calculate on the time the fuse would occupy. Miners used frequently to lose their lives by the instantaneous explosion of a the "rush." The

quills were “slower,” but this was the best plan for the blasting of rocks in my opinion that I have ever seen. As far as I could judge it a new invention.
The mine agents are alive to all improvements; they frequently meet together, and if such an instrument as this had been in common use I think it would be impossible that I should not have known it. I think that the expense of the fuse is about one half of the quills, including powder. If the expense were equal I should prefer the fuse. I never saw it miss fire. I have heard but rarely that it has. If the quills missed fire we had to take out the tamping or abandon the hole.
By the Learned JUDGE—If there was a failure in this the same consequences would ensue—we must either takeout the tamping or abandon the hole. I have known tin tubes used in cases of wet ground, but never else.
Cross-examined by Mr. BOMPAS—I was agent of Dolcoath mine 24 years, 21 out of the 24 below ground. When we let a piece of ground the men execute it as they please. These fuses have been used at Dolcoath for six years—generally for the last two years. But some of the men occasionally use the rush up to the present day. They get more into use every year. I suppose you know human nature as well as I do, and like the rest of mankind it is very hard to make them adopt improvements; and even to this moment there are a few who use the rush. A few of the “rushans” will run the risk of being blown up rather than abandon the rush.
The Learned JUDGE remarked that there were more accidents in the North since the invention of the Davey lamp than before. Mr. Serjeant BOMPAS added, because they go into more dangerous places than they did before.
I have not seen them generally in use in other mines, but in Stray Park, for the last two years.
Re-examined—I have not been in the habit of going into other mines much till the last two years, because I had been ill three or four years previously.
Henry Andrew Vyvyan mining agent for 20 years, said that the fuse was not attended with danger, not uncertain and cheap. The rush is grown on moors; they slit it and take the pith out of it, and put in gunpowder. It closes when it is put in.
John Walters, Nicholas Trevernan, Ferdinand Williams, Isaac Barrow, James Holman, James Sprague and others, and mine agents, were examined, and proved that till Bickford’s fuse came into operation, they had never met with anything of the kind.
Edward Deneyon, surgeon of Camborne, and adventurer in mines, said, before the introduction of the safety tubes, deaths from bursting were very frequent. Since the introduction, not more than one in 20.
Col. Julian Jackson was in the artillery. The patent fuse bears no resemblance to the port fire used in the army. The port fire is for sudden discharge, the fuse for gradual. I think the fuse is well adapted for blasting rocks. Simple gunpowder will do for filling up the cavity in the rock. *Cross-examined*. The port fire is made of sulphur, gunpowder reduced to a finer powder, and nitre or saltpetre. The safety fuse is gunpowder alone. *Re-examined*. The port fire is contained in a tube of cartridge paper. Both the materials in which it is contained are different. The powder bears no resemblance.
Colonel Charles William Pasley—I am a Colonel in the Royal Engineers; I have been many years in that corps—since the year 1798. I was about six months in the artillery previously. In the year 1812, I was appointed by the government as director of the establishment at Chatham for the purpose of instructing the

junior officers and sappers and miners in military mining. I have been among other things from that time very conversant with military mining matters. I have directed my attention a good deal for 14 years to firing gunpowder under water, till at last I succeeded in producing a method for effecting it in 1827. It is not a matter of considerable difficulty to get gunpowder ignited under water, but very simple when known. My plan was to make a very small hose about three sixteenths inches in diameter to reach the powder, which was to be exploded under water in a tin or metallic cylinder, and to have a patent leaden pipe to contain the hose; the leaden pipe it was necessary to buoy up in the water by a buoy, which occasioned great difficulty in a tide-way. We were obliged to secure it at every six inches by a wire. I know Bickford's safety fuses. They were referred to me in April, 1832, by the Master General of the Board of Ordnance, and having tried them I was to make a report on them as to their capability for military purposes.

I examined them particularly, and tried them in various ways. I had never seen anything of the kind before, and I am confident that nothing of the kind could have been used in military mining before. I think I must have known it if there had been, but at the same time nothing is absolutely impossible. It is a great advantage in firing under water, it dispenses with the leaden tube, and it dispenses with the buoy. It is certain for ten feet, but cannot be depended on beyond that length as there are always flaws which admit the water at every 30 or 40 feet—but for ten feet they may be used at any depth. In blowing up two vessels in the Thames last summer which attracted a considerable degree of attention, I used my own method for the large charges, and used Bickford's fuse for the small. It went down burning to the bottom. I recommended them very strongly both in the Royal Engineering Department and the Company's service—I recommended them to be sent round to all the ports wherever there were rocks to be blown under water—to Portsmouth, Devonport, and Gibraltar.

The hon. and gallant Colonel then proceeded to detail the former mode adopted, and also to speak to the specifications on which he was cross-examined at some length by the learned Serjeant for the purpose of showing that the wording of the specifications as to the other materials that might be employed in lieu of the gunpowder— was not clear and intelligible as the law required it. His evidence tended to support the specification.

The Learned Sergeant took an objection to the specifications, which being overruled the case for the plaintiff was now closed.

Mr. Sergeant BOMPAS addressed the jury for the defendant. — This case had already occupied a considerable portion of the time of the jury, and would for some hours longer, but he hoped that the jury would give him credit for not having unnecessarily occupied their time by long cross-examinations of the witnesses. If his leaned friend had felt it necessary to call so many witnesses, he (the learned Sergeant) had not increased the infliction by cross-examining them. His friend opened this case by telling them that it was not uncommon, when a party took out a valuable patent, that some persons anxious to share the profit, came in and questioned their right to the patent, for the purpose of depriving the patentee

of the profits, to which by his skill and ingenuity he was entitled. That was one side of the case. He admitted that the right of the patentee was not unfrequently attacked. There are other cases also, in which patentees are called to prove their right, and that was when patents were taken out, not by the inventor, but

by those who have got hold of the invention of another party, and are holding a monopoly of that to which by law and justice they were not entitled. He admitted that those who were really the inventors of any useful instrument, were entitled to a full monopoly of the profits, so long as the term of the patent held, but at the same time he had no hesitation in saying, that the man who was not the inventor, but who from circumstances, lays hold of an invention, and gets the profits which ought to belong to another—that person had no right to protection—and the real question which the jury would have to decide between these two parties was—was Mr. Bickford the inventor of this instrument? He knew that in many instances patents were called in question, where juries ought to decide against the patentee. He knew that a man brought an action for the protection of his patent, when it was actually proved that the plaintiff in the case he was alluding to, actually saw the thing in the window of the defendant, and went and took out a patent for it before the other had perfected his invention. That surely was a case in which the patentee did not deserve protection. There were two sides to a question in all these cases, and the question which they would have to decide was—did this invention belong to the plaintiff? His learned friend had occupied a considerable time in endeavouring to prove that the fuse was a good deal better than the old rush. He admitted it, and could not understand why he had spent so much time in proving that which he (the learned Sergeant) had admitted from the outset, and confirmed by his cross-examination. The value of the invention was not in issue—it was not upon the record, and if he had attempted to show that it was not worth a farthing it would not be available, for that was not in issue. But why had he done this? because he would get the feeling of the jury in behalf of the valuable inventor of so valuable an instrument, which had saved the lives of half the people in Cornwall. But the question which the jury must keep in mind was not the value of the invention, but was he really the inventor? The fact that it had got widely into use since Mr. Bickford's name had been attached to the fuse was no proof that he was the inventor, for he had taken the most effective steps to get it noticed in the quarter where a favourable notice would ensure success. In the hands of a person less skilled in getting it noticed, it might have lingered for years without being generally adopted; for they had it in evidence that although the safety fuse was as cheap as the rush, yet there were miners in Dolcoath who would still stick to rush; for men accustomed to danger all their lives were never driven by accidents into caution, as was evident to every observer of persons following dangerous avocations. Mr. Bickford, however, took the earliest means of getting it into notice: his patent was obtained in September, and by the beginning of March he had applied to the government, who referred it to Col. Pasley, when meeting with his approval, he sent it round to all the ports of the kingdom—to Devonport, to Portsmouth, to Gibraltar. Hence it was at once known. But supposing it had been the invention of some poor miner, among his fellow miners it might have remained hidden for years. Setting aside the value of the invention, it would be his duty to direct their attention to the circumstances under which he asked their judgment in favour of his client and upon the ground that the person from whom the plaintiff claimed was not the inventor of the fuse. He would not go through the witnesses which he should call in detail, but would rather call their attention to them in classes. He would not attempt to show that anything analogous to it had been in use in Cornwall. How slowly a useful thing got into general use would be admitted by all who had observed mankind, and

had been proved by the witnesses in the case, many who, though practical miners, had only known the fuse about five years; and if the fuse had not been aided by the strong recommendation of Col. Pasley, and its introduction by the mine agents, it would have been years hence before it would have got into general use. The law did not require that the instrument should be generally known to set aside the patent; but it must be publicly known. If a person makes a thing in his own room, and never tells a human being of it, and if another person makes the same thing, and takes out a patent for it—it is no bar to his right that the other had done it without making it known—it is no answer to the man who took out the patent, that some one knew it before—that is sound sense. But it, on the other hand, a person makes a discovery public to all around if he makes no secret of it—uses it himself though very little, that is quite evidence enough to set aside the patent. The learned sergeant then proceeded at some length to detail the kind of evidence which he should lay before the jury. He should prove that about the year 1830 a poor Irishman was down in the mining districts of Cornwall, making and selling a safety fuse, having all the properties and characteristics of Bickford's paten safety fuse; that it was made of the same materials, and that he sold the secret, being very poor, to Mr. Bickford, who was a porter merchant, for twenty shillings. He should bring respectable evidence to prove that the Irishman's fuses were tried in every way, and underwent all the tests to which the patent fuse was submitted—that it was in every respect the same, and therefore that the verdict must be for the defendant, if this evidence were substantiated.

[Several witnesses were called to prove the existence of a similar invention, prior to the appearance of Bickford's, having been hawked about Cornwall by a poor Irishman. We have only space for a few. The Court adjourned at seven till Tuesday.]

TUESDAY. —The Court sat at eight o'clock.

Stephen Litcher, a miner, on being called required that his expenses should be paid. Mr. Serjeant BOMPAS assured him that he should be paid his expenses, but he hesitated and hung fire. The Learned JUDGE assured him that he should be paid—he then assented to it, saying, with a patronizing & confiding air—thank you sir, I will take your word for it— (a laugh) He was examined respecting the fuse of the Irishman, which he had brought to him eleven years ago. It was made of hemp and band—there was a bandage over it, and then it was bound with twine, and pitched over with tar or pitch— "trade'' that would stick to our hands very much. I handled several pieces of it. I saw it put in the vice. They had some pieces like a trace about the breadth of his finger—there was tin or lead about it. I carried it down the mine and put it into a hole, but it was so limp that it would not stand. I put a rod of quills by the side of it and set fire to both. I had never seen anything like the round thing in mining before that. Lately we use the safety. All the difference I have seen between the safety of the Irishman and that of Bickford's, is that Bickford's has some flour or white stuff about it. But I don't know any difference between them. *Cross-examined*—I had never seen the

Irishman before that I know of, and I don't think I have seen him since. Twelve months ago, Mr. Skewes came and asked me about it, and about three or four days after that I went to be examined. I did not try the round one—because it was not our fancy to do it. I will swear that there were three or four took down in the shop, but I will not swear that any one took Dare down into the mine. From

the time that I saw them with the Irishman, I did not see them again till three or four years afterwards. Never heard that it was Bickford's till one or two years ago when I was examined on it. The Irishman's rod was about as thick as your pen—it might be a little more. I'll tell you what was said by the other party— but this was stopped.
By the COURT. —The flat one had a thin floating of lead or tin at the outside of the hemp and trade. It was put there to keep out the wet.
William Trengrove—I am a miner. I worked in Poldice Mine about ten or eleven years ago. I saw a man who called himself an Irishman—he had a rod, paper outside, then tin or lead, and powder inside. You could not call it flat or round. I saw him afterwards with a round one, which was just like that we are using now. It was turned in the mine in the presence of a man who went his way afterwards, and I went mine.
Cross-examined—It was in 1829. I will swear to that. I cannot tell the particular time I cannot tell anything that happened. [After considerable hesitation] -—I was not married then. I have been married & at Gwennap church. What was the woman's name— [after much hesitation]— "Prudence, [hesitation] "Bray," she lived at Gwennap. This marriage was in 1828. How do you know it was 28— [very quickly] —29. Was it the May month? —the spring time. Where did you go to after you were married— (great laughter). What time of year—who was present at the marriage— [no answer]. Have you got a son or daughter— [no answer].
The JUDGE—You must know that answer. I have a son—seven years of age.
[Examination resumed.]—It was something about Christmas, I was married. Skewes spoke to me about it, a year and four months ago. I cannot read, I cannot write. I swore to something, and signed to it. I have a brother of the name of John—he did not work with me at that time. I saw the rod tried, it "smiddered" away powder through the pitch and tar—Richard Bennett was with me at the time, my comrade, when it was burned. There were several men about, but I have not seen him a long time.
John Mitchell, of Redruth—I am a smith; I have lived there as long as I can mind. In 1830, I saw a man with some rods or fuses in my brother's shop—he was an engineer, I was foreman there; I recollect the Irishman bringing a safety fuse, it was like Bickford's, one and the same thing as near as I could see; I could not tell what it was made of; I fitted up some iron work for him, just as he directed; I recollect his bringing a piece of fuse, and we screwed it up lengthwise in the vice, and set fire to it: it burned right through—he said that was to prove that it would go through any hard substance; I screwed the vice up; I saw him come into the shop with a boy whom he called his son; he had some of these fuses in a basket, they were like those I had seen before. [A question as to whether he had applied to witness to have them sold, was not put, the Court deciding that it was not evidence.]—Cross- examined—I have not seen him since he came with the basket; I have been examined in Chancery—I cannot say how long it was before that, I was asked about the Irishman; I never saw anything more.
By the COURT—The Irishman looked like a man nearly broke down—he had a white hat on— (a laugh). The work we did for him was about seven inches high, with a flange at the bottom of it; I cannot tell what he paid for it, nor where he lived; I recollect it was 1830, because I made a grate for Joe Bray, who kept a beer house—he asked me to go and fit him a kitchen range, and when I measured the chimney, he asked me to go up-stairs—I went up, there were

three rooms up-stairs, and in the middle room I saw some of these fuses and powder, on a board over the door—that was on the 17th of November, 1830, I know, because I booked it. The Irishman had been staying there.
John Jenkins, Tinman. I recollect seeing the Irishman with the safety fuses, some coiled, and some he had got straight. I had been used to making the tin tubes for firing in damp ground. I was called out of my shop by a neighbour of mine to see it. I made my living by the tin fuses, and I was very sorry to see it. I spoke to him about it. I saw them burn—they were like Bickford's. *cross-examined*. It was about 1829 or 30. He looked very poor and mean. Bickford's fuse has been in general use 6 or 7 years Bickford's fuse has taken away all my trade, but I have no ill feeling to the party. *By the* Court. I called him an Irishman on account of his dialect.
John Budge, a friend—was examined on his affirmation. I am the executor of the late Mr. Bickford—I have no agreement among my papers, between Mr. Bickford, and another person, regarding some safety fuses. *Cross-examined*—I am a Quaker—Nancarrow is not of our society. *Re-examined*—He is not secretary of any society, of which I am a member—by no means: he lives in the house of the Institution—his wife brushes out the rooms, and lights the fires, but he has nothing to do with it. It is an institution for literary purposes, in Camborne—Sir C. Lemon, and Mr. Pendarves, are patrons of it. There is a standing committee, but I am not a member—two of the plaintiffs are members of it. *By the* Court—I never had any paper but the probate of the will.
Richard Bray—I am a brass-founder, living at Redruth; I knew Mr. W. Bickford; I saw old Mr. Bickford at the New Inn, in St. Day; I saw the landlord Mr. Treweek, who has been dead some three or four years; I saw a man also, who told me he was an Irishman; Bickford and the Irishman talked about a safety fuse, to be used by miners; and then Mr. Bickford fancied it from his statement, and said he would purchase it. There was some little altercation about the price; the Irishman wanted two pounds for it; Mr. Bickford said it was very heavy, for he was but a poor man, and would gladly give him one for it; he said it was too little, it was well worth trying, and he had made an improvement on the other; he showed it to me, and the persons present, and I examined it; Mr. Bickford purchased it, he gave 10s. as a deposit, and had an agreement; we returned to another room, in the same house, and Mr Bickford drew up an agreement in my presence, and I signed it—because there was to be a certain time in future, when it was to be proved; Mr. Bickford put his name to it; the Irishman could write very badly, and he put a cross to it; I forget the contents of it, but I was bound, I remember, to see it proved by the Irishman, to Mr. Bickford's satisfaction, before the remainder was paid. The only thing that I can recollect more, was, that he was to keep it a profound secret—not to teach anybody, or cause them to be taught; Mr. Bickford took the agreement; I was not present on the day that it was to be proved, having particular business to attend to; I saw him afterwards, and expressed a regret that I was not present, and asked him how he had got on with the Irishman—he said, very well; I hoped it was to his satisfaction—he said it was, and he had paid him the other ten shillings. When I first saw it, he asked me if I had ever seen anything of this kind before—I opened it and found it was hemp and twine, there was gunpowder in it—he said it was a fuse for blowing with. There was varnish outside. He said that was his last improvement, as it prevented the water getting at it. He explained how he made it, and told me that he would teach Bickford in about an hour to make

them as well as himself. He had a model he said that he was going to show Mr. Bickford that would make them perfectly. I have seen a great number of Bickford's fuses. I know no difference between them I and the Irishman's—I believe them to be exactly the same. *Cross- examined*—I am a master tradesman if you will allow the term—I have a man and a boy working for me. I have two shops, one at the house where I live, and the other opposite. I made a memorandum of the month that I was at St. Day with Mr. Bickford— "I put down August, 1830"—that is all because I knew the business that is the whole of the memorandum—it was in an account book—I cannot tell the reason for putting it down—it was a fancy —I had a reason at the time, but what it was I don't know, because it escaped my recollection. I cannot swear that it was not 3 years after. Skewes first spoke to me about the case just before he commenced the action. I did not find the memorandum in the book till lately—about a fortnight ago. I was not told to look into my book—but I had to look after some old accounts that I had, and then found it—It was "August, 1830," no other words. There is no other memorandum in the book—I am not in the habit' of making memorandums—I cannot tell what made me do it—I used to go to St. Day, perhaps once or twice a week, to buy pots—I should think we had been talking two hours before we went into the other room—I sat and smoked my pipe—I had a pint of beer, I might have had two pints. The Irishman put the cross to it himself—I did not think him a broken down gentleman, far from it, he was very meanly dressed—I did not write "witness'' but the word was there—I have always recollected that it was a pound that was given for it—I have said so to scores before ever Mr. Skewes had anything to do with it—It struck Mr. Bickford amazingly—he said this is the thing I have been trying to get at a long time—I made an impression on him—It was better than twelve months after that I heard of Mr Bickford's fuses. I have seen them from time to time ever since—I cannot say how many times I was sworn to this matter in the Court of Chancery—I was not present in the court —I think I have sworn to three or four affidavits—Cyrus Penrose lodged at my house, and showed me one of the fuses—soon after I heard of Bickford's patent—he was manager of a mine, and it was sent for him to try.—*Re-examined*—I could not distinguish any difference between the Irishman's fuse and the one sent for Penrose—I talked to him about it. I had business at St. Day to call me there with Mr. Harvey—it is a wholesale place where they sell things belonging to my trade.

Jane Phillips remembers a person called an Irishman—used to cook and wash for him, and help to make his safety fuse—bought four sorts of twine and tar for him, also gun powder—cannot name any shop where she used to buy either. He had only one shirt, and no money. Her evidence established the fact that he was poor enough to be a very great genius.

By the COURT—The owner of the house is alive—I know Joseph Bsay—he lived in the house after this Irishman left—he gave me something to keep for him till he came back, because he had not paid me—He said he should go and fetch his wife and family—the things were two cups and saucers, two milk jugs, and two plates—

I knew him for three months—I never heard his name the whole time—So far as I knew he had but one shirt. Mr. Blamey, the landlord of the house, is up here, but he did not come up with our party.

William Clements, a miner of Camborne, had bought the safety fuse of the Irishman before the patent ones appeared—had since had the patent fuse—

they were nearly the same as the Irishman's. —Cross-examined—I recollect that it was ten years ago from the place I worked in—We used no quills in trying it.

Geo. Nancarrow, A witness, whose name had run throughout the whole of the proceedings on the part of the plaintiff, in anticipation of some statements which he would make, was put into the box, and took the affirmation of a Quaker. Mr. Sergeant BOMPAS declined to put any questions to him, but asked the other side to examine him if they wished—who however, declined.

This closed the case for the defence

The Foreman of the Jury expressed a wish to return the verdict AT ONCE, AS THE JURY WERE QUITE SATISFIED.

The Learned JUDGE begged them to hear it out, for there were many points on both sides, which really required consideration. —These points were not obvious, and much was to be said, not whether it was a new invention, but as to whether it had been made public before.

Mr. ERLE then addressed the jury in reply. He should be very sorry to intrude upon their time—the two questions which they would have to decide was, whether or not Mr. Bickford was the first inventor, or whether this instrument was in public use before he took out his patent. Now for the early part of the case: — He had listened to his learned friend's opening, because he knew there would be this redoubtable would-be Quaker brought before them, and because, in anticipation of his appearance, he (the learned counsel) had, on the part of the plaintiff, called a great many witnesses, who had worked with him in various places in Pontypool, in Crowland, and in other mines, and had sworn that there was never any other process known but that of the needle and rush, the spire and the quill—he had called these witnesses on till his Lordship was tired of them. To the end of his case his learned friend had said all this has been tried before another Judge, and we come before an Exeter Jury to have their verdict upon the merits of the case. What the witnesses have sworn in the Court above they are ready to repeat here, and I will not flinch from calling Nancarrow before you. But when he (the learned Serjeant) had put Nancarrow before them, he had not ventured to ask him one word. He had therefore literally abandoned the question on which he first stood. The question (said his learned friend) was not whether Mr. Bickford was the first inventor, but was it not known before. The parties who were represented by Mr. Skewes in this action—for he was not the real defendant—but was set up by a party who wished dishonestly to get hold of the profits of this useful invention—and was now in prison for the interlocutory costs—these parties now said we do not stand upon this third plea, that it had I not been publicly used, but they stand on the second plea that Mr. Bickford was not the first inventor of this valuable invention. Contrast the two parties. Mr. Bickford appeared to be a substantial man—be had turned his attention to this subject according as he had sworn on oath.—in Sept. 1831, he swears that he is the first inventor of this important invention—on the following year the very skilful officer Col. Pasley, who had had his attention for fourteen years turned to this subject, and had been labouring to find some process that would answer the end, but without effect—had this question referred to him, and he pronounced it to be a highly useful invention that had long been sought for. Was it possible that the discovery of a safety fuse could have existed without his knowledge? It was not. He had his attention constantly directed to military mining and the teaching of military miners—and here where there was the

greatest skill, talent, and experience, it was; impossible that there could have been ignorance of the existence; of an instrument for which the military and civil engineer had both been looking with so much anxiety. He had shown that there was no knowledge of the existence of the instrument in this quarter—he had called before them practical men engaged in the operations of mining, working miners whose business called them below ground to peril their lives on their daily avocations, and mine agents who had the superintendence of their operations, and neither the one nor the other had ever heard a word of the safety fuse till Bickford's invention had been brought out six or seven years ago. And yet they wanted to rob him of the credit and give it to this unknown Irishman, whose poverty he would not willingly sport with, but who was selling some fuses composed of paper and lead, which did not answer, and left the country in a state of wretched poverty. But who was this Irishman—he might have been King of one of the provinces of Ireland, but driven forth by our tyranny, his golden crown displaced for the white hat which one of the witnesses cited as a proof that he had not a genteel appearance, and who so far from being a man of any marked abilities was not even able to his own name. After commenting on the evidence and contrasting the various points in his own keen penetrating style, the learned gentleman concluded by saying after the intimation which they had given him, he was ashamed to have occupied the time of the Jury, fully satisfied that he should have their verdict without.

The Learned Judge summed up with much perspicuity and conciseness, drawing out the various points of evidence in strong contrast, and with extraordinary clearness. His Lordship said he had thought it right not to stop the case, because he thought it was of the utmost importance to both parties that the Jury should hear it throughout. He did not mean to say that they had not taken a right view of it. But great expenses had been already incurred, and nothing was more likely to increase these expenses than by summarily stopping a case before it was gone through—which would be very strong ground for the Court above sending it to another Jury—if they had reason to conclude that the jury had taken a hasty view of it, or decided upon the testimony of a particular set of witnesses. His lordship did not mean to say that they had taken a wrong view of it, but he wished it to be manifest before they decided, that they had fully considered the whole of the case. Much had been said on one side and the other, and unless they watched the operations of their minds, it would be impossible to escape prejudice. It was for the persons who represented the plaintiff, to represent how common it was, and how very hard that those who had the merit of discovering some useful invention, should be robbed of the reward which the law gave them, of a monopoly for a certain period of the profits of an invention—a reward to which they were fully entitled, for without the exercise of their ingenuity and labour, society would never have had the benefit of the article for which the patent was granted. On the other hand, it is contended that here is a person having no merits of his own, but who avails himself of the talent of an ingenious mechanic—who has no title to the merit of the discovery, and is a monopolist in attempting to get the reward. That in opposing the pretensions of such a person, they would be standing between the public and a monopolist. The jury were to assume who was original inventor. If they assumed that Bickford was the inventor then all that his counsel had argued was perfectly true. If they assumed that Bickford was not the inventor, then that was assuming the whole of the case for the defendant. Now the plaintiff had certainly made out

a strong primafacie case, and the principal part to decide was the consideration of these pleas upon the issue. He would state the pleas because it was not enough to give a verdict generally—they must give an answer upon each question. His Lordship then went through the pleas and specification, laying down the law in the latter case. In doing this he adverted to the evidence of Col. Pasley whose testimony was the highest authority that could be got on the subject of the combustible materials specified. That gallant officer had spoken only of the general principles of the science not having, as he said, turned his attention to that particular branch. But this mode of expression was an illustration of the modest way in which great men frequently expressed themselves, when in fact the world knew that they were possessed of the fullest knowledge just as Lord Eldon would have declined to speak on a point of common law before the Judges, whilst in fact he would probably have decided it better than any man on the Bench. His Lordship having taken the evidence of the gallant Colonel as conclusive for the correctness of that part of the specifications to which he spoke, then took the other portion of the evidence—his observations on which we have not space to give. He had no doubt that there was such a person as the “Irishman,” but as to his connection with the invention, he left that for the Jury
The Jury immediately found a verdict for plaintiff on all the issues.
The trial lasted nearly two days.

The London Journal Of Arts, Sciences And Manufacturers And Repertory Of Patent Inventions. Conducted By Mr. W. Newton, Of The Office For Patents, Chancery Lane. (Assisted by several Scientific Gentlemen.) VOL. XXIX. (Conjoined Series.) London: 1846.

To JOHN SOLOMON BICKFORD, GEORGE SMITH, and THOMAS DAVEY, all of Tuckingmill, Camborne, in the county of Cornwall, for certain improvements in manufacturing the miner's safety fuse. — [Sealed 6th November, 1845.]
THIS invention consists in certain improvements in the manufacture of the safety fuse, for igniting charges of gunpowder when blasting rocks, &c., for which a patent was granted to William Bickford, September 6, 1831. The fuse consists of
a cylinder of gunpowder, in the centre of a rope composed generally of eight, ten, or twelve threads or yarns carefully twisted (in the manner of twine-spinning or cord-making), so as to enclose the gunpowder; the rope is defended by a covering of strong twine, wound on nearly at right angles to the “lay” of the yarns composing the rope (which process is termed “countering”); and the whole is afterwards coated or
varnished over. The laying of the yarns is performed by a machine described in the specification of the above-mentioned patent, and called a “monkey;” but only a single fuse can be spun by it at one time. Now, the first part of this invention consists in a novel construction of machine for spinning three or more fuses at the same time.
In Plate XIV., fig. 1, is a plan view, fig. 2, an end view, and fig. 3, a vertical section of a monkey for spinning three fuses at the same time. This machine travels along a table or bench, between two ledges; on the side of one ledge a rack is fixed, having 24 teeth in each foot of its length; and the wheel *a*, of 12

teeth, working therein, is thus caused to rotate when the machine is drawn onwards. The wheel *a*, drives a wheel *b*, having a like number of teeth; on the spindle of the latter wheel, at its upper end, is a crown-wheel *c*, with 52 teeth on its under edge, working into a pinion *d*, of 8 teeth, on the spindle *e*; at the outer end of which spindle there is a cog-wheel *f*, with 18 teeth, working into three wheels *g, h, i,* of the same size and number of teeth. On
the centres of the wheels *g, h, i*, are wires and crooks *j, j, j*, to which the yarns are attached; and as the monkey travels along the bench, the yarns are spun into fuses by the rotation of the wires *j, j, j*. If the cog-wheel *f*, is placed in such a position that a larger number of wheels may gear into it, and such additions are made as will be obviously necessary, four, five, or more fuses, may be spun at one operation.
When the improved monkey is used, the collars and funnels through which the yarns and gunpowder pass, are arranged in the manner represented at figs. 4, and 5; fig. 4, being an elevation, and fig. 5, a plan view. The collars *k, k, k*, are cast in one united piece of brass-work, which is fixed to an upright frame by the screws *l, l*; the centre holes *m, m,* (fig. 5,) receive the gunpowder funnels *o, o*; and through the holes *n, n*, the yarns *p, p*, pass, meeting below, and enclosing the gunpowder as the fuse is spun, *q, q, q*, are the three fuses issuing from the apparatus. The methods
of supplying yarns and gunpowder to each collar, and the other general arrangements for spinning the fuses, are the same as those described in the specification of the above named patent.
The second improvement consists in introducing into the centre of the fuse a strong thread or yarn, smaller and less fibrous than the yarns used for making the fuse. The
thread employed for this purpose is that known as No. 135 white-brown thread; it is supplied from a reel, and passing down through the gunpowder in the funnel, is spun into the centre of the fuse by being attached to the monkey with the other yarns; —the central threads are shewn at *r, r, r,* in fig. 4. By the introduction of the central thread, the gun powder in the lower part of the funnel is constantly kept in motion, and travels on with the thread, so as to flow regularly down into the fuse; and thus, the continuity and regularity of the cylinder of gunpowder is ensured.
The third improvement relates to the coating or varnishing of those fuses which are intended for blasting in dry ground, and in close or confined situations, where considerable variations in temperature are experienced. The coating of tar or resin, heretofore applied, burns with much smoke and heat, and is affected by changes of temperature; therefore, in order to avoid these inconveniences, the patentees propose to use a composition formed by dissolving 4 lbs. of the best glue, and 2 lbs. of yellow soap, in 12 gallons of water, by a gentle heat, and then adding 56 lbs. of whiting to give it a body. The fourth improvement relates to fuses to be used under
water. In manufacturing these, it has been usual to add a second “countering,” and then to coat or varnish them a second time; but fuses, prepared in this manner, have occasionally failed, in consequence of the varnish becoming hard and brittle on immersion in water, and cracking, and thus admitting the water to the gunpowder. The improved mode of preparing the fuses is as follows: —After the fuse has been coated or varnished with tar or resin, and before the coating becomes hard, the fuse is fastened to “crooks,” and made to revolve as if for

countering, as described in the former specification, -and a strip of brown paper is wound around the fuse, in a helical form, so as to completely cover it. A thread is wound upon the paper, in order to fix it and prevent shifting; and then a coat of tar or resin is applied to the paper: the fuse is thus rendered perfectly waterproof. The patentees claim, Firstly, –the improvement in manufacturing fuses by the use and application of suitable arrangements and apparatus, whereby three or more fuses may be spun at the same time, as above described. Secondly, –the improvement in manufacturing fuses by the introduction of a central thread, spun in with the gunpowder. Thirdly, –the improvement in manufacturing fuses by covering such as are to be used in close or warm places, and not under water, with a non-inflammable coating or varnish. Fourthly, –the improvement in manufacturing such fuses as are to be used in or under water, by the application of a second countering of paper and a second coating of tar or resin varnish. - [Inrolled in the Inrolment Office, May, 1846.]

ROYAL EXHIBITION FIRST CLASS PRIZE MEDAL,

AWARDED TO

BICKFORD, SMITH & DAVEY,

For their Original Patent

SAFETY FUZE,

FOR CONVEYING FIRE TO THE CHARGE

IN BLASTING ROCKS.

NO OTHER PRIZE MEDAL WAS AWARDED FOR THE MANUFACTURE OF SAFETY FUZE.

MANUFACTURED BY GREATLY IMPROVED MACHINERY

AND PROTECTED BY A SECOND PATENT.

BICKFORD, SMITH & DAVEY,

Beg to inform Merchants, Mine Agents, Railway Contractors, and all persons engaged in Blasting Operations, that, for the purpose of Protecting the Public in the use of a Genuine Article, the PATENT SAFETY FUZE, *has now a thread wrought into its centre*, which, being Patent Right, infallibly *distinguishes it from all Imitations*, and ensures the continuity of the Gunpowder.

This Fuze has for many Years been Patronized by Her Majesty's Board of Ordnance, and is used by all the Public Works at Home and Abroad. It can be manufactured of any length and size, and adapted to any climate.

ADDRESS—BICKFORD, SMITH & DAVEY,

TUCKINGMILL, CORNWALL.

1852

Family
John Bickford married Susanna Evans, 6th October 1757, at Ashcombe, Devon.
(died 1811) and Susanna Evans (died 1810), their son William **Bickford,** baptised 23rd January 1774, at Ashburton, Devon.
William Bickford became a currier and leather merchant at Illogan
William Bickford married Susanna Burrall 10th April 1802, at Illogan, Cornwall.
Children of William and Susanna Bickford:
1. Susanna baptised 26th March 1803, at Liskard, Wesleyan
2. Elizabeth Burrall born 10th Dec 1805, bap 23rd Jan 1826, at Truro, Wesleyan.
3. John Solomon born 9th March 1804, baptised 9th April 1804, at Launceston, Wesleyan,
4. William born 6th November 1807, baptised 25th January 1808, buried 29th March 1808, at St Marys, Truro
5. William born 29th June 1809, baptised 1st November 1809, died 2nd November 1811

Susanna Bickford was buried 16th July 1823, at Tucking Mill, Illogan, aged 41
William Bickford died 2nd October 1834, at Tucking Mill, Illogan, aged 60, buried 7th October 1834,

William Bickford

2. **Elizabeth Burrall** married George Smith, carpenter, 31st Oct 1826, at Camborne
George Smith son of William Smith, carpenter and small farmer, and his wife Phillipa Moneypenny.
In 1841, at Chapel Street, Camborne, **George Smith**, merchant, aged 40, his wife Elizabeth 35, children, Susan 11, Eliza 9, Emily 5, and Charles 2.
In 1851, at Trevu, Camborne, George Smith, safety fuse manufacturer &c., aged 50, his wife Elizabeth 45, children, William B, merchant in safety fuse manufacturer, aged 23, Susan B 21, Eliza 19, Mary Emily 15, Charles B 11, George John 5, and Henry Arthur 3.
In 1861, at Trevu House, Camborne, George Smith, Justice of the Peace for the county, manufacturer of safety fuse, aged 60, his wife Elizabeth 55, children, Susan 31, Mary Emily 25, George John 15, and Henry Arthur 13.

Probate 18th September 1868, The Will of George Smith late of Trevu in the Parish of Camborne in the County of Cornwall Safety Fuze Manufacturer LL.D. deceased who died 30 August 1868 at Trevu aforesaid was proved at Bodmin by the oaths of William Bickford Smith of Camborne aforesaid Safety Fuze Manufacturer and George John Smith of Camborne aforesaid Safety Fuze Manufacturer the Sons the Executors.
Effects under £50,000. Re-sworn Nov. 1869, Under £35,000

In 1871, at Trevu, Elizabeth B Smith, widow, aged 65, son Henry A, Flax merchant, aged 23, and grandson Charles W Boots aged 10.
In 1881, at Trevu House, Camborne, Elizabeth B Smith, widow, aged 75.

Probate 7th May 1886, The will with a codicil of Elizabeth Burrall Smith, late of Trevu in the parish of Camborne in the county of Cornwall, widow, who died 4th March 1886 at Trevu was proved at the Principal Registry by George John Smith Esquire the son and John Rule Daniell, solicitor both of Trevu the executors. Personal Estate £8,810 19s 8d.

3. **John Solomon Bickford**, schoolmaster, of Phillack, married Sarah Davey, 26th March 1833, at Camborne.
In 1841, at Tuckingmill, Illogan, Sarah Bickford, married, aged 30, and daughter Susan aged 7.
In 1851, at Tuckingmill, Camborne, John S Bickford, safety fuse manufacturer employing 25 persons, his wife Sarah 41, children, Susan 16, and John 15.
Sarah Bickford, died 3rd January 1861, aged 51, at Tuckingmill.

In 1861, at Penlu, Tuckingmill, John S Bickford, widower, manufacturer of safety fuse employing 11 men and 66 women, aged 57, and daughter Susan, aged 27
John S Bickford married Julia Vivian 26 July 1866

John Solomon Bickford died 17/18th February 1870, aged 66 years.

Probated 11th March 1870. Letters of Administration of the Personal estate and effects of John Solomon Bickford late of Tuckingmill in the Parish of Camborne in the County of Cornwall Gentleman deceased who died 17 February 1870 at Tuckingmill aforesaid were granted at Bodmin to Julia Bickford of Tuckingmill aforesaid Widow the Relict of the said Deceased she having been first sworn. Effects under £100,000

In 1871, at St Hilary, Penzance, Julia Bickford, widow, aged 43, son John S Bickford, 11 months, sister, Frances M Vivian, aged 31, and visitors, John Vivian, widower, general practitioner, aged 74, Hugh P Vivian, merchant, agent foundry, aged 36, Clara E Vivian 32, and Ethel M Vivian 3.
In 1881, at Basset Road, Camborne, Julia Bickford, widow, aged 53, son John S V aged 10, and sister Francis M Vivian aged 41.
